JUMBLE — THAT SCRAMBLED WORD GAME

by Henri Arnold and Bob Lee

Unscramble these four Jumbles, one letter to each square, to form four ordinary words.

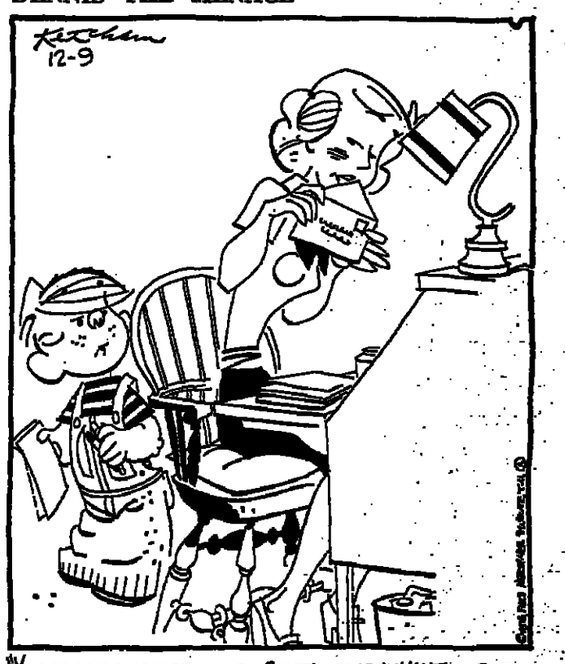
OXPRY

BANIC

LIEDEY

DYLGOO

Now arrange the circled letters to form the surprise answer, as suggested by the above cartoon.



Answer here: IN A ○○○○○○

(Answers tomorrow)

Saturday's Jumbles: YOUTH SANDY TALLOW VERSUS
Answer: A fine waste of the carpenter's work— SAWDUST

BOOKS

NORMAN THOMAS

The Last Idealist

By W. A. Swanberg. Scribner's. Illustrated. 528 pp. $14.9

Reviewed by Richard R. Lingeman

IF Diogenes went around with a lantern looking for an honest man, Norman Thomas carried a spotlight at the ready to shine on whatever was the injustice of the moment. In a life of 84 incredibly crowded, busy, do-gooding years, he found a lot of dark corners in America, although the Socialist party to which he devoted his life did little directly about any of them. He was an evangelical reformer, but his most effective opponent was reform. Franklin D. Roosevelt did in the Socialists more than any Wall Street plutocrats—more even than the party's own internal schisms, says W.A. Swanberg, the author of this biography.

Swanberg calls his subject "the last idealist"; last or not, idealist he certainly was, in the old American grain, believing in Progress and Abundance. A preacher's boy from Marion, Ohio, he grew up to be a Socialist preacher in a slum parish who was married to a rich wife, and evolved into a preaching Socialist. If his later Marxism was less than scriptural, his earlier Presbyterianism was not strictly according to Calvin. Thomas embraced the Social Gospel early on, and that quickly took him, after his graduation from Princeton and ordainment, away from a cushy pastorate at Manhattan's Red Brick Church to the slums of East Harlem.

After a rough stint of pacifism during World War I, his disillusionment with religion's capacity to alleviate the social injustices he saw about him me to a head and he dropped the Gospel part, kept the Social and added an ism. From then on it was preaching Socialism—a life of talk, talk, lectures, writing and, of course, running for president, which he did six times. During the 1944 election, a GI who didn't know him asked him whom he was voting for. Thomas replied that he was voting for himself, which pulled the GI up short until Mr. Thomas explained that he was the Socialist candidate for the presidency. The GI thought that over a moment, then said, "Well if you weren't running, who would you vote for?"

That was symbolic of Thomas's campaigns: People wanted his advice but they never wanted him. Many of the Socialist measures he advocated were adopted by the mainstream parties and, as Swanberg says, his chief role was that of an educator and popul ser—as well as gadfly.

His causes came serially and bunches—Eugene Debs, Ameri Indians kicked off their land, kansas sharecroppers (for w he bore physical witness at siderable danger to hims Japanese-Americans in W War II (while the American Liberties Union remained sile Yet much of his time was s helping out indigent old Social fighting a radical's deportati even his neighborhood gr who, driven out of business the supermarkets, took to w ing libelous letters to execut He kept an eye on the spar as well as the hawks.

A biography of such a risks the obvious peril of ha graphy, on the one hand, or chological or ideological re tionism on the other. I think owe Swanberg some sort of —at least the price of his bo for the seemingly artless, strai forward way he has given Thomas's life. There is a tr parent candor and fair-min objectivity in his book, fre any trick camera angles or t psychological crosscurrents dark eddies. He has writte quietly passionate biography manages to make a good plausible without sanctifying —and Thomas was far fro saint, even an agnostic one.

Not that Swanberg is inno of partisanship, but in wr about a life that was embro in so many sectarian disputes can perhaps be forgiven if he not always fully expound cause of a Thomas opponent, as the "Old Guard" Social Most readers will care little a those dusty internecine strug and I feel that, in general out Swanberg's portrait of Mr. Th as's leadership of the Socia is very fair and certainly not critical. Here, after all, wa man who is titular head party that in 1912 had 10 members and by 1942 was d to 3,000.

Nor does Swanberg deal deeply with Thomas's thought that is not a vital matter Thomas was a nondoctrin pragmatic Socialist of whom observer said, "Any Rotarian understand him," and whom English Socialist sized up a typical Social Democrat of Centre."

Surveying the multifa causes of Thomas's career in h sight one might venture tha was most often wrong—and was not often wrong—when was most embroiled in sects disputes invoking a polemics ideological reaction. When built-in injustice detector homed in on real, immed human suffering, he was sple and invaluable.

Richard Lingeman is a reviewer for The New Times.

BRIDGE — By Alan Truscott

Opening bids of three clubs or three diamonds are not common, but when they do occur the responder may face some tricky problems. If he has a strong hand with a singleton in partner's suit he has a delicate choice between three no-trump, in which dummy's long suit may be unusable, and a minor-suit game in which there may be three losers.

The solidity of the opener's suit is a key factor, and although he virtually denies a solid suit he could have anything from A-K-x-x-x-x to J-x-x-x-x-x-x-x. A convention to solve this rare problem was suggested a decade ago by an expert. He would probably be surprised to learn that two players with long memories used his idea recently and is shown in the diagram.

The three-heart response to three diamonds conventionally asked South to describe the quality of his diamonds, and the rebid showed a suit that included the ace or king, but not an A-K or A-Q combination. With the latter holdings, the rebid would have been three no-trump, and with a weaker suit four clubs or four diamonds, depending on the length of the suit.

North decided against three no-trump, and temporised with four clubs. South's hand was better than it might have been to the extent of the two red queens, so he tried five diamonds.

West led the heart jack, and South won in dummy and led diamond jack. It would not h helped West to hold up. He c to win, and South had no tru in drawing the remaining tru and disposing of his pote club loser.

In the post-mortem, it bec clear that a club lead would defeated the contract, for can later manage a club ruf spade lead and a club would not have helped bec South would dispose of two c from his hand before pla trumps.

In the replay, North pl three no-trump and was defe when East led the spade se West held up his diamond and the declarer had no wa come close to nine tricks. How er, it is far from clear that diamonds was a better cont than three no-trump.

Baseball Czar to Propose A's Shift to National League, Move to Washington

Bowie Kuhn lobbying

By Nancy Scannel

LOS ANGELES, Dec. 8 (WP).—Baseball commissioner Bowie Kuhn said yesterday that he will introduce a plan to have the Oakland A's shift from the American to the National League and move to Washington.

Working behind the scenes with some allied club owners, Kuhn said he would make his unprecedented proposal to a joint meeting of the leagues. A vote may be held tomorrow.

Meanwhile, The Washington Post learned that the staff of the House Select Committee on Professional Sports will recommend Friday that the committee vote to recommend Congress remove baseball's anti-trust immunity.

The committee, formed to inquire into the relationship between the law and professional sports, has been leaning in that direction. A vote is scheduled Friday morning, but no action is expected until the next congressional session.

A committee source said there is a possibility that the panel might reject the staff's recommendation if it appears that baseball really is ready to give Washington a team "instead of asking for more time to work things out."

But the source said the committee may still vote to recommend lifting baseball's immunity regardless of Washington's status.

At the same time that the commissioner was lobbying for his proposal, Charles Finley, the A's owner, told the Associated Press he had never heard of the plan and shrugged it off as a joke.

But, according to some owners, Finley has been involved in the discussions and there have been suggestions that approval of the plan is contingent on his dropping a lawsuit against Kuhn and the major leagues.

The suit, scheduled to go to trial in Chicago Monday, was filed after Kuhn nullified Finley's $3.5-million sale of three Oakland players to the Boston Red Sox and New York Yankees in June.

Kuhn said at the time that the sale was not in the best interest of baseball, claiming it threatened to destroy balance between the affluent and poorer clubs.

Finley's attempted sale of Vida Blue, Joe Rudi and Rollie Fingers was also viewed as a move that would further strip the once-dominant three-time World Series champs. It also increased speculation that Finley wanted to get out of baseball.

The A's and their NL neighbor, the San Francisco Giants just across the bay, have been losing money and attendance consistently, in part because of their competition for fans—universally regarded as an unhealthy situation for baseball.

The thinking among some club executives here is that Finley, who has been in poor health recently, would sell the club rather than retain ownership if it were moved to Washington.

Some NL clubs reportedly might not go along with the proposal unless Finley agrees to drop his suit. "I would say there is a likelihood, a probability, a possibility that he'd drop it," said Dan O'Brien of the Texas Rangers.

Oakland Contract

Others, who asked not to be identified, raised questions about whether the two leagues would have to help Finley but the A's contract with Oakland Coliseum, which runs until 1983.

There is an irony in that the plan, if approved, would put long-time adversaries Kuhn and Finley in a position of helping each other out of some vexing problems.

Kuhn would not comment on how his proposal was being greeted, but the idea appeared to have a fair amount of support among the owners, particularly in the AL.

Since the plan would create two 13-club leagues, there would be some need for limited inter-league play—which the AL has sought and the NL has fought.

But because the plan would resolve the San Francisco-Oakland problem and fulfill Kuhn's promise to return baseball to Washington—without having to go to expansion—there is some growing support in the NL.

NL president Charles (Club) Feeney said he could not predict how the league might vote but suspected it would require unanimous approval of the 12 clubs.

Since there is also a move under way in the NL to change the unanimous-consent rule for making changes in the league constitution, a fight over this procedural matter could doom Kuhn's plan.

Taken by Surprise

In the AL, a three-quarters vote of approval would be required. AL president Lee MacPhail could not be reached for comment.

Probably taken most by surprise by the plan was Jerold Hoffberger, owner of the AL's Baltimore Orioles, who learned of the proposal through the news media. Hoffberger would have veto right over another AL club coming into Washington—thus, Kuhn's plan calls for the A's to switch to the NL.

"I'll tell you what else they're recommending," Hoffberger said. "They're recommending that I become captain of the Graf Zeppelin, that aircraft that couldn't fly and crashed some decades ago. It would make as much sense.

"This thing is utterly ridiculous."

HL Capitals Learning ow to Use Advantage

NDOVER Md., Dec. 8 (UPI). ely, penalties to Washington tals' opponents have been ed with moans from the hockey fans.

e reason is that the caps to get into more trouble they cause when they own man advantage. They have up nine goals and scored eight on the power play. those moans turned to last night as the Capitals ded on three power-play unities in beating the Van- Canucks, 4-3.

don't know what the differ- in our power play is," said Charron, who scored the sec- power-play goal and made the nalist on the final score, Ace ey's game winner. "We work- the puck around well, and I k that was the key. Any- you get good movement, e going to succeed."

ach Tom McVie also had no on for the Capitals' sudden wealth of man-advantage goals.

"I didn't see anything that different out there," McVie said. "We've moved the puck well at times before, but the penalty killers had been doing a good job. Tonight the shots just went in."

Capitals' rookie Rick Green opened the power-play parade with a 45-foot slapshot that gave Washington a 1-0 lead. Vancouver's Boby Lalonde tied the game later in the first period and Washington's Rick Bragnalo and the Canucks' Gary Monahan traded second-period goals before Charon banged in another power-play marker with 48 seconds left in the period.

The goal was Charron's 18th of the year and his 4th in as many games.

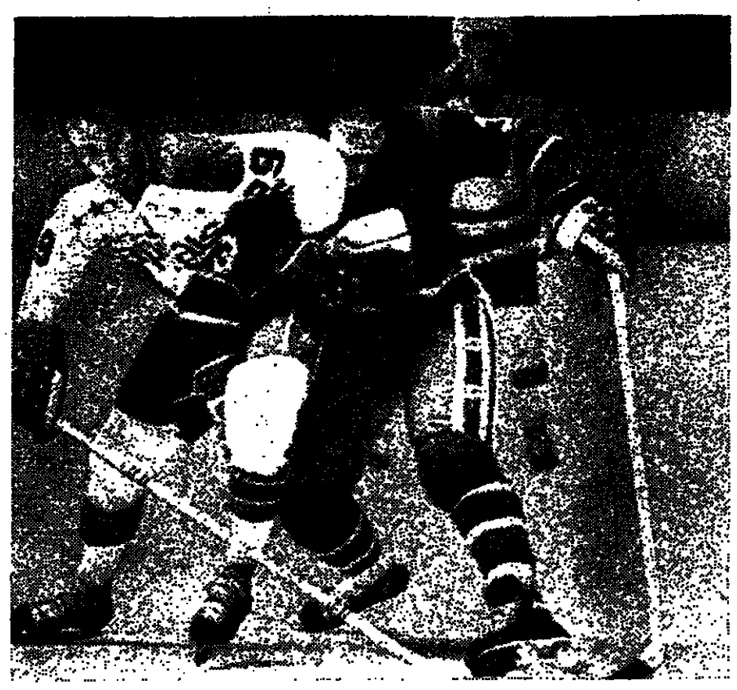
The game appeared destined for a tie as Monahan scored again early in the third period but Bailey neatly converted Charron's pass from behind the net for the evening's third power-play goal and the Caps' eighth triumph of the season against 15 losses and 4 ties.

Penguins 6, North Stars 2

At Pittsburgh, center Ron Schock scored two goals to lead the Penguins to a 6-2 victory over Minnesota.

Schock, who failed to score since the opening game of the season, broke a 25-game goalless draw with two goals, 37 seconds apart, midway through the third period. Both goals were set up by passes from linemates Mike Corrigan and Rick Kehoe.

Corrigan had given Pittsburgh a 4-1 lead with his sixth goal of the season at 4:49 of the third period. Kehoe also assisted on Corrigan's goal.



Rookie Blair Chapman and Wayne Bianchin opened the scoring in the first period, as the Penguins jumped to a 2-0 lead. Dean Talafous and Bill Hogaboam scored for the North Stars, while Jean Pronovost rounded out Pittsburgh's scoring.

Islanders 3, Blues 2

At Uniondale, N.Y., Clark Gillies and J.P. Parise scored goals less than three apart early in the third period to give the New York Islanders a 3-2 victory over St. Louis.

Gillies tied the game, 2-2, when he batted in a Bob Bourne rebound at 1:30 of the period and Parise scored the game-winner on the rebound of a Jean Potvin shot with five seconds left on a hooking penalty against the Blues' Garry Unger.

Bob Nystrom closed the scoring with 3:07 left in the game with his team-high 13th goal of the season as the Islanders' increased their first-place lead in the Patrick Division to five points over the idle Philadelphia Flyers.

Baseball Appears Healthy

Free-Agent Draft Defies Pessimists

By Murray Chass

NEW YORK, Dec. 8 (NYT).—Four weeks and about $21 million after the historic free-agent draft, where does baseball stand? Well, for one thing, it does stand, which puts the sport in a healthier position than its doomsday prophets had predicted. Some owners, of course, continue to warn that the structure of the game will crumble under the weight of the dollars that suddenly are flowing into the players' pockets, but don't try to convince George Steinbrenner, Gene Autry or Ray Kroc of that dire forecast.

These aggressive, heavy spenders own, respectively, the New York Yankees, the California Angels and the San Diego Padres—three of the nine clubs that signed the 14 high-quality players in the first class of free agents under the new rules. Two lesser players—Steve Stone and Eric Solderholm—have also signed, leaving nine free agents available.

Six of the players who remain at large were selected by a varying number of clubs in the negotiation-rights draft Nov. 4—Richie Hebner, Tito Fuentes, Tim Nordbrook, Billy Smith and Paul Dade, all infielders, and Royle Stillman, an outfielder. Then there are Dick Allen, Willie McCovey and Nate Colbert, who were not selected by anyone and therefore are free to sign with any team.

Reggie Jackson was the last of the 14 stars to sign with a new team, which wasn't surprising. Jackson has a flair for the dramatic. It just wouldn't have seemed in keeping with his character for him to sign somewhere in the middle of the pack.

"I did it my way," Jackson explained. "There were certain things I wanted to do, certain things I wanted to hear, certain things I wanted to sort out in my mind. I wanted to step back and get perspective."

If one looks at the free-agent situation from an overall perspective, certain conclusions can be drawn, certain realities can be discerned from the revolutionary process that baseball has experienced the last four weeks.

For one thing, there was the relative aggressiveness of the teams in competing for the top-caliber, top-money free agents. The teams can be classified in these categories:

• Successful in signing the 14 stars: California (three), Yankees (two), San Diego (two), Texas (two), Montreal (one), Cleveland (one), Milwaukee (one), Atlanta (one) and Boston (one).

• Aggressively, although unsuccessfully, competitive: Pittsburgh, Chicago White Sox, San Francisco and Los Angeles (the Dodgers sought only Don Gullett).

• Fairly competitive: Kansas City, Philadelphia and Baltimore.

• Mildly, although not realistically, competitive: Mets, St. Louis and Detroit.

• Sat it out: Oakland, Minnesota, Houston, Chicago Cubs and Cincinnati (the Reds drafted no one).

Some footnote should be added. Of the teams that signed one star, Montreal was the most aggressive in trying to snare a second, making a huge offer to Jackson and an outstanding one to Gary Matthews, while Boston and Atlanta didn't truly compete for a second. The Red Sox did not even go after Bobby Grich, who could have solved the second-base problem.

The Dodgers probably could have signed Jackson but never offered serious competition.

The White Sox tried valiantly for certain players but couldn't match some of the higher bidders and had to settle for two lesser free agents. Pittsburgh aggressively sought Sal Bando and Rollie Fingers, and even offered Bando more money than he took in signing with Milwaukee. San Francisco also went all out, and came close on Fingers and Joe Rudi.

Baltimore made efforts to retain its three stars—Jackson, Grich and Wayne Garland—but didn't really seek anyone else's stars.

NBA Cavs Even Road Record With Sharpshooting Victory

OAKLAND, Calif., Dec. 8 (UPI).—The Golden State Warriors hardly needed the home edge last night in dispatching the Cleveland Cavaliers. The revived Warriors sank 55 per cent of their field-goal shots in coasting to a 120-104 NBA victory, their fifth straight.

For Golden State, it was a matter of sharpshooting by forward Rick Barry (37 points), guard Charles Johnson (22), slick ball handling, running and hard work.

"There's really no secret to it," said Johnson, who came off the bench to eclipse his previous season high of 21 points. "Shooting well is just a lot of hard work. Cleveland has been holding a lot of people under 100 points by controling the tempo, but we didn't let them do it tonight."

The loss evened the Cavaliers' road record at 7-7—they are 16-7 overall.

Warrior coach Al Attles explained before the contest why he thought road records around the league might improve:

"I'm amazed like everyone else about the exceptionally high percentages of home teams this year. Support from fans gets home teams going. But in modern arenas teams don't practice at home often enough to have the kind of advantage a college team may have at home.

"It's early yet. Things may even out. Last year we were good on the road. This year for a while I thought we'd never win away from home."

The Warriors, 2-8 on the road, improved their overall mark to 12-10 with a performance reminiscent of their run for the NBA title two seasons ago and the best regular season record of the 1975-76 campaign.

"The big thing is that we're running as well as we ever have," said Barry. "If we could only sustain ourselves and do it more often it would be remarkable."

Barry scored 14 points in the first quarter, 10 in the second, made all 13 foul shots and had 8 assists.

The Cavaliers, who seemed unable to keep up with the Golden State running game, were paced by Campy Russell with 24 points and Bobby Smith and Austin Carr, with 16 apiece.

Jazz 110, Sonics 98

At New Orleans, Aaron James hit 18 straight point at the end of the third quarter to lead the Jazz to a 110-98 victory over Seattle.

James, who led all scorers with a career-high 36 points, had a team-record 12 consecutive field goals in the third and fourth quarters as the Jazz pulled away. James's surge brought New Orleans from a 58-58 tie with 9:50 left in the third period to a 76-68 lead at the end of the quarter.

Bulls 89, Lakers 81

At Chicago, Mickey Johnson and Artis Gilmore each scored 23 points to lead the Bulls to a come-from-behind 89-81 victory over Los Angeles.

The Lakers scored the last eight points in the third quarter to build a 70-63 lead. But Chicago came back to outscore the Lakers, 11-1, in the first four minutes of the final quarter to take a 74-71 lead. Norm Van Lier sparked the Bulls in the final quarter when he got 10 of his 12 points.

Pacers 107, Braves 103

At Buffalo, Dave Robisch hit four free throws in the last 13 seconds to ruin a 42-point, 29-rebound performance by Buffalo's troubled superstar, Bob McAdoo, and carry Indiana to a 107-103 victory over the Braves.

Robisch's left-handed tosses from the 15-foot line came after McAdoo four times pushed Buffalo ahead in the closing minutes of the game.

But McAdoo, gunning in a personal season high point total as well as a team record in rebounding, missed two free throws with 24 seconds remaining that would have put Buffalo on top.

For the 6-10 center-forward, who is having a contract dispute with Braves co-owner Paul Snyder, it may have been his last game in a Buffalo uniform. Snyder said he expects to resolve soon the question of whether McAdoo stays or is traded to the New York Knicks.

Blazers 111, Knicks 94

At New York, Maurice Lucas scored 22 points, Lionel Hollins added 20 and Portland took advantage of poor New York shooting as the Trail Blazers defeated the Knicks, 111-94.

The victory was the fifth straight and the first in Madison Square Garden for the Pacific Division leaders.

Portland opened an 81-61 lead by outscoring the Knicks 36-21 in the third quarter. Lucas scored 9 and Bill Walton 8 in the quarter, which included an 11-0 Portland burst near the end of the period.

Nuggets 122, Bucks 115

At Denver, guard David Thompson scored a game-high 27 points and Dan Issel added 24 as the Nuggets defeated struggling Milwaukee, 122-115.

Thompson scored 17 of his points in the first half as Denver, leader of the Midwest Division with a 16-7 mark, jumped to a lead of 63-54.

High scorer for the Bucks, who have lost 15 straight games on the road, was Junior Bridgeman with 22 points.

Skiing Postponement Causes Grumbling After Race Begins

By Bernard Kirsch

VAL D'ISERE, France, Dec. 8 (UPI).—The fastest today were saddest and the slowest smiled as three officials and mother nature delayed the opening of the World Cup ski season.

The grumbling on the mountains began when the women's downhill was canceled after it had started. The verdict to have a do-over tomorrow was made by a jury consisting of an American, a West German and a Swiss. They blamed fickle winds for the decision, and pointed to "irregular and unusual times." Their women had finished well behind a pair of unknown Austrians; an Iranian was third, a Briton broke the top 10; all very weird in a sport which has few upsets.

The Briton who went well, Valentina Iliffe, said: "They had no right to cancel the race," she said that skiers from the top countries did not get the results they had expected and that's why the decision was made.

It was the first time that a World Cup race had been called off after it had started. Events are canceled because of dangerous racing conditions; that was not the case today. The winds and the new snow made the course slower. Austrians Elfi Deufl and Brigitte Habersatter managed to handle it, finishing first and second, and after their initial disappointment also managed to hang on to their humor. Deufl, 19 and a comer on the team, said, "*There were cross winds and side winds. But I like sailing. I have a catamaran.*"

Another Chance

Given a reprieve were Annemarie Proell-Moser of Austria and American Cindy Nelson. Proell, now svelte rather than thickly muscular, finished 5 seconds behind her countrywoman in her return to the World Cup circuit which she once dominated. She sat out last year.

Nelson, the American Olympic bronze medalist in this event, finished 9 seconds off the leader. She was the ninth skier to start, and the American on the race jury, women's coach John Bowerman, said the decision for cancellation was made after 10 skiers had raced. But communications in the Alps were slow moving and 20 more skiers took their turns before the decision was passed along.

Before Nelson heard of it, she had called today's race "ridiculous." She said that wind and snow had almost erased the course and officials had to set down pine boughs as markers.

35 Seconds Behind

"There's one race like this every year," said Nelson, who referred to a catastrophe last year in Austria when she finished 35 seconds behind the winner and the result held.

"I just hope there are no more like this one."

There will be another chance for the bizarre to occur when the women try the giant slalom. At first, both the downhill and giant slalom were set for tomorrow, but one of the week's many protests again changed the schedule—an Italian coach saying that two races in one day would be too much for the women, who, after today's race was canceled, went off to do their jogging, play soccer, train, train.

The wind and falling snow was no bother. Said an American sage:

"Maybe the trouble with skiing is that it's held outdoors."

Who's In, Who's Out

WASHINGTON—The big game in Washington these days is who is "in" and who is "out" in the Carter administration. It seems to change every day and it's giving lobbyists and other power seekers conniptions.

At lunch the other day I overheard four people talking at the next table and it went like this:

Buchwald

"I hear if you want to get to Carter you have to see Rhett Butler."

"No, he's been cut for two weeks. If you want to get anything done you have to talk to Charley Winkler." "Carter doesn't talk to Kinkler anymore."

"Why not?"

"Winkler had a fight with Hamilton Jordan and Jordan axed him with Carter. If you want to get anything done you have to get to Phil Stromberg in Atlanta."

* * *

"Forget Stromberg. He canceled a luncheon date with Jody Powell, and Powell is putting out the word that Stromberg can't even get a motel room in Americus, Ga. The only one Carter listens to now is Henry Kleinberg of the Savannah Coca-Cola bottling plant."

"That was Thursday. Kleinberg is no longer in the inner circle because he didn't show up for Sunday school in Plains last weekend."

"Well, if it isn't Kleinberg, who is it?"

"I hear the guy with all the clout is Horace Bromide, a banker from Pecksville. He was in the Peace Corps with Miss Lillian."

"Don't waste your time on Bromide. Carter hasn't taken a telephone call from him in a month."

"Where did you hear that?"

"From Sarah Collins, Russell Halliburton's secretary. Halliburton is the only person Carter listens to these days."

"I thought Halliburton blew it the day before the election when he lost Carter's luggage in Shreveport."

"But he's back again because Billy Carter put in a good word for him."

"I heard Billy Carter was out."

"When did you hear that?"

"He overcharged Jimmy for a lube job at his gas station and Jimmy said that was the last straw."

* * *

"Well, if Billy Carter is out, who is in?"

"Amy Carter's still in but the Secret Service has orders to keep everyone away from her."

"What a mess. We have a new administration coming in and nobody knows who to talk to."

If you want a job, the guy to see is Jack Watson."

"Watson's out because he got Jerry Rafshoon mad at him."

"Then Rafshoon must be in."

"Not necessarily. Charley Kirbo gave Rafshoon the cold shoulder at National Airport last week. I hear Cy Vance is in. He slept in Carter's house overnight in Plains. Carter wouldn't let him sleep in the house if he didn't trust him. He may trust him as secretary of state but not enough to play softball with him."

"Clark Knopf is in."

"Who told you?"

"Clark did."

"Then he's out. Anyone who tells you he's in with Carter is automatically out."

* * *

"What about Terence O'Hara? He's been advising Carter on economic affairs."

"He was until he told the President-elect he had to wear tails at his inauguration. O'Hara hasn't been to Plains since."

The headwaiter delivered a phone to the table.

One of the men took the call. "Are you sure?" he said. "You're positive? You'll stake your life on it? Thank you."

He turned to the others. "I just got the word. Walter Cronkite is in."

"Then that means Barbara Walters is out?"

"It looks that way."

"I'll have to cancel my lunch with her tomorrow."

Neolithic Painting Found

MOSCOW, Dec. 8 (UPI).—Soviet archaeologists have found a fragment of a Neolithic wall painting 8,000 years old, according to the weekly Nedelya magazine. The painting, a deer-hunting scene, was unearthed in Tsedzhidepe, a town in the central Asian republic of Turkmenia.

One of the Few Remaining Rail Barons in the U.S.

By Charles Hillinger

CUCAMONGA, Calif.—Redfield (Tad) Finlay jr., is a private rail car baron.

He owns and operates one of the largest fleets of private rail cars in the United States, leasing them for $250 to $500 a day to corporations, film companies and individuals and puttin together his own tours.

"Ever since my wife, Bets, and I were first married we dreamed about owning our own private rail cars," explains the 56 year-old North Hollywood man. "We started our collection 20 years ago. Our daughter Ann, now 25, grew up in a lower berth."

His seven rail cars were originally built as prestige coaches for railroad presidents. Now, they are parked on a special siding in Cucamonga—a stretch of track on 3 1/2 acres owned by Finlay.

At the end of the track is a maintenance shop where railroad tradesmen—electricians, plumbers, pipefitters—service the plush cars. Seven members of the Brotherhood of Sleeping Car Porters are employees.

One of them, Virgil Smock, 60, a sleeping-car porter since his teens, has worked for Finlay since the day he purchased his first private rail car, La Marguerita de Oro, in 1956.

The luxury cars are run throughout the United States, Canada and Mexico, pulled by regular passenger trains or by all-Finlay coach specials.

One of Finlay's cars is the Elihu C. Redfield Lounge Car, named after his great-grandfather, who died in 1917 after spending his life as an engineer for the Missouri Pacific Railroad. "I think my love for rail cars stems from my lifelong fascination with my great-grandfather, who died before I was born," Finlay says.

The Line That Shattered a U.S.-Soviet Production

By David K. Shipler

MOSCOW, (NYT)—Last June, after a U.S. production team finished filming a documentary on the Kirov Ballet's renowned school in Leningrad, an ebullient reception was held at a Moscow hotel—all champagne and brotherly love.

The Russians told the Americans what nice, cooperative, friendly people they were, and the Americans gave the Russians their deepest thanks for the freedom and ease with which they had been able to work.

Amid the free-flowing superlatives, Earle Mack, a New York financier who had backed the film, said he hoped it would be just the first in a series on Soviet ballet. Some of the Russians said they hoped so, too.

But with the film edited and the narration written, the Soviet-American good cheer has gone tumbling down in a heap of mutual misperceptions.

The fundamental differences between the two societies became manifest over a single line in the script, sweeping away a layer of illusion that arose because each side had assumed that its intellectual and political perspectives had been accepted by the other.

The disputed line was a reference to three prominent dancers who trained at the Kirov school—the Vaganova Institute of Choreography—and who defected to the West: Rudolf Nureyev, Natalya Makarova and Mikhail Baryshnikov.

The Soviet State Committee for Television and Broadcasting demanded that the three names be deleted from the script, according to Ted Landreth, a consultant to the producer.

When the Americans refused, he said, the committee withdrew its endorsement of the film, canceled a scheduled premiere in Moscow and even balked at accepting a $15,000 fee that Mack had contracted to pay for filming rights.

The documentary will still be distributed in the West, but without being labeled a joint production.

From an American viewpoint the reference was innocent enough, and absolutely essential to the integrity of the film. It supported the inescapable fact, as the camera focused on a gallery of photographs of leading graduates, that some pictures were missing. The names were mentioned. To ignore them, Landreth said, "in terms of our principles would have been something of a fraud."

Officials from the state committee and the Ministry of Culture had seemed delighted when they saw the cut film without narration, Landreth said.

A copy of the script had been provided. Only at the final meal, after a December date for the premiere had been set, Landreth related, "just at the point where we were about to jump up from our dinner and embrace, a young guy I thought was just a translator said that this line would have to be taken out, whereupon we all sat down and talked again for two hours."

The Russians must have realized that any U.S. documentary on the school would have to mention the defecting dancers, Landreth said, adding: "I suppose I was somewhat naive to think that they had addressed themselves to it months ago. They have been at this eight months. I just thought they must have reviewed the subject."

In any event, the Soviet objections will have no effect on the documentary, Mr. Landreth said. Princess Grace of Monaco has been asked to narrate the English-language version. Two prints, minus narration, will be delivered to the Russians, as previously agreed, so they can provide their own narration.

PEOPLE: *Word From Hawaii: No Kingship for Amin*

Hawaii is to be spared Idi Amin. It seems that the petition "signed by 175 Hawaiians" who wanted the Uganda leader to lead them to "freedom" was not a petition but a phone call. A group of University of Hawaii Law School students were having a party, the way Don Dzura tells it. "We had been laughing about this article we'd read in which he said he was prepared to be king of Scotland. Somebody said 'What the hell, if he's good enough for Scotland, he's good enough for Hawaii.'" The group telephoned Entebbe and made the proposal to one of Amin's aides. The next morning Amin himself called back reaching Dzura's roommate, who had not been in on the prank: "We had a leisurely five or six-minute conversation in which I denied any offer for kingship," said the roommate, who refused to be identified. He did say, however, that Amin was very interested in becoming king of Hawaii and seemed more than willing to go there to take over.

Actress Sarah Churchill has been accused by a Chicago publishing firm of breach of contract for keeping a $15,000 advance for an autobiography that remains to be written. The suit against the late Winston Churchill's daughter was filed this week in Chicago. Harvey Plotnick, president of Regnery, said that Miss Churchill was to have written the book with Charles Hamblett, who died two weeks after the contract was signed in March, 1975. Hamblett's death voided the contract. Plotnick said, adding that a chapter Miss Churchill wrote herself and later submitted to the publishing house was "atrocious". Plotnick added that Miss Churchill refused to return the advance, saying that she had already spent it.

The tunic worn by Napoleon at Waterloo has ended up in the home of his battlefield enemy, the Duke of Wellington. The present and eighth duke bought the tunic for $36,300 at an auction in Monte Carlo. He plans to put the tunic on exhibition at Stratfield Saye, the house given by the British government to the earlier Wellington. Napoleon started out on the morning of June 18, 1815, wearing the tunic, but rain made him change his clothes. The tunic was found in his coach when he abandoned it and fled on horseback after defeat by Wellington and Prussian commander, Prince Vahlstatt Blücher. The belonged for many years Blücher's family.

Sabotage Cuts Flow Of Water To Lisbon

By Marvine Howe

LISBON, Dec. 9 (NYT).—A powerful bomb explosion early today slashed Lisbon's water supplies and heightened tension only three days before crucial municipal elections.

A series of bombings, election campaign incidents and widespread resistance to official reforms appear aimed at discrediting the minority Socialist government at election time.

Premier Mario Soares's government has reacted firmly, putting security forces on the alert, closing down university faculties, suspending farm credits and warning Communist-dominated farmworkers that it will use "all means" to enforce the law.

Nevertheless, these measures have not put an end to the agitation and are expected to cost the Socialists dearly in votes.

Vote of Confidence

Mr. Soares has made it clear that he sees Sunday's election as a vote of confidence in his four-month-old government. If the Socialist party receives substantially less than the 35-per-cent majority it got in last April's legislative election, Mr. Soares reportedly would seriously consider presenting his government's resignation.

The recent wave of bombing attacks, which has caused no victims, is generally believed to be pressure from the extreme right for a more authoritarian government.

Lisbon's main water line was sabotaged early this morning at the village of Povoa de Santa Iria, causing considerable damage and cutting the capital's regular water supply by 90 per cent. The authorities broadcast an appeal to the public to use water only for "indispensable needs."

On Monday, four bombs exploded on Lisbon's suburban railroad lines to Estoril and Sintra and a train was derailed.

Dull Campaign

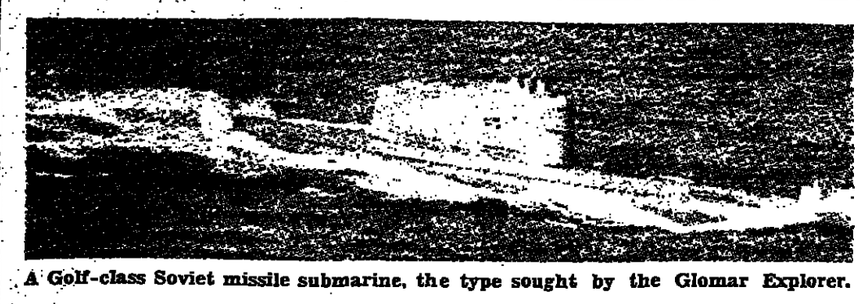
Political violence broke out yesterday as the rather dull election campaign neared its end. Communists and extreme leftists backed two Socialist rallies and a conservative gathering. In the northern industrial center of Setubal, radicals unsuccessfully tried to disrupt a meeting presided over by Mr. Soares.

In the university town of Coimbra, a group of about 300 students walked out of a Socialist rally, in protest against the main speaker, Education Minister Mario Sottomayor Cardia. Later, the police broke up a demonstration by the students who accused the Socialist minister of "fascist policies."

In the resort town of Costa de Caparica, south of Lisbon, demonstrators protested against a rally by the main conservative party, the Social Democratic Center. The party's security guard reportedly fired shots at the demonstrators and there were clashes, in which several persons slightly wounded.

Angry Reaction

Public opinion has reacted angrily to increasing violence and accuses the Socialist government of failing to take strong measures. The most difficult situation, however, remains in the southern Alentejo district, where Communist and extreme leftist farmworkers appear to be headed for open confrontation with the government.



The revolutionary Popular Democratic Union has called on Lisbon's industrial workers to go to the Alentejo Saturday and demonstrate their solidarity with the resident farmworkers. The rally is planned for the Lobata farm, where farmworkers are resisting the government's attempts to restore illegally occupied lands to their owner.

The Minister of Agriculture Antonio Barreto announced last night that eight Alentejo farms are currently besieged or illegally occupied by farmworkers and said that they must be evacuated immediately." He warned that the government would use force if necessary to uphold the law.

South African Editor Wins Appeal in Court

GRAHAMSTOWN, South Africa, Dec. 9 (Reuters).—The South African Supreme Court today upheld the appeal of a newspaper editor against his conviction and six-month jail sentence for refusing to name a source of information.

Donald Woods, editor of an East London newspaper, had refused to identify an informant alleged to have seen a security policeman near the offices of a black welfare organization before it was burglarized.

A Golf-class Soviet missile submarine, the type sought by the Glomar Explorer.

How CIA Sub Salvage Failed

By Seymour M. Hersh

Setback Is Laid To the Misuse Of Giant Claw

NEW YORK, Dec. 9 (NYT).—The CIA's attempt in July, 1974, to salvage a Soviet submarine failed when an error in judgment resulted in damage to prongs on a huge claw that was to have retrieved the submarine from a depth of three miles, according to two former members of the project.

Wayne Collier, of Houston, who was in charge of recruitment on the project for the CIA, and his brother Billy, who served as a cutting-torch handler, said that at least two prongs of the claw were severely bent back as CIA technicians tried to grab the 328-foot Soviet submarine on the ocean floor 750 miles north of Hawaii, where it had sunk in 1968. The claw was unable to fully support the vessel as it was being lifted and the vessel broke into two large pieces, the brothers said.

The front section, less than one-third of the submarine, was brought to the surface, according to high-level intelligence officials.

The CIA, which spent four years building a computer-run submarine rescue ship, the Glomar Explorer, was forced to cancel a second attempt to recover the main section of the vessel after newspaper publicity about the operation early last year. The Glomar Explorer was built under elaborate cover and was considered—under the code names Azorian, Jennifer and Matador—to be one of the government's highest-held secrets.

In a series of interviews, the Collier brothers provided a detailed account of the operation's basic failure—the inability to retrieve all of the submarine, including the code room and three nuclear-tipped missiles—which was independently verified by The New York Times in interviews with another crew member and high government officials with first-hand knowledge of the operation.

The Collier brothers' description of the unsuccessful mission is at variance with published reports, including one in Time magazine alleging that the CIA operation did recover all of the

Stalled Rhodesia Conference To Adjourn

GENEVA, Dec. 9 (UPI).—The Rhodesia conference began to dissolve today, after seven weeks of stalemate, with adjournment set for next week but the start of a second phase envisaged for early in the new year.

Conference officials said adjournment was almost certain by the end of next week but that the conference would be reconvened for a second stage "fairly early" in January.

The British conference chairman, Ivor Richard, after a day of private bilateral meetings with the black and white delegation leaders, booked a flight to London to brief outgoing U.S. Secretary of State Henry Kissinger.

Rhodesian Prime Minister Ian Smith, who returned to the conference yesterday after a five-week absence, was not expected by officials to await Mr. Richard's return on Saturday or Sunday.

Bishop Abel Muzorewa, a black nationalist leader, was flying to the Rhodesian capital of Salisbury to hold a series of public meetings aimed at increasing support among the black majority.

Joshua Nkomo flew to London as well but to address a meeting of Quakers on Saturday. His aides did not rule out a meeting with Mr. Kissinger, who was going to the British capital from the NATO session in Brussels. Mr. Nkomo was to return Sunday for the final few days of the conference.

Smith, Richard Meet

The disintegration process followed a meeting this morning between Mr. Smith and Mr. Richard. Mr. Smith reiterated afterward that he remains firmly behind original British-U.S. plans—put forward by Mr. Kissinger in September—for a peaceful transition to black majority rule within two years but with the police and army remaining under white control during the interim period.

Mr. Smith said the adjournment is necessary for "reflection."

"But thereafter the conference will reconvene. I think of that you can be certain," he said.

Conference officials said the talks would likely resume in Geneva, where the cost as officially estimated by the British government is £30,000 ($50,100) a week, because no one has suggested another site acceptable to all sides.

The conference formally opened Oct. 28 and was supposed to have concluded with an agreement by Nov. 30.

There was an immediate monthlong deadlock, however, caused by Mr. Nkomo and his militant "Patriotic Front" partner Robert Mugabe demanding that Britain set a fixed and binding date for independence under majority rule before anything else could be discussed.

Mr. Richard finally broke that impasse by winning nationalist agreement to setting March 1, 1978, as the latest deadline for independence.

But once that problem was out of the way the conference ran into a deeper and continuing impasse on the structure of the proposed interim government. Mr. Nkomo and Mr. Mugabe demanded immediate transfer of all power to their liberation movement. Bishop Muzorewa demanded general elections to choose an interim prime minister.

All three nationalists, together with the fourth black delegation leader, the Rev. Ndabaningi Sithole, did however agree on the need for a British supervisory presence in Rhodesia during the transitional period.

Mr. Smith rejected this idea, saying a British presence would

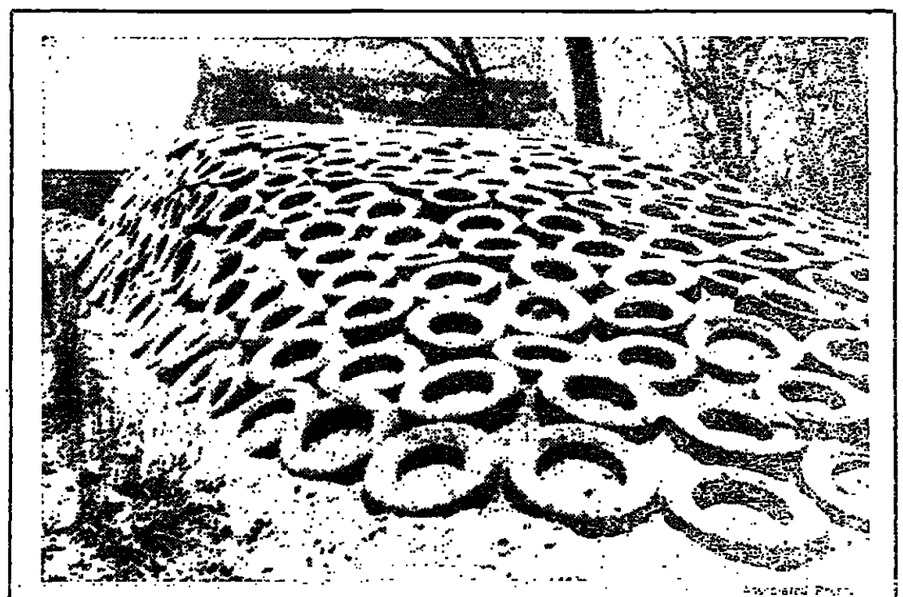
Kissinger Reads Message

Carter Reaffirms Pledge Of Stronger Tie to NATO

By James Goldsborough

BRUSSELS, Dec. 9 (IHT).—President-elect Jimmy Carter told the Western European allies today that "the American commitment to maintaining the NATO alliance shall be sustained and strengthened under my administration."

In a message to the NATO Council meeting read by Secretary of State Henry Kissinger, Mr. Carter stressed a theme that came out throughout his presidential campaign, that ties between the United States and the NATO allies needed to be strengthened.



In the short, three-paragraph statement today, he appeared to be dispelling fears, if there were any, that there would be drastic changes in U.S. policy toward Europe. He called it essential in order to "maintain a common strategy against common threats, that we have efficient and strong military forces and that we consult closely as we negotiate with others on both European and global issues."

The Carter message fit in with the main theme of this NATO meeting, which has been the growing military strength of the Soviet Union. Mr. Kissinger, British Foreign Secretary Anthony Crossland and West German Foreign Minister Hans Dietrich Genscher all commented on the subject.

There was no great difference between the tone of Mr. Kissinger's last message to the council today and Mr. Carter's first. Mr. Kissinger warned, however, as he has in other speeches this year, against overestimating Soviet strength. He told the council that the Russians have historically maintained large forces and that size is not all that matters.

In remarks reported later by U.S. delegation officials, Mr. Kissinger indirectly responded to criticism of him by Mr. Carter during the presidential campaign. He denied that he had been too accommodating to Moscow and

BLANKET OF TIRES—A farmer near Hamburg has recycled worn-out tires by using them to hold down covers on his harvest, thus curbing losses from weather.

Major Deflation Drive Not Foreseen

British Cabinet Devises Plan To Qualify for Big IMF Loan

LONDON, Dec. 9 (AP-DJ).—The Cabinet reached basic agreement today on the economic measures it will put into effect to meet the conditions of the International Monetary Fund for permitting Britain to use its remaining $3.9-billion credit.

A government spokesman said that Chancellor of the Exchequer Denis Healey would make a statement about the program to the House of Commons next Wednesday.

The agreement on the measures was reached at a 2 1/2-hour meeting of the Cabinet, the eighth session devoted to working out the details of the package. Some minor questions still have to be resolved, but they will not require approval by the Cabinet, a source said.

It was indicated after the meeting that the measures not only will satisfy the conditions for the IMF loan but also will prove acceptable to Parliament, which has opposed any suggestion of a major drive for deflation.

The government's negotiations with the IMF have lasted more than a month, far longer than had been expected, and speculation arose that the fund was calling for drastic slashes in the government's spending and a sharp reduction in its loan request.

However, the program that Mr. Healey will announce Wednesday is now expected to be far less deflationary than was forecast. In fact, Mr. Healey told Parliament at the end of last month that the IMF was not seeking a far-reaching deflationary program in conjunction with the loan and that any major measures would probably be phased in over several years to avoid a disruption of the British economy.

Government officials apparently have been successful in convincing the IMF that large cuts in public spending would ruin Britain's "social cohesion" and deal a harsh blow to the government's pact with the unions to restrain wage increases.

The two main conditions for the IMF loan—as well as for possible assistance in solving Britain's problem of sterling balances held abroad—are a reduction in the government budget deficit and specific targets for money-supply growth. It is thought that the reduction in public spending will be gradually introduced over the next two or three years in line with Mr. Healey's call for a national stabilization program to bring the economy into balance.

The government has said it plans to hold money-supply growth for the current fiscal year, which will end March 31, to 12 per cent. In his letter of intent to the IMF, Mr. Healey is expected to propose growth targets of no more than 12 per cent and possibly as low as 10 per cent for the next two fiscal years.

The Bank of England said today that it is repaying the $1.545 billion drawn on the $5.3-billion standby credit arranged in June.

A Bank of England spokesman also said that Italian authorities were repaying a $486-million short-term credit that Britain had advanced to Italy earlier this year.

Although the repayment of this credit by the Italians will not produce a major improvement in British reserves, officials here had requested repayment since it will improve Britain's liquidity.

Financing the Loan

TOKYO, Dec. 9 (Reuters).—The IMF's 10 leading members plan to meet in Paris before Christmas, probably Dec. 21, to decide on transferring funds to the IMF so it can lend the $3.9 billion to Britain, Finance Ministry officials said today.

Briton Tries Old Plan To Catch a Thief

BEDFORD, England, Dec. 9 (Reuters).—Lawbreakers here are to receive advertisements to join the police with their summonses.

The plan is the idea of Bedfordshire chief constable Anthony Armstrong, whose regional force is 50 members short. "Serious offenders cannot join the force," a police spokesman said. "But we feel that minor offenders will see the error of their ways and want to help prevent others from making the same mistakes."

UN Vote Asks Reopening of Mideast Talks

UNITED NATIONS, N.Y., Dec. 9 (UPI).—The General Assembly called today for resumption of the Geneva conference on the Middle East by next March, with the Palestine Liberation Organization participating.

The United States stood by Israel in opposing PLO participation and rejected a March deadline for the peace-seeking talks. Ambassador William Scranton explained that with President-elect Jimmy Carter's administration taking over in January, Washington does not consider it appropriate now to commit itself to such a move.

But sources close to the U.S. delegation said that to the best of their knowledge Mr. Scranton's negative vote on two Arab-backed resolutions was not checked out with Mr. Carter's transition team, which is arranging the take-over from President Ford's administration.

The Assembly's decision was reached after Israel withdrew a resolution— the first it had submitted in UN history—calling for an early resumption of the Geneva talks without PLO participation. This had been countered by an Arab-inspired amendment that would have called for a seat for the Palestinian organization.

The world body then approved, 122-2 with 3 abstentions, a resolution that originated with Egypt but was sponsored by nonaligned powers. It called on Secretary-General Kurt Waldheim to press his contacts with "all the parties" to the Middle East conflict and submit his findings to the Security Council not later than next March. It also called for reconvening the Geneva talks, under the co-chairmanship of the United States and the Soviet Union, by the end of March.

A second resolution, sponsored by nonaligned countries but originating with Syria, was approved 91-11, with 29 abstentions. It called for PLO participation in an early resumption of the Geneva talks and condemned Israel's continued occupation of Arab territories and its actions tending to change their character.

Until Carter Takes Office

North-South Parley Put Off to 1977

PARIS, Dec. 9 (AP).—The final ministerial meeting of the stalled North-South economic conference has been postponed from next Wednesday to some time in the first half of next year, the co-chairmen announced today.

Working groups meeting throughout this year have been unable to reach any agreement on how to set up a "new world economic order." Nineteen developing nations and eight industrialized countries represent their respective blocs at the conference.

Manuel Perez Guerrero of Venezuela, speaking for the group of 19, issued a statement in Paris and Caracas saying that his group accepted the suggested postponement because some industrialized countries could not currently take "political positions which will insure the success of the conference" and that "early next year the perspectives appear favorable."

The reference clearly was to the United States and the need for the new administration to be installed in January to study the complicated problems before negotiations can be resumed.

It also indicated a belief among the developing nations that they had received signals that the new administration might be more flexible toward their arguments.

The developing nations are demanding debt relief, indexing of raw materials prices to Western inflation rates and increased aid among other aspects of the "new world economic order."

It was clear in Paris in recent months that the failure to agree on any single clause of the many working papers meant there was no point in the foreign ministers meeting as scheduled.

In Ottawa, Canada's Allan MacEachan, the industrialized group's co-chairman, also announced the postponement of the foreign ministers' meeting. He said that he and Mr. Perez Guerrero would consult later on what further preparations might be made for the ministerial meeting and when it might be held.

Political Will

Mr. Perez Guerrero's statement said that the developing nations had not sought the postponement and hoped that when the meeting reconvened all the industrialized nations "will demonstrate the political will which has been lacking so far."

A critical conference of the Organization of Petroleum Exporting Countries is to be held in Qatar next Wednesday to consider increasing the price of oil.

OPEC had considered postponing this conference until Dec. 20 to see if any progress would be made at the Paris meeting and, Western sources said, to put extra pressure on the Paris negotiators. But when it became clear that the Paris meeting could not usefully be held, the Dec. 15 date for the OPEC meeting was confirmed.

Some authorities fear that a major price increase by OPEC this month would severely hurt any chance of the North-South conference achieving any success.

They add that developing countries would be hesitant about making real concessions to the industrialized world when the gains would be eaten up by higher energy prices.

Iran Aide Says Disclosure Of U.S. Cable Hurts Talks

By William Branigin

TEHRAN, Dec. 9 (WP).—Revelation of a secret U.S. State Department cable has "torpedoed" efforts by industrialized and developing countries to reach agreement on oil prices and other issues, according to Iranian Minister of State Mohammed Yeganeh.

The chief Iranian delegate to the North-South conference in Paris said in an interview yesterday that the telegram, which was leaked last week in the Netherlands, showed U.S. bad faith at the negotiations, revealing that it never intended to seriously consider Third World demands.

[Dutch newspapers last week published parts of the State Department cable sent to Dutch Foreign Minister Max van der Stoel, who represents the European Common Market at the Conference on International Economic Cooperation (CIEC). On Saturday, the Times of London reported that the Netherlands Press Association had checked the cable's authenticity with the U.S. Embassy in The Hague.

[A State Department spokesman said in Washington he had no information on the reported cable, pending a check with other officials.]

Section Quoted

The cable, explaining why the United States does not want to make concessions to the less developed countries (LDCs) at the North-South talks, said in part: "We have been relatively successful in CIEC in intensifying LDC restraints on OPEC. A strategy linking the two [CIEC and the Organization of Petroleum Exporting Countries] would negate these gains and confirm the ef-

Opportunity to Fight in Rhodesia Attracts U.S. Vietnam Veterans

By Robin Wright

SALISBURY, Rhodesia, Dec. 9 (WP).—They have come from all corners of the United States but they have two things in common: they are all Vietnam veterans and they have all come to Rhodesia looking for another war.

They are the Americans in the Rhodesian Army, now known among locals as "the other American connection," who have become an increasingly important factor in Rhodesia's campaign against the rapidly escalating four-year-old guerrilla war.

They are estimated to number about 400, with army officers reporting that inquiries and applications are increasing daily.

The troubled southern African territory does not have enough white manpower to lead black troops in the anti-guerrilla campaign. All white, colored (mixed-race) and Asian men between 18 and 38 have already been drafted. Blacks may volunteer for military service but are not subject to the draft.

So the army has increasingly turned to recruiting what it calls "foreign volunteers"—and others call mercenaries—to help hold off guerrillas now penetrating deep into all four corners of the country from bases in neighboring Mozambique and Zambia.

There are an estimated 1,000 foreigners in the Rhodesian Army and police, from Germany, Canada, Greece, the Netherlands, Australia, Portugal, France, New Zealand, Britain and Sweden. There is even one from Sri Lanka.

Perhaps the most important members are the Americans, well-trained U.S. veterans from Vietnam with experience in guerrilla warfare and with what chief army recruiting officer Maj. Nick Lamprecht describes as "an enthusiasm about fighting Communism—they don't want to see a repeat of what happened in Vietnam."

Most of the Americans have joined up in the last eight months, according to a major from Texas. They have come despite an escalation in the war, despite the U.S. law that threatens any American serving in a foreign army with loss of citizenship, and despite a recent warning from the State Department that all Americans should leave Rhodesia because the U.S. government cannot offer protection.

The motives vary. "I came to Rhodesia six months ago because I believe our policy toward Rhodesia is all wrong," explained a 30-year-old captain from Alabama who described himself as a "Disraeli conservative."

"This country is important to us and one of the few friends we have in Africa," he said, "yet we are doing everything possible to ruin it."

Not all foreign volunteers claim to have ideological motives.

Some admit they came out for "adventure in the sun," as U.S. magazines such as Soldier of Fortune advertise the Rhodesian Army. Others say they came back from Vietnam and could not get jobs, could not adjust to a peaceful environment or were simply restless.

Maj. Lamprecht said his office does no advertising outside Rhodesia and provides information only on request. He acknowledged however that "independent operators" have capitalized on the recruiting program, placing ads guaranteeing details for a sum anywhere between $5 and $20 when the same brochure and forms are available free on request.

Mercenary Status Denied

Maj. Lamprecht denies that the foreigners are mercenaries.

Most of the Americans agree, pointing to the poor pay scale—roughly $4,000 a year for privates, $6,400 for sergeants and $7,600 for lieutenants.

An American officer in the Rhodesian forces said he received about half of what he was paid as an officer in the U.S. Army.

All recruits have to go through basic training, whatever their experience or previous training. Friends who came over together are not allowed to serve in the same unit.

Yet the Americans here have to be concerned about the same possible consequences as a mercenary—the legal options against them on return to the United States. So far no American serving in the Rhodesian Army or police has been prosecuted by the U.S. government.

But two U.S. soldiers here said that within the last month they have been refused passport renewals at U.S. offices in South Africa.

Mostly Political Unknowns

Lebanese Premier Appoints 8-Man Technocrat Cabinet

BEIRUT, Dec. 9 (UPI).—Premier Selim al-Hoss today announced formation of an eight-man Cabinet of technocrats to preside over the reconstruction of Lebanon after a year and a half of civil war.

Leading political and military personalities of the war were conspicuous by their absence. All but two of those named were political unknowns.

The Premier, a conservative Moslem, also took the ministries of trade, economy, industry and oil, and information.

Two other important posts, foreign affairs and defense, were entrusted to Fuad Butros, a 58-year-old Greek Orthodox, who is the only man with extensive previous political experience in the new Cabinet. He has served as a parliament deputy and in a variety of ministerial positions during the term of the late President Fuad Chehab from 1958 to 1964.

The Cabinet also included six other ministers of various religious sects, in conformity with the nation's long tradition of distributing government posts on a sectarian basis.

Under this system, the president of the republic has always been a Maronite Christian, the premier a Sunni Moslem and the speaker of the House of Deputies a Shia Moslem.

Moslem leftists have demanded the reform of this political formula in favor of proportional representation. They object that it concentrates too much power in the hands of the Christians, who also usually obtained senior army posts.

Besides Mr. Hoss and Mr. Butros, the line-up included a Druze, Salah Salman, as minister of interior and of housing and cooperatives. He also served in the government of former Premier Saeb Salam in 1970.

The portfolios of health and hydroelectric resources went to a Moslem Shia, Ibrahim Shaito, while public works, transport and tourism went to Amin Bizri, a Sunni Moslem.

The new minister of planning will be Michel Doumit, a Maronite Christian, and a Greek Catholic Assaad Rizk, became minister of labor and social affairs as well as of education and agriculture.

The portfolios for the Ministries of Justice, Finance and postal service were put in the hands of Farid Rafael, a Maronite Christian.

Reunification Goal

"The government will be one of reunification," Mr. Hoss said after his appointment last night. He told reporters that the reconstruction process "will be long and requires patient effort and persistence."

The new Cabinet held its first working session for an hour and 15 minutes. A statement issued afterward said the eight men discussed "urgent social and economic questions for the rebuilding of the country."

Although no reliable estimates are available yet as to the extent of damage and costs of reconstruction, the rebuilding program could cost more than $5 billion, according to conservative estimates.

Politicians generally regarded the prospect of a Hoss government of technocrats as a stopgap measure until quarreling Moslem and Christian leaders can settle on a new political formula for the country.

The independent newspaper An Nahar said the new government would ask the long-paralyzed parliament for special powers to rule by decree and declare martial law.

Mideast Talks Urged by UN

(Continued from Page 1)

take office in Washington on Jan. 20." Mr. Scranton told the Assembly, "and we do not consider it appropriate to join now in a definition of detailed options or time limits governing the evaluation of this crucial negotiating process."

"By its vote," Zehdi Labib Terzi, a PLO observer, said later, "the present administration is actually creating great problems for the Carter administration. I don't think that the new administration will be opposed to peace in the Middle East but the attitude of the present government will create very difficult conditions for peace in the area."

Speaking at a plenary session, Israeli Ambassador Chaim Herzog said his government was forced to withdraw its proposal because of the amendment urging PLO participation at Geneva.

For the first time in UN history, Israel on Monday submitted a resolution calling on Egypt, Israel, Jordan and Syria "to reconvene, without delay, the peace conference on the Middle East under the co-chairmanship of the United States and the Soviet Union."

It said the conference should be resumed "without prior conditions on the establishment of a just and durable peace in the Middle East," as called for in Security Council Resolutions 242 and 338.

S. Korea Bids U.S. Explain Alleged Bugging

SEOUL, Dec. 9 (AP).—Unless the U.S. government clears up reports that it used listening devices on President Park Chung Hee's mansion, the South Korean government will conduct its own investigation and take "appropriate measures" against any illegal acts, the government said today.

The United States has told South Korea that its statements on the alleged bugging were "not helpful" to U.S.-South Korean relations, the State Department said today.

Information Minister Kim Seong Jin said that South Korea has repeatedly demanded an explanation from Washington but that none has been given.

"The failure by the U.S. side to provide a convincing clarification in public has given rise to continued speculations and distortions which are quite detrimental to the interest of both the Republic of Korea and the United States," Mr. Kim said.

The Washington Post reported on Oct. 27 that the U.S. investigation of alleged Korean influence-buying in Washington is using "highly sensitive intelligence reports" based on electronic eavesdropping, wiretaps and other intercepts of communications to and from the Blue House, the South Korean presidential mansion.

President's Orders

The Post said that the reports showed that the Korean President personally ordered the bribing of U.S. congressmen. The Korean government earlier denied the report and called it "malicious, sensational reporting." It also denied any connection with businessman Tong Sun Park's lobbying activities in Washington.

If an "early public clarification" of the bugging reports is not made by the United States, Mr. Kim said, his government will launch its own investigation. And if it finds that U.S. agencies committed unlawful acts, it will take "appropriate measures in accordance with the relevant laws and regulations," he said.

Mr. Kim declined to say what these measures would be.

"Such acts, if committed, would not only cast doubt on the American morality but also adversely affect the friendly relationship between the Republic of Korea and the United States," he concluded.

The minister also said that the U.S. State Department was not convincing in its denial of the South Korean government's charge that the counselor of the Korean Embassy in Washington is being held by U.S. authorities against his will.

Protective Custody

U.S. officials say that the embassy official, Kim Sang Keun, is under protective custody, is seeking asylum and is assisting in the investigation into Korean activities in the United States. He is said to have been a key agent of the Korean Central Intelligence Agency.

A Korean statement yesterday demanded that a representative of the Korean Embassy be allowed to interview Mr. Kim. State Department spokesman John Trattner replied that Mr. Kim "chose freely to seek to remain in the United States" and has "thus far refused to see any representatives of his government."

Park Subpoenaed

WASHINGTON, Dec. 9 (IHT).—U.S. investigators have subpoenaed businessman Park in a probe of alleged cash payments to congressmen but Mr. Park may remain beyond the reach of U.S. authorities.

Mr. Park's Washington attorney said yesterday that his client had no immediate plan to return to the United States from London.

Mr. Park could not be compelled to return unless he were formally charged with a crime, according to Justice Department sources.

Probe by SEC

WASHINGTON, Dec. 9 (AP).—The Securities and Exchange Commission is investigating whether fee payments made to two South Korean business agents by a U.S. electronics firm were later used to finance the bribery of U.S. congressmen.

An SEC spokesman said yesterday that the agency is investigating E-systems, Inc., of Dallas to determine whether that company, which manufactures military surveillance equipment, had been linked with any wrongdoing.

The business fees were allegedly paid by E-Systems to Jong Ho Yoo, a registered alien, and Howard Lee, a naturalized U.S. citizen. Both men live in Los Angeles and work for the Korean Research Institute, a consulting firm which has advised E-Systems about selling equipment to South Korea.

Iran Aide Says Disclosure Of U.S. Cable Hurts Talks

(Continued from Page 1)

fectiveness and utility of the OPEC-LDC alliance."

The telegram also said Washington did not believe the industrialized countries could reach any CIEC agreement which would serve to hold down oil prices.

"The United States has now revealed most astonishingly that it believes no concessions should be given to the Third World," Mr. Yeganeh said at his Tehran office. "The views of the group of 19 [developing countries] and their disappointment is justified now," he said.

Mr. Yeganeh charged that the U.S. position at the CIEC was "just to keep up pressure on oil-exporting countries and break the ranks of developing countries. But this has not worked in the past and it will not work now."

He said the secret U.S. position has torpedoed the CIEC negotiations, showing them to have been "a complete waste of time and resources."

Urges U.S. Shift

But he stopped short of calling for termination of the talks. Instead, he urged the incoming government of President-elect Jimmy Carter to "disassociate itself from the position taken by the present administration" and to present new proposals at the conference.

Mr. Yeganeh also said Iran would be going into the OPEC conference in Qatar demanding an oil-price increase of "not less than 15 per cent."

He said predictions of a 10-per-cent increase were "wishful thinking by some countries," but he would not rule out a compromise when asked about the possibility of a showdown with Saudi Arabia, the largest oil producer in OPEC which has said it will not accept an increase over 10 per cent.

Iran has indicated that it will push harder than expected for 15 per cent and the State Department cable is evidently being used as ammunition in this drive.

But Mr. Yeganeh would not predict whether the cable would prompt other oil producers to take a harder line.

Israeli Sales Tax Sparks Riots in West Bank Town

TEL AVIV, Dec. 9 (UPI).—Israeli troops fired tear gas into crowds of rioting youths in the biggest town on the occupied West Bank of Jordan today.

The clashes with rock-throwing students in Nablus took place on the fourth day of protests against Israeli policies in the occupied territory. Shopkeepers closed their stores in Nablus and Hebron, but business was as usual elsewhere.

The demonstrations were sparked by the decision of military authorities to collect an 8-per-cent sales tax that has been in effect in Israel since July.

Arab sources said that the Middle East debate at the United Nations and anger at the government seizure of lands around Bethlehem were also behind the riots.

Stick-wielding troops pursued the teen-agers and broke up burning-tire barricades. Youths set barricades on fire in Ramallah, between Nablus and Jerusalem.

The new value-added tax was imposed in July. It was delayed on the West Bank after weeks of protests. Small businessmen have been excused from paying the tax.

Schmidt Assailed Over Report of Pension Freeze

BONN, Dec. 9 (Reuters).—Chancellor Helmut Schmidt's government was accused today of breaking a pre-election pledge to give 11 million pensioners a 10-per-cent rise in benefits next year.

The opposition Christian Democratic Union, labor groups and pensioners' organizations said the government had deceived people by promising them more money when seeking re-election in October.

Reliable sources said last night that the coalition partners—Mr. Schmidt's Social Democrats and the Free Democrats—had agreed to put off the increase from next June until January, 1978.

Before the general election in October both the government and the opposition repeatedly assured pensioners that they would get their annual increase despite reports that the pension system was running short of cash.

Pensions were raised by 11 per cent both in 1975 and this year.

Chinese Army Says Radicals Set It Back

Bid Seen to Get Funds For Modernization

By Jay Mathews

HONG KONG, Dec. 9 (WP).—China has released a lengthy report on trouble within its 3-million-member army that appears to be part of an effort by the military to justify more funds for its ill-equipped armed forces.

The article, written by members of the army general staff and released by the Chinese news agency this week, attacked army "careerists" linked to Mao Tse-tung's disgraced widow, Chiang Ching, who sacrificed military training for the sake of politics and stymied development of modern weaponry.

The article repeated themes heard in at least two recent provincial broadcasts monitored here and pointed toward what analysts see as a coming debate within the leadership over how much is to be budgeted for new tanks, planes, artillery and landing craft.

Some analysts here suggest that recent guided tours of Chinese military installations provided for Western visitors have given army officers an opportunity to publicise their needs and influence the Communist party's money managers.

Schlesinger's Comments

The analysts noted that at least one pro-Peking newspaper here made a point of reprinting former U.S. Defense Secretary James Schlesinger's recent comments on outmoded Chinese weapons after one such guided tour.

This week's article suggested that some army officers still had links with four recently purged radical leaders—Miss Chiang, Wang Hung-wen, Chiang Chun-chiao and Yao Wen-yuan.

The prominence now given the army, particularly Defense Minister and second-ranking party leader Yeh Chien-ying, has led analysts here to watch for a reaction from the civilian bureaucrats who must share the country's limited financial resources with the military. Differences between civilian and military leaders are not unheard of in China and they may crop up again in the wake of the joint victory of the bureaucrats and the army over the so-called radicals.

Emperor Bokassa

Bokassa Sees Imperial Rule Of Etiquette

NDJAMENA, Chad, Dec. 9 (AP).—Anyone meeting Emperor Bokassa of the Central African Empire must at a distance of six paces bow his head, say "Yes, Imperial Majesty" if answering questions in the affirmative, and if the answer is "brutal no" if responding negatively, the government radio said yesterday.

It said Bokassa, proclaimed Emperor of the former Central African Republic Saturday, had dropped the recently acquired Moslem name of Salah Eddine Ahmed or "defender of the faith," because of his new functions.

Jean-Bedel Bokassa took power in a 1965 coup and has ruled the landlocked country with an iron fist ever since.

Carter Reaffirms U.S. Pledge To Maintain NATO Alliance

(Continued from Page 1)

stressed that the West needed to be both strong and conciliatory. He rejected notions that the two were incompatible.

In many ways, the Carter and Kissinger statements were identical. Mr. Carter said that the alliance was "no less important today than when NATO was originally established." Mr. Kissinger pointed out that, since NATO was established in 1949, all U.S. administrations had followed the same policies toward it. He said that foreign policy was based on national interests and not individual views.

Economics and Security

Mr. Kissinger also told the council that there was a link of increasing importance between the security of the West and its economic health. He made a strong appeal that nations use all their diplomatic influence on oil-producing states in order to keep down rising energy prices that have weakened Western economies.

Most of the speakers today rejected the two proposals made by the Warsaw Pact nations at their meeting in Bucharest last month for a ban on the first use of nuclear weapons and for a freeze in the size of the present alliances.

Mr. Kissinger, Mr. Crosland and Mr. Genscher said that it would be unwise for the West to indicate how it might respond in the event of an attack. The three also dismissed the call for an alliance freeze. The Warsaw Pact's proposal has been prompted by recent NATO feelers to the Spanish government.

Mr. Kissinger devoted much of his 45-minute statement to his present assessment of relations with Moscow. He said that the Soviet Union did not have a specific plan for world domination but was piling up military power as its industrial power increased.

But he argued that, because the Soviet Union's weaknes particularly economic, the W could create incentives for h now to act positively.

French Denial

PARIS, Dec. 9 (AP).—French President's office to denied a Washington report t France might join a four-po NATO directorate, giving it important strategic and tact military role in the alliance.

Elysée Palace spokesman Mi Bassi denied an Associated P story yesterday quoting U.S. ficials as saying such a devel ment could follow what they as France's quiet policy of res ing military cooperation w NATO.

Mr. Bassi said France's m tary policy "is in the continu of the policy defined by Gen. Gaulle and carried out for years." Under this policy, Fra pulled out of the NATO milit structure and expelled all forces based here.

Review of Defense Choice Reported

Prospective Cabinet Officers Continue to Meet With Carter

By Leslie H. Gelb

WASHINGTON, Dec. 9 (NYT). —Prospective Cabinet members continued to confer with President-elect Jimmy Carter in Atlanta yesterday amid reports that Mr. Carter is taking a second look at his first choices for secretary of defense and national security adviser.

Dr. Harold Brown, a high Pentagon official in the Johnson administration who was among those who met with Mr. Carter, is still said to have the inside track for secretary of defense.

But sources who said they have spoken to Mr. Carter or his closest aides maintained that Paul Warnke, a Washington attorney and a former high Pentagon official, is back in the running for the defense job after receiving the endorsement of several senators. Mr. Warnke met with Mr. Carter Tuesday.

Sources also said that Mr. Carter is close to naming Prof. Zbigniew Brzezinski as his assistant for national security affairs. "The only thing holding it up," a source said, "is that some people have been telling Carter that it would be inconsistent with his campaign statements not to have a policy advocate in that job."

'Lack of Concern'

Queried about this in a telephone interview, Mr. Carter's press secretary, Jody Powell, said that "one of the points that Gov. Carter mentioned that attracted him to Cyrus Vance as secretary of state was his lack of concern about strong people being named to other top positions in the national security area."

A close Carter aide said that no more appointments will be announced until next week, and that these announcements "probably will finish out the international security cluster," meaning the Pentagon, the Treasury Department, the national security advisers and the ambassador to the United Nations.

Meanwhile, in Atlanta, Mr. Carter talked with another group of reputed contenders. In addition to Dr. Brown, who is president of California Institute of Technology, they included:

• Michael Blumenthal, chairman and chief executive officer of the Bendix Corp., who remains on the final list for Treasury, the Pentagon or other top positions dealing with international economics.

• Jane Pfeiffer, a former vice-president of the International Business Machine Corp., reported to be under consideration for secretary of commerce. She is now retired and is married to a senior vice-president of IBM.

• Rep. Brock Adams, D-Wash., widely said to be among the front-runners for secretary of transportation.

Rep. John Brademas

No. 3 Position In House Goes To Brademas

By Richard D. Lyons

WASHINGTON, Dec. 9 (NYT). —Rep. John Brademas of Indiana was appointed yesterday as House majority whip—the third-ranking position of power in the chamber—by Speaker-designate Thomas O'Neill of Massachusetts.

The appointment of Rep. Brademas, who in this Congress is the chief deputy majority whip, had been anticipated. He replaces Rep. John McFall of California.

The elevation of Rep. Brademas was made despite his long-term friendship with a South Korean agent, Tongsun Park, from whom Rep. Brademas has acknowledged the receipt of about $5,000 in campaign contributions in 1972 and 1974.

It was this issue that led to Rep. McFall's being deposed, with the difference that Rep. Brademas had made public disclosure of the receipt of the funds before last month's elections, while Rep. McFall had not.

'Strong Critic'

"I was a friend of Mr. Park's but my voting record shows that I have been a very strong critic of the regime in South Korea," Rep. Brademas said in an interview after his appointment.

Speaking of his 14-year friendship with Mr. Park, Rep. Brademas said, "If one knew earlier what we know today one wouldn't have had anything to do with him."

Rep. Brademas noted, however, that in 1974 President Ford, who was then vice-president, had attended a party given by Mr. Park.

The appointment of Rep. Brademas was announced by Rep. Jim Wright of Texas, who was elected majority leader on Monday, the third day of meetings of the House Democratic Caucus.

Rep. Wright also announced the appointment of Rep. Dan Rostenkowski of Illinois to Rep. Brademas's former position of chief deputy and majority whip.

Sick Leave Held Not Obligatory In Pregnancies

WASHINGTON, Dec. 9 (WP). —The Supreme Court ruled this week that an employer may legally refuse to pay disability or sick-leave benefits to pregnant women.

There is no sex discrimination "simply because an employer's plan is less than all-inclusive," said the majority opinion written by Justice William Rehnquist.

The justices overturned the findings of a lower court in a 6-to-3 decision saying that General Electric Co. does not violate the rights of any of its 100,000 women employees by making them take unpaid leaves of absence to have babies.

The decision does not mean that those employers now offering pregnancy disability coverage as part of their overall compensation package must stop doing so. The court said, however, that existing laws such as the 1964 Civil Rights Act do not compel employers to offer that coverage.

However, Congress is free to pass legislation making such exclusions illegal, the court said.

One group that supported the GE women employees, the International Union of Electric Workers, said it planned to seek such legislation. It was enthusiastically backed by women's rights groups which unanimously criticized the court's decision.

Harm Seen to U.S. Anti-Espionage Effort

Intelligence Aides Fault Levi on Wiretaps

By Nicholas M. Horrock

WASHINGTON, Dec. 9 (NYT). —Senior intelligence officials said yesterday that Attorney General Edward Levi has refused to approve any requests for wiretaps in counterintelligence cases and that efforts to combat hostile foreign intelligence services are being hampered.

In a series of interviews, officials familiar with the counterintelligence efforts of the FBI and the CIA said privately that six requests for electronic surveillance of Americans or resident aliens have been made to the attorney general during the last year and he has declined to approve them.

Compromising Security

In these cases, the officials said the requests were all for telephone wiretaps. They were instances where the counterintelligence experts believed that the American or resident alien was in contact with agents of hostile intelligence services and compromising national security.

The instances demonstrate sharply the controversy between the protection of civil liberties in the United States and efforts to take steps considered necessary to maintain national security.

U.S. counterintelligence agencies do conduct electronic surveillance of the intelligence officers and offices of hostile foreign intelligence services operating in this country.

It is common knowledge here that the United States wiretaps officials of Communist-bloc nations it suspects are engaged in espionage.

But the counterintelligence surveillance presents a more thorny problem. A senior official described it as a situation where "we believe that Ivan Ivanov, a Soviet intelligence officer, has compromised Joe Zilch, an American or resident alien, with entrée to national security data and that person is meeting with the Russian and supplying him information. They have sought to wiretap Joe Zilch," the source said.

Rethink Criteria

Mr. Levi, these officials said, has told them in each instance that they had insufficient "probable cause" to install the tap. They do not fault Mr. Levi's judgment as a lawyer but suggested that the Department of Justice must "rethink" the criteria for such surveillance.

The official said that Mr. Levi had told the agencies that if they feel strongly that the taps were necessary they could seek approval from the courts under the provisions of Title 3 of the U.S. Code. The intelligence officials have declined because they would have to disclose their informants or sources of suspicion.

State Dept. Said to Open Way For Sale of Fighters to India

By George C. Wilson

WASHINGTON, Dec. 9 (WP). —The Ford administration has taken the first step toward selling modern jet fighters to India, informed sources disclosed yesterday.

This new approach to the government of Prime Minister Indira Gandhi is sure to draw fire from Pakistan and perhaps from President-elect Jimmy Carter. Pakistani officials already have complained that they are heavily outgunned by India and should be allowed to buy the A-7 attack plane from the United States.

The State Department's Office of Munitions Control has cleared the way for McDonnell-Douglas executives to brief Indian officials in New Delhi next month on the company's A-4 Skyhawk fighter-bomber.

The clearance was in the form of a license from that office to export data on the A-4's performance to India. A spokesman at the Office of Munitions Control said information about such licenses is confidential and could not be disclosed.

However, other sources said McDonnell-Douglas received its license last month. The Pentagon approved the release to India of the information.

World Market Value

The State Department has been analyzing for the incoming Carter administration what the world market is for arms between now and 1980. One estimate is $35 billion.

For India, the fighter market is estimated to involve as many as 300 planes. The relatively inexpensive Skyhawk was used by the United States in Vietnam and by Israel in the Sinai.

If India decides to buy, then, in a process involving both the executive branch and Congress, the U.S. government would have to give final approval.

It is possible that the administration is allowing McDonnell-Douglas to launch the sales drive in India only to gain diplomatic leverage.

The Skyhawk is believed especially appealing to India right now because it is the only modern aircraft that could be handled on India's only aircraft carrier. The Indian Navy would like to buy 30 Skyhawks and officials have been putting out feelers for such a deal for some time.

The carrier-Skyhawk combination would clearly be an offensive force. Pakistan almost certainly would protest such a sale.

Pakistan has sought to buy 110 A-7 light bombers from the United States. The Pentagon last month recommended that the sale be made but State Department officials have said a final decision will be left to the Carter administration. The A-7 can carry seven tons of bombs and has a 600-mile range, enough to cover most of India.

Mr. Carter during the election campaign promised to curb arms sales through international agreements, terming the "almost completely unrestricted sales of U.S. military weapons" under President Ford and President Richard Nixon a "cynical" and "dangerous" policy.

French Survey Supports OECD On Salary Gap

PARIS, Dec. 9 (UPI).—A special report ordered by the government on salaries in France, West Germany, Britain and the United States showed again that France has the largest gap between rich and poor.

The survey, published by the Study Center on Income and Costs, confirmed a report issued by the Organization for Economic Cooperation and Development in July saying France had the largest income inequality among industrialized nations.

France formally protested to the OECD on Oct. 12 that the report was biased and undocumented.

The new report said that, although the disparity of salaries in France had been reduced since 1968, the gap was closing much faster in Britain and West Germany. In the United States the gap has been much smaller than in other countries but it has started widening.

Salaries of top French executives are 5.1 times higher than those of blue-collar workers, while in Britain the ratio is 2.8 and in West Germany 2.3 the survey said.

The average white-collar employee in France earns 63 per cent more than the blue-collar worker. The gap is 57 per cent in West Germany and Britain for men and 38 and 30 per cent between women workers of the two categories.

High Price of Caviar

TEHRAN, Dec. 9 (AP).—A U.S.-based firm, Pana Caviar, yesterday agreed to pay $16,384,000 for 275 tons of Iranian caviar over the next five years.

No Federal Prosecutions

Capitol Hill Sex Scandals Just Fade Away

WASHINGTON, Dec. 9 (AP).— The Capitol Hill sex scandal of 1976 is fading to an end. The Justice Department has closed its books on the case and will not prosecute anyone involved.

The scoreboard shows that six members of the House of Representatives allegedly were involved in various incidents of sexual misconduct.

One was forced to resign from the House, another was convicted in a local court and defeated for re-election, three were re-elected and the voters promoted one to the Senate.

Government prosecutors investigated the allegations against former Rep. Wayne Hays, D-Ohio, and Rep. John Young, D-Texas, but closed both cases after concluding the prosecutor lacked evidence to support criminal charges.

The scandal broke last May when Elizabeth Ray asserted publicly that Rep. Hays kept her on the government payroll as his mistress. She insisted that she did no government work, seldom showed up at the office and could not even type.

While the charges were making headlines, the voluptuous 33-year-old blonde produced a book about the affair and capitalized on the publicity to land a part in a play in Chicago.

Relationship Admitted

Rep. Hays finally admitted to a relationship with Miss Ray but insisted that her job with his House Administration Committee was legitimate. Under pressure from his colleagues, Rep. Hays stepped down as chairman of the committee and later resigned from the House.

Meanwhile, prosecutors in the Justice Department's Public Integrity Section investigated to determine whether Rep. Hays should be prosecuted for misusing government money—Miss Ray's $14,000 annual salary.

Yesterday Justice Department spokesman Robert Stevenson said Rep. Hays was notified through his attorney that no criminal charges will be brought against him.

Prosecutors lacked evidence to corroborate Miss Ray's account, the source said. But an even greater barrier to prosecution was that "her story is awfully shaky," the source continued. "She's just not a very good witness for the purpose of criminal prosecution."

Soon after the Hays scandal broke, Colleen Gardner said that her former boss, Rep. Young, had required her to have sex with him as a condition for keeping her staff job at premium pay.

"Poppycock!" Rep. Young replied.

Department investigators looked into this case, too, but concluded last August that there was no evidence to support criminal charges. Rep. Young was re-elected in November.

AP.

Wayne Hays

Other Scandals

Justice Department officials emphasized that they were interested only in possible violations of federal law, not in the sex habits of politicians. The department investigated only the Hays and Young cases and never became involved in the other sex scandals.

The other scandals involved:

• Rep. Allan Howe, D-Utah, who was defeated for re-election after he was convicted in a Utah court of soliciting sex from police agents posing as prostitutes.

• Rep. Joe Waggonner, D-La., re-elected after the disclosure that Washington police detained him last February on suspicion of soliciting a decoy policewoman. He was never charged.

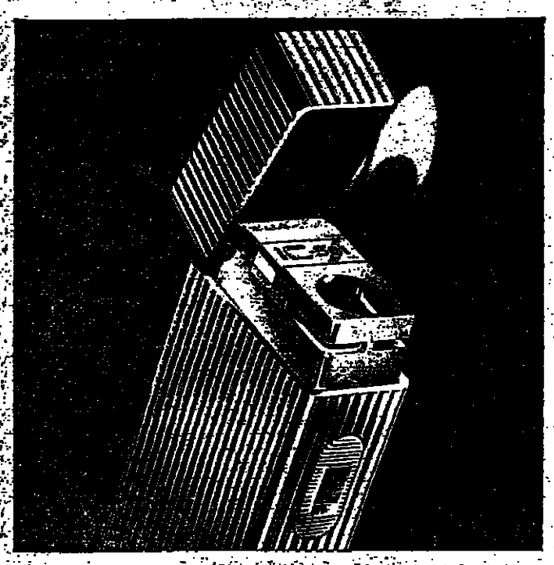
• Rep. John Dingell, D-Mich., re-elected after a Detroit prostitute's allegation that he was one of several politicians who frequented her brothel.

• Rep. Donald Riegle, D-Mich., elected to the Senate following the disclosure that he once had an affair with an unpaid volunteer worker in his House office.

Swiss Appoint Panel To Probe Spy Issues

BERN, Dec. 9 (Reuters).—The Swiss parliament today appointed a group of deputies to investigate issues raised by the arrest of former air defense Brig. Gen. Jean-Louis Jeanmaire on allegations of spying for the Soviet Union.

The parliamentary investigation group was set up after deputies accused the government of failing to keep the public properly informed of the case and said that Gen. Jeanmaire had shown defects of character and intelligence which were known to his superiors.



Convicted Killer Asks Utah to Release Him

SALT LAKE CITY, Dec. 9 (AP).—Convicted killer Gary Gilmore says that Utah, by not heeding his demands for a speedy execution, now must set him free. Attorney Ronald Stanger petitioned the 4th District Court in Provo yesterday for Gilmore's release on grounds that state law required that the firing-squad execution be carried out within 60 days after Gilmore's Oct. 7 sentencing for killing a motel clerk.

But it appeared unlikely that Gilmore would go free, even if the court accepted Mr. Stanger's argument. Utah County Attorney Noall Wootton has asked the same court to set a trial date for Gilmore on another murder charge in the fatal shooting of a gas station attendant during a robbery. Mr. Wootton said the judge would probably act tomorrow.

Claw Misuse Reportedly Scuttled Soviet Sub Salvage Effort by CIA

(Continued from Page 1)

submarine, and one in Science magazine speculating that the vessel might have been recovered in pieces.

Such reports, which have drawn official "no comments" from the Pentagon and the CIA, were depicted as fallacious by the Collier brothers and by The Times's sources in the intelligence community.

Richard Duncan, deputy chief of correspondents for Time magazine, acknowledged that "we've run into questions on our own about the story we published and we're still investigating." He added, "I'm not willing or able to say now that our story is wrong."

Fact, Speculation

John Walsh, editor of the news and comment section of Science magazine, said that his magazine's article "clearly distinguished between fact and speculation. We think that it added important information and feel it is correct in its basic analysis."

Wayne Collier, 33, who is now in the oil business in Houston, also said that some crew members of the Glomar Explorer, *including his brother, were exposed* to radioactivity from corroded nuclear warheads during the CIA's subsequent analysis of the recovered section of the Soviet submarine. Wayne Collier added that he and his brother were considering legal action against the intelligence agency.

"I feel it was negligence on the part of the agency," Wayne Collier said. Since leaving the job on the Glomar Explorer, Wayne said, his brother Billy—who weighs 240 pounds and is known as "Bimbo" to his friends—has felt weak.

Wayne Collier said he did not know whether the other crew members who were exposed to the radioactivity were suffering from similar ailments.

Although Wayne Collier did not directly participate in the recovery operation, his account of what went wrong has been corroborated in subsequent interviews with a number of high-level intelligence officials and others in the government whose information on the project has been reliable in the past.

The key failure, according to Wayne Collier, was not mechanical, but rather a failure in human judgment.

The concept behind the planned recovery of the submarine was simple: A huge claw capable of grabbing and lifting the submarine was constructed, fitted under the Glomar Explorer at sea, and then—while the Glomar Explorer was stabilized with the aid of computers over the sunken submarine—the claw was slowly extended into the ocean.

The Glomar Explorer, a 36,000-ton vessel 618 feet long and more than 115 feet wide, was capable of generating 12,000 horsepower. The ship's "moon pool," a huge hold into which the submarine was to be hoisted, was 200 feet long and 65 feet wide. If the submarine was recovered and placed in the pool, the water would be pumped out and the disassembling would start.

Lights, Cameras

The claw, whose three miles of supporting pipe was estimated to weigh 10 million pounds in air, was equipped with strobe lights and television cameras to enable its operators—working in the Glomar Explorer's control room—to observe the lifting operation.

The submarine was known, on the basis of previous reconnaissance photographs taken by deep-diving Navy craft, to be intact. The plan, according to Wayne Collier and other sources, was for the claw to encircle the submarine and pull it to the surface. The claw, nicknamed "Clementine" by crew members, was operated by a seawater hydraulic system.

But, Wayne Collier said, two or three prongs of the claw became entangled in the seabed along the aft end of the submarine. According to Wayne Collier's account, there was a debate inside the control room—repositioning the claw could cause an extensive delay and, at the great stress of the three-mile depth, could even lead to mechanical breakdown.

The project leader, a high-level CIA official known to the crew as "Blackjack," ordered the claw's engineer to increase the power to pull the claw around the submarine, Wayne Collier said.

Out of Shape

After some agonizing moments, the claw encircled the submarine, the account continued, but the few prongs that had become stuck were bent out of shape and could not fully support the submarine.

At 5,000 feet, the rear two-thirds of the submarine broke off and sank, Wayne Collier said. It was a moment of fear, he added, because the men aboard the Glomar Explorer thought that one of the submarine's nuclear warheads might be triggered by the fall.

The section that broke off, Wayne Collier said, included the conning tower, the three missiles and the vessel's code room—the prime targets of the recovery mission.

Billy Collier talked at length about his intense 12-hour days disassembling the vessel in the huge hold of the Glomar Explorer. As many as 100 oversized air-conditioning units were working constantly in the "moon pool," he said, in an attempt to re-create the water temperature three miles down, and to delay the submarine's decay.

'Damp, Rotten'

There were other memories, he said—the smell, for example. Billy Collier's face turned sour when he tried to re-create it in words. "It was terrible. Hard to describe. Damp and rotten." He stopped trying to explain and said simply: "The bodies."

"A crew of doctors went at them first," he continued, "two doctors and some medics. They took out everything that they found." The intact bodies of at least six Soviet submariners were recovered and later were buried at sea.

Many crew members, in direct violation of CIA orders, quickly stripped the bodies and the submarine of souvenirs and items of value—rings, watches, coins and bracelets—according to the Collier brothers.

The Soviet submarine, a 1958 Golf-class model driven by a diesel engine, was radioactive, as CIA analysts had predicted. The Collier brothers said there had been decay of the nuclear warheads that were mounted on the vessel's three missiles and four torpedoes. Two of the torpedoes were recovered, according to the brothers.

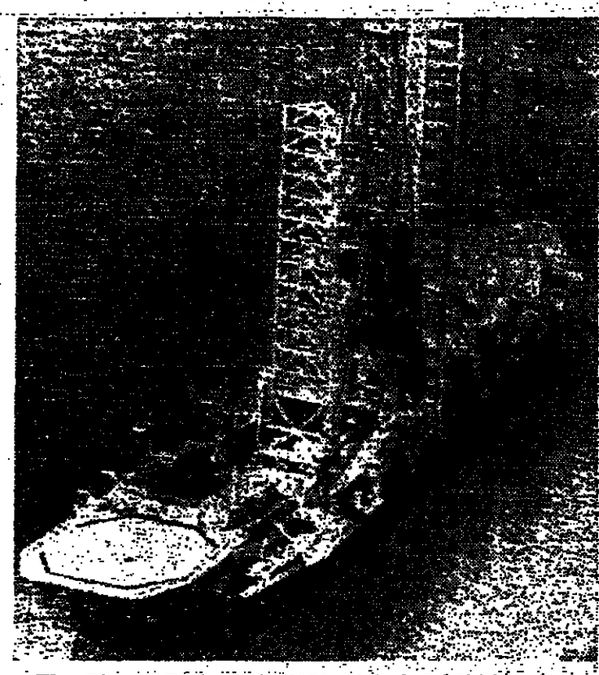
Chance Refused

Moments after the submarine's forward section was brought into the "moon pool," Billy Collier recalled, the crew members were summoned to the ship's dining room. "Blackjack" told them the submarine was "hot" and gave them a chance to forgo working on the project and thus avoid exposure to radiation. The men all agreed to go below to work, he said.

Special uniforms were provided, including a full-length cotton jumper and a shiny outer uniform that seemed to have a metallic content, Billy Collier said. Sleeves and ankles were taped, he said, and the men all wore oxygen masks and hoods with built-in microphones. The suits were described as hot and clumsy.

After work, Billy Collier recalled, the men were carefully checked and ordered to take hot showers. "After five days, they decided it wasn't necessary to take all of the precautions," he said, and the suits were dispensed with to insure that the job of dismantling the submarine could proceed quickly.

Billy Collier worked his normal shift with about six other men, he said, and then he and others took a break and were routinely checked for radioactivity. "The instrument went as high as anything could go," he said, "and they found it was on me."



He remembered that the others exchanged long locks and he was undressed and ordered not to touch his skin. He said that he showered and scrubbed down for an hour, was examined, and told to return for more scrubbing. Later, he said, he was ordered to throw all of this clothing overboard.

Costs Estimated

The precise importance of the CIA's findings could not be learned nor could The Times determine how much money was spent on the overall operations. Sources generally agreed that more than $500 million was spent, a total that is roughly twice as much as publicly acknowledged by the government.

The intelligence findings cited by Wayne Collier have been described by experts as, at best, insignificant in terms of the project's high costs. Among those findings are the following:

- Evidence that wooden two-by-fours were used in the building of some compartments, a crudity that amazed CIA engineers.
- Exterior welding of the hull was uneven and pitted, and the hull itself was not uniform in thickness. Hatch covers and valves also were crudely constructed, compared with those on U.S. submarines. The valves and covers, along with all electrical wiring and gear, were considered high-priority recovery items by the CIA.
- Two of the submarine's four nuclear-tipped torpedoes were determined to be powered by electric motors and two were steam-powered, indicating that the submarine's firing tubes were not interchangeable. CIA experts had thought that the torpedoes would be fired by more modern means.
- One of the dead Soviet sailors, a young officer, was found in a room that apparently had been sealed tight when the submarine sank. The room contained a variety of Soviet Navy instruction books and journals, some of whose pages could be deciphered after chemical treatment. The documents were said to include a partial description of the Soviet codes and nuclear system in effect in 1968.

The Glomar Explorer in 1974, anchored off Hawaii.

N. Korean Shift Of Envoys Raises Queries in Russia

MOSCOW, Dec. 9 (WP).—The departure of a dozen diplomats from the North Korean Embassy here earlier this fall may have been connected with the black-market activities of North Koreans in Scandinavia, some Western diplomats believe.

They suggested that the North Koreans could have been operating in Moscow as they were in Scandinavia, selling liquor, cigarettes and drugs at black-market prices, and that they were forced to leave. But it is also possible that the North Koreans were simply sent from Moscow to replace their colleagues expelled from posts in Scandinavia.

Soviet and North Korean officials deny that there was anything unusual about the departures, which became known when the embassy sent out a routine diplomatic list.

New Moscow Airport

MOSCOW, Dec. 9 (UPI).—Moscow will soon begin work on a new airport, the capital's fifth, Tass said.

Thai Minister Says Vietnam Sets Invasion

Hanoi Radio Brands Report an 'Absurdity'

SINGAPORE, Dec. 9 (Reuters)—Thai Interior Minister Samal Sundravej said today that captured documents show that Vietnam is planning to invade Thailand in two months.

He said his information came from intelligence sources, which learned this week of the plan.

"A meeting has been held between pro-Hanoi Vietnamese refugees and left-wing Thai students at which it was decided to organize industrial unrest in Thailand to pave the way for the invasion," he said.

He said that the Vietnamese have been looking for a chance to invade us on D-day, Feb. 15."

Asked why he thought Feb. 1 had been chosen, he said: "Because it is at the height of the dry season."

He said he issued the warning first released yesterday in Bangkok "so that the world knows. Then let us see whether the Vietnamese deny it."

Hanoi Calls It Absurd

From Hanoi, the official Voice of Vietnam radio today described Mr. Samak's claim as "an absurdity." It said his statement was designed to justify possible Thai attempts to reopen U.S. military bases in Thailand and to advance Bangkok's "extreme reactionary domestic and foreign policy."

The Thai leaders "also want to plead for more dollars from their U.S. master," the broadcast said.

Mr. Samak, making a two-day visit to Singapore, said that the planned crossing points for the invasion are through Burma in the north, Chongmek near the Laotian border and through Aranyaprathet, near the Cambodia frontier.

He said he had clear evidence that weapons and tanks were being stockpiled near the crossing points.

In Bangkok, there was no public sign of any special action by the Thai regime to counter the alleged invasion threat or prepare for war.

A Thai military spokesman said the interior minister had informed the Cabinet of the Vietnamese invasion plan but added it was not possible for anyone to reveal what military movements were being prepared to meet it.

No Call for Help

Mr. Samak said here that Thailand was taking no special measures and was not calling for outside help.

Relations between Bangkok and Hanoi have worsened since the rightist military coup in Thailand in October.

"Some of the Vietnamese refugees who have arrived since the Communist victories in Indochina are working for the benefit of their colleagues in Vietnam," Mr. Samak asserted.

He said that refugees had contacted Thai students who fled to Laos after the coup and "some of these students have now infiltrated back into Thailand."

He said that rightist-oriented trade unions have been infiltrated by leftists who are planning industrial unrest as a prelude to the Vietnamese invasion.

"Some factory owners may add to the tension by taking strong measures against troublesome workers. But I am warning both groups to stay calm and I am making it clear that we know what is going on," Mr. Samak stated.

Philippines Storm Toll

MANILA, Dec. 9 (UPI).—Seventeen more persons were reported to have died in provinces hit by tropical storm Nora, raising the five-day death toll to 58, the Philippines Red Cross reported yesterday.

Expanding into Germany? Start at Rheinland-Pfalz, the "Crossroads Bank"

There are advantages in starting at the right place. And with the right bank.

Our location is ideal.

First, Mainz is part of the expanding Rhein-Main commercial complex – at the Crossroads of the German economy. Not only is this a sizeable market in itself, it is an ideal base for further expansion.

Second, we are at the gateway to the state of Rheinland-Pfalz. In this high-potential state you will find everything you need for expansion: you'll have sufficient labour, adequate energy supplies and a strategic location with direct access to Germany's and Europe's main transportation arteries. All that, plus a state government whose close co-operation with foreign businesses is reflected in measures which are specifically designed to benefit you and make your start easier. (They'll even pay up to 20 per cent of your investment.)

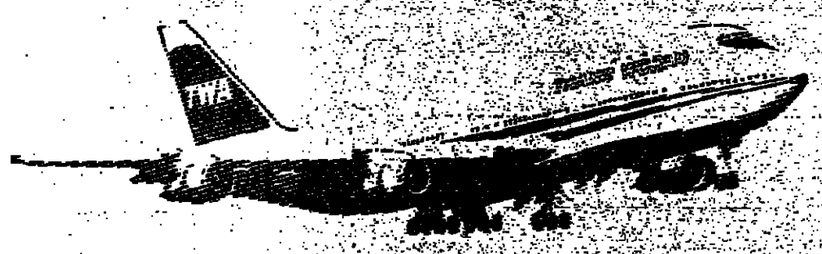
And with us as your bank you will have a reliable, well informed partner. Not only are we a highly respected, all-purpose bank (assets DM 16,000 million), we are also specialists in large, long-term loans – a practical combination for you.

Contacts will be no problem for you either.

We have connections all over Germany. But in Rheinland-Pfalz we can be especially helpful since we serve as a central clearing bank for the 45 savings banks in the state.

Remember, one of the most important aspects of expansion is choosing the right location.

If you want to start at the Crossroads, talk to Rheinland-Pfalz, the Crossroads Bank.



Drop us a line. Or send us a telex. Our number is 4 187 885.

2 Quit 'Shadow Cabinet'

Tories Split Over Party Stand On Scottish, Welsh Home Rule

LONDON, Dec. 9 (UPI).—Britain's opposition Conservative party has been split by a dispute over the Labor government's plan to give Scotland and Wales limited home rule and their own assemblies.

The Conservatives' two chief parliamentary spokesmen on Scottish affairs, Alick Buchanan-Smith and Malcolm Rifkind, resigned their posts last night. Two other Conservative "shadow cabinet" members, Hector Monro and John Corrie, also said they were quitting but the party leader, Mrs. Margaret Thatcher, persuaded them to stay on.

The moves brought to a head a growing party conflict over the home-rule issue.

A Labor government bill giving Scotland and Wales limited home rule will have its second reading in the House of Commons reading next Thursday.

Mrs. Thatcher and a majority of her "shadow cabinet" have announced their opposition to the government bill, which they say goes too far and could lead to the breaking up of the United Kingdom.

Mrs. Thatcher ordered all 278 Conservative members of Parliament to vote against the bill next Thursday.

But some in the party argued that failure to give Scotland at least the limited measure of home rule offered in the government bill would fuel full-independence demands by the fast-growing Scottish National party.

Political informants predicted that as many as 20 Conservative MPs, including most of the 16 from Scotland and former Prime Minister Edward Heath, will defy Mrs. Thatcher's orders and either vote for the bill or abstain.

Mr. Buchanan-Smith said "I profoundly disagree with that decision" to order all Conservative MPs to vote against the bill.

"In Scotland, people will think Conservatives are opposing the principle of devolution," he added. Devolution is the term applied to the transfer of limited home-rule powers to Scottish and Welsh assemblies.

Mr. Rifkind said the order to vote against the home-rule bill was "a serious and unfortunate mistake."

Mrs. Thatcher, accepting Mr. Buchanan-Smith's and Mr. Rifkind's resignations, expressed "regret" but said: "I understand their reasons."

She announced the appointment of Teddy Taylor, a Scotsman but a hard-line opponent of any home rule for Scotland, to replace Mr. Buchanan-Smith as chief Conservative spokesman for Scotland.

The home-rule dispute earlier this week forced into the open a long-simmering feud between Mrs. Thatcher and Mr. Heath, whom she ousted from the party leadership in February of last year.

Mr. Heath on Monday placed himself squarely at the head of a party rebellion against Mrs. Thatcher's authority by announcing that he will defy her orders to vote against the government's home-rule bill.

"It is unthinkable that those of us who have for so long believed in this principle should be expected to vote against it," Mr. Heath said.

No English Assembly

LONDON, Dec. 9. (UPI).—The government has ruled out the possibility of a regional assembly for England, according to a paper issued by the Privy Council. But it said that government ministers are considering a possible reform of local government after an examination to determine any shortcomings.

Russians Get Large New Paris Embassy

PARIS, Dec. 9 (AP).—The Soviet Union has taken possession of a new seven-story embassy here. In addition to two floors of offices and 130 apartments, it has:

A banquet hall for 1,500 guests, a grand salon, several libraries, two theaters, six medical suites, a school, gymnasium, restaurant, interior garden and sauna.

The price of the structure, put up by a French firm, is not known.

EEC Ex-Official Borschette Dies; 5 Months in Coma

BRUSSELS, Dec. 9 (UPI).—Albert Borschette, 56, former Luxembourg member of the European Economic Community's executive Commission, died yesterday after being in a coma for more than six months, EEC sources said today.

Mr. Borschette, commissioner for competition, was felled by a stroke while participating in a meeting in Strasbourg in May. When it became clear he would not recover sufficiently to resume his post, his fellow countryman Raymand Vouel was named as his successor.

Mr. Borschette had been Luxembourg's permanent representative to the Common Market since 1958 and a member of the commission since 1970.

Dr. Sarah Stewart

WASHINGTON, Dec. 9 (WP).—Dr. Sarah Elizabeth Stewart, who helped show that some cancers are caused by viruses and thus set the course of much present-day research into the disease, died of cancer Nov. 27 at her home in New Smyrna Beach, Fla.

Dr. Stewart and Dr. Bernice Eddy were the first scientists to show the polyoma virus in tissue cultures. They then demonstrated that the virus would cause many kinds of tumors in mice and other rodents.

Their finds, made at the National Institutes of Health in Bethesda, Md., and published beginning in 1958, became one of the cornerstones of modern viral oncology, the study of viruses as a cause of cancer.

William P. Campbell

WASHINGTON, Dec. 9 (WP).—William Patrick Campbell, 62, senior curator and curator of American painting at the National Gallery of Art, died of cancer Saturday.

Associated with the gallery staff since 1941, he had served in several curatorial capacities before taking on the positions he held at the time of his death.

AID Denies Role In Exports of Banned Pesticide

WASHINGTON, Dec. 9 (UPI).—The Agency for International Development says that it does not finance the export of pesticides that have been banned and deemed health hazards in the United States.

The Washington Post reported (IHT, Dec. 9) that the agency shipped abroad "hundreds of tons of pesticides so poisonous they are not permitted to be used in the United States." The newspaper listed these as leptophos, DDT, aldrin, heptachlor and chlordine.

It said that shipments between 1972 and last year to Indonesia and South Vietnam included tons of leptophos, a pesticide used on cotton crops which has been linked to a variety of nerve disorders and paralysis.

It has been 33 months since AID assisted in the export of leptophos, an agency spokesman said, and it was only last October that an Environmental Protection Agency advisory board recommended against the pesticide's further use in the United States.

"AID has no intention of resuming financing the export of leptophos in light of recent information," the agency said yesterday.

An agency statement said: "AID does not, has not and will not finance the export of pesticides whose proper manufacture, distribution or use is known to be hazardous to human health."

GETTING OUT THE VOTE—A Madrid resident reads a poster urging participation in the referendum next week on Spain's proposal for an overhaul of the parliament.

Spain's Extreme Left, Right Urge Boycott of Referendum

MADRID, Dec. 9 (AP).—With private polls indicating nearly a third of Spain's voters still undecided, the government faced mounting opposition today as both the extreme left and right organized against the referendum next Wednesday on the government's political-reform program.

Government officials said they still expected overwhelming approval and at least a 70-per-cent turnout of the 23 million eligible voters next week.

But reports from Spanish news correspondents abroad said only 5 per cent of Spanish emigrants cast absentee ballots in France and the United States before that balloting closed two days ago.

In Madrid, the National Confederation of War Veterans who fought with the late Generalissimo Francisco Franco in the Spanish Civil War urged its 500,000 faithful to vote against the reforms, which it said would destroy Spain and the system Gen. Franco built.

In Barcelona, more than 80 labor lawyers urged abstention "as the only way to fight today for the liberties of the people." Leftist extremists in Spain's northern Basque region called for a general strike in that area on the day of the referendum.

The main leftist thrust against the referendum, asking Spaniards to vote yes or no on Premier Adolfo Suarez's program calling for free parliamentary elections next year, was led by the Communist-Socialist National Alliance.

It charged that the referendum was undemocratic and that the government controlled the prereferendum publicity by spending 550 million pesetas ($8 million) of taxpayers' money. Police Tuesday arrested 19 persons, most of them members of the illegal Communist party, for distributing anti-government referendum propaganda.

But the government also was under attack from the extreme right, which is using a campaign theme that "Franco would have voted no."

The ultraright New Force party said 91 of Madrid's 255 polling places would be observed by party members, leading capital newspapers to charge that "extremists will control the polls."

With opposition leaflets and graffiti calling for abstention, the government dropped its neutral stance and openly asked for a yes vote.

It appeared to have the support of most Spaniards, although one newspaper poll showed 41 per cent of rural voters undecided.

The government television monopoly invited all political forces, except the Communist party, to appear on the national network and give their views.

Jose Maria de Areilza, head of the centrist Popular party and the country's first foreign minister after Gen. Franco's death a year ago, called the referendum "the key to democracy" and urged approval of Mr. Suarez's program.

50 Reported Held In Plot to Oust Afghan President

ISLAMABAD, Pakistan, Dec. 9 (Reuters)—More than 50 persons have been arrested in Afghanistan for allegedly plotting to overthrow Afghan President Sadar Mohammed Daud, reliable sources said here today.

The plotters were reported to have been led by former Gen. Mir Ahmed Shah, who retired from the army last year, the sources said.

An undisclosed number of the alleged plotters, who were rounded up by security forces about two weeks ago, were military personnel, but no actual coup attempt took place and there was no bloodshed, the sources said.

They added that the conspiracy apparently resulted from disenchantment within the armed forces with President Daud, himself a former army strongman, who came to power in July, 1973, in a military coup d'état which ousted King Mohammed Zahir Shah.

A semi-official source described Mir Ahmed Shah as a devout Moslem with strong religious views but no political following nor any conspicuous backing in the army.

Visitors to Kabul, the Afghan capital, said on their return here that the city was calm but increased security was evident.

Seizures Demanded

Troops in Mexico Disperse Land-Reform Demonstrators

MEXICO CITY, Dec. 9 (Reuters).—A campaign by peasants for the breaking up of Mexico's big estates lost momentum today as groups blocking estate roads dispersed in the face of troops.

In the capital, 2,000 peasants ended their 36-hour occupation of the Agrarian Reform Ministry yesterday. Officials said they quit the building after they had been promised an investigation of their demands that the government seize landholdings in eight states, mainly in the southern region.

In the northwestern state of Sinaloa, 650 miles from here, peasants who had blocked roads and entrances to estates over a wide area began withdrawing after the police and troops threatened to evict them by force.

Local officials said about half the 4,500 protesters had gone home and most of the rest had moved their encampments onto public land to avoid clashes.

Echeverria's Lead

The peasant campaign during the last week was sparked by former President Luis Echeverria's seizure of estates in two northern states for distribution among landless peasants shortly before he left office on Dec. 1.

His move provoked bitter opposition from Mexico's main private enterprise groups.

The new President, Jose Lopez Portillo, was planning to meet business leaders tomorrow to seek a rapprochement as part of his strategy to bring the country out of an economic recession.

Officials said he was planning to offer a more pro-business outlook from government and closer consultation on economic policy if the businessmen would guarantee to step up investment in basic industries.

Plant Aide Slain

CIUDAD JUAREZ, Mexico, Dec. 9 (AP).—Five armed members of what police called a Communist terrorist group forced their way into a U.S.-owned plant here yesterday and killed the plant manager after dispensing propaganda to workers.

The manager of a Sylvania electronics plant was shot in the head after he apparently resisted the three men and two women intruders who broke into the plant about 7:30 a.m., the police said.

Local and federal police mounted a statewide search for the five, described as members of the 23d of September group.

Representatives of eight U.S.-owned firms, including General Electric, Westinghouse and Admiral, met yesterday afternoon with Juarez Mayor Raul Leezama.

Authorities said plant officials requested Mexican federal protection for the industrial complex that houses 14 U.S. and Mexican-owned industrial firms on the southwest edge of Ciudad Juarez, a city of more than 500,000 across the Rio Grande from El Paso, Texas.

Qadhafi's Talks In Moscow Seen As Inconclusive

MOSCOW, Dec. 9 (Reuters).—Libyan leader Moamer Qadhafi left here today for home after four days of talks which apparently failed to settle differences over ways of solving the Middle East problem.

Col. Qadhafi had what Tass news agency called "a detailed exchange of opinions" on world problems and bilateral ties with Communist party chief Leonid Brezhnev, Premier Alexei Kosygin and President Nikolai Podgorny.

Observers said the high-level attention given to the Libyan leader was exceptional for a Third World politician. They said it appeared the Russians were trying to convince Col. Qadhafi of the wisdom of reconvening the Geneva Middle East peace conference, an idea he has so far rejected.

But the wording of Tass reports on the talks gave no indication that the Libyan leader, who in a banquet speech here on Monday said "not too much significance should be attached to conferences," had been won around to this view.

The two countries signed three cooperation documents—a shipping agreement, a protocol for economic and technical talks and a cultural program.

U.S. Underground Test

WASHINGTON, Dec. 9 (Reuters).—The United States yesterday conducted its 13th underground nuclear test this year in the Nevada desert.

Swiss Army Sale Of Wine Draws Sour Grapes

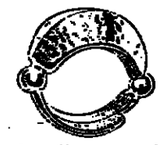
LAUSANNE, Switzerland, Dec. 9 (AP).—The Swiss Army came under fire today for selling wine.

The national Center for Alcoholic Problems charged this week that a growing number of army units were resorting to such sales as part of fund-raising efforts. It cited the case of a brigade commander who had promoted, on army stationery, the sale of wine in bottles with a "brigade label."

The official reply is that the proceeds from the sales served "military purposes, including sports training after duty," the statement said. "Authorities thus contribute directly to increased consumption" of alcohol, it said, demanding that "an end be put as soon as possible to the military wine trade."

Child's Sex Guide Ruled Obscene by European Court

LONDON, Dec. 9 (UPI).—It took five years for the courts to decide, but this week the ruling was handed down: Britain's "Little Red Schoolbook," a sex guide for children, is obscene.



The book, a translation from the Danish version, was seized in 1971 under the Obscene Publications Act shortly after its publication by Richard Handyside. The schoolbook case was tried by London magistrates, contested up to the Court of Appeals and finally tried by 13 judges at the European Court of Human Rights.

That court ruled that readers "could have interpreted some passages as an encouragement to indulge in precocious activities harmful for them or even to commit certain criminal offenses."

The judges said that they recognized that a fundamental concern in the case was the principal of freedom of expression but found that "restrictions on that freedom must be proportionate to the aim pursued."

They concluded that Mr. Handyside's human rights were not breached by banning the book.

Too Much Oil?

When the Alaskan pipeline was first being proposed some seven years ago, the argument was that the United States was becoming dangerously dependent on foreign oil, that we needed to exploit every drop of the resource for ourselves and get it out of the ground in a hurry, no matter what the environmental hazards. Even then, some skeptics suggested that the oil would eventually be sent to Japan, but that charge was scathingly denied.

The United States was then importing less than 20 per cent of its oil. Now, when it is importing 40 per cent and the oil from Prudhoe Bay is scheduled to go into the pipeline in a year or so, we are told that this Alaskan crude will be a glut on the West Coast market, after all. The Standard Oil Company of Ohio, which owns more than half the production, wants permission to ship the precious fuel to Japan. In payment, the Japanese would buy Mideast crude oil and have it shipped direct to American East Coast refineries, with both the United States and Japan saving on shipping costs.

* * *

The scheme might be ingenious except for one overriding fact: It would leave this country more than ever at the mercy of the OPEC producers as to price and as to potential cutoffs. Frank Zarb, head of the Federal Energy Administration, puts the matter succinctly: "It is not in the nation's best interest to let that oil go abroad."

The surprising oversupply on the West Coast is being attributed by some of the companies to a lowering of demand due to a reduced growth rate, to conservation, and to the opening last July of the Elk Hills Naval Petroleum Reserve in California. The first two factors are regrettably too modest to account for most of the change, and the Elk Hills production represents less than 15 per cent of West Coast requirements. A possibly significant factor is the importing of 400,000 barrels a day of Indonesian oil by Standard of California. This company finds it more profitable to import Indonesian oil, which it owns, than to refine oil from the North Slope, in which—unlike Standard of Ohio—it has only an insignificant financial interest.

Even if the Elk Hills flow is stopped and Alaskan oil is substituted for Indonesian (not an easy thing to do mechanically or economically in view of the heaviness of one and the lightness of the other) there will be a West Coast surplus and one that will grow larger as the Alaskan yield rises from its initial 600,000 barrels a day to an eventual 1.5 million.

Now that the pipeline has been laid, with billions of dollars at stake and the economy of Alaska in the balance, the question cannot be one of "shutting in" the oil, even temporarily, but of distributing it effectively. One proposal is to pipe it from Long Beach, Calif., to Midland, Texas, taking advantage of an abandoned natural gas line. California's Coastal Zoning Commission fears that the oil transfer might add significantly to the already polluted air of the Los Angeles region. Alternative lines have been proposed from British Columbia to Edmonton, Alberta; from Port Angeles, Wash., to Clearbrook, Minn., and across Guatemala to the Gulf of Mexico.

Any of these lines would take time and might well involve some environmental damage, but in the long run, some one of them may be essential. More immediately, the problem will be to distribute the initial flow from the Prudhoe Bay wells.

* * *

If it is not to go to Japan, then it must be brought East by tankers moving through the Panama Canal. Standard of Ohio and other companies contend that there are not enough tankers, since under the Jones Act only American vessels may be used to carry U.S. products from one U.S. port to another. Mr. Zarb, whose agency has made a long study of the subject, says that there are enough tankers and so does the Maritime Administration, which should know.

If there should nevertheless prove to be too few of them to carry the load, then it would be up to Congress to amend the Jones Act. Too much has been said about the value of Alaskan oil in reducing U.S. dependence on foreign sources, for it to be exported now and the country made more dependent than ever on the energy resources of foreign states.

THE NEW YORK TIMES.

Waldheim Renamed

It is no derogation of Kurt Waldheim to observe that he is now assured of another five years as secretary-general of the United Nations because no member government had anything against him. In particular, Mr. Waldheim had managed during his first term to avoid giving lasting offense to any of the five permanent members of the Security Council, whose "recommendation" is binding on the General Assembly.

China did veto Mr. Waldheim on the first Security Council ballot but only to make the point that the job ought this time to go to a Third World leader. Peking then joined the other permanent members to assure the Austrian's re-election. The only real issue in fact was whether the chief political and administrative office of an organization now dominated numerically by the developing countries should continue to be occupied by a European.

Mr. Waldheim's path was undoubtedly eased by the fact that the only actual Third World candidate—the only other person voted on—was former President Luis Echeverria Alvarez of Mexico, who had alienated some members by campaigning too obviously for the job. But all this should not be allowed to obscure Mr. Waldheim's creditable five-year record, especially his tireless efforts to involve the United Nations—often in the form of himself—wherever it might be useful in easing world crises.

A discreet career diplomat, Mr. Waldheim has never stretched the implied or "residual" powers of the secretary-general in his efforts to advance political solutions, as did the first two holders of the office, Trygve Lie of Norway and Dag Hammarskjold of Sweden. But he has been at least as active as Hammarskjold and far more vigorous than his immediate predecessor, U Thant of Burma, in traveling to the trouble spots to offer his own services or those available through UN machinery.

At this stage in the checkered 31-year history of the UN, an objective, sensitive, intelligent and exceptionally hard-working career diplomat from a neutral country best fits the requirements of the secretary-general's office as member governments in the majority conceive them. The Security Council acted wisely in giving Kurt Waldheim a second term.

International Opinion

Europe's Air Fares: A 'Jungle'

Starting from scratch, it would be hard to invent a structure of the baroque complexity, the devious intricacy, of European airline fares. If you book a ticket from London to Malaga, for example, you can choose from 30 different fares, including six categories of discount. Because of the endless variety of special deals, the rate you pay per mile varies wildly and with no apparent logic. Fares on journeys of almost identical length are widely different. Thus there is a 15-per-cent difference in the fares from London to Paris and from London to Brussels—journeys of almost equal distance. In their report on European airline fares, the Airline Users' Committee understandably describes this chaos as a "jungle."

The ultimate evidence that the fare structure needs an overhaul is the proliferation of black and "gray" markets in airline tickets which the committee describes. There is a turnover of between £40 and £50 million a year in illicit cut-priced tickets in London alone. This market is supported by the large number of cut-rate fare schemes which the airlines offer.

It is quite evident that the whole structure of European airline fares needs to be overhauled and simplified. The committee itself proposes a basic three-tier structure. First class passengers would pay their full share, and no longer be subsidized by economy-class passengers: businessmen flying economy class would be charged on the basis of cost, rather than on the present rough and ready principle of what the market will bear; and a new third class fare would replace the present jumble of special offers. This is a thoroughly sensible starting point. . .

—From the Guardian (London).

North-South Talks

The major industrialized countries appear to have succeeded in postponing the day of reckoning in their "dialogue" with the Third World on a new international economic order . . . The 19 developing countries represented in the North-South talks now seem to have reluctantly accepted that the closing ministerial session planned for next week should be put off until the spring . . . The West thus appears to have escaped, at least temporarily, from the trap that was closing in on it. . . .

—From the Financial Times (London).

Seventy-Five Years Ago

December 10, 1901

NEW YORK—The statement is made today that Andrew Carnegie has arranged to give a considerable sum, possibly $10 million, for the cause of university extension in the United States. Although information on the subject is very vague, it is stated that Mr. Carnegie's plan is to found a great national university at which any American could acquire higher education.

Fifty Years Ago

December 10, 1926

PARIS—"Spain is destined to become the playground of America and the American traveler going there will feel her welcome as in no other country," asserted Ogden H. Hammond, U.S. Ambassador to the Court of Spain, yesterday. "Motoring in Spain is excellent, the roads are the equal of any to be found in Europe," Mr. Hammond said in an address at the American Club.

'The Rest of You Secure the Halls and Playground—Begley, That's Your Chair Over There.'

When Britannia Waives the Rules

By Fritz Stern

NEW YORK.—The transitional phase in U.S. politics is not a propitious time for dealing with a complicated and controversial problem abroad, but the world at large does not always respect our four-year rhythm. Thus, decisions will soon have to be made concerning aid to Britain.

In the first place, the International Monetary Fund, where U.S. influence is great, must respond to Britain's application for a standby $3.9-billion loan to defend the pound; some British observers have talked of an additional, and larger, loan that should be sought among Britain's richest allies.

Britain has needed loans before; the very regularity of its requests may obscure the present crisis. At stake today may be Britain's political stability—and its role abroad. Responsible Britons now worry about the governability of the country, indeed about the survival of liberal democracy in Britain. A flawed decision on its request for help—in conjunction with economic developments over which Britain has no control—could bring about a sudden, perhaps irreversible, deterioration in Britain's political life.

Beyond Its Means

It is easy to blame the British for their predicament; they are their own best critics and don't need foreign generals to tell them what is wrong. Britain has lived beyond its means, warned Harold Macmillan in a recent broadcast. The crisis is not economic: it is structural and spiritual; it cuts to the very essence of Britain's way of life, on which in the postwar era a vast welfare state has been superimposed.

The leader of the Conservative opposition, Margaret Thatcher, recently exclaimed that Britain's plight did not represent a crisis of capitalism but the catastrophe of socialism. Actually, Britain has had the worst of both systems: a capitalism without sufficient managerial skill or incentive and a socialism mired in bureaucracy and trade-union selfishness.

The professional classes have been reduced to economic constriction, and the tax system represents a denial of hope. The loss of Empire proved hard; its legacy is the racial problem that embitters and endangers English life today. Devolution—the demand for Scottish autonomy—presents a further liability from the past. While the rest of Western Europe prospered, Britain was caught in the clinches of a stop-and-go economy. What statistics conceal is that the essential civilized qualities of British life were preserved—at a cost.

Radical Cuts

Given the British performance, it is not surprising that fiscal experts insist that radical cuts in public expenditures should precede a new loan. "Let Britain put its house in order first," reasonable men might argue, as they did last year about New York City. (On that occasion, the West German Chancellor, Helmut Schmidt, had to instruct President Ford that the world economy could not tolerate a bankrupt New York. It can tolerate a bankrupt Britain even less.) The financial community will speak with a powerful voice; politicians may have to defend their own priorities. Fiscal wisdom can be political folly; economic stringency applied at the wrong time can set in motion political events that produce an unimaginable upheaval. In the 1930s, the guardians of fiscal orthodoxy clung to "sound" policies that brought about social catastrophes.

There are sound reasons for helping—without demanding draconian reforms. Britain's prospects are reasonably good—if it can get through the next few years. By 1980, Britain will export oil, with obvious benefit to the balance of payments. The government of Prime Minister Callaghan, moreover, has maintained the social contract whereby trade unions renounced their extravagant demands for instant redress of past inequities. Inflation has been cut in half. For all its appeasing gestures to the radical left, the government has pursued a policy of moderation, and it is unlikely that the Tories could find another course.

The response of foreign lenders has to be finely calibrated: Massive austerity could produce a violent reaction that would be harmful to both major parties. A collapse of the Callaghan government would test Macmillan's fear: "If the Conservatives get in with a majority of 30 or 40, will they be able to govern the country?" Will the trade unions accept from Mrs. Thatcher, whom they would immediately brand as "a class enemy," what they would deny their own party? A return of the Tories with mounting unemployment could well turn the hope of social peace to the certainty of social conflict. The Labor party might finally split; a new socialist party, with a Trotskyist core and its class anger, would constitute the most radical party in Europe.

The British have a genius for temporizing, for gradualism, but past successes should not make us forget that there is also much bloody-mindedness, much pent-up resentment and frustration in Britain. Our very faith in Britain could blind us to potential trouble.

A sudden deterioration of Britain's political climate would bode ill for Europe. The left already demands a siege economy; protectionism could spread, with grave consequences to the European Economic Community. In arguing for help, the distinguished correspondent of the Financial Times, David Watt, emphasized the dangers to Europe "if the British stone crumbles from the arch."

Aid to Britain is an intricate technical question, fraught with political imponderables. The United States needs to be intelligently generous, as it was in the days of the Marshall Plan. We poured hundreds of billions into a futile and divisive war in Vietnam. A fraction of that sum could buy needed time for a much-needed ally. With luck, we will never know what disasters we escaped.

Fritz Stern, Seth Low Professor of History at Columbia University, wrote this article for The New York Times.

Carter's Agenda: Justice

By Anthony Lewis

WASHINGTON.—A new law that becomes fully effective on Jan. 1, 1978, will require agents of the Federal Bureau of Investigation to retire by age 55. It means that 650 men will have to leave the bureau during the next year—nearly one agent out of 12, among them some in senior positions.

Those prospective retirements are among a number of factors that could make the next year a decisive time for the country's most important law-enforcement agency. There is a good chance that the FBI will get a new director, too, although Clarence Kelley has said that he does not intend to leave. And the bureau's relationship to its parent Department of Justice is still being redefined.

All of this poses a great responsibility for Jimmy Carter and the man or woman he choses to be attorney general—and a great opportunity. The FBI not only has important functions in dealing with the enormous U.S. crime problem. It also has a good deal to do with setting the tone of civil liberties and official respect for law in this country.

Briefing Book

One of Carter's transition teams has been studying the Justice Department. It is due to give Carter a briefing book listing problems that may require early consideration by the next attorney general, and some possible policy options. The FBI is doubtless one of the topics.

Public debate about the FBI has focused on the dramatic disclosures of illegal action in recent years—such things as its repeated break-ins at the offices of the Socialist Workers party. Those episodes do raise extremely important issues, and they have had a large impact on feelings inside the bureau, but some informed persons think a less-discussed problem is just as weighty. That is the quality of the FBI's investigative work.

During his decades as director, J. Edgar Hoover put heavy emphasis on simple crimes with measurable results—notably auto theft—and on alleged internal security threats. His presentations to Congress emphasized the value of property recovered by the bureau, the number of stolen cars and the like. He was extremely reluctant to investigate organized crime or civil rights violations and moved only under pressure from Attorney General Robert Kennedy.

Accountability

More recently, the FBI has begun to shift its targets and its methods. Outside experts say that the quality of its investigations is improving—but that much more needs to be done to meet the sophisticated challenge of serious national crime.

The other crucial problem is that of accountability.

In the Hoover years, the FBI came virtually to ignore the Justice Department. President Ford's attorney general, Edward H. Levi, has said that the very day he arrived at his office, an FBI man asked him to sign wiretapping orders that neither he nor anyone else in the department had studied. He refused.

Levi has done much to regulate the work of the bureau, working out some written guidelines and limiting its security operations. FBI officials are more concerned about the Justice Department now—but relations are still quite distant and dim. Present department officers agree that much remains to be done to assure accountability.

The most significant single step the next administration could take to improve FBI methods and accountability would probably be to appoint a really strong-minded and respected new director. That is said with due respect for Kelley's transitional role, but he has not been a strong leader.

The new man should come from outside the bureau, and probably from outside the immediate world of police work: he should be a lawyer so hardheaded and at the same time so committed to legal rights that he would have the respect of both old-time FBI people and outsiders.

Apart from the FBI, many interesting issues in the law await Carter. He promised during the campaign, for example, to pick both federal prosecutors and judges on merit, chosing from persons recommended by "independent, blue-ribbon judicial selection commissions." He did exactly that as governor of Georgia, but it will not be so easy in Washington.

Voice of Senators

Traditionally, senators have an influential or even a decisive voice in naming federal judges and U.S. attorneys in their states. Can Carter persuade them to make their recommendations from a list drafted by some new commission?

Will senators help choose the commission? Will Democratic and Republican senators be expected to work together?

Those are just a few of the hard questions that will have to be answered before the promised change is made on appointing methods. And there are many other large issues ahead in the legal area: drug law enforcement, the confused and often contradictory anti-trust policy, the position on so-called reverse discrimination.

Law is less glamorous as a subject for speculation than what Carter will do, and whom he will appoint, in foreign affairs. But the decisions and appointments that will determine the federal government's legal directions over the next four years could matter as much to the quality of American lives.

Letters

Ulster Solution

Lasting peace will not come to Northern Ireland merely by the cessation of street violence as supporters of the peace movement tend to believe.

Only when Britain declares her willingness to carry out an orderly withdrawal will the tide of bitterness subside.

Supporters of current British policy who claim that withdrawal will lead to worse turmoil echo previous British politicians who, up to 1922, made lurid predictions about southern Irish independence in an effort to prevent it.

Independence, once gained, led not to anarchy but social calm. To the chagrin of British Empire enthusiasts, the native Irish were able to run their own country on a sounder footing than the old colonial authority.

It is no coincidence that the most troublesome part of Ireland today is where the British writ still nominally runs. Imposed British solutions, whether well-meaning or not, have down the years only exacerbated the situation: Today, Ireland suffers its longest period of continuous strife in at least 300 years.

The one solution not yet attempted is complete British withdrawal from the island of Ireland. The omens for it are good. Once die-hard members of the loyalist community are now questioning the British link and advocating an independent Ulster with equal rights for both communities.

Britain, the ball is now in your court.

TOMAS O'GALLCHOBHAIR.
Derrybeg, Ireland.

The International Herald Tribune welcomes letters from readers. Short letters have a better chance of being published. All letters are subject to condensation or space reasons. Anonymous letters will not be considered for publication. Writers may request that their letters be signed only with initials, but preference will be given to those fully signed and bearing the writer's complete address.

Extra Man

As a Canadian living in Europe, I was delighted to see a brief account (IHT, Nov. 30) of Canada's annual football classic, when the Ottawa Roughriders won the national championship. I suggest, however, for future reference, that your headline writer, who reported "Ottawa 11 Victor in Final Seconds" take note of the fact that there are 12 men on a Canadian football team.

KENNETH C. BROWN.
Stockholm.

Toughing It Out In Taiwan

By William Buckley Jr.

NEW YORK—In Washington last week, a daylong conference of U.S. scholars, diplomats, and journalists focused on the question "The United States and China After Mao." They were bound by the conviction that the United States ought not to fall for the old "normalization" line, so attractive to Democrats propelled by the inertial impulse of their own slogans. It was an impressive affair, by all accounts, and, in intensity of conviction and enthusiasm for its point of view, testimony to the fact that the old anti-Chinese Communist coalition is not quite dead.

The root of the intellectual/juridical problem is the Shanghai Declaration of 1972. This, as promulgated, you will remember, after several all-night sessions in Peking and Hangchow between President Nixon and Chou En-lai. What the Shanghai Declaration said was that all of China (meaning the mainland and Taiwan is one country, and that interference in the internal affairs of a country (not counting Vietnam, Korea, Berlin, Poland, Romania, Bulgaria, Czechoslovakia, and Germany) will not be tolerated.

The unofficial U.S. interpretation of this was that it would not interfere in U.S. relations with Taiwan, since international declarations of this character tend not to upset de facto accommodations of long standing. But the Chinese, and more importantly the Chinese lobby in the United States, took the declaration to mean a mandate for instant normalization. Normalization defined as ditching Taiwan, by terminating our defense treaty, and withdrawing all diplomatic representation.

Dreams

It is a curious phenomenon to see in the United States, where it would appear that many of our diplomats and poets dream at night about the unification of China. Not since Garibaldi stirred all of Europe with his passion for the unification of Italy has there been anything comparable. There are others of us who manage, while weeks at a time caring not at all if Taiwan and Peking follow their separate ways, lest we are perhaps untouched by that idealistic compulsion. One wonders why Senator Mike Mansfield, D-Mont., and others spend less time dreaming about the unification of Germany, or Korea—but there is no doubt that their dreams constitute an important datum in U.S. political life.

Now, the consensus of the conference in Washington is that Peking desires far less ardently than the United States the unification. On meeting after meeting between Chinese plenipotentiaries and the U.S. secretary of state, the matter of Taiwan has been listed deep down in the agenda, packaged with problems that receive only cursory attention.

The assumption is this, that if the United States were to desert Taiwan, there would be no excuse left for failure by China to attempt to take it over by military force. But since this would require an amphibious operation on a great scale, the cost might not prove to be worth it, and the results of it on world opinion would be unpredictable. Besides which, presumably the whole operation could be aborted at any moment by the simple act of a declaration of independence by Taiwan. This could of course be managed at any moment.

And then looked at the other way round: What would we concretely achieve by turning Taiwan over to the mainland? Our diplomatic representative in Peking is not that impatient for promotion to the rank of ambassador to China. His ambassadorship would not, in any event, mean access to secrets of Chinese life which we need to have in order to spare ourselves a third world war. Fully accredited diplomatic installations maintained by Western European countries are as much at sea as we in trying to understand the drift of affairs in China.

The disposition of the Chinese to amiability toward the United States reflects one single consideration: Are we tough enough and strong enough to provide a counterweight to Soviet strength? Here we have the subtlest consideration of them all. Although by yielding Taiwan we would be accommodating China, in doing so we would reveal that weakness in character which would make us less estimable, strategically, in the eyes of the Chinese. This all the arguments, let alone the moral arguments, call on us to stay. It is nice, every now and then, to hear it said: Yankee welcome.

PARIS THEATER

Another Hit for Anouilh

By Thomas Quinn Curtiss

PARIS, Dec. 9 (IHT).—Jean Anouilh must be the most prolific dramatist now in active service. His "Scenario" is a hit at the Théâtre de l'Œuvre and his second 1976 play, "Chers Zoiseaux" has just opened at the Comédie des Champs-Elysées.

Anouilh's plays are often failures with the critics, but very rarely with the public. No French stage author since Henri Bernstein has had as faithful a following.

The alleged purpose of comedy is to ridicule the vices and fads of the age and, by so doing, cause society into improvement. Such is the theory, but somehow one does not see Anouilh as a Billy Sunday. Rather he appears in the mind's eye as a showmaster putting his clownish characters through hoops. His satire for satire's sake.

In his latest contribution he is at it again. The central figure Anouilh has no modern heroes is a tired hack writer who has directed scores of best-selling detective yarns. In a burst of good taste, he has given up whodunits. But eventually the economic pinch forces him to return to his dreary labors and with a German au-pair as his secretary he begins dictating yet another thriller, this one set in a lonely Irish castle and baptized "The Birds Befoul All."

The sycophant relatives are a motley crew. Among them are a duo of nasty, noisy granddaughters in their early teens who march about protesting against protest parades that keep their parents from home. Their father is an aimless loafer who spouts leftist slogans and their mother, of like political persuasion, has fallen in love with a professional agitator. In addition to his subversive activities the male parent has seduced a 15-year-old girl. Her outraged father arrives without, with threats to blow up the house unless the culprit is delivered into his hands.

The home is held at bay for the duration of the second act when certain obnoxious guests—a pseudo-intellectual harpy and an establishment fogey—are paying a call. Having assembled his dramatis personae in this nest, Anouilh proceeds to expose their baseness. Under pressure, every one of them shows an innate instinct for treachery. The women are either sluts or ninnies and the men are cowardly rats. It is not a pretty picture, but it is one that audiences, if not all critics, relish for its reproduction of contemporary society.

The play has been denounced as another ignoble mud bath. This, it seems to me, is hitting it with the wrong stick. Anouilh has written, on occasion, of pure spirits—of Joan of Arc and Thomas à Becket. That he has a shrewd eye for human foibles can scarcely be denied and the truth of his character delineation is proven by the responsive laughter it wins. But here his general portrait with crude melodrama forcing the issue is a bit slapdash and exaggerated. Actually his burlesqueing of types would be excellently suited to revue sketches where his points could be made more quickly and with like devastation. Some brisk song and dance would also make the evening less tedious.

Runs Out of Fuel

Preferring to be sardonic in full-length play form, Anouilh runs out of fuel in the interminable "dialogue" between the unseen avenger and the personnel gathered in the parlor during the second half. What has begun as a comedy of manners descends into broad, wise-crack-ridden farce. The able company eases the sudden jolt as far as possible. Michel Lonsdale delivers a brilliant caricature of the moony yes-man of leftist causes and, balancing this, there is Jacques Castelot's equally entertaining bumbling conservative who never reads newspapers. Guy Tréjean plays the weary novelist with robust humor. Outstanding in support are Françoise Brion, Uta Taeger, Odile Mallet, Gérard Dournel (as a sloppy, one-eyed servant) and Catherine Arditi and Régine Teyssot, as the dreadful grandchildren.

In the program Anouilh wishes the spectator a good evening and confesses to having no other ambition. The evening—the stalled sections aside—is goodish, coming off more as a show than as a play of high literary value. The author has aided it with clever casting and expert direction (Roland Pietri, as usual, acting as his assistant). Jean Denis Malcles's decor accents with its uncomfortable, gloomy drawing room the leitmotif of the script.

Françoise Brion, who is appearing in Jean Anouilh's "Chers Zoiseaux."

DANCE AND OPERA IN FRANCE

Béjart's Molière, Ginastera's 'Rodrigo'

By David Stevens

PARIS, Dec. 9 (IHT).—With "Le Molière Imaginaire," Maurice Béjart has produced one of his full-length, biographical, omnibus spectacles, taking off on the life and times of the historical *patroné* of the Comédie-Française, where this new show has just had its first performances.

Béjart calls it a *ballet-comédie*, an inversion of the term *comédie-ballet*, invented to describe some of Molière's collaborations with Lully, and intended to suggest a preponderance of dance over the spoken word. It is a good show for the end of the year, for here Béjart is almost consistently affectionate and lighthearted, and he is aptly abetted by the original score, exuberant, adroit and undemanding, by the Italian composer Nino Rota, who is perhaps best known for his film collaborations with Fellini and Visconti.

Molière is represented as a child, then by the dancer Bertrand Pie, then by the astonishing former Comédie-Française actor Robert Hirsch, who doubles as a kind of nonstop master of ceremonies and, even with a charley horse disabling one leg, very nearly takes away the dancing honors from Béjart's own troupe.

The stage action involves a mixture of real characters from Molière's life and the hardly less real characters from his plays, and it slips imperceptibly from the real to the allegorical to the theatrical. Death is on hand too, from the beginning, in the white-faced, piano-playing person of Elizabeth Cooper, but when Molière has his fatal attack in the famous chair, death's triumph only lasts a moment until Hirsch leaps up and joins in the buoyant finale.

There is plenty of dance, from solos to pas de huit and most of the combinations in between, although Béjart's invention here is not at its best. The strongest impressions were made by the girlish Rita Poelvoorde as Mlle. de Brie, Bertrand Pie as the young Molière, and Jorge Donn as the Sun King himself, doubtless cutting a finer figure and dancing better than the original ever did. The sets and costumes of Joëlle Roustan and Roger Bernard were colorful and amusing.

Opera Premieres in Europe

STRASBOURG (IHT).—Alberto Ginastera's first opera, "Don Rodrigo," which had its first performance in 1964 in Buenos Aires and which was Placido Domingo's earliest big success in the tenor title part in New York in 1966 (it was the first opera to be performed in Lincoln Center), has just been given its European and French-language premiere here in a co-production by the Opéra du Rhin and the Lyons Opera.

The Argentine composer seems to have been captivated by the colorful, quasi-historical subject, in much the same way that Verdi was attracted to his super-romantic stories. Rodrigo, the last Visigoth king of Spain, seals his eventual doom at the outset by peeking in a forbidden coffer to solve the mystery of the Cave of Hercules. The message is that he will be the last of his line, and the agent of his downfall is Florinda, the daughter of one of his lieutenants, who turns against him after Rodrigo's seduction of his daughter. History, mystery and sex—who could ask for more.

But if Verdi is Ginastera's spiritual guide, his intellectual guide seems to be Alban Berg, and his musical language is a richly colored use of Schoenbergian dodecaphonism. Like "Wozzeck," "Don Rodrigo" is nothing if not highly organized. There are three acts, each with its own character (epic, lyric, dramatic), and each act has three self-contained scenes with its own subtitle and formal musical structure. Dramatically and musically, the opera is shaped with careful symmetry, and the singers are given heroic bel canto passages to sing as well as the entire Schoenbergian array of spoken and semi-spoken lines.

It is a mighty effort to create a Verdian atmosphere with modern means, and it almost works, although not quite—at least in this honorable but earth-bound production. Ginastera draws some marvelous effects from a huge orchestra, but the climaxes never quite live up to the tense anticipations; the end impression of the music is more of calculation than inspiration.

Some of the composer's more spectacular effects were simply not realized here, such as the stereophony of horns and percussion intended to be placed in the auditorium. Louis Erlo's staging and René Allio's designs tended to the matter-of-fact rather than the larger-than-life that the work demands.

The Strasbourg company staffed the lesser roles admirably, but Gérard Quenez in the title role sang with colorless tone, while Galina Savova as Florinda deployed ringing top notes, but some very erratic vocal production below that. Claude Schnitzler was the excellent conductor.

LONDON

Strauss for the Holidays

By Henry Pleasants

LONDON, Dec. 9 (IHT).—The English National Opera traditionally greets the Christmas season with lighthearted fare, and does so this year with a tasteful and surprisingly idiomatic production of Johann Strauss's "A Night in Venice," introduced last night at the Coliseum.

That an English company can come so close to the Viennese idiom is less surprising when one examines the credentials of those involved. Producer is Murray Dickie, the Scottish tenor whose long career at the Vienna Staatsoper was rewarded with the title of *kammersänger*. He is also responsible for the adaptation of an originally wretched libretto and for a consistently intelligible and singable translation. The designer is Walter von Hösslin, whose experience of the Viennese theater dates back to his association with Max Reinhardt at the Volksoper in the mid-thirties. And the conductor is the late Josef Krips's younger brother Henry.

If what we get is more style than substance, the fault lies with the original librettists, Zell and Genee, and, to a considerable extent with Strauss himself, who found 17th-century Venice less congenial to his melodic genius than 19th-century Vienna. He was aware of the score's deficiencies, and is said to have made seven revisions. Erich Korngold subsequently put together a performing edition, and this was the basis of the Anton Paulik edition used in this production.

Paulik shrewdly looked beyond the original score, interpolating such redoubtable *Schlagers* as the "Annen Polka" and "The Dynamieden Waltz" (which Richard Strauss would seem to have appropriated for Baron Ochs in "Der Rosenkavalier"). These "ringers" were predictably the show stoppers last night, especially the "Annen Polka," deliciously sung by a "tipsy" Valerie Masterson.

"A Night in Venice," even in this production, suffers from a libretto that is still silly nonsense despite Dickie's ministrations. But the production is pretty and lively, it is gaily and professionally played and sung, especially by the ever engaging Miss Masterson, and there is always a good tune in the offing when the nonsense palls. It remains in the ENO repertoire through January.

SHARPS & FLATS

ISTANBUL—Singers from six countries came out with the top honors in the first Turkish International Song Festival last weekend. They were: Oscar Harris of the Netherlands, who got the grand prize; Neco of Turkey, first prize; Lily Ivanova of Bulgaria and John Dawson Read of England, a second; Noelle Cordier of France and Marion of Finland, third. The Turkish-born brothers Ahmet and Nesuhi Ertegun, now U.S. citizens and presidents of Atlantic Records and Warner Brothers Enterprises respectively, gave $100,000 to help victims of recent earthquakes. The Ertegunes were co-chairmen of the jury.

* * *

GENEVA—Milt Buckner is at the Popcorn Club for the month of December. Tap dancer Jimmy Slide and saxman Buddy Tate are among the many guest stars scheduled to appear.

* * *

BRUSSELS—The Stars of Faith of Black Nativity will give a concert on Dec. 16 at the Centre Culturel Strombeekbever at 8 p.m.

* * *

MUNICH—Wishbone Ash and the Sutherland Brothers will be at the Olympiahalle Dec. 3 at 8 p.m.

* * *

The Golden Gate Quartet, continuing its tour of Germany, will be in Herne Dec. 10 at the Kulturzentrum; in Hannover the following night for a TV appearance; in Bersenbruck Dec. 12 at the Aula Gymnasium; in Bochum Dec. 13 at the Ruhrlandhalle; in Mulheim/Ruhr Dec. 14 at the Stadthalle and in Krefeld Dec. 15 at the Seidenweberhaus.

* * *

LONDON—George Melly, John Chilton's Feetwarmers and the Ronnie Scott Quartet open at Ronnie Scott's on Dec. 13 for three weeks, replacing Linda Lewis. Frankie Vaughan is at the Talk of the Town.

* * *

HELSINKI—The Delta Rhythm Boys are at the Fiskartorpet through Dec. 18.

* * *

PARIS—Caravan, Kevin Ayers and Soft Machine will be at the Palais des Sports Dec. 13 at 7 p.m. Wishbone Ash will be at the Pavillon de Paris Dec. 17 at 8 p.m. Singer Marc Ogeret, accompanied by a young pop group, is appearing nightly at the Théâtre Hébertot through Dec. 11. Ogeret interprets the poems of Louis Aragon and Pablo Neruda. Sam Woodyard is at the Hôtel Méridien, Rhoda Scott and Bill Elliott at the Club St. Germain, Michael Silva and Christian Donnadieu at the Lady L, Memphis Slim and Jerome Van Jones at the Trois Mailletz and Jimmy Gourley at the Caveau de la Montagne.

This week's top single in the United States is "Tonight's the Night" by Rod Stewart, and in Britain, "Under the Moon of Love" by Showaddywaddy.

— FRANK VAN BRAKLE.

FBI Agents Recover Stolen Dutch Paintings

LOS ANGELES, Dec. 9 (UPI).—Seven paintings stolen from a Dutch art collector last August have been recovered by the Federal Bureau of Investigation, but an early Rembrandt, taken in the same burglary, is still missing.

Two residents of the Netherlands, arrested after an attempt to sell the seven paintings valued at $100,000 to undercover agents for $150,000, were arraigned yesterday on charges of receiving and concealing stolen property transported through interstate and foreign commerce.

Peter Johannes Rombouts, 45, was held on $75,000 bail and Gus Kouverboven, 34, was held on $50,000 bail.

The eight paintings, including the Rembrandt valued at $100,000, were taken Aug. 19 from a home in the Dutch town of Bebilt.

If you're looking for a transnational bank, come to the Pyramid.

The Bankers Trust Pyramid is virtually everywhere. We have offices in 49 key cities on 6 continents and a network of 1,700 correspondents in 119 countries.

But being transnational—that is, able to conduct business beyond national boundaries—is not as important as *how well* we conduct business. We pride ourselves on being skilled professionals, with over 60 years of experience in international banking to draw from.

It would be fairly difficult to exhaust our international services. They range from complicated loan syndications, overseas private placements and trade financings, through foreign exchange and cash and Eurocurrency management, to routine remittances via air freight.

Our bankers are prepared for the most intricate and demanding projects. (A case in point might be one involving a transnational company, a developing country, several government agencies and multiple currencies.)

This is why so many companies come to us for so many different types of financing—a Yugoslavian nickel mine, for example, or an American company building tractors in Germany for Turkish farmers, or a North Sea oil exploration project, or an American company exporting grain throughout the world.

Wherever you see the Bankers Trust Pyramid, you're dealing with a full service bank in the fullest sense of the word, with the capacity to raise, lend and manage money worldwide.

Whatever your needs, a visit to the Pyramid can be a rewarding experience.

U.S. Weighing Options On Sterling Balances

By Edwin L. Dale Jr.

WASHINGTON, Dec. 9 (NYT).—U.S. officials weighing a major international effort to cope with the perennial problem of Britain's sterling balances are facing a choice between two diametrically opposed solutions.

One would preserve and stabilize these balances through various forms of guarantees and standby credits for Britain from the United States and other countries in a position to help.

The other would get rid of them for good and would bar any future buildup.

It is possible that nothing at all will be done. The U.S. government is not yet committed to anything. But it is evident that the issue will be taken up in the coming weeks with the aim of finding a solution.

'Official' Balances the Problem

The sterling balances, now amounting to the equivalent of about $10 billion, are pounds owned by foreigners and deposited or invested in London. About half are privately held, and there is little discussion about these. Many individuals and businesses find it convenient or profitable to hold pounds, and these balances do not pose a major problem.

It is the other half, held by foreign governments and central banks, that is at stake in negotiations that seem likely to begin soon and that Britain urgently seeks. A large portion is held by oil-producing countries, though exact holdings are not published.

Sales by foreign "official" holders of sterling so far this year have been one cause of the decline in the exchange rate of the pound. Harold Lever, a Cabinet member, said in a visit here last month that the pound could not be truly stable until this unpredictable and volatile element in the equation was dealt with.

This has been a periodic British lament, particularly when foreign official holders were running down their holdings, and top U.S. officials are skeptical about how serious the problem is. A common view here is that if Britain's government ran the economy properly, the sterling balances probably would not be much of a problem.

However, there is obvious willingness here, in the face of a strong U.K. initiative, to consider the matter. And this is in full awareness that Washington would bear a major share of any "solution" at a time wher there are many other claims on U.S. budgetary resources.

U.K. Fuzzy on Goal

The U.K. government has been very fuzzy—even in private—on exactly what it wants. But thinking here is well advanced, and the two entirely different approaches have come into focus. There is considerable sympathy here for the objective of getting rid of the sterling balances, though this is probably not what Britain is seeking.

The technical term is "funding" the balances. The simplest way to describe the process is to assume that the United States alone comes to Britain's aid. It involves several steps:

- The present official holders of sterling accept dollars instead of pounds.
- Britain's "debt" is now to the United States instead of to a group of other countries. There are no more official sterling balances.
- Britain agrees to pay off this debt of some $5 billion over an agreed period of time, say 10 years, with an agreed interest rate. A crucial question would be the exchange risk—whether the debt would be denominated in pounds or dollars.

Britain would take steps, such as a "negative interest rate," to make sure that there would not again be a buildup of foreign official holdings of pounds except for very small working balances.

For Britain, this would mean that what amounts to a debt—foreign official sterling holdings built up originally during World War II—would be recognized as a debt and would have to be paid off. One thing that could make this a tolerable proposition is the prospect that North Sea oil may dramatically improve Britain's balance of payments in the years ahead.

The other alternative would presumably be some version of the "guarantee" approach taken in a package negotiated in 1968, now expired. The sterling holders would get an exchange rate guarantee—meaning compensation if the pound's exchange rate should fall below a specified level—to induce them to hold on to their pounds. Britain would get standby credit from the United States and others to be used if the sterling balances, despite the exchange-rate guarantee, should drop below an agreed amount.

Although there has been little of a specific nature from London, officials here suspect that Britain prefers the guarantee approach—sometimes called a "safety net." U.K. bankers clearly prefer it because pounds would continue to be invested and deposited in London.

If the funding approach is used, other countries in a strong international position besides the United States, such as West Germany, would probably participate. The International Monetary Fund would be a possible vehicle for taking over the pounds and giving the present official sterling holders dollars and other acceptable currencies, but this approach would strain the IMF's present limited resources of usable currencies.

Profit Drops Sharply at British Firm

LONDON, Dec. 9 (AP-DJ).—J. Lyons & Co., the catering and food processing company, today reported a net profit of £938,000 in the six months ended Sept. 10, down sharply from £3.6 million in the same period a year earlier.

Turnover rose to £340 million from £301 million. The company declared an interim dividend of 2.037 pence, but said that the payment did not imply a commitment concerning a final dividend.

The company also said that it has changed accounting methods for the reporting of results of some of its subsidiaries not operating on the same fiscal year period. If the old system of accounting had been used, the six-month period would have shown a post-tax loss of £2.37 million compared with a profit of £714,000.

While the operating profit of the group for the balance of the year is expected to show an improvement, this may be more than offset by extra costs of higher interest rates in Britain and of overseas taxes, the company said.

In order to improve its position, Lyons has sold off some £50 million of assets since the beginning of November. Yesterday, it announced it had disposed of the Wimpey franchise in Britain and Tetley in the United States. United Biscuits bought the Wimpey operations in a transaction valued at £7 million. Liggett, the U.S. tobacco group, paid £16.5 million for the U.S. operation of Tetley, which markets tea and coffee. Earlier, Lyons had sold 35 hotels it operated to Trust Houses Forte for £27.6 million.

GHH Net Rises

OBERHAUSEN, West Germany, Dec. 9 (AP-DJ).—Consolidated net profit of Gutehoffnungshuette Aktienverein (GHH) rose to 92.5 million deutsche marks in the year ended June 30 from 63.5 million DM in the preceding year, the machinery maker reported today.

Group turnover rose to 11.1 billion DM from 9.9 billion DM in the previous year.

GHH set an unchanged dividend of 14 per cent.

Currency Futures Fraud Charged By Panel in U.S.

CHICAGO, Dec. 9 (AP-DJ).—An apparent crackdown against illegal use of futures trading to avoid taxes has spread to the International Monetary Market (IMM) of the Chicago Mercantile Exchange.

The Commodity Futures Trading Commission filed a complaint yesterday alleging that a Chicago commodity firm and 10 individuals committed fraud through fictitious, prearranged trading of currency futures on the IMM. The commission is also assisting a grand jury investigation of soybean trading on the Chicago Board of Trade.

The latest complaint may be the first in a number of such actions involving IMM trading. Some of the exchange's most prominent traders are reportedly being investigated for possible violation of tax and commodity laws.

Named in the complaint are Siegel Trading Co.; Joseph Siegel, the firm's president; Alvin Winograd, its vice-president and secretary-treasurer; Carl Leaven, also a vice-president, and Edward Zelner, an IMM floor broker for the company.

The complaint also named Maury Kravitz, a Chicago attorney and IMM floor broker, and Alan Freeman, a general partner of Rosenthal & Co., a Chicago commodity brokerage firm and an IMM floor trader, among other individuals.

IMF Plans To Sell Gold Each Month

$137 an Ounce Set At the Latest Sale

WASHINGTON, Dec. 9 (IHT).—The International Monetary Fund, which yesterday sold 780,000 ounces of gold at a common price of $137 an ounce, announced that it is changing its auctions to a monthly basis from the present system of sales every six weeks.

The IMF said it will hold its next auction on Jan. 26, when it will auction a total of 780,000 ounces of the metal at a common price.

Starting in March, the monthly auctions will be held on the first Wednesday of each month and 525,000 ounces of gold will be sold at each auction, the IMF said.

Details of the monthly auction will be made about three weeks before each sale, and the pricing *method will remain unchanged* for three consecutive auctions, the IMF said.

Bids from successful buyers yesterday ranged between $137 and $150 an ounce and averaged $137.89 an ounce, the IMF said.

It received bids for a total of 4,307,200 ounces, up from the 4,241,000 ounces at the fourth auction held Oct. 27, when successful bidders paid between $116.80 and $119.05 an ounce.

Gold was fixed in London this afternoon at $135.65 and closed at $136.50 to $137, up from $135.70 yesterday.

Yesterday's sale, the fifth in a series of scheduled auctions, raised about $75 million for the IMF's trust fund to avoid developing nations. So far, about $320 million has been raised for the trust fund.

The IMF also said it expects the first in its four yearly gold restitution operations will be completed by the first half of January.

Under the agreement reached in Jamaica, IMF members will be able to buy 6.25 million ounces of gold at the official price of 35 special drawing rights ($42.22) an ounce in proportion to their quotas within the IMF.

A total of 25 million ounces of gold will be returned to members during the four-year span of the plan.

Surprise Surplus In N.Y. to Help Redeem Notes

NEW YORK, Dec. 9 (NYT).—New York City financial officials, after a long struggle to conserve cash resources to pay current expenses, disclosed yesterday that they expected a cash surplus of up to $300 million this year—big enough to help redeem a significant portion of outstanding short-term notes as demanded by the State Court of Appeals.

The cash surplus came to light as one of the key features in the latest proposal advanced by city and state officials to meet nearly $1 billion in note payments. The notes had been subjected to a year-long moratorium that the state's highest court declared unconstitutional last month. The financial officials said that perhaps as much as $200 million of the surplus could be used for note repayment.

City and state officials last week said they would attempt to persuade the noteholders to accept less than full cash payment for their notes. But now they say they are pursuing an approach to meet the entire $1-billion payment in cash, if possible.

The city must pay interest on more than $300 million of notes Monday. The one-year notes were issued on Dec. 13, 1974, with a 9 1/3-per-cent yearly interest.

Under the moratorium, interest was cut to 6 per cent a year. With the freeze lifted, holders said they will not accept the lower rate.

At the 9 1/3-per-cent rate, the city would have to pay out $26.4 million to holders, instead of $16.7 million at the lower rate.

Today, Controller Harrison Goldin said the city plans to pay only 6-per-cent interest on the notes. However, the said the rate to be paid is subject to later adjustment by the Court of Appeals.

Mr. Goldin said interest on the balance of the $1 billion in notes will also be paid at the 6-per-cent rate as they become due, unless the court rules otherwise.

FINANCIAL NEWS AND NOTES

Rolls Royce Wins Soviet Order

A consortium headed by Rolls Royce (1971) Ltd. has won a £100-million order for 42 gas pumping stations for a new 800-mile pipeline in the Soviet Union. The consortium, Coberrow Ltd., also includes the U.K. units of the U.S. firms Cooper Industries Inc. and Williams Cos. The jet turbines used to pump the gas from western Siberian fields to Chelyabinsk in the Urals will be built by Rolls Royce. Most of the pumping equipment will be constructed by Cooper and overall coordination for installation of the system will be handled by Williams. Coberrow hopes to receive further orders for other power stations along the 18,000 miles of pipeline expected to be laid in the Soviet Union over the next five years.

Daimler Sees Record Sales, Net Up

Daimler-Benz group sales should grow by 2 billion deutsche marks this year to more than 23 billion DM, an all-time high, while earnings should exceed last year's 310 million DM, reports Joachim Zahn, management board chairman. Automobile production is expected to increase 5.7 per cent to 370,000 units for the year, another all-time high. The order inflow has continued strong, Mr. Zahn notes, so that production in 1977 should increase to about 400,000. The company's capital spending next year will be focused on expanding production capacity. The firm's five-year investment plan calls for expenditures of 5 billion DM to reach auto production capacity of 450,000 by 1980. Commercial vehicle production should be up 7 per cent in the year, to 346,000 units. Domestic group sales for the year should total more than 19 billion DM, up 11.1 per cent from the previous year. Autos should make up about 48.5 per cent of sales, against 46.5 per cent, and commercial vehicles about 48 per cent, against 50.1 per cent. World turnover is expected to increase 10.6 per cent to 23 billion DM.

Thomson to Control Ericsson Unit

Thomson-CSF will take a majority stake in Sté. Française des Téléphones Ericsson through an exchange of shares. Earlier this year, Thomson bought Cie Générale d'Electricité 16-per-cent stake in Téléphones Ericsson. In the latest agreement, Thomson will acquire 51 per cent with the remaining shares held by L.M. Ericsson of Sweden and the public. Financial details of the transaction were not disclosed. The French Ericsson unit lost 50.1 million francs (about $10 million) in the first half, compared with a profit of 11.2 million francs in the year-ago period. It expects to report a loss, though less serious, in the second half. Thomson, the telecommunications division of the Thomson-Brandt group, says that despite the new charges resulting from Ericsson's losses and the acquisition of a controlling interest in Le Matériel Téléphonique from International Telephone & Telegraph last June, it expects to post an increase of about 20 per cent in 1976 sales and earnings. The French government agreed to place major contracts for telephone equipment with the Ericsson and ITT units after both companies agreed to "Frenchify" their subsidiaries operating in France. Thomson's 68-per-cent stake in LMT cost about $160 million.

U.S. Stock Markets Agree to Link Trading

By Jack Egan

NEW YORK, Dec. 9 (WP).—U.S. stock exchanges agreed yesterday, as expected, to a proposal to link their market places to form the basis of a national market system.

The agreement represents a modest and inexpensive approach to reaching a national market system, which Congress mandated in legislation passed in 1975. The emphasis is on maintaining the present autonomous operation of individual exchanges, but the agreement would link them through a communications system for the first time.

The proposed system is also an alternative to far more ambitious and expensive projects for a computerized central execution system that would handle most routine trades automatically. Some persons fear those projects would spell the end of the country's exchanges.

Representatives of the New York, American, Midwest, Pacific, Philadelphia and Boston stock exchanges signed the agreement yesterday. The pact must still be ratified by their boards. Also signing was the head of the National Association of Securities Dealers, which represents over-the-counter dealers in exchange-listed securities.

The agreement will be submitted to the National Market Advisory Board next week for endorsement as the preferred way to proceed toward a national stock market. The NMAB was formed by the Securities and Exchange Commission to advise it on how to proceed toward a national market, and the SEC must give ultimate approval to any plan.

The proposed system is expected to cost $1.25 million and will take 12 to 15 months to put into place, Securities Industry Association president Edward O'Brien, chairman of yesterday's meeting here, estimated. The SIA is the brokerage industry's trade group, and has been instrumental in getting the exchanges together on this issue.

Under the proposal, specialists making a market in a particular stock will be able to communicate with their counterparts on other exchanges for the first time.

Each market maker, in addition, will display his current bid and ask quote on a stock via a composite quotation system, allowing brokers to know where the best execution price is available for their customers on a particular trade.

Paris Bourse Struck

The Paris Bourse was closed Thursday due to a strike by administrative workers.

Prices Rise On Soaring N.Y. Volume

But Advance Cut By Profit-Taking

NEW YORK, Dec. 9 (IHT).—Prices rallied on the New York Stock Exchange today as volume hit its highest level since September. However, profit-taking trimmed some of the gain.

The Dow Jones industrial average closed up 7.48 points at 970.74. At 3 o'clock it was up 6.24 points.

Some 31.8 million shares were traded compared with 24.6 million yesterday.

Second-tier issues again led the way, but analysts said the market's recent resistance to selling pressure attracted institutional activity today.

"It's all a matter of the market being its own best advertisement," commented Larry Wachtel of Bache Halsey Stuart.

Analysts say the market's confidence in President-elect Carter continues to rise. There is "an easing of some of the worst fears as to what Carter's attitude toward business is," said Monte Gordon, of Dreyfus Corp.

Advancers outnumbered decliners by about 1,040 to about 484.

The advance carried auto, chemical, petroleum, aircraft, retail, drug and bank stocks higher.

Among the actives, American Telephone rose 5/8 to 63 1/2, General Motors 1/4 to 73 1/4, Sony 1/4 to 9 3/8, MGIC Investment 7/8 to 19, Exxon 3/8 to 52 and Dow Chemical 1 to 40 1/4.

Factory Profit Margins In U.S. Fall 10 Per Cent

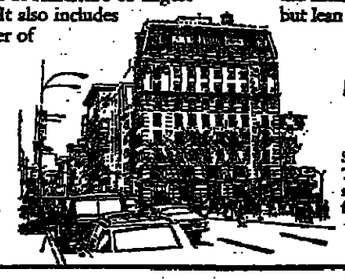
WASHINGTON, Dec. 9 (AP-DJ).—Factory profit margins fell 10 per cent in the third quarter from the second period, the Federal Trade Commission said today.

In the second quarter, manufacturer's profit margins had increased more than 13 per cent from the opening three months of the year. Profits in the latest period fell to an average 5.3 cents for each dollar of sales from 5.9 cents in the prior quarter.

The annual rate of return on stockholders' equity dropped to 13.7 from 15.7 per cent.

The man with exceptional goals needs an exceptional bank.

What makes Trade Development Bank exceptional? To start with, there is our policy of concentrating on things we do unusually well. For example, trade and export financing, foreign exchange and bank notes, money market transactions and precious metals.



Geographically, too, we work mainly in areas where we have something special to offer. This includes the U.S.A. (our U.S. affiliate, Republic National Bank of New York, is now one of America's 60 largest banks). It also includes a number of out-of-the-way countries which, frankly, many other banks lack the first-hand knowledge to tackle properly.

What's more, we keep our back-office systems running abreast of our business. You don't notice this directly, but it shows up in quicker decisions, less red tape, fewer errors.

Serving our clients well has helped us grow uncommonly fast. Today, we're big enough to provide most of the sophisticated facilities of the international banking giants—but lean enough not to keep you waiting for committees to deliberate.

As part of the Trade Development Bank Holding Group ($2.9 billion in assets, $258 million in capital funds employed), we're ready to serve you in most of the world's financial centers.

Key Group offices: Geneva, London, Paris, New York (Republic National Bank of New York). Other offices in Buenos Aires, Caracas, Chiasso, Frankfurt, Luxembourg, Mexico City, Nassau, Rio de Janeiro, São Paulo.

Trade Development Bank

Shown at left, head office of Republic National Bank of New York, U.S. subsidiary of the Trade Development Bank Holding Group. The 59th largest bank in the United States, ranked by order of deposits, Republic is one of America's fastest-growing financial institutions.

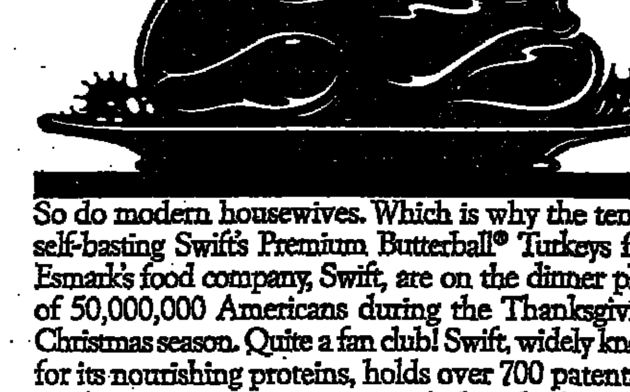
Eurodollar Borrowings

WASHINGTON, Dec. 9 (Reuters).—Liabilities of U.S. commercial banks to their foreign branches fell $569 million to $4.77 billion in the week ended Dec. 1, the Federal Reserve Board reports. This was $1.86 billion higher than the level of Eurodollar borrowings in the year-ago week.

INTERMARKET FUND ONE

Société Anonyme
Registered Office:
11 Bld. Grande-Duchesse Charlotte,
LUXEMBOURG.
R.C. Luxembourg - B 7.443

NOTICE TO SHAREHOLDERS



Shareholders are hereby convened to attend an Extraordinary Meeting of Shareholders to be held at the registered office of the Fund, 11 Boulevard Grande-Duchesse Charlotte, Luxembourg, on 29th December, 1976, at 11:30 a.m., with the following agenda:

1) Approval of an amendment of article 5 of the investment advisory agreement between Intermarket Fund One S.A. and Intermarket Management Company Ltd., dated September 10, 1969, to become effective as of January 1, 1977, to read as follows:
"As compensation for its services the fund shall pay the management company the following advisory fee: a) A performance fee of 10% per annum of the increase in its net asset value as computed in accordance with the provisions of article 23 of the articles of incorporation of the fund (exclusive of the performance fee and of the advisory fee described below and of transactions involving sale or repurchase of the fund's own shares) computed and accrued on a weekly basis and payable on the last Thursday of each financial year, provided that no such performance fee shall be paid or accrued as long as there is a negative change in the net asset value from any preceding quarterly evaluation date, and b) An advisory fee of 1% per annum of the average value of the assets under management during each calendar quarter, for this purpose the value of the fund's assets (exclusive of the performance fee and the advisory fee and of transactions involving sale or repurchase of the fund's own shares) shall be computed and accrued on Thursday of each week or, if this be a holiday, on the first business day thereafter, and the advisory fee shall be payable on the last Thursday of each calendar quarter.
Unless advised to the contrary by the management company in writing, this fee shall be paid or credited to the account of the management company in U.S. dollars."
2) Authorization to the board of directors to amend the current explanatory memorandum relating to the issue of shares, dated April 10, 1972, to reflect this change in the description of the investment advisory agreement.
3) Any other business which may properly come before the meeting.

No quorum is required for this meeting and resolutions shall be approved by a simple majority of those present or represented at the meeting.
In order to attend the meeting, holders of bearer shares should deposit their shares on or before 22nd December, 1976, at the registered office of the Fund, with respect to registered shares, proxies should be deposited at the registered office of the Fund on or before 22nd December, 1976.

THE BOARD OF DIRECTORS.

ESMARK
thinks turkey-basting is tiresome.

So do modern housewives. Which is why the tender, self-basting Swift's Premium Butterball® Turkeys from Esmark's food company, Swift, are on the dinner plates of 50,000,000 Americans during the Thanksgiving/Christmas season. Quite a fan club! Swift, widely known for its nourishing proteins, holds over 700 patents on products, processing equipment, and methods. Swift—one of five growth companies involving Esmark in food, fuel, fertilizers, financial services, and family products. Write for information. Dept. CFR, Esmark, Inc., 55 East Monroe Street, Chicago, Illinois 60603.

This announcement appears as a matter of record only. All these bonds have been sold.

Private Placement — November 1976

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pld after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

ADVERTISEMENT
INCOME PRODUCING REAL ESTATE
Freehold pine plantation for sale in Australia, 4,000 acres, (1,600 ha) with own lake, dams, house, shed and equipment.
Enormous potential for subdivision in later years due to proximity to Capital City. 500 acres planted with capacity of 3,300. Profit now $50,000 and rising to $1.1 million yearly, plus results from land sales, farm, lake resort or any other diversification you or your group may wish to develop.
You will require $3 million to continue operations.
Australia imports $300 million worth of timber or timber products, so sales are assured.
Australia has a free enterprise system with fair tax and funds repatriation schemes.
For more information please contact: A & A Consultancy P/Ltd 11 Holford Cres. Gordon. 2072. Australia.

BOOKS

AMATEURS

By Donald Barthelme. Farrar, Straus & Giroux. 184 pp.

Reviewed by Joseph McLellan

WITH Donald Barthelme, it is often best to let the author speak for himself:

"Yesterday," William said, "I saw six Sabrett hot-dog stands on wheels marching in single file down the middle of Jane Street followed at a slow trot by a police cruiser. They had yellow and blue umbrellas and each hot-dog stand was powered by an elderly man who looked ill. The elderly men not only looked ill but were physically small—not more than five-six, any of them. They were heading, I judged, for the Sixth Precinct. Had I had the black hat with me, and sufficient men and horses and lariats and 30-30s and popular support from the masses and a workable revolutionary ideology and/or a viable myth pattern, I would have rescued them. Removed them to the hills where we would have feasted all night around the fires on tasty Sabrett hot dogs and maybe steaming butts of Ballantine ale, and had bun-splitting contests, sauerkraut-hurling."

There are many Barthelmes, and most of them are in that paragraph. There is, of course, Barthelme the stylist, who has raised the deadpan style to heights barely dreamed of by the florid. And there is Barthelme the surrealist, a mind more puissant in this mode than any this side of Jorge Luis Borges. There are also Barthelme the wit, the storyteller, the psychologist. But this story (called "Our Work and Why We Do It") and the collection in which it is the opening number present an opportunity to examine yet another avatar: Barthelme the social critic.

There are 20 stories in "Amateurs", and all of them might be construed as social criticism in one way or another: critiques of the family (with subthemes of isolation and escape), of class structures, of peer-group pressures and collective decision-making; studies in the modes of leadership: charismatic, permissive, bumbling, scared; biopsies of social symbol and ritual, of role-playing and hierarchies; critiques of the small societies that are formed everywhere by two people. In perhaps 75 per cent of the stories, the intent of social criticism seems deliberate, even predominant; in a few, it is obvious, though it can be obvious in slightly devious ways.

It is obvious in "The Sergeant", a nightmare about a middle-aged man inducted into the army by mistake and strangled in red tape. It is obvious in the story of social manipulation that begins, "So I bought a little city (it was Galveston, Texas) and told everybody that nobody had to move, we were going to do it just gradually, very relaxed, no big changes overnight." But you may have to look twice to notice the ways in which this story is an analogue of the Vietnam experience. It is less obvious in "The Great Hug", which can be read simply as a tale of yin and yang but also some observations on the the artist to widely...

One of the best (the first line also its title) begins "Some of us had been fing our friend Colby time, because of the been behaving. And gone too far, so we hang him. Colby just because he had g (he did not deny th gone too far) did not he should be subjecting. Going too far, h something everybody times. We didn't pay tention to his argu asked him what sort would like played at ing. He said he'd t it but it would take t to decide. I pointe we'd have to know so Howard, who is a would have to hire a the musicians and begin until he knew music was going to said he'd always bee Ives's Fourth Symphon said that this was tactic and that even that the Ives was als sible to perform and, you've weeks of reh that the size of the or chorus would put us the music budget, able," he said to Col said he'd try to thin thing a little less ex Nowhere in the st tell exactly what "going too far"; it doe and a precise definit weaken the universal theme's metaphor—w stands could apply to tactics in a street gan from maneuvering o Avenue. The importa that we have here simultaneously comic s ing of a subsociety and enforces its own r tically when it feels Colby represents the victim who accepts it absurd; we lack data basic premise that destruction but ties it appeals for mercy, quibbles, delaying fast few pages, we are p maintained, equatio (being an equation of tention and handled common skill) embodie that vibrate outward finity.

In this, as in mos thelme's stories, the i is something that (w selves) could never ac pen as described; the beyond mere accurac to present a basic metaphor of social which is truer and m focused in its overton plications, precisely cannot be read satisf the level of mere "i pened next" narrative. cial power of these based on the fact tha mixed metaphors; we see a particular aspe society more clearly b seen through a distor Barthelme, like the m posers who have fou new beauties in disso taken a technique manuals solemnly wa and made it, with brie fiance, the basis of system for writing the

BRIDGE — By Alan

The South cards shown in the diagram, after opening one heart, bounced to game after a single raise from his partner. The opening lead was the spade queen, and it was clear that the result would hinge on the diamond suit.

The normal play of the diamond suit would be to lead low to the ten, succeeding whenever East has both missing honors, or one honor singleton or doubleton. The declarer starts by playing low from his hand toward the jack, hoping to catch West with a doubleton honor, but he could be left with a guess on the next round if West played low and East won.

In this case, there was another play of leading to the ten in the diagramed hand the best response. It g East has more than two including both the kin queen.

These positions are queen than the position West has a doubleton h ing a trick to the p

Now the 19-year-old only has time for skiing and that's how it is for most of those on the touring snow circus. Almost six months of racing, three of training, with the body so tired at night that it is difficult to concentrate on reading.

But Fisher, as did Proell, made the decision long ago to try for ski success and the determination—a word which she used today—had led to prizes. Good results lead to even greater enthusiasm, which is why today's season opener was so important.

The first-place finish also helped to regain some confidence for Morerod, who was favored to win a gold medal at Innsbruck. The best she was able to do there was fourth in the giant slalom, won by Canadian Kathy Kreiner. At the time, Kreiner's victory was considered an accident, but Kreiner today finished fifth, a second off the pace in this Alpine resort still plagued by too much snow.

The fresh-falling snow made the course slow, and the women had to work hard on their poles to keeping pushing toward the finish line. For Morerod, Fisher and Proell, it was most definitely worth the effort.

Women's Giant Slalom

Runner-up Abbi Fisher (left) and Annemarie Proell-Moser surround Lise-Marie Morerod.

Wicks Paces NBA Celtics Victory

BOSTON, Dec. 9 (UPI).—Tom Heinsohn went one-on-one with Sidney Wicks during halftime last night and the discussion bore results.

Wicks, who had only two points until then, went out after the talk with his coach and sparked the Boston Celtics to a 104-95 victory over Portland, snapping a five-game Trail Blazers' victory streak.

"At halftime, I just told him to stop thinking so much and just go out and shoot the ball," the Boston coach explained. "Sidney's so intelligent that he's been overthinking, and therefore hesitating to see what's going to happen. He came alive offensively tonight... It was his best ballgame."

Wicks, who came to the Celtics from Portland this year, poured in 13 third-quarter points and added four more at crucial fourth-period junctures to finish with 19.

"Tommy said I had been looking to pass too much," Wicks said. "Since joining the Celtics, I had been oriented almost too much toward the team concept and looking almost too much for the pass, but I guess I'll be looking for my shots more from now on."

In a game that saw neither team fall more than seven points behind, it was the combination of Wicks and steady Jo Jo White, with 21 points, that proved to be the difference down the stretch.

Tom Boswell and Charlie Scott chipped in 17 points apiece for the Celtics. Portland's Maurice Lucas was the game's high scorer with 25 points and Bill Walton had 20.

Knicks 105, Nets 95

At Uniondale, N.Y., Earl Monroe scored 22 of his game-high 37 points in the second half and Lonnie Shelton had 31 points, enabling the New York Knicks to score a 105-95 victory over the New York Nets.

Monroe led a third-period 38-17 surge, which lifted the Knicks from a one-point deficit to an 82-17 lead, by scoring 11 points in that session. The Nets closed the gap to four points with six minutes to go in the game, but Monroe scored seven more points and Shelton tossed in a key basket to give the Knicks the victory.

Pistons 107, Bulls 100

At Detroit, Al Eberhard and Leon Douglas came off the bench in the fourth period to help the Pistons turn a tight battle into a 107-100 victory over Chicago.

Eberhard, playing despite a fractured toe, hit five baskets while Douglas added two from the field and one from the foul line to increase an 80-77 Detroit advantage after three quarters to as many as 13 points midway through the final period.

76ers 123, Braves 102

At Philadelphia, George McGinnis scored a game-high 22 points and grabbed 16 first-half rebounds to help the 76ers post a 123-102 victory over Buffalo.

Rookie Mike Dunleavy triggered a second-quarter outburst by Philadelphia that enabled the Sixers to take a 61-45 halftime lead. Dunleavy contributed four assists while Henry Bibby connected on all eight field-goal attempts in the first half.

Sonics 109, Bullets 99

At Landover, Md., Seattle had seven players in double figures as it beat Washington, 109-99. Leonard Gray scored 21 points as Seattle broke open an 80-79 game at the start of the fourth quarter.

Seattle raced to a 16-6 lead early in the first quarter before Washington got its fast break going. A Dave Bing jumper put the Bullets in front, 26-24, and they never trailed in the quarter. Elvin Hayes paced the Bullets.

Sonics coach Bill Russell made wholesale changes with his lineup at the start of the second quarter and his new five responded with excellent defensive play. They closed the Bullet break and held Hayes scoreless in the period. Gray and Mike Green scored eight points each in leading the Sonics to a 58-53 halftime lead.

Hawks 117, Spurs 106

At San Antonio, Texas, John Drew broke loose for 39 points and snared 15 rebounds to lead Atlanta to a 117-106 victory over San Antonio in snapping the Spurs' eight-game home-court winning streak.

The Hawks were trailing 87-83 at the end of three quarters but opened the final period by outscoring the Spurs 18-2 and then coasted to the victory, only their second on the road this season.

Suns 116, Rockets 95

At Phoenix, Paul Westphal scored 23 points to pace five Suns in double figures as Phoenix snapped an eight-game Houston winning streak with a 116-95 victory.

The Suns, who never trailed, took command with 15 straight points during a three-minute span at the end of the first half, during which Houston committed five turnovers. The Rockets committed 24 turnovers in the game.

Pacers 111, Lakers 98

At Indianapolis, it didn't take Indiana long to figure out how to beat Los Angeles: keep the ball away from Kareem Abdul-Jabbar. It worked well enough for the Pacers to score a 111-98 triumph, with Abdul-Jabbar being held to 22 points and 13 rebounds.

The first time the two teams met, nearly a month ago in Los Angeles, Abdul-Jabbar scored 34 points and Lucius Allen had 28 as the Lakers won by 11. Allen was hurt and sat out last night's action as the Lakers dropped their third straight road game.

Wednesday's Games

New York Knicks 105, New York Nets 95 (Monroe 37, Shelton 31; Archibald 27, Williamson 18).
Philadelphia 123, Buffalo 102 (McGinnis 22, Free 21; McMillen 19, Adams 16).
Phoenix 116, Houston 95 (Westphal 23, Sobers 19; Murphy 30, Tomjanovich 18).
Detroit 107, Chicago 100 (Lanier 34, K. Porter 18; Holland 22, May 18).
Atlanta 117, San Antonio 106 (Drew 39, Barker 17; Bristow 25, Gervin 23).
Indiana 111, Los Angeles 98 (Knight 29, Robisch 19; Neumann 24, Abdul-Jabbar 22).
Seattle 109, Washington 99 (Gray 21, Johnson 14; Chenier 23, Bing, Robinson 19).
Boston 104, Portland 95 (White 21, Wicks 19; Lucas 25, Walton 20).

Finley Noncommittal on Plan To Relocate His Baseball A's

By Nancy Scannell

LOS ANGELES, Dec. 9 (WP).—Charles Finley, in a long discourse touched off by his anger over losing six of his Oakland A's players to wealthier clubs, said yesterday that he does not know if he could continue much longer operating his baseball club.

During a rambling 90-minute press conference, the flamboyant Finley said there is a possibility he could sell the A's, but he dodged most questions on reports that the A's could be Washington-bound.

Finley initially disclaimed any knowledge of commissioner Bowie Kuhn's plan to have the A's bolt the American League, join the National League and transfer to Washington. He subsequently acknowledged discussing the proposal with AL president Lee MacPhail.

Finley said he has not talked to Kuhn about the plan and was noncommittal to MacPhail on the subject about 10 days ago.

Club owners in both leagues were being briefed on the Washington plan for a possible vote later today. Some thought that the NL owners might kill the plan because it could result in interleague play, which they oppose.

Returning from the meeting this afternoon, a National League club owner said that Kuhn had presented his plan and that the owner thought it had a "pretty good chance" of passing. But the owner stressed that the plan would not be contingent upon Finley's dropping his lawsuit against the commissioner and the two leagues for Kuhn's vetoing the sale of three Oakland players last June.

"There is no question in anybody's mind in baseball that something's got to be done in the [San Francisco-Oakland] Bay area because there's one too many teams," Finley said, refusing to answer another question on which team should leave. The two clubs have been failing financially.

"There ain't no way I'm going to stand around and go bankrupt the way things are going today in baseball. I certainly don't intend to go bankrupt and I wish I had one one-hundredth of the money some people think I have," he said.

Using the press conference as a forum to elaborate on his unhappiness with the new four-year agreement between owners and players, Finley also suggested that he might try opening the A's to public ownership. Details of his plan were fuzzy, but Finley said he is "seriously considering going public with the Oakland A's and have a tax shelter for the working man . . . I could say, 'Come on in, own a part of a jock,' and when I start advertising that you'll find things going hellsa-poppin."

Finley said he was disturbed about Kuhn's vetoing the $3.5-million sale of three Oakland players in June and plans to fight him in court next week. There have been some hopes that, if Kuhn's plan for returning baseball to Washington is approved, Finley would drop his suit against the commissioner and the two leagues in return for their helping him out of his lease with the Oakland Coliseum that runs until 1983.

In keeping with his maverick style, Finley released salary figures of the six players he lost because of their free-agent status. He said the figures came from MacPhail's office:

Sal Bando, Milwaukee, signed for $1.4 million over five years; 1976 salary $80,000.

Bert Campaneris, Texas, signed for $950,000 over five years; 1976 salary $72,000. ("He got gypped," Finley said. "He was our most valuable player.")

Rollie Fingers, San Diego, signed for $1.6 million over six years; 1976 salary $71,200.

Joe Rudi, California, signed for $2.09 million over five years; 1976 salary $67,200.

Gene Tenace, San Diego, signed for $1.6 million over five years; 1976 salary $35,200.

"I tried to give them substantially more money during the year, but they did not accept it because they knew they could get more by playing out their options. I don't blame them. I would have done the same thing," Finley said. "There's no way clubs like the A's can survive this battle. We don't have the income to pay those salaries. And you ain't seen nothing yet.

"Wait till 1977."

In NHL Activity

Flames Rise to 2d Place on Shutout

BLOOMINGTON, Minn., Dec. 9 (UPI).—Atlanta moved into second place in the National Hockey League Patrick Division last night with an impressive 5-0 victory over Minnesota, but Flames coach Fred Creighton wasn't satisfied.

"It was a big game for us since we moved two points in front of Philadelphia," Creighton said, "but then I guess they are all big games when you win. We've been playing pretty good hockey the last six weeks or so, but we're not playing up to our full potential yet.

"We need more work on our power play and we have also had some trouble with penalty-killing. We'll just take it a game at a time."

Atlanta has lost only once in its last 13 games.

Tom Lysiak scored two goals for the Flames, while veteran goaltender Phil Myre posted his third shutout of the season.

Lysiak scored his first goal at 4:33 of the second period, converting a pass from Bill Flett to put Atlanta ahead, 3-0. The Flames had taken a 2-0 lead on first-period goals by Rey Komeau and Flett.

Tim Ecclestone made it 4-0 at 19:03 of the second period, and Lysiak made it 5-0 with his second goal of the night and 10th of the season at 1:48 of the final period.

"I was glad to get the two goals," Lysiak said, "but I don't feel I'm playing all that well. I don't have nearly as many points now as I had at this time last year."

The loss was the fourth straight for the North Stars, who dropped into the cellar of the NHL Smythe Division.

"There is no one problem that showed up in the game," Minnesota coach Ted Harris said. "We've got a bunch of different problems. Our passing was terrible. We've got to get more discipline into our playing."

Rockies 3, Kings 3

At Inglewood, Calif., winger Marcel Dionne scored from five feet out to lift Los Angeles to a 3-3 tie with Colorado.

Center Dave Hudson of Colorado had slipped a five-foot backhander between the pads of Kings goalie Gary Edwards earlier in the third period to put the Rockies ahead, 3-2.

Defenseman Tom Edur evened it with a 15-foot shot that eluded Edwards for the only score of the second period.

Canadiens 4, Black Hawks 3

At Chicago, Guy Lafleur and Yvon Lambert scored goals 25 seconds apart in the third period to break a 2-2 tie and Montreal held on for a 4-3 victory over the Black Hawks.

Kirk Bowman pulled the Black Hawks to their final one-goal deficit with three minutes left in the game but goalie Ken Dryden stopped Chicago from that point on to earn his 18th victory.

John Marks tied it at 2-2 for the Hawks with his third goal of the season at 7:50 of the final period but Lafleur's power-play tally less than three minutes later gave Montreal the lead again and Lambert made it a two-goal bulge a short time later.

Rangers 4, Blues 4

At New York, New York center Wayne Dillon completed the second hat trick of his career to give the Rangers a 4-4 tie with St. Louis, as the Rangers extended their unbeaten streak to nine games.

The game marked the return to New York of Emile Francis, the general manager-coach of the Blues who severed a 15-year relationship with the Rangers this past summer to join St. Louis.

Dillon, a WHA refugee in his second year with the Rangers, triggered a three-goal second period by the Rangers which lifted New York from a 3-1 first-period deficit. His first goal of the second period came when St. Louis defenseman Rod Selling inadvertantly poked the puck into his own net and the other came on a pass from Rod Gilbert on a power play.

Canucks 4, Maple Leafs 3

At Toronto, Rick Blight's breakaway goal at 12:58 of the third period lifted Vancouver to a 4-3 victory over Toronto and snapped the Maple Leafs' six-game unbeaten streak.

Blight's winner came after Chris Oddleifson tied the game, 3-3, with a goal at the 8-14 mark of the final period.

Mike Walton and Gerry O'Flaherty scored first-period goals to give the Canucks a 2-1 lead, but Toronto tied it on Inge Hammarstrom's goal at 1:17 of the second period and the Leafs took the lead at 4:30 of the final period on a goal by Don Ashby.

Sabres 5, Barons 1

At Richfield, Ohio, Gilbert Perreault and Danny Gare each scored two goals to lead Buffalo to a 5-1 victory over Cleveland to extend the Barons' winless streak to 11 games.

The Sabres scored three power-play goals, including two with two-men advantages. Gare, playing his first game since the first six of the season because of back problems, scored both of his goals in the third period after Cleveland's Wayne Merrick scored late in the second period.

The Sabres took a 2-0 lead on first-period goals by Perreault and Gary McAdam and made it a three-goal lead on Perreault's 14th of the season early in the second period.

NHL Results

Wednesday's Games

St. Louis 4, New York Rangers 4 (Plante, Larose, Patey, Sanderson; Dillon 3, Parrish).
Los Angeles 3, Colorado 3 (Kozak, Venasky, Dionne; Edur, Dean, Hudson).
Vancouver 4, Toronto 3 (Walton, O'Flaherty, Oddleifson, Blight; Hammarstrom, Boutette, Ashby).
Atlanta 5, Minnesota 0 (Lysiak 2, Comeau, Flett, Ecclestone).
Montreal 4, Chicago 3 (Cournoyer, Lapointe, Lafleur, Lambert; Martin, Marks, Bowman).
Buffalo 5, Cleveland 1 (Perreault 2, Gare 2, MacAdam; Merrick).

Winnipeg 4, Calgary 2 (Labrosse, Hedberg, Sullivan, Hull; Sentes, Tannahill).
New England 5, Houston 1 (Lyle 2, G. Roberts, Boldirc; Hanssi).
San Diego 6, Cincinnati 1 (Ferguson 3, Dobek, Cassolato, Lacroix; Plumb).

Cleveland Trades Hendrick To San Diego for 3 Players

LOS ANGELES, Dec. 9 (AP).—The San Diego Padres obtained slugging outfielder George Hendrick from the Cleveland Indians yesterday in exchange for outfielder Johnny Grubb, catcher Fred Kendall and infielder Hector Torres.

The Chicago Cubs sold outfielder-first baseman Peter Lacock to the Kansas City Royals, and purchased outfielder Jim Dwyer from the New York Mets as part of a three-way deal at baseball's winter meetings. The Mets are to receive a player to be named later from the Royals. Lacock batted .221, hit eight homers and batted in 28 runs in 106 games for the Cubs last season. Dwyer hit .181 in 61 games for Montreal and the Mets.

The Cubs also acquired left-handed-hitting outfielder Greg Gross from the Houston Astros in exchange for minor league infielder Julio Gonzalez. Gross hit .314, .294 and .286 in his three years as Astro leadoff batter.

Hendrick, 27, batted .265 with 25 home runs and 81 runs batted in last season in 149 games. He ranked fourth in the American League in homers.

Grubb, 28, hit .284 with five homers and 27 RBI last season in 109 games, missing one month because of torn knee ligaments. The left-handed batter has a .286 lifetime mark, which includes a .311 average as a rookie in 1973.

Torres, 31, played in 74 games with San Diego last season and hit .195. He previously played for Houston, the Chicago Cubs and Montreal. Kendall, 27, hit .246 with 2 homers and 39 RBI last season.

The expansion Seattle Mariners sent relief ace Grant Jackson to the Pittsburgh Pirates for young infielders Craig Reynolds and Jimmy Sexton. The Mariners had made Jackson a first-round choice in the expansion draft last month from the New York Yankees.

Melton Is Sold

ANAHEIM, Calif., Dec. 9 (UPI).—Veteran third baseman Bill Melton was sold by California to the Cleveland Indians for an undisclosed amount of cash and a player to be named later.

Melton, 31, batted .208 in 118 games for the Angels last season. He hit six homers and drove in 42 runs. He led the American League in home runs in 1971 with 33 while he was with the Chicago White Sox.

Observer

Completely Rocked

By Russell Baker

NEW YORK.—Notes from the pop-music world: Arfie Melina of Ten Cent Coffee, in London to promote Coffee's new album, took off on the British press last week for asking dumb questions about her on-again off-again relationship with Lips Luscombe. Arfie threatened to stuff cucumber sandwiches in the Daily Express's presses, then struck the Times man with her pet boa (constrictor) when he asked if Lips had split because he couldn't stand the triple taradiddle in the backup on Arfie's last single ("Toothache of My Mind") on the Hohokus label. Lips, playing it cool, turned up at the Baltimore Festival of Rock (3 killed, 23 injured, 118 mugged), playing alto electric saw for Queen's Indian Declined. Lips's agent denied he planned to undergo sex-change surgery at Johns Hopkins after the concert.

Baker

The crowd in Boston wasn't exactly amused when promoter Rick (Take the Money and Run) Wisengoffer announced that Hog Momma & Cornsilk would stand in for Coronary Insufficiency. The Cornsilk haven't been on the charts since Wayne Newton was a soprano and Hog Momma, with his antique 1975 snuffle-rock sound, wasn't what the kids had laid out $25 a head to hear. The Insufficiency weren't kidding, however, when they wired ahead that they'd been grounded in New York. Rock authorities there were holding them for questioning on suspicion of not transporting concealed drugs.

There were plenty of nasty looks when Rock Starr pulled into Oakland last week still alive. Press-agent stories about Rock's lethal habits, failures in love and family rejection had whetted fan appetites for another big suicide story. Clytemnestra, the label that pressed Rock's biggest hits, was all set with heavy promo to exploit a postsuicide market for Rock's old records, and six publishing houses had already inked contracts for "Rock Was My Secret Lover"-type mortuary-exploitation books. Rumor has it that Clytemnestra will take a million-dollar bath if Rock doesn't do the fatal overdose number before Christmas.

We caught Eyeball's new act at Oakland last week to see if it really was as tasteless as people who saw it at Monterey claimed. At Monterey many fans were offended, as were the police, when the Eyeball ended their closing number by committing a human sacrifice on stage.

Naturally, this became a cause célèbre of sorts, what with the mayor canceling the next day's performance and the civil-liberties people replying that the Eyeball's freedom of expression was being infringed by the mayor. Things really hit the fan when the musicians' union found out that the victim wasn't a member of the union and the Eyeball left Monterey pretty depressed.

Well, things had been ironed out when we caught the act in Oakland and the crowd gave the Eyeball one of the biggest ovations heard on the coast all year. It couldn't have been for the music, which wasn't quite hard rock, or soft rock, or even chimney rock. Let's face it: Eyeball still doesn't understand about blowing the audience's brains out. The sacrifice, on the other hand, was performed with great panache and threatrical style. Although several fans stated that they were offended in principle, even these had to admit the whole thing was done in very good taste.

Dotty Van Doty, whose "Lugubrious Ballads" and "Songs From the Tombstones" led the charts in the morbid sixties, has issued her first new album since returning from the dead.

On the Fast Bucks label, it is titled "Yearning for the Grave," and features some first-rate piano work on two bands by the late, great Fats Waller. For the benefit of you kiddies, Fats was the Bob Dylan of the piano. A piano is an instrument like the guitar, except it has more strings and is not usually electrified. Dotty, fortunately, still hasn't been electrified either and her lyrics, melodies and voice are just as depressing as we all remember them from the days before she crossed over. In a New York interview, Dotty revealed that Janis Joplin is very active on the other side and is studying civil engineering.

The pill did it, and the changing, more hedonistic, way of life of millions of young West German couples. The birth rate has fallen sharply and so have toy sales.

Needed: Children for W. German Toy Market

By Craig R. Whitney

GIENGEN, West Germany (NYT).—The venerable German toy-making industry, which survived two world wars, a depression and a recession, is now threatened by a critical shortage of children.

The pill did it, and the changing, more hedonistic, way of life of millions of young West German couples. The birth rate has fallen sharply and so have toy sales.

So the manufacturers—those who can—are trying to invent toys that adults can enjoy. Those who can't, like the Margarete Steiff Co., which makes stuffed animals here in the Swabian hills, are exporting more of their wares to the United States.

Worry Shared

All the manufacturers share worry about the future. As Peter Wiedling, owner of a toy store in Munich, put it, "Not enough babies today means not enough adults tomorrow—who will be our customers then?"

Christmas sales account for half the year's volume—about $1 billion annually in sales for the West German retail toy trade. This season has been "catastrophic" so far, a toy dealer in Ulm said, and unless things pick up as Christmas draws nearer, 1976 will be "depressing."

The increasing prevalence of birth control, the fact that many women have jobs and the preference of many young people for enjoying life for a while instead of having children is changing West German life, and even its economic patterns.

The postwar population explosion was finished here by 1972 and now more and more couples are deciding to have no children or, at the most, two.

By 1985

"By 1985," warned an official of the Marklin Electric Train Co. recently, "the traditional intended customers of the toy industry—children—will diminish by 3.6 million. This will lead to a drop of almost 40 per cent in potential demand."

What to do? In 1972 Marklin started making sets of tiny trains, too small for children, hoping to catch their parents instead.

Wiedling's toy store, on Munich's main shopping street, the Theatinerstrasse, displays these tiny trains in a roundhouse placed much too high for any child to reach or even see. The minuscule engines roll on tracks only 17/64 of an inch wide, too delicate for a child to handle. Although there is at least one 17-month-old girl in Bonn who gets her father out of bed in the morning to play with "his" train, Marklin had men 25 to 50 years old in mind when it designed these smaller models.

Strategy Worked

The strategy worked. The company is still the leading West German toy manufacturer. But others have lost their share of the shrinking market to such foreign firms as Milton Bradley and Parker Brothers, whose parlor games aimed at the adult market have swept West Germany. Backgammon in countless variations, Monopoly and new games about such exotica as newspaper reporters have replaced dolls and stuffed toys as the biggest sellers in Wiedling's store.

Giengen's Margarete Steiff Co. changed from a one-person shop to an industry at the turn of the century when the stuffed bears made by the polio-stricken founder caught on in a big way in the United States. Miss Steiff's "bear factory" expanded and came to dominate this sleepy village on the Brenz River, and Steiff has since become a synonym for stuffed animals that demand to be cuddled.

"We're aiming at the 4-to-8-year-old child," said Manfred Haag, the company's sales manager. There are 2.6 million children of that age in West Germany today, but in 1985 there will be only 1.6 million, according to census projections, so the Steiff company is turning to exports for salvation—$2.1 million worth this year, about half to the United States.

Mostly Women

The animals are handmade. Nine hundred employees, most of them women (like Marklin's train women a few miles away in Goppingen), cut, stitch, stuff and paint 14,000 animals a day. They are paid about $4.65 an hour in wages and fringe benefits, so the little toys are expensive.

In West Germany a small baby seal retails for $12.50 and a medium-size Teddy gets the equivalent of $39.

"The devaluation of the dollar caused us some terrible problems," Haag said. "We had to make a choice between losing our share of the U.S. market or narrowing our profit margin. We chose the latter, and the market didn't collapse."

A PIOUS ROLE—Actor George Burns and John Denver are making a movie together. Burns plays God. It's Denver's fir...

PEOPLE: *The Krishna Kl... No Ho-Ho Mat...*

The spirit of Christmas has overwhelmed the Hare Krishna sect in New York and it's no ho-ho matter to the Volunteers of America Santa Clauses. "They've been harassing our Santa Clauses," declared Volunteer Col. Don Schwartz. "They're standing in the way of our chimney, which prevents many people from coming up and making donations." The Hare Krishnas have shed their saffron robes, incidentally, for Claus clothes. Some passersby complain that the Krishna Klauses are pursuing them for blocks, chanting, "Ho, ho, ho. Don't you have anything for Santa?" Roma Pada, 28, associate director of public affairs for Hare Krishna, denies that the sect is trying to muscle in on the Volunteers of America. "The essence of our preaching mission is to have people remember God," he said. "Santa, being the contemporary emblem of Christmas, when people see Santa we want them to think of God."

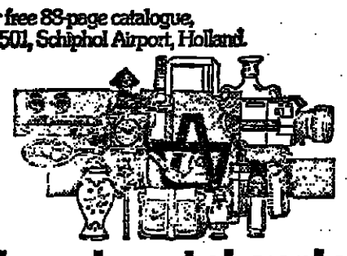
Value the Classics



The Jolly Toper by Frans Hals (1579-1666)

of Old Amsterdam.

They have made the city one of the world's foremost tourist attractions. But on departure visit Amsterdam's other great attraction: the new airport shopping centre. Value here the world's greatest selection of tax-free, fully guaranteed products at the world's lowest prices. Fifty-one shops, all-under one roof, offer an infinite variety of items and brands unsurpassed by any other airport.

From chocolates and cheeses to cars and cassettes, lighters and leather to lace and lingerie, magazines to moccasins, dolls to diamonds, spirits to sports, the choice is yours. Especially large is the range of lighters, watches, cameras, calculators, radios and T.V.'s.

Ask for free 88-page catalogue, P.O. Box 7501, Schiphol Airport, Holland.

ACCEPTS NOBEL PRIZE—Dr. Samuel Ting, co-winner of the Nobel Prize for Physics, bows to the applause of the Swedish royal family after accepting the award Friday in Stockholm. At the right are King Carl XVI Gustaf, Prince Bertil and Queen Silvia. Seven Americans received prizes in the first Nobel sweep.

A 200-Mile Fish Zone Is Decreed By Moscow

MOSCOW, Dec. 10 (UPI).—Citing the need for "urgent measures" to protect its interests, the Soviet Union said today it was introducing a temporary 200-mile limit on fishing in its coastal waters.

The restrictions would remain in effect, it said, until the UN Law of the Sea Conference could work out an international convention governing use of the world's oceans.

President Nikolai Podgorny signed the decree ordering the restrictions—200 miles into the "open sea"—in the name of the Presidium of the Supreme Soviet, or parliament. There was no indication when the measures would go into effect, but presumably it was immediately.

The order was a sharp reversal of policy by Moscow, which maintains one of the world's largest fishing fleets and until recently strongly opposed imposition of 200-mile limits by other countries.

But earlier this year the United States extended its fishing zone. The European Common Market nations are expected to do the same Jan. 1 and Western economists said Soviet leaders apparently decided they should follow suit now rather than later.

The economists said Japan and the Scandinavian countries were most likely to be affected.

A preamble to the decree pointed out that "more and more" countries including those neighboring the Soviet Union were ordering 200-mile restrictions without waiting for the outcome of the Law of the Sea Conference.

The Soviet Union, it said, would always support the settling of matters involving the sea through international convention. But it added:

Pacific Coast

"Keeping in mind that before the time when such a convention is signed, it is necessary to take urgent measures on the protection of the interests of the Soviet Union in the preservation, reproduction and also optimal use of living resources in the waters bordering Soviet coasts."

The main area affected is the Soviet Union's 4,500-mile Pacific coast. It also applies to the Barents Sea and the Baltic Sea. A Soviet delegation is in Oslo now discussing limits in the Barents Sea.

According to the decree, foreign ships will be able to operate inside the new limit only after their governments have signed agreements with the Soviet Union.

Violations could result in a maximum fine of 100,000 rubles ($130,000) and possible confiscation of the offending vessel and its gear.

Inside the new zone, the decree said, the Soviet Union will have "sovereign rights over fish and other living resources for the purpose of detecting, processing and preserving them."

The amount of future catches would be determined "on the basis of scientific information and in some cases taking into account recommendations of competent international organizations," it said. The fishing restriction will not change the Soviet Union's 12-mile territorial limit.

In May, while the sea conference was under way, Moscow officially protested to Washington over the U.S. decision to adopt a 200-mile limit.

Until now the Soviet Union stuck to a 12-mile limit, the same as their zone of national jurisdiction. However, for some time Moscow has favored an "economic zone" of 200 miles, with the distinction being that foreign fishermen should be able to catch fish reserves not needed by the country of jurisdiction. This door was left open in the decree.

Kissinger, Crosland Voice Hope On Geneva

From Wire Dispatches

LONDON, Dec. 10.—Secretary of State Henry Kissinger and British Foreign Secretary Anthony Crosland said today they were hopeful of progress in the Geneva conference on Rhodesia, but neither saw the need for the United States or Mr. Kissinger to resume a crucial mediation role

At a news conference with Mr. Kissinger after a 90-minute review of the Rhodesian talks, Mr. Crosland was asked if he would ask Mr. Kissinger to again take a role in an effort to break the Geneva deadlock.

Mr. Crosland said: "It is agreed between the two governments that the American role, which was critical, crucial last summer, should give way to Britain, which has a legal and constitutional responsibility."

There had been speculation that Mr. Kissinger might end his international diplomatic career with a major new initiative concerning Rhodesia.

'Push' Requested

In Geneva, where the conference that began Oct. 28 has made little headway toward a settlement, Rhodesian Prime Minister Ian Smith called on Mr. Kissinger to give the negotiations "a push in the right direction."

Mr. Kissinger made it clear here that he backed the prominent role of Britain in the settlement effort and said there was no need for him to meet Mr. Smith again.

Privately, U.S. officials described the current impasse as a "tribal dance" that would give way ultimately to serious negotiations.

"The parties are approaching the problem from totally different points of view," Mr. Kissinger said.

'Very Painful'

"It is obviously an enormously delicate and complicated issue, very painful to some and probably *very painful to all—for one side* to give up power and for the other to take it in stages."

In Geneva, Mr. Smith charged today that he was brought to the conference table "on false pretenses"—that is, an understanding that the nationalists were ready to accept the proposals on independence under black majority rule agreed to between himself and Mr. Kissinger.

But the head of the white minority government hastened to exempt Mr. Kissinger from his strictures. "I was misled by the parties who arranged this conference," he said, in clear reference to Britain, which serves as chairman.

"As far as I'm aware, Dr. Kissinger abides by the agreement," Mr. Smith declared. He said he was in touch with U.S. officials but not with the secretary of state himself.

'No Progress'

Mr. Smith, while asserting that "no progress whatsoever" had been achieved since the conference opened, said that he did not "anticipate a breakdown."

However, Mr. Smith expressed skepticism over the possibility of reaching agreement with the four heads of the nationalist delegations—Joshua Nkomo, Bishop Abel Muzorewa, Robert Mugabe and the Rev. Ndabaningi Sithole. He asserted that a number of black delegation members had sent him messages expressing unhappiness over their delegation chiefs' negotiating tactics.

He accused London of "obdura-

In Preparation for Talks With Israel

Arabs Press PLO to Scale Down Political Aims

By Henry Tanner

EIRUT, Dec. 10 (NYT).—The lestine Liberation Organiza- n, which was born in the ref- e camps 13 years ago, nur- ed into a military power, dev- sted by defeats in Jordan in 0 and in Lebanon this year, now under severe pressure m Arab allies to scale down political objectives.

fter months of open warfare Lebanon, the guerrilla fight- have withdrawn into their nps and their political leaders preparing to negotiate a set- ment with Israel alongside the vernments of Saudi Arabia, ypt and Syria.

he leader of the PLO, Yassir afat, announced a few days that his movement now ac- ted the idea of a Palestinian e on the West Bank and in s—a long step back from the anization's earlier call for a ular Arab-Jewish state in all Palestine, which implied the appearance of Israel.

he PLO is also moving to- d a decision to accept its in- ion in a single Arab delega- n to the Geneva peace con- ence. In the past, it has in- ed on a separate Palestinian egation, which would have nt recognition by Israel.

Basic Differences

sic differences remain be- en the Palestinian leadership Syria, which has more than 00 troops in Lebanon and ch is apparently determined in full control over the PLO. ans have been talking about ting to purge the main lead- of the PLO and of el-Fatah, largest guerrilla group within PLO, and the name of Mr. fat, who heads both, has been uded.

ut his position with the rank file appears so strong that eems doubtful that any effort n the outside to remove him be successful. However, the b governments' plans for ne- tiations with Israel may require otally submissive Palestinian ership.

r. Arafat, meanwhile, is strug- g to retain a veto over the coming negotiations so that might block any agreement he thinks might be at the nse of the Palestinians.

he willingness of the Pales- ans to negotiate is the direct lt of the losses they suffered he Lebanese war. "We have hoice but to fit ourselves into Arab context now, and the s want to negotiate," an el- h official said.

Guerrilla Losses

Fatah and the guerrilla or- ations fighting at its side lost as many as 20 per cent heir leaders and 3,000 of their fighters—in addition to the h of more than 20,000 Pales- an civilians in Lebanon—ac- ing to an unofficial Pales- an estimate. The real figure be higher. The estimate not include the losses of as- a, a Syrian-backed guerrilla p that has fought at Syria's

hen the Lebanese civil strife ted early last year, the PLO the strongest military power he country and clearly a state in a state. Its power in- sed as it fought the main les for the Lebanese Moslem sts, who were arrayed against rgely Christian force of right-

It took over government tions in western Beirut and he countryside south of the tal, so that what law and r existed was enforced by stinian fighters. The ports aida and Tyre were controlled he Palestinians. Wheat, fuel other essentials were distrib- by Palestinian administra-

l this is gone. The fighters back in refugee camps, some hich date from the establish- ment of Israel. Syrian tanks have taken up positions overlooking the slum area in Beirut where the largest refugee camp is situated.

The Palestinians have lost politically as well. Their display of power in Lebanon frightened the rulers of Saudi Arabia, Kuwait and other Gulf countries, who wondered whether a similar Palestinian "revolution" could not threaten them eventually. Indeed, el-Fatah's association with the Lebanese leftists convinced some conservative Arab leaders that the PLO was a Trojan horse for Communism.

Despite all that has happened, the outlook for the Palestinians is not entirely poor. The number of trained fighters in Lebanon is larger than at the start of the war. Regular units of the PLO that had been stationed in Syria, Egypt and Iraq were brought here during the war and are still here, and with the exception of some from Syria, they are under Mr. Arafat's control. The war appears to have strengthened the nationalist fervor of rank-and-file Palestinians; it was the sort of experience required to build a nation, a Palestinian intellectual remarked. The muddy, rutted road

'Disturbed' Calm, 'Normal' Killers in Beirut

By Don Schance

BEIRUT, Dec. 10.—In the 19 months of civil war, life at the Lebanon Hospital for Mental and Nervous Disorders has had bizarre overtones.

"While the supposedly normal people outside the hospital were acting insane . . . our most disturbed patients became calmer," said a psychiatrist.

"Shells, shrapnel and bullets hit every building, sometimes like rain. They came through the walls, the ceilings, everywhere. To move at all was to risk your life.

"Yet our need for tranquilizers and other psychoactive drugs actually declined. The most upset patients calmed down in the midst of the worst gunfire. They watched television, played games and helped the staff."

Upsurge Is Feared In Mental Illness

The Asfuriyeh Mental Hospital, as it is called, is the largest and most modern psychiatric institution in the country. It stands on a hill in Christian East Beirut, just above the Tal Zaatar and Jisr al Basha Palestinian refugee camps, where the worst fighting of the war raged. It was in the direct line of fire from rockets, artillery and automatic weapons of all sides.

On the western side of town another psychiatrist, Dr. Abdul Rahman Labban, described how some of the supposedly sane people there behaved under fire.

"We saw sophisticated, educated, professional people—one of them I know to be an exceptionally fine doctor—standing on balconies with snipers' rifles, killing almost at random with seeming pleasure," he said.

"To me the very worst . . . was to find evidence that even members of my own profession, pledged to save life, were taking it in a cruel fashion."

Among other duties, Dr. Labban supervises a hospital for the senile elderly, most of whom come only for final care before dying. As a result, the hospital has one of the largest morgues in Beirut and was heavily used throughout

Exile at Secret Press Parley in Madrid

Spanish Red Vows Full Party Role in Vote

By Miguel Acoca

MADRID, Dec. 10 (WP).—Santiago Carrillo, head of the outlawed Spanish Communist party, said at a clandestine news conference here today that the party will run a full list of candidates in parliamentary elections scheduled for next spring.

The Communist party's secretary-general, who is officially barred from Spain, denounced the government of King Juan Carlos for refusing to legalize his party. It recently celebrated "Communist week" in Madrid, handing out thousands of party cards to members at fund-raising dinners. The party also has been openly selling its underground newspaper, Mundo Obrero (Workers' World).

An indetermined number of Communists have been arrested in the last two weeks for distributing the paper and for promoting "abstention" from the Dec. 15 referendum on a law creating Spain's first freely elected parliament since 1936, when the three-year civil war broke out.

There was no immediate comment from government officials. They said that they were not aware of the news conference, which was reported by afternoon newspapers in Madrid and Barcelona.

However, minutes after Mr. Carrillo ended the two-hour meeting, government officials warned editors that it would be unwise to publish photographs of the Communist leader making his first public comments in Madrid since 1939, when he went into exile following the defeat of the Second Republic by the late dictator Francisco Franco.

Mr. Carrillo told 50 reporters, photographers and TV-cameramen that his party cannot remain underground and be pushed into "extra-parliamentary opposition."

He warned that if forced to assume this role, the party would play it to the hilt and the Spanish people and the world would blame the government for the "consequences." Mr. Carrillo rejected reports that the party remained proscribed because of military pressure.

An advocate of the anti-Soviet "Euro-Communist" line, and a man who has been involved in a polemical fight with Moscow, Mr. Carrillo said that his party was "independent," was not affiliated with any Communist international, and had "condemned any attempts to rebuild it."

In a prepared statement, Mr. Carrillo said that despite party opposition to the referendum, Communists in January would announce a list of candidates who would run in all Spanish provinces for seats in the proposed chamber of deputies and senate. He also stated that the party would name poll watchers for next spring's voting.

Shift of Policy

He said that the party had ended its opposition to the establishment of formal diplomatic relations between Spain and Communist-bloc countries. The party had asked the Soviet Union and other East European nations to refrain from establishing formal diplomatic relations until the Spanish government legalizes the Communists.

Mr. Carrillo remarked that the new stand would come as a surprise to Communist Eastern Europe. The Tass correspondent in Madrid reportedly was not invited to the news conference. But a source said that the Soviet reporter here had been asked to provide a full report on the conference as soon as possible.

When asked about reports that U.S. pressure was among the reasons for keeping the Communists outside the law in Spain, Mr. Carrillo said that if this were true, the government was "a mere servant of a foreign power." He added, however, that he had read press reports that President-elect Jimmy Carter was not opposed to Euro-Communists' participation in European governments.

Member Limit Also Turned Down

NATO Rejects Red Pact Bid To Prohibit First A-Strike

By James Goldsborough

BRUSSELS, Dec. 10 (IHT).—The 15 nations of NATO today formally rejected the Warsaw Pact's proposals last month to prohibit the first use of nuclear weapons and to limit the two alliances to their present memberships.

In a communique ending the two-day ministerial meeting, the NATO foreign ministers said that the countries of the alliance "in the event of an attack on them, cannot renounce the use, as may *be required for defense, of any* of the means available to them."

On limiting membership, which the Warsaw Pact nations have brought up since Spanish membership in NATO began being discussed following Franco's death late last year, the communiqué said that the alliance would "remain a free association open to all European states devoted to the defense of the freedom, common heritage and civilization of their peoples."

Several ministers suggested that both Warsaw Pact proposals had been floated as a means of preparing for the Belgrade conference next June, the follow-up to the 35-nation Helsinki security conference.

NATO Secretary-General Joseph Luns said that the pact countries needed "to take the offense because their noncompliance with the Helsinki agreements will certainly come up at Belgrade."

In a press confrence, Secretary of State Henry Kissinger said that the possibility of Spain's joining NATO sometime after the Spanish elections should not upset the Soviet Union. "This is not directed at the Soviet Union," he said. There would be no change in the military balance because of Spain's existing bilateral military accords with the United States, he added.

Before leaving for London and two days of talks with British leaders on the Rhodesian situation, Mr. Kissinger gave a wide-ranging, final NATO press conference. Much of the press conference and much of the final communiqué reflected Mr. Kissinger's parting views on the necessity for simultaneous strength and conciliation on the part of the alliance.

The opening paragraph of the communiqué calls for a more "constructive and stable relationship with the Warsaw Pact countries." With the change in the U.S. administration on everybody's mind, there were signals going out from here both to the pact and to the new administration that NATO wanted to continue on the same path it has been on.

Disquieting Expansion

The 15 ministers "viewed with concern the high level of military expenditure in the Soviet Union and the continued disquieting expansion of the military power of the Warsaw Pact on land, air and sea." The alliance would take the "necessary measures" to meet the threat, the communiqué said.

At the same time, it urged that the Strategic Arms Limitations Talks between the United States and the Soviet Union continue under the administration of Jimmy Carter, that the Vienna negotiations on force reductions get moving again and that the Belgrade meeting next June of the 35 signatories of the Helsinki final act become a forum for further progress toward détente—a word that is back in favor.

There was some recognition in the communiqué of the signals that have been coming out of Moscow recently on the apparent willingness of the Soviet Union to quickly resume serious negotiations after Mr. Carter's inauguration, Jan. 20.

The tone of the communiqué was generally conciliatory, speaking of "realistic opportunities to resolve points of difference with the East," calling for "progressive improvement" in relations and for "perseverance and steadiness over the years."

On the Middle East, Mr. Kissinger said that "the objective conditions are better for peace than they have been for decades." He said that he would be willing to assist the Carter administration "in specific circumstances" if the need arose.

He showed his displeasure over the alleged leak of a State Department cable on the North-South conference negotiations by the Dutch last week and said that he was investigating it. Dutch Foreign Minister Max van der Stoel was no happier. He told the press here that Dutch police were also investigating the

(Continued on Page 2, Col. 3)

4 Liberals Said Freed by Prague

PRAGUE, Dec. 10 (AP).—Czechoslovakian authorities were said to have released from prison today four prominent representatives of the short-lived "Prague spring" liberalization period. The four were serving terms ranging from 5 to 6 1.2 years.

Reliable sources said that the former head of the Communist party academy, Milan Huebl, former student leader Jiri Mueller, former party ideologist and Central Committee member Jaroslav Sabata and Antonin Rusek, a former regional party official, were released on a three-year probation.

They were the last to be set free from a group of 42 dissidents sentenced in seven trials in the summer of 1972.

Lisbon Water Supply Still Cut On the Eve of Local Elections

LISBON, Dec. 10 (AP).—Hospitals postponed operations, office workers went unshaved and housewives fought at public faucets today as 1.5 million persons endured a second day virtually without water.

Officials of the Lisbon Public Water Co. said that they hoped to restore service in Lisbon and communities up to 25 kilometers from the capital by Tuesday. Some supermarkets reported panic buying of chickens and other fresh foods whose production would be affected if the shortage continued.

President Antonio Ramalho Eanes joined other military officers in a predawn inspection of the suburban pipeline damaged by a bomb early yesterday. Unofficial sources speculated that the explosion, which cut off 90 per cent of the normal water supply, was intended to create instability before nationwide local elections Sunday.

Officials said that 50 tank trucks and 500 firemen and soldiers tried to maintain emergency supplies to hospitals, schools, homes for the aged, bakeries and prisons. But some schools closed down until Tuesday and the 600-bed St. Joseph's Hospital said that it had no water for most of the day.

Patients were fed with sandwiches, milk and fruit, the heating system was turned off and hospital laundry services were closed.

Fire officials urged residents to go to water company offices near Tagus River docks to get water. But hundreds of pedestrians besieged tank trucks destined for hotels and restaurants, forcing firemen to dispense water in the street.

The 24-story Sheraton Hotel, Lisbon's most luxurious, provided only drinking water for 400 guests. The U.S. Embassy cafeteria was closed.

Middle-class Portuguese quickly bought up stocks of bottled mineral water. Less well-to-do housewives queued up in long lines at public faucets.

Residents near Lisbon airport

Schmidt Bows to Public Pressure, Cancels Pension Increase Delay

BONN, Dec. 10 (UPI).—Chancellor Helmut Schmidt's government today bowed to mounting public pressure and canceled its decision to delay for six months an increase in old-age pensions.

The ruling coalition of Mr. Schmidt's Social Democrats and Foreign Minister Hans-Dietrich Genscher's Free Democrats decided to increase the pensions by an average 9.9 per cent on July 1, as promised during their campaign for the Oct. 3 general election.

The coalition earlier this week had decided to delay an increase in pensions until Jan. 1, 1978, in an effort to get the social security system out of the red.

The decision to delay increases in pensions caused a storm of protest among West Germany's 11 million pensioners and also met opposition within the ruling coalition's ranks.

The two coalition parties, however, decided that after the July 1 increase, the next hike in pensions would take place 18 months later.

Since 1972, pensions have been raised each July 1 in line with the increase in gross income. In the last three years, the annual rise in pensions has amounted to 11 per cent.

Justice Dept. Presses Investigation

3 Congressional Probes Loom On Korean Bribes in the U.S.

By Scott Armstrong and Maxine Cheshire

WASHINGTON, Dec. 10 (WP).—Steps were taken yesterday to begin three congressional investigations of efforts by agents of the South Korean government to bribe U.S. congressmen with campaign contributions and other cash and material gifts.

The proposed investigations by the House Ethics Committee, a House Judiciary subcommittee and a House International relations subcommittee would include public hearings and would cover the reported influence-buying and other activities in this country of the Korean Central Intelligence Agency and similar intelligence arms of other foreign governments.

Meanwhile, it was learned that the Justice Department has reorganized and added extra personnel to its expanding investigation of South Korean efforts to bribe congressmen.

The Justice Department investigation has been aided by several former ranking KCIA and South Korean Embassy officials in addition to Kim Sang Keun, the second-ranking KCIA official here, who agreed last week to cooperate with U.S. investigators in return for refuge in this country.

Possible Probes

The congressional probes that became possibilities yesterday include:

• An investigation by the House Committee on Standards and Official Conduct (commonly called the Ethics Committee) that was requested yesterday by a vote of the House Democratic Caucus, which referred to the Ethics Committee the question of alleged bribe-taking by congressmen.

• A planned investigation by the International Organizations subcommittee of the International Relations Committee, involving an extension of hearing held in August on the role of the KCIA here.

• An investigation being considered by the Civil and Constitutional Rights subcommittee of the House Judiciary Committee, into the lobbying, propaganda and intelligence operations here of several foreign governments.

Justice Department sources said they were concerned about how their investigation might be affected by the absence from this country of South Korean businessman Tonsun Park, who recently has been living in London.

Mr. Park, who is alleged to have dispensed, along with other Korean agents, between $500,000 and $1 million a year in cash, gifts and campaign contributions to congressmen since 1971, had been cooperating with federal investigators before he left for London about six weeks ago.

Justice Department officials still expect Mr. Park to return here, sources said.

However, Justice Department officials are said to be more concerned that he may not continue negotiations through his attorney William Hundley, to continue turning over financial and business records to the U.S. investigators.

To guard against this possibility, the Justice Department gave Mr. Hundley last week a subpoena for Mr. Park's appearance before a federal grand jury here. Sources close to the investigation said such a grand jury appearance would be indefinitely postponed by the government if Mr. Park continued to provide information voluntarily.

Hope Voiced By Kissinger

(Continued from Page 1)

cy" in rejecting a proposal that he said his government made for including what he called a delegation of "moderate" Africans in the conference.

Asked about the future of the conference, Mr. Smith said much depended on the Kissinger-Crosland talks. He said he had expected to return to Salisbury, Rhodesia, tonight, but "it looks like I'll have to wait another day or two more," presumably until the return of Ivor Richard of Britain, the conference chairman, who went to London to confer with Mr. Kissinger.

Mr. Smith said there was need for a recess of at least a month to allow the delegations time for reflection. He said he would prefer to have the conference resume elsewhere, preferably in Rhodesia. He said he would consider any other venue in Africa, including Nairobi.

Asked why he had returned here after leaving the conference more than a month ago, he replied that his delegation had informed him "things were deviating from the way they were when I left." He added in criticism of Mr. Richard, "The chairman hasn't been bringing people to the starting point."

That starting point, he reiterated, was his agreement with Mr. Kissinger.

Opposition Chief Quits

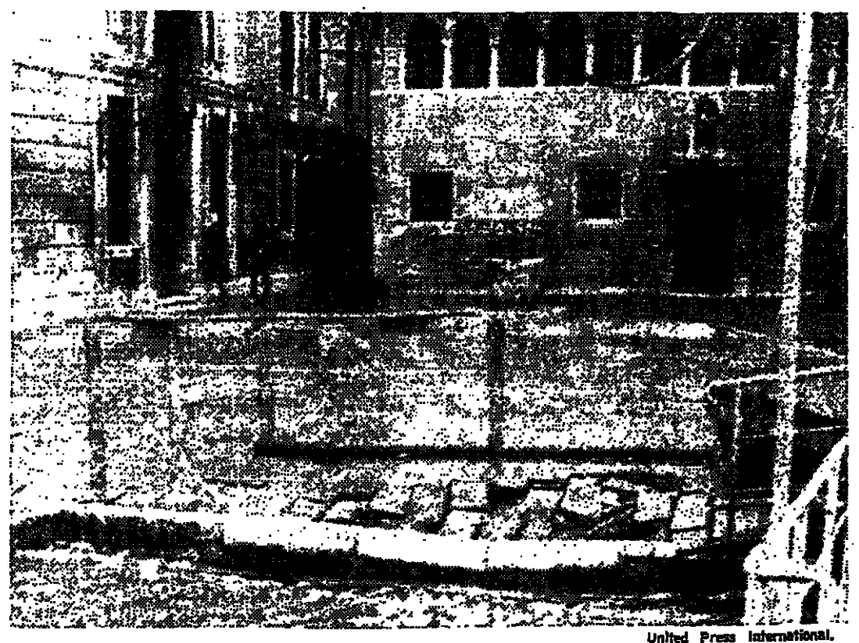
SALISBURY, Dec. 10 (UPI).—The opposition Rhodesia party, which opposes white supremacist policies, today announced the resignation of its president, Tim Gibbs.

UN Aide Charges S. Africa Readies Attack on Angola

LUSAKA, Zambia, Dec. 10 (Reuters).—The United Nations Commissioner for South-West Africa (Namibia), Sean MacBride, today accused South Africa of massing troops in the disputed territory in readiness for an attack on Angola. The charge was immediately denied by South Africa.

Speaking to reporters here, the former Irish foreign minister said the Pretoria government had already moved about 50,000 troops into South-West Africa's border area with Angola.

He added he had information that before the attack, South Africa would set up in the territory what he called a puppet interim government dominated by blacks, toward the middle of next year.



"The intention of this is clear," he said. "South Africa wants to turn the guerrilla war into a struggle in which the new black government is pitted against SWAPO (the South-West Africa People's Organization)."

In Pretoria, South African Defense Minister Pieter Botha said that the troops were in South-West Africa at the request of the authorities in the territory, and that they would stay there until the authorities asked South Africa to withdraw them.

2 in Bronfman Case Guilty of Extortion

WHITE PLAINS, N.Y., Dec. 10 (AP).—The two accused abductors of Samuel Bronfman 2d were acquitted of kidnapping charges today, but were convicted of exporting $2.3 million in ransom from the whisky heir's father.

The jury apparently accepted testimony of defendant Mel Lynch, 38, that the alleged kidnapping Aug. 8, last year, was a hoax planned by the 23-year-old Bronfman to extort money from his father, Edgar, 47, co-defendant Dominic Byrne, 54, did not take the witness stand.

United Press International.

IS VENICE SINKING?—Yes, at least part of it: pavement along the Grand Canal, which began breaking up Friday after flooding hit several sections of the city.

In Preparation for Talks With Israel

Arabs Press PLO to Reduce Political Goals

(Continued from Page 1)

that skirts the camp is full of life. The open markets and small repair shops are crowded.

While ordinary Palestinians return to familiar ways, Syria is working through as-Saiqa to try to oust the PLO's leaders. Having been driven out of Palestinian strongholds in Beirut on June 6, a week after the Syrians entered Lebanon in force, as-Saiqa is back with 8,300 soldiers in Beirut and 2,000 more in Nabatiyet and Saida. It has reoccupied its headquarters at the refugee camp, driving out Palestinians loyal to Mr. Arafat in a gun battle that cost 12 lives.

The Syrians do not hide their hold on as-Saiqa. At the headquarters, a tough-looking Syrian officer fondling a riding crop that appeared to conceal a weapon relinquished his place beneath President Hafez al-Assad's picture to as-Saiqa's civilian spokesman. The spokesman, Ossama Bayrakdar, speaking excellent English to a reporter, identified himself as a Syrian citizen and an official of the governing Ba'ath party and the Information Ministry as well as head of the as-Saiqa information office in Lebanon.

'They Must All Go'

"We won't tolerate the present PLO leadership," he said. "They must all go, including Arafat." He ticked off the names of the four men who, with Mr. Arafat, are running el-Fatah: Abu Iyad, Farouk Kaddoumi, Abu Jihad and Abu Saleh, and added that of Nayef Hawatmeh, head of the Democratic Front for the Liberation of Palestine, a Marxist group that is el-Fatah's close ally.

Mr. Iyad, the second-ranking man and a hardliner standing to the left of Mr. Arafat, controlled the overall direction of the war in Lebanon before and during the confrontation with Syria. He often attacked Mr. Assad personally and vituperatively. Last spring he declared that the road to the liberation of Palestine led through Aintourah and Junieh, Aintourah being a mountain village 20 miles northeast of Beirut and Junieh the "capital" of the right-wing Lebanese Christians in their redoubt north of the capital. The statement was viewed by Syrians and Lebanese Christians as the symbol of Palestinian "aggression" in Lebanon.

Mr. Jihad was military commander in the mountain battle against the Syrian Army. Mr. Kaddoumi, also known as Abu Lutf, is the "foreign minister" and has a reputation for being more flexible and moderate, representing the right wing of the movement. Mr. Saleh, a military commander with no pretensions to political leadership, is regarded as being on the left wing.

Broad Movement

Mr. Arafat, who is deeply religious, is widely believed to be on the right in el-Fatah, which, its member explains, is a broad nationalist liberation movement that has no precise political program and can accommodate diverse political currents and personal attitudes—a vagueness that has served the organization well.

The Syrians have not been able to wean away a single leading official. Even the two members of the Executive Committee who lived in Damascus throughout the Lebanese war remain committed to Mr. Arafat. The two, Abu Mazen and Abu Maher, moderates standing on the right wing of the movement, acted as a channel of quiet negotiation even during the worst periods.

Another seen as a rightist, Khaled el-Hassam, was mentioned in Damascus as a possible successor to Mr. Arafat, but he, too, remained loyal. He used his conservative credentials to persuade the Saudis to impose a cease-fire on the Syrians and Palestinians, call President Assad and Mr. Arafat to confer and save the Palestinians from military defeat.

As an insider relates the story, Mr. Hassam approached Crown Prince Fahd, the first deputy premier, with all the humility of a Bedouin petitioner extolling the God-given powers of the royal house. "We are in your hands," he said, according to this account. "If you want all Palestinians slaughtered, give your command and we will bare our throats." Referring to the Empty Quarter, the most desolate region of the Arabian Desert, he added: "If you want all the children of Palestine to be herded into Rub al Khali, say so and we will go."

At the end of the conversation, the account continued, Prince Fahd phoned Damascus and curtly told Mr. Assad that a conference would be held the following day in Riyadh, and messages were sent to Mr. Arafat and the Presidents of Egypt and Lebanon. The Palestinian movement had survived its worst crisis.

Survival is Mr. Arafat's specialty, and there is a conviction here that the Syrian effort to replace him will fail. At the age of 47, the small, bald man is constantly in motion as the tireless advocate of the Palestinian cause—touring the camps, front lines and hospitals, visiting the presidential and royal palaces of the Arab world and occasionally straying as far as Belgrade, Moscow and New York.

NATO Rejects Red Pact Bid To Prohibit First A-Strike

(Continued from Page 1)

leak and that criminal proceedings may be brought, but he did not say against whom.

On the North-South conference, Mr. Kissinger said that the United States had urged postponement of its final session this month because of the change in administrations. It was not in the interests of the conference, he said, "for the outgoing administration to put forward proposals that would have to be implemented by another administration."

On the Warsaw Pact proposals, there was a little embarrassment here that NATO was in the position of refusing what appeared to be reasonable propositions for reducing tensions and limiting competition between the military blocks and there was considerable discussion of the wording of the communiqué, especially on banning first use of nuclear weapons last month. The proposal received considerable attention at the time.

The NATO view is that the potential use of nuclear weapons has great dissuasive value and could become even greater if the disparity between the sizes of the conventional forces confronting each other in Europe continues to grow.

In the Central Europe area, the Warsaw Pact maintains 925,000 ground troops and 16,000 tanks against NATO's 777,000 troops and 6,000 operational tanks.

Because of the sensitivity of the defense issues discussed, Mr. Luns said that the sessions here had been restricted most of the time, which limited them to ministers and top advisers only.

The secretary-general said the Warsaw Pact countries need not worry that NATO use nuclear weapons other than defensively because "there never could be any question that NATO countries would use nuclear weapons to commit aggression."

Lisbon Water Is Still Out

(Continued from Page 1)

reported that women were breaking open fire hydrants and scuffling for trickles of water.

Many Abstentions

Meanwhile, political analysts predicted that Communists will make significant gains at the expense of the ruling Socialists in Sunday's elections because many Portuguese will not vote.

The analysts said that they also expect the rightist Social Democratic Center party to take votes away from the Socialists because of economic discontent and apathy.

The 6.5 million Portuguese voters will fill 45,000 legislative and executive posts in 304 municipalities and 3,262 smaller entities. There are 150,000 candidates.

The issues are local, but most Portuguese see the elections as a kind of referendum on Socialist Premier Mario Soares's four-month-old Cabinet, Portugal's first freely elected national government since the April, 1974, revolt ended 40 years of rightist dictatorship. Mr. Soares has said that he may resign if the elections show his party has lost popular support.

The Socialists polled 35 per cent—1.9 million votes—in parliamentary elections last April, while the Social Democrats got 1.3 million—24 per cent. The Social Democratic Center won 16 per cent and the Communists 15 per cent.

Europe to Begin Manned Spacelab

PARIS, Dec. 10 (Reuters).—Construction of Europe's manned space laboratory, which is scheduled to begin orbiting the earth in 1980, will begin next year, the European Space Agency said.

Spacelab is scheduled to be launched by the U.S. National Aeronautics and Space Administration in 1980 with a European and an American in the crew. The laboratory is due to make at least 50 flights in the next decade.

Investment Slows in 4 Provinces

Quebec Worries Maritime Canada

By Henry Giniger

HALIFAX, Nova Scotia, Dec. 10 (NYT).—The leaders of Canada's four Atlantic provinces are trying to avoid panic over the possibility of Quebec's separation from Canada, but more than just winter winds are giving them a chill.

Deep concern has been evident in Nova Scotia, New Brunswick, Newfoundland and Prince Edward Island since Quebec's voters elected a separatist government in the province on Nov. 15.

Though issues other than independence dominated the election, this seaside capital of Nova Scotia and the three other capitals are taking the issue of independence seriously and are embarking on studies on where such a move would lead them.

For Premier Richard Hatfield of New Brunswick, anything that weakens the central power in Ottawa would adversely affect his region.

Federal Funds

"We in New Brunswick believe in strong federal government," Mr. Hatfield said in an interview. "The reason is that it is the only kind of government that can deal effectively with the problems of the weaker provinces."

More than 40 per cent of New Brunswick's budget is financed by federal funds. In Nova Scotia, Premier Gerald Regan estimated the federal share of his budget at 35 per cent. In Newfoundland and Prince Edward Island the figures run well over 50 per cent.

Mr. Regan had another reason to worry. "Election night in Quebec was a shock and ever since we have been telling ourselves that Quebec really doesn't want to separate," he said. "But we now have an element of uncertainty, and uncertainty is the worst enemy of investment. It affects not only Quebec but the Atlantic provinces as well."

Trade Decreasing

The four provinces feel more vulnerable than ever. It is not easy in ordinary times to attract industrial investment to an area that has long land connections to the big consumer markets in central and western Canada.

Investment is now slower than usual and some big ones, such as two major steel plants in Nova Scotia, are turning sour. The

NYT.

Canada's four Atlantic provinces, east of Quebec, are shown on map in white.

plants are having trouble selling their products elsewhere. The international trade on which Halifax depends is also down. Unemployment is at 10 per cent in New Brunswick and Nova Scotia and around 14 per cent in Newfoundland.

Outwardly, Halifax belies the depressing picture because the boom years spurred major construction in the dilapidated downtown area, and this construction is continuing. But with the collapse in the market for oil tankers Halifax shipyards are running out of orders. Its industry remains greatly dependent on electricity that is produced with high-priced oil.

Newfoundland looks to Labrador because of its still largely untapped hydroelectric power reserves. But the province has a long-standing dispute with Quebec over boundaries and is now worried that an independent and more nationalistic Quebec would push its claims more aggressively.

There is less worry about the idea of physical separation from the rest of Canada, a problem that political and economic leaders think could be overcome. Quebec lies between the four Atlantic provinces and the rest of Canada. But René Lévesque, Quebec's new Premier, wants a common market or at least a customs union between Canada and an independent Quebec so that the eastern provinces would not have tariff barriers to hurt in trading with Quebec or other parts of Canada.

The Atlantic provinces already feel isolated geographically, because of their heavy dependence on international trade, have a long-standing grievance against the federal government because of its protectionist tariff policies.

The area has strong economic and personal links with the United States, and this north-south tie has led some to think that the provinces could become American states if the Canadian confederation should break up.

Both the New Brunswick and Nova Scotian Premiers reject such an idea out of hand, stressing the strong pro-Canada sentiment in the area. Many thousands of Nova Scotians have relatives living in New England. Mr. Regan said these bloodlines were those of an older generation that was dying out.

"New England is not doing too well economically anyway," he said.

Another possible reaction to withdrawal of Quebec and subsequent rearrangement of Canadian Federation is the merger of three of the Atlantic provinces—Nova Scotia, New Brunswick and Prince Edward Island. This is a move that has been discussed for a long time.

"It will never happen," Premier Regan said. He said Nova Scotia, as the wealthiest of the four provinces, was completely opposed to it. But others in the area are less categorical about the idea.

The Atlantic Provinces Economic Council, a private non-profit organization that is financed in part from official sources, is about to embark on a study of the possible consequences to the maritime provinces of Quebec separation. Peter Gunther, director of the council, cited the possibility that Quebec might boost railroads rates through Canada's territory.

"The politicians are trying to stay calm," Mr. Gunther said, "but everyone is caught between the need for calm and the need to start making contingency plans. Nobody underestimates René Lévesque."

'Disturbed' Calm, 'Normal' Killers in Beirut

(Continued from Page 1)

the fighting for the bodies of war victims.

"During the early period of the war, when both sides were kidnapping and massacring according to the religion of the victim, the morgue was completely full. I did post-mortems on some of the bodies. One night I saw a dozen who could only have been killed, deliberately, by a skilled surgeon. They showed no wounds except for very neat and precise scalpel incisions of the carotid arteries (arteries along the sides of the neck that feed blood to the brain)."

Dr. Labban and the psychiatrists at the hospital told their stories not simply to describe the horrors and absurdities of the war in Lebanon, but to illustrate what they believe soon will become the embattled country's most difficult problem—widespread mental disorder.

"Right now there is a strange kind of lull," said Dr. Labban. "People are no longer dying, but

Upsurge Is Feared In Mental Illness

they are not living, either. There is a temporary feeling of relief, even a kind of exhilarating release from the tension. Yet just beneath the surface they are on the watch—relieved but not really relaxed. They are anxious. Everyone is reviewing within himself the whole experience.

"In a month, three months, six months, the feelings will surface as psychoses, depressions, hysteria, phobias."

An Asfuriyeh psychiatrist who served in the British Army psychiatric service during World War II agreed. "We learned then that during the actual crisis there were few problems. In all disasters, the real psychological drama comes after the disaster is over, when people settle down and afford themselves the luxury of becoming emotionally disturbed."

There is no way yet to measure the extent of the coming mental-health problem in Lebanon, he said, but added that from past experience, "I would guess about 25 per cent of the people, especially here in Beirut, will have breakdowns—anxiety and hysterical manifestations that require

UN Drafts Pact On Prevention of Taking Hostages

UNITED NATIONS, N.Y., Dec. 10 (AP).—Third World and Western nations agreed today on a West German proposal for an international treaty against the taking of hostages.

The agreement assured the resolution's unanimous adoption by the General Assembly's Legal Committee. Subsequent passage by the full Assembly was largely a formality, since all 146 member nations sit on the Legal Committee.

The resolution calls for establishing a 35-nation panel to draft a convention committing governments to prevent the taking of hostages and to punish those who take them. The treaty would be the first UN anti-terrorism measure seeking binding jurisdiction over the world's population.

The agreement followed a compromise between West Germany and Libya, which dropped a demand that the treaty apply only to "innocent" hostages.

In return for Libya's concession, the West Germans and their measure's 37 co-sponsors agreed to delete a provision saying that the taking of hostages should be condemned, prohibited and punished and that those involved should be prosecuted or extradited for prosecution.

Beirut Premier Orders Merger Of Rival Radios

BEIRUT, Dec. 10 (UPI).—Premier Selim al-Hoss announced today that Moslem-leftist and Christian-rightist radios will be merged.

Mr. Hoss said that "it was agreed to unify the media once and for all" but the decision appeared to apply only to radio since no mention was made of television or newspapers.

Throughout the Lebanese civil war, rival radio station broadcast highly partisan reports and propaganda from their respective sectors.

Beirut radio in the Information Ministry in west Beirut was controlled by the Moslem leftists. Amsheet Radio, north of the capital, followed the line of rightist former President Suleiman Franjieh.

Moslem and Christian factions also broadcast from "pirate" stations like the Phalangists' "Voice of Lebanon" and the leftist Mourabitoun's "Voice of Arab Lebanon."

"There will be one radio station," Mr. Hoss said. "As of Sunday, people will be able to listen to the same radio programs as before."

Israel Arabs End Strike

TEL AVIV, Dec. 10 (UPI).—Merchants in principal towns in the West Bank of Jordan today ended a four-day business strike that sparked violent clashes between Arab youths and Israeli occupation troops, Arab sources said. some businessmen agreed to pay part of a new sales tax, while others held out pending talks with the military government.

Connally Bars Bid for GOP Chairmanship

After Meeting Ford, Rockefeller, Reagan

By Edward Walsh

WASHINGTON, Dec. 10 (WP).—Former Texas Gov. John Connally yesterday virtually removed himself from consideration as the next chairman of the Republican Party after a White House political summit conference called by President Ford to begin patching up the tattered party.

The President summoned Mr. Connally, Vice-President Rockefeller and Mr. Ford's presidential primary foe, Ronald Reagan, to the White House for the first of what apparently will be continuing discussions among the nation's four most prominent Republicans on the future of the party.

Mr. Ford said afterward that he and the others had agreed that there are "five or six" potential choices for the party chairmanship that would be acceptable to all of them.

Mr. Connally was not among those potential consensus choices, and the Texan also told reporters::

Not 'Available'

"I'm really not available, and don't see any circumstances under which I would be."

The President also said that the four men had agreed that a Republican coordinating committee should be established. It would be separate from the Republican National Committee and modeled after a similar group that was formed in 1965, when the party also was at a low point.

Mr. Ford said he and the others will continue to meet, with their next session tentatively planned for the first week of next month.

The national committee will meet Jan. 14-15 to choose a successor to Mary Louise Smith, who is resigning as chairman.

The President emphasized that he and the others would not try to dictate the choice to the party. He said repeatedly that "we are not kingmakers," and that there was agreement among the four men not to attempt to choose among the five or six acceptable candidates.

No List

The President declined to list the potential acceptable choices, but at least some of them are generally known.

They include Utah Republican chairman Richard Richards, who was an early Reagan supporter and is the choice of the Western Republican chairmen, Indiana chairman Thomas Milligan and Ohio chairman Kent McGough.

Others who have been mentioned as possible choices, and who might qualify as consensus selections, include Wisconsin national committeeman Ody Fish, former Ford campaign chairman James Baker 3d, Tennessee Sen. Bill Brock, who was defeated for re-election, and Treasury Secretary William Simon.

Carter Gets 2 Sets of Proposals for Ending Economic Slump

By Eileen Shanahan

WASHINGTON, Dec. 10 (NYT).—The chief executives of 16 major corporations and members of President-elect Jimmy Carter's transition staff independently presented him yesterday with what turned out to be strikingly similar proposals for ending the economic slowdown.

Both plans involved tax reductions for both individuals and business, and both included new government spending programs that would directly create jobs for the unemployed.

The proposal presented by the transition staff would cost the government $20 billion in the current fiscal year in reduced tax collections and additional spending. The proposal advanced by the business executives would cost $23 billion, although not all of that would be spent in the current fiscal year, which ends next Sept. 30.

Mr. Carter made no comments on which, if either, proposal he would adopt.

According to Irving Shapiro, chairman of E.I. du Pont de Nemours Co., Mr. Carter told the businessmen that he hoped to be able to bring the economy out of its slowdown with an expenditure of "less dollars" than they had recommended.

The President-elect told his transition staff aides that he would make no decisions on economic policy matters until he had completed the selection of his key subordinates in the economic area.

Only one of these has been chosen, Atlanta banker Bert Lance, who will be director of the office of management and budget.

Mr. Lance, at a luncheon with reporters yesterday, noted his own preference for a $15-billion package of tax reductions and job-creating programs and observed that an economic-stimulus package of this size would mean a budget deficit of about $75 billion. He said that to deliberately create a deficit of that size was "going to require some explaining to the American people," but that he felt it had to be done.

Mr. Carter's meeting with the business executives and his transition staff in the economic policy area constituted only two of 16 separate meetings that he held yesterday with his staff, members of Congress, the governors of the northeastern states, and such private citizens as Leonard Woodcock, president of the United Auto Workers, and Clark Clifford, the Washington lawyer and lobbyist who was President Lyndon Johnson's last secretary of defense.

Mr. Woodcock said afterward that he had proposed a rebate of individual taxes to stimulate the economy, but did not specify the size.

The tax-reduction plan recommended by the Carter transition staff involved a combination of a rebate of some part of 1976 taxes and a reduction in 1977 tax liabilities that would mean reduced withholding for all taxpayers.

The staff also presented several different ideas for tax incentives to stimulate business investment in new equipment.

The reduction in individual and business taxes recommended by the transition staff totaled $15 billion. The staff also proposed an additional expenditure of $5 billion in job-creating programs of various kinds, including direct federal programs of employment, grants to states and local governments for emergency employment programs, and additional subsidies for home construction.

Details of the programs for economic stimulus presented by the business executives were disclosed by Reginald Jones, chairman of the General Electric Co.

They did not include a tax rebate. Instead, the business executives proposed an increase to $50 a person, from the present $35, of the special tax credit, plus reductions in tax rates that would cut individual income taxes by a total of $15 billion.

U.S. Pesticide Caused Deaths In Egypt, Is Still Being Used

By Thomas W. Lippman

CAIRO, Dec. 10 (WP).—U.S.-made pesticide leptophos, which attacks the nerve system, was spreading illness and death among Egyptian villagers as early as 1974 and is still in use in Egypt, according to officials here.

Last week is was reported that the U.S. government has helped pay for the shipment overseas of hundreds of tons of pesticides so poisonous that they are not permitted to be used in the United States. This included leptophos, which has been linked to illnesses among workers at the plant where it was made.

In fact, a U.S. government laboratory warned Egypt two years ago about the dangers of the pesticide, marked as Phosvel. But the Egyptian government made another large purchase, and the pesticide is still being used on crops here, the officials said.

Entire families have suffered from convulsions, speech impairment, loss of bladder control and "mental defects," a health official said, adding: "We had some deaths."

Food Supply

It was the first confirmed report of deaths caused by the pesticide, which is suspected of causing partial paralysis, failures of muscular coordination, blurred vision, choking sensations and dizziness among workers at the Bayport, Texas, plant of its manufacturer, Velsicol Chemical Corp.

The fact that whole families here, not just field hands, suffered the symptoms indicates that the problem was in the food supply. Egyptian researchers found that the people had been using the pesticide as a preservative for their wheat seeds, a common practice.

Only last month did the Ministry of Agriculture make a final decision not to buy any more of the pesticide, which Velsicol stopped producing early this year. But ministry officials said that a company representative tried recently to persuade them to make a new purchase.

Velsicol's office in central Cairo has ben closed all week. Attempts to reach the company's representative at his home were unsuccessful.

It is not known here wether the laboratory that conducted the tests in June, 1974—the Environmental Protection Administration's (EPA) Pesticides and Toxic Substances Effects Laboratory in North Carolina—distributed its findings about leptophos at that time. Its report to the Egyptians is marked "confidential."

Ahmed Akkad, under secretary for preventive medicine in the Ministry of Health, said that the government is apparently still distributing the remnants of the multi-ton shipment of leptophos it received later in 1974. "It must be condemned," he said.

He said the findings of the EPA were unequivocal. They confirmed, he said, suspicions that were first aroused in 1972, shortly after the pesticide was first used here.

Bid to Overturn Carter Victory in Ohio, Texas Fails

NEW YORK, Dec. 10 (AP).—Challenges to the U.S. presidential election results in Ohio and Texas were overruled yesterday, but in both cases the judges kept the door open for attempts to reverse the results.

Challenges are pending in New York, Pennsylvania and Wisconsin, but so far the efforts have been unsuccessful in overturning Jimmy Carter's victory in those states.

The suits will have to be settled by Monday, when the Electoral College votes for president. At present, Mr. Carter has 297 electoral votes with 270 required to win, President Ford has 241.

In Ohio, Mr. Carter was ordered certified as winner of the state's 25 electoral votes. However, the judge denied a defense motion to dismiss the suit. Republicans, the U.S. Labor party and others had complained in a federal court suit that the Nov. 2 general election voting in the state was marred by fraud.

In Texas, a federal judge refused to issue a restraining order that would have prohibited the Texas presidential electors from casting their ballots for Mr. Carter.

But U.S. District Court Judge Robert Porter said he will issue an order allowing an emergency appeal.

Two Koreas Meet

SEOUL, Dec. 10 (AP).—North and South Korean representatives met for 80 minutes today at Panmunjon but failed to agree on how to resume full-scale talks aimed at reuniting families separated by the Korean war.

Budget for Probe Of Assassinations

WASHINGTON, Dec. 10 (AP).—The House Committee on Assassinations has voted to spend $6.5 million in the first full year of its investigation into the slayings of President John Kennedy and the Rev. Dr. Martin Luther King jr.

"Any cut [in that figure] in my opinion will make the task impossible," said Richard Sprague, chief counsel and director of the panel.

Mr. Sprague said it was his "best estimate" that the investigations into the two murders could be completed within two years and that the second year might cost less, since the areas to be probed would be narrowed by then.

Morocco Frees 105

CASABLANCA, Morocco, Dec. 10 (Reuters).—Morocco has released 105 persons held in preventive custody for up to two years on suspicion of subversive activities, defense lawyers said.

U.K. Trotskyist Flap: Is It Inflated?

By Robert B. Semple Jr.

LONDON, Dec. 10 (NYT).—Prime Minister James Callaghan, his predecessor, Sir Harold Wilson, and the general secretary of the governing Labor party have joined some of this country's newspapers in warning against a party take-over by "extremist infiltrators," mainly youthful Trotskyists.

Judging by the headlines given these warnings, the average British reader could easily conclude that the party is ripe for take-over, if not already in bondage. In fact, the militants are few in number, and only about a dozen seats in Parliament are being seriously challenged.

But what the "infiltrators" as well as their critics have done is to focus attention on an important aspect of present British politics: the antiquated methods by which the British select their candidates for Parliament.

This system, which has nothing in common with the U.S. primaries, vests the power of selection in the "management committee" of a local constituency party. This works well for the member of Parliament who has friends on the committee; it works badly if the committee is suddenly seized by activists.

Asset Strippers

Of all the critics, the most vituperative has been Sir Harold, who resigned as Prime Minister early this year. Sir Harold, in a speech Saturday in Yorkshire, denounced what he called "political asset strippers" and the "cynically calculated methods of the take-over bidders." He named no one, but clearly he had in mind the activists who are supposedly trying to unseat members they believe to be on the right wing of the party.

Sir Harold called for a number of reforms, all designed to protect the safety of a sitting member's seat rather than widen the choices available to voters in a local constituency. He said that a member should be rejected only if a majority of all registered Labor voters in the district voted against him; he also said that temporary "infiltrators" who move into a neighborhood with the sole purpose of unseating a sitting member could be neutralized if a rule was adopted preventing anyone from joining a management committee unless he had registered for two successive elections.

Mr. Callaghan, who spoke the night before to party workers in Leeds, was no less emotional. He told his audience that the most hateful slogans he had heard recently were: "What do we want? Everything! When do we want it? Now!"

"That's not socialism, that's fascism," Mr. Callaghan said. "There are too many people who have infiltrated this party already. Get them out!"

Meanwhile, the party's left-wing secretary, Ron Hayward, issued similar warnings and, as a result, the party's influential National Executive Committee is expected to reopen an earlier investigation of "extremist" infiltration. Such a move would have the support of many of the country's powerful labor unions and most party regulars.

Mr. Hayward's statement came as a surprise. Only a month ago, he had voted for the appointment of Andy Bevan, a Trotskyist, to a $7,000-a-year post as the party's national youth organizer.

The attack from senior members of the party gave the appearance of being orchestrated, although Sir Harold had insisted that he did not clear his comments with the Prime Minister's office before delivering them.

The speeches followed a series of articles in The Times of London alleging infiltration of various constituencies. The series included a detailed portrait of left-wing machinery in Bradford, now represented by a moderate member of Parliament, Edward Lyons.

Divided Group

The true influence of the radical left may be less than the government fears, or says it fears. The Trotskyists in Britain are divided, one group coalescing around a 12-page newspaper called the Militant, another around a party-financed paper called Left. Some experts think there are less than 10,000 of them altogether, although this is in dispute.

What is not in dispute is that they believe in much wider government ownership of the means of production and distribution. They also believe that Labor members who favor a mixed economy, and there are many, have forsaken socialist ideals.

It is also true that their ability to capitalize on the apathy of rank-and-file Labor voters, and thus gain influence on—if not control of—local committees, has confronted several members of Parliament with the prospect of repudiation at the next general election.

Among these are Neville Sanderson, Frank Tomney, Mr. Lyons, and a member of the Cabinet, Reginald Prentice, the minister for overseas aid. A staunch supporter of public spending cuts, Mr. Prentice has been told by his London management committee that he will not be chosen to represent his district the next time around, a decision he is now fighting.

U.S. Moscow Envoy

MOSCOW, Dec. 10 (UPI).—Malcolm Toon is to arrive Dec. 30 to take over as the next U.S. ambassador to the Soviet Union, embassy officials said today.

"Camera of the year."

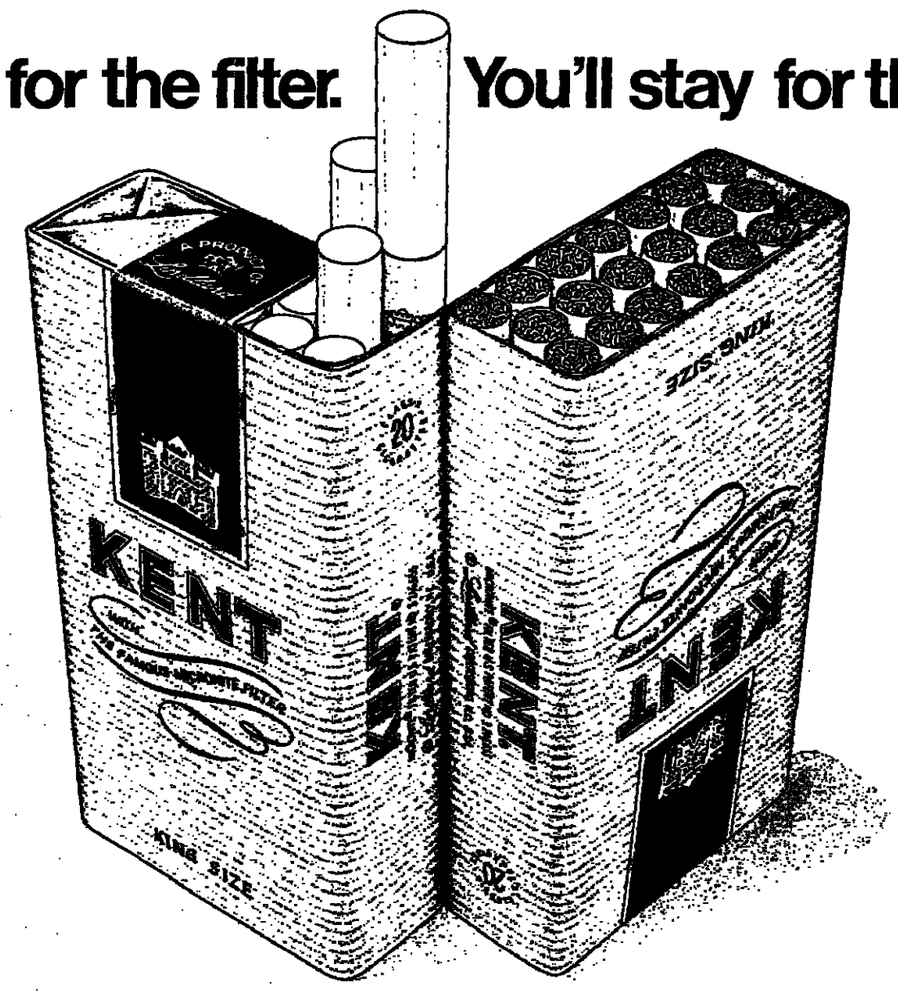
Photo magazine said it in their first article on the Pentax K2. The editors went on... "A skilful synthesis of recent technical developments, a special shutter, a highly reliable metering system and an exceptional basic lens... all these elements serve to make the Pentax K2 the star of this year's photographic salons".

A truly versatile camera, the Pentax K2 is automatic *or* manual. If you like, the K2 will select the correct shutter speed for you—electronically—from an infinite range between 1/1000 and 8 seconds. Or you can choose manually one of the 15 speeds from B, 8 seconds to 1/1000, match the needle and shoot.

Most remarkable, perhaps—with all its engineering perfection—the K2 retains the famous Pentax "feel". It's light, compact, so designed to fit your hand that it actually becomes a part of you. In brief, a photographic pleasure.

SMC PENTAX K2

Shown is the SMC 45-125mm f/4 zoom. Also available, 3 "standard" lenses, a full range of others.



K2 The Ultimate Pentax.

Medvedev Story of Soviet A-Disaster Backed

LONDON, Dec. 10 (Reuters).—Evidence is growing that the Soviet Union suffered a nuclear disaster almost 20 years ago, but its scope, nature and location remain in doubt.

Prof. Leo Tumerman of the Weizmann Institute of Science in Israel has supported the report of Soviet dissident Zhores Medvedev that a nuclear accident devastated a large area of the Ural Mountains late in 1957 or early in 1958.

Dr. Medvedev, a biochemist who left the Soviet Union to live in England, where he works at the National Institute of Medical Research, mentioned in an article in the New Scientist magazine last month that nuclear waste buried near the town of Blagoveshensk had exploded "like a violent volcano."

The radioactive fallout spread over hundreds of miles, affecting tens of thousands of people and killing hundreds, he wrote.

Unexpected Reaction

The statement caused a minor sensation in the nuclear community, although Dr. Medvedev, who made the revelation in the middle of an article about dissident Soviet scientists, said he had thought that the incident was a matter of common knowledge.

Sir John Hill, chairman of Britain's Atomic Energy Authority, called the Medvedev report "rubbish," noting that radioactive monitoring was being carried out in the West at the time and such a blast would have been detected.

Prof. J.H. Fremlin of Birmingham University recently said that even if the waste had been buried incorrectly, it would not have exploded. Besides, the Soviet Union had only one reactor at the time, he noted.

However, Mr. Fremlin did not dismiss Dr. Medvedev's report completely. He admitted that a test hydrogen bomb could have gone off during assembly.

Prof. Tumerman wrote to the Jerusalem Post that during a car trip through the Urals in 1960 he came across an area 60 miles from the city of Sverdlovsk that was completely uninhabited and unfarmed.

Warnings to Drivers

A highway sign warned motorists to drive at maximum speed and not to stop for the next 15 to 20 miles because of radiation, he said.

"Superficially, everything was in order," Prof. Tumerman said. "There were trees and grass. But it was an empty land, like on the moon. There were no villages, no towns, only the chimneys of destroyed houses, no cultivated fields or pastures, no herds or people... nothing."

Prof. Tumerman, who headed the Institute of Molecular Biology in Moscow before going to Israel in 1972, said he was told later that the area was the site of the "Kyshtim disaster"—apparently named for a town about 150 miles east of Blagoveshensk and 120 miles south of Sverdlovsk—and that a blast had occurred at a military nuclear plant which prepared plutonium for hydrogen bombs.

But the professor also reported that scientists said that the accident was caused by negligent storage of wastes, although he did not mention underground burial.

No Problem Seen

Dr. Medvedev, commenting after the Israeli newspaper published Prof. Tumerman's letter, said that no problem was posed by the different versions of how the catastrophe occurred.

"I don't know which story is true. It depends on which story was more embarrassing to the officials," he said, indicating that he thought they would spread the one which was least embarrassing.

At the time of the blast he was working in a Moscow laboratory, studying the effects of radiation on plants. Officials informed the lab that there had been an explosion of nuclear waste in the Urals and asked for volunteers to set up an experimental station in the area, he said.

Dr. Medvedev did not want to leave Moscow at the time, but many of his colleagues took up the offer because it involved extra privileges and a chance for research that interested them, he said. Later, Dr. Medvedev said, the researchers were frustrated by not being allowed to publish their findings.

Court Upholds Czech Hijackers

ANSBACH, West Germany, Dec. 10 (UPI).—A court here ruled yesterday that West Germany should grant political asylum to two Czechs who hijacked an airplane to Nuremberg in 1972.

Karel Dolezel, 32, and Antonin Lerch, 28, asked West Germany for political asylum after they hijacked a Czech twin-engined aircraft on a domestic flight from Prague to Marianske Lasne and diverted it to Nuremberg. The co-pilot was shot in the chest during the hijacking but survived and returned with the pilot and seven other passengers to Prague.

A Nuremberg court sentenced the two refugees to seven years in prison each for the hijacking. Czechoslovakia demanded the extradition of the two men, both miners. In its verdict, the Ansbach court said the hijackers acted because they believed their life would be better in the West.

Kidnapped Heir Discovered Dead In West Germany

SAARBRUECKEN, West Germany, Dec. 10 (UPI).—Police said yesterday that they found the body of Gernot Egolf, the heir to a brewery fortune kidnapped five weeks ago, buried in a remote wartime air raid bunker.

Mr. Egolf's abduction was the third kidnapping in West Germany in three months of heirs to more than a million marks. The two other kidnappings ended with the victims' release unharmed after the payment of large ransoms.

Two men who confessed to having been involved in the kidnapping of Mr. Egolf, 32, led police to his body which was buried under the bunker.

Mr Egolf was kidnapped Oct. 19 and although his parents paid the ransom demanded by telephone, the kidnappers never collected the money.

Police said that Mr. Egolf died of exposure while chained to the bunker.

Greek Schools Shut

ATHENS, Dec. 10 (UPI).—More than 32,000 primary and nursery school teachers staged a 48-hour warning strike today asking for equal salaries with other civil servants.

U.K. 'Gay News' Facing Charges Over Blasphemy

LONDON, Dec. 10 (UPI).—Britain's morals crusader Mary Whitehouse has been given court permission to begin blasphemous libel proceedings against a magazine for homosexuals—the first such case to be tried in 44 years.

The subject of the prosecution is a poem written by James Kirkup, 53, a poet in residence and visiting professor at Amherst College in Massachusetts.

Published in Gay News, Mr. Kirkup's poem is a fantasy in which the speaker imagines a series of homosexual acts in which Christ is involved.

Using an act of 1889, Mrs. Whitehouse appealed to judges at a private hearing that she be given leave to bring proceedings against the paper. By using the acts she was able to bypass pretrial hearings.

The maximum penalty for blasphemous libel is life imprisonment. The last man convicted on that charge was sentenced in 1922 to three years hard labor for describing Christ riding like a circus clown on two donkeys.

Swiss May Extradite Millionaire as SS Man

BERN, Dec. 10 (UPI).—The Swiss government said that a decision will be made either next week or the week after on extraditing Dutch millionaire art collector Pieter Menten, wanted in the Netherlands in connection with the wartime killing of 300 Polish Jews.

A Justice Ministry spokesman said Switzerland could send Mr. Menten, 78, back to the Netherlands if it is satisfied there are "well-founded grounds for suspicion that he committed the crimes in question." He allegedly served as an SS officer during the German occupation of Poland.

Dacca Leader Charges India Aggression

DACCA, Dec. 10 (AP).—Bangladesh's military strongman, Ziaur Rahman, has accused India of inciting persistent violence on their common border.

"They are training miscreants and sending them inside our country," Maj. Gen. Rahman said in one of his sharpest public statements about the tension between the two countries. "Sometimes, there is major violence and almost every day there are border violations."

The 40-year-old chief martial-law administrator also charged in an interview this week that arms were coming into Bangladesh from across the border and that some Bangladesh political parties were receiving financial assistance from India.

"In the past year, we have seized more than 8,000 firearms," said Gen. Rahman, who came to power 13 months ago after a bloody three-month power struggle. "We hope India will stop these things."

Political Purposes

India has repeatedly denied inciting border incidents and has blamed Bangladesh for whipping up anti-Indian sentiment for domestic political purposes.

The most serious incidents occurred in April, when several injuries were reported from exchanges of gunfire. Each side blamed the other for inciting the violence. Bangladesh, a predominantly Moslem nation, is surrounded on three sides by predominantly Hindu India.

Gen. Rahman's accusations came just before bilateral talks with India on the issue of sharing Ganges River water were adjourned yesterday without a settlement. Both sides agreed to meet again "in a very short time."

Gen. Rahman expressed the hope that a settlement of the water issue could be reached. He said that the Ganges question represented a matter of survival to his impoverished nation, which India helped to create five years ago.

International Problem

"Nobody has the right to deny water to our people," he said. "It's an international problem."

"The most important thing is that to have peace and stability in South Asia there must be peace and stability in Bangladesh. Nobody should try to destabilize Bangladesh," he added.

Bangladesh has taken the Ganges River dispute, which has been under negotiation for several years, to the United Nations with the hope of gaining international support. But a special UN Political Committee recommended two weeks ago that both sides try to find "an urgent solution" through further bilateral talks.

At issue is how much Ganges River water India diverts down to the port of Calcutta from a large dam located just west of the Bangladesh border and upstream on the Ganges.

Desertion Grew In U.S. Navy to Record for Year

WASHINGTON, Dec. 10 (AP).—The U.S. Navy suffered its highest desertion rate on record during fiscal 1976 and officials said they do not know why.

As a result, the Navy has formed a special study group to determine the cause and recommend actions to cure the problem.

At the same time the Army was registering its best record in 10 years. The Marine Corps record was improving, although its desertion rate still is the highest of all the services, and figures show the Air Force has virtually no desertion problem, and never has had one.

The Pentagon figures showed the Navy desertion rate climbed to 24.8 per 1,000 enlisted men during the fiscal year that ended June 30. The Army, which was hit by a rate as high as 73.5 per 1,000 in 1971, was down to 17.7.

The Marine rate of 69.2 per 1,000 men last year was the worst, but it represented a major improvement over the 105 figure the previous year. The Air Force's rate was only 1.2 per 1,000 men.

Miki to Propose Party Reforms

TOKYO, Dec. 10 (Reuters).—Premier Takeo Miki said yesterday he would submit reform proposals for the ruling Liberal Democratic party early next week but gave no confirmation that his resignation might follow.

Informed sources said Mr. Miki wanted a pledge from the party's executive that the party would institute his proposed reforms in return for his resignation. A majority of LDP parliamentarians has been demanding that he step down since the party's general election setback Sunday.

Mr. Miki seeks a revision of the party's leadership election system, continuation of the investigation he ordered into the Lockheed scandal, institution of a code of political ethics and reduced domination of the party by old men, sources said.

Italy Acts to Cut Cash Pay Boosts

ROME, Dec. 10 (AP).—The Italian Parliament gave its final approval yesterday to a government decree curbing cash outlays on some wage increases pegged to the cost-of-living index.

The Chamber of Deputies approved the decree by a vote of 147 to 21, with 227 abstentions. The Senate had approved the measure earlier.

The measure, designed to curb inflation and the rising cost of labor, calls for automatic increases to be issued in treasury bonds for those earning more than 8 million lire ($9,600) a year. For those earning from $7,200 to $9,600, half of the increase will be in treasury bonds and the other half in cash. Such bonds cannot be turned into cash for five years. The law will be in effect until May, 1978.

U.S. Addict Charged Over Sons' Symptoms

SAN BERNARDINO, Calif., Dec. 10 (AP).—Charges of child abuse have been filed against a 30-year-old woman because her twin sons were born with heroin-withdrawal symptoms.

Authorities said the mother was warned several times by a Welfare Department nurse that heroin use could endanger her unborn children but she did not seek treatment. Deputy Attorney Don Feld said Margaret Reyes of Cucamonga gave birth to the twins Oct. 31. She was arrested upon release from the hospital.

Trial Postponement Won by Miss Hearst

LOS ANGELES, Dec. 10 (AP).—Patricia Hearst, escorted to a courtroom by armed guards, won a postponement yesterday of her trial on kidnapping, robbery and assault charges to next April 4.

Miss Hearst, in her first public appearance since her release Nov. 10 on $1.25-million bail, appeared before Superior Court Judge William Ritzi and waived her right to a speedy trial. The trial had been scheduled to begin Jan. 10.

Congress to Get Bills to Insure Pregnancy Pay

WASHINGTON, Dec. 10 (UPI).—A move is on in Congress to counter the Supreme Court decision that employers may exclude pregnancy benefits in disability insurance programs.

At least three representatives and three senators have said they will introduce bills in January to make such exclusions illegal on the grounds of sex discrimination.

The court ruled Tuesday that refusing to grant sick pay for pregnancy is not sex discrimination, and does not violate the 1964 Civil Rights Act.

There is virtually certain to be even more legislation proposed by the time the 95th Congress convenes—in part because there is no agreement on the best legislative approach.

So far suggestions range from a fairly narrow attack on the court's ruling by amending the 1964 act, proposed by seven members of Congress, to a very broad attack on sex discrimination in the insurance industry as a whole proposed by the Women's Lobby.

French A-Test Reported

PAPEETE, Tahiti, Dec. 10 (UPI).—France set off an underground nuclear explosion at the Pacific testing grounds on Mururoa Atoll in the South Pacific on Wednesday, the newspaper Dépêche de Tahiti said.

Baccarat

The finest in French Crystal since 1764.

PRE-QUALIFICATION NOTICE

STATE CEMENT CORPORATION OF PAKISTAN

3rd FLOOR WAPDA HOUSE

LAHORE (PAKISTAN)

State Cement Corporation of Pakistan invites applications for pre-qualification of manufacturers and suppliers of equipment and machinery for cement manufacturing plants. The pre-qualified parties will be invited to participate in tenders for two dry process 1,000 tons per day clinker capacity each complete integrated cement plants proposed to be located at Thatta and Dandot in Pakistan.

Finances for the purchases would be provided by O.E.C.F. Japan against Yen credits and the purchases would be governed by their rules and regulations. Eligibility is confined to LDC countries specified by O.E.C.F. Japan.

Pre-qualification will be limited to manufacturers and suppliers capable of delivering either complete plants or specific departments in discrete areas or fully engineered and integrated systems in the process line. Vendors of individual machinery components are not eligible. The applications of the interested bidders should be forwarded to State Cement Corporation of Pakistan Limited, Third Floor, Wapda House, Lahore (Pakistan).

With the following information:

1. Description of the portion/department or system of the process line for which pre-qualification is sought.
2. Reference list giving name, address, year of supply and year of commissioning of plants or sections supplied by the applicant within his own country or outside.
3. If the equipment or any portion of it is manufactured under licence, the address of origin of such license.
4. The number, names and locations of manufacturing facilities directly operated by the applicant.
5. Approximate percentages of equipment of self-manufacture and those from sub-suppliers.
6. Description of the portion or section of the proposed scope which has to be imported from third countries.
7. Balance sheet of the applicant for the last three years, along with his business brochure.
8. Name and address of agents in Pakistan.

The last date for receipt of application is December 31st, 1976.

Well-Trained Manpower Is China's Major Military Resource

By Drew Middleton

Troops Strongly Indoctrinated but Weapons Are Outmoded

PEKING (NYT).—"The role ...yed by the soldier is decisive." ...e man who knows why he ...ts and for what he fights ...be victorious."

...e comment by Chang Feng-... chief of staff of the 179th ...nfty Division of the People's ...ation Army, reflects the con... ...ion of the officer corps that ...power is China's major mili... ...resource.

...compensate for inadequacies ...equipment, the command has ...centrated on the mass pro... ...ion of tough, alert soldiers, ...ors and airmen.

...he impression given by the ...th Division and the 38th Air ...sion and that gained from ...npses of other units and talks ...h officers and soldiers—all ...ing a three-week visit at the ...tation of the Defense and ...eign Ministries—is that these ...ps are psychologically prepar... ...to sustain battle casualties ...ceptable to Western forces ...to carry on guerrilla opera... ...s if their formations are ...shed.

...he Chinese soldier's life is of ...partan simplicity beyond the ...aining of a U.S. soldier.

The Company Room

...t one end of the company ...m is a storage space where ...sonal belongings, winter uni... ...ns and extra ammunition are ...ly arranged.

...he barracks room is bare and ...r. Double-decked bunks, each ...a carefully rolled quilt, oc... ...one wall. Rifles and ammuni... ...n are stacked on the other. ...are rice bowls and tooth... ...shes.

"They get eight hours' sleep a ...ht," the chief of staff said. ...ually they are in bed by 9 p.m. ...e bedtime varies with the ...sons."

...The 179th represents a worker ...ety. Like units of the United ...tes and British Armies, it ...intains a military museum ...rough which recruits are ...ded to absorb its combat his... ...y—eight years of fighting against the Japanese, five years of civil war against the Nationalists, and the short, intense and, an officer conceded, costly intervention against the Americans in Korea.

The walls are hung with pictures of individual heroes given the title of Skilled Fighter or Combat Hero and with battle flags and diagrams of successful actions. Save for language and the aggressive austerity of the building, a visitor might be at the Armored Cavalry Museum at Fort Knox, Ky.

The Infantry Recruit

The infantry recruit, who is the core of the forces, begins with two months' basic training, a mixture of ideological teaching, drill and instruction in army life.

He goes to his unit, where he learns a specialty—field gunner, machine gunner, mortar crewman, rifleman. There are few specialties compared with those in Western and Soviet forces.

A soldier's uniform differs from that of a commander in only one respect—two pockets instead of four. While airmen wear blue trousers and the ubiquitous green jacket, the army's uniform is all green. In early November, with an Arctic wind sweeping in from Siberia, the 179th, at its depot outside Nanking, had not yet donned the heavy quilted trousers and jackets and the quilted greatcoats that are worn in winter.

Officers are not called by terms of rank, but commanders are identified by their roles—platoon leader, battalion commander, chief of staff.

Although commanders and men mix off duty, field discipline in both the ground and air forces appeared to be strict. Salutes were punctilious, and orders were carried out at the double.

No Pinups

No pinups, no stereo or television sets, no radios broke the stark simplicity of the barracks. The food is equally simple: rice, two other dishes and tea at each meal.

The conscripted infantryman is in service for two to four years, although officers of the 179th said the usual term was three. There are no regular leaves, but Sunday is a day of rest. A soldier gets leave in the event of family illness.

During his first year the basic monthly pay is 6 yuan, perhaps $3. After the recruit has progressed to fighter, or combat infantryman, he is raised to 7 yuan. A deputy squad leader, comparable to a corporal, gets 8 yuan, a squad leader 10 and a junior officer 60.

The training, intensive and thorough, reflects the limited range of weapons with which the Chinese infantry is armed.

The division chief of staff, Mr. Chang, and other officers agreed that in the Soviet Army "the tank is everything." They were confident that their anti-tank weapons, the heaviest being an 85-millimeter gun, would stand off Soviet armored attack in the possible war toward which all training is directed.

Accuracy Excellent

At a demonstration on the regimental range, the heaviest anti-tank weapon displayed was the 75-millimeter recoilless rifle. The accuracy at 400 yards against stationary and moving targets was excellent, as long as the old soldier's maxim, "The other fellow isn't firing back," was kept in mind.

The difference between these teams and U.S. teams observed a month before in West Germany was that the Americans were opening fire in less than 10 seconds, while it took the Chinese about 25 seconds to set up and fire.

Riflemen, machine gunners and mortarmen banged away at targets with commendable accuracy. Two squads engaged in a long competition in bayonet fighting, on which the Chinese spend an inordinate amount of time despite the small percentage of bayonet wounds in modern war.

In conceding that the division needed more modern weapons, Mr. Chang said:

"Much depends on the economy and the development of industry. We have started to pay attention to the modernization of weapons, but for the moment we depend on what equipment is available and make the best use of it. We know that precision and timing are all-important factors in battle, and it is just a question of time when modern weapons, like laser sights, are supplied to the armed forces."

Realistic Training

Officers emphasized that the division underwent realistic battle training, including bacteriological, chemical and nuclear warfare, twice a year.

Chinese doctrine emphasizes close coordination to the extent compatible with the shortage of advanced weapons. Each division of the field army includes an anti-aircraft battalion.

Asked how the division would move to a battle area, the chief of staff said, "By truck or on foot."

Reconnaissance, detailed and constant, is insisted upon as a means of balancing the Soviet advantage in aerial and other surveillance. Though manpower is abundant, the use of infantry firepower is stressed, while the human-wave attacks of the Korean War receive less emphasis.

Close Combat

The ground army, essentially an infantry force, has adopted tactics that maximize its advantage in manpower. The aim of the Chinese is to get as close as possible—"to embrace the enemy"—convinced of their superiority to all other armies in close combat.

As for the air force, the 38th Air Division, at its base southeast of Peking, is built around the Chinese version of the Soviet MiG-19, known as the F-6. The Soviet MiG-19 first flew in the middle 1950s and ceased being produced by the Russians at the end of that decade.

The division's officers asserted that the installation of three 30-millimeter guns and of two Chinese-built jet engines made the F-6 superior to the Soviet version.

The pilots, one of whom had been in service for 17 years, expressed complete confidence in their craft and were largely ignorant of recent advances in fighter performance in the Soviet and Western air forces.

The overall impression is of hard-working, well-trained forces proud of their role. This is balanced in both the air force and the army by the impression that they are preparing to fight a war in the 1970s with the equipment of the 1950s.

British Company Denies Secrecy On Nuclear Leak

WINDSCALE, England, Dec. 10 (Reuters).—Britain's nuclear fuel treatment company today denied it attempted to cover up the presence of a leak at its plant while the local government was considering an application to expand its facilities.

Peter Mummery, general manager of the British Nuclear Fuels Ltd. plant at Windscale, northwest England, told a press conference, "There was no cover-up."

Tony Benn, secretary of state for energy, revealed in the House of Commons yesterday that a leak of irradiated water from a silo containing caesium, which has a half-life of about 100 years, was detected on Oct. 10.

The company said the leak of about 100 gallons of water did not affect ground or surface water and only reached a few yards from the silo. No worker was endangered, it said, asserting that a man could stand on the worst-contaminated area for two weeks before he absorbed radiation up to permitted limits.

At the time the leak was discovered the local Cumbria Council was considering a planning application for a £600 million ($358.9 million) expansion of Windscale to allow it to treat foreign nations' spent nuclear fuel. British Nuclear Fuels is the commercial arm of the British Atomic Energy Authority.

Gas, Power Strike Is Set in France

PARIS, Dec. 10 (AP).—Workers in the French state-owned electricity and gas networks today called a strike for next Tuesday and Wednesday to protest a planned cut in wage increases for next year.

The strikes, in practice, will mean two-hour electricity blackouts for all but essential services each day and reductions in gas pressure. The cuts will occur Tuesday afternoon and Wednesday morning.

The workers were protesting a management decision to end a five-year-old agreement guaranteeing the 130,000 employees an increase of 2 per cent in their buying power each year—increasing their wages 2 per cent above the inflation level.

Nuclear Warning Dud in Australia

SYDNEY, Saturday, Dec. 11 (Reuters).—A deadline set by a group which threatened to explode a nuclear device in one of Australia's two largest cities yesterday passed without incident.

An organization calling itself the "Group of Six" sent letters to Prime Minister Malcolm Fraser and opposition leader Gough Whitlam last month threatening to explode a nuclear device in either Sydney or Melbourne unless the government announced a ban on the mining and export of uranium.

Earlier this week, the government announced that uranium exports to fill existing contracts would go ahead.

Soviet Air Attaché Expelled by Canada

OTTAWA, Dec. 10 (UPI).—The federal government has ordered a Soviet diplomat expelled from Canada for "activities incompatible with his diplomatic status."

Maj. V.M. Vasiliyev, an assistant air attaché to the Soviet Embassy, has been ordered out of Canada, the External Affairs Department said.

Discipline in the House

After several years of turnover and turmoil in their ranks, the House Democrats are in mood to consolidate. The best evidence is the refusal this week of the Democratic Caucus to promote to majority leader either of the two men—Rep. Phillip Burton, D-Calif., and Richard Bolling, D-Mo.—who have been the most aggressive champions of change in the internal power structure of the House. Instead, a bare majority of the Caucus turned to Rep. Jim Wright, D-Texas, who—like incoming House Speaker Thomas P. O'Neill jr., D-Mass.—is a canny, engaging veteran well-versed in the classic arts of congressional politics.

Rep. Wright certainly capitalized on antagonisms toward Mr. Bolling, who has been regarded as too arrogant and aloof, and Mr. Burton, who is widely seen as too ambitious, contentious and manipulative. Yet Mr. Wright also gained favor because of his ability as an orator, coalition-builder and legislative strategist. Though he was backed by many conservatives and Southerners, his outlook and support are broader than those categories might suggest. His voting record, while hard to summarize, averages out as moderate. In regional terms, he is not a spokesman for the Old South or Texas oil, but more a representative of the Sun Belt and the world of aerospace.

* * *

Reps. O'Neill and Wright promise to be a strong, persuasive team. That is encouraging, because what the 95th Congress will need most of all is self-discipline. It may sound easy, for example, to build a stable House majority for Democratic programs under a new Democratic President. But the 292 House Democrats are a diverse and restless pack. Partnership with a president will be a new experience for the 65 per cent of them who have come to Congress since 1968. Even the veterans will have to adjust after eight years of fighting vetoes and hectoring Republican officials. Indeed, the current House in general has been shaped largely by opposition—to the Nixon and Ford administrations, to the war and to Watergate. While Congress in the Carter years will have many opportunities for creative, productive work, certain habits of fragmentation, showboating and self-indulgence will need to be overcome.

More discipline is also needed in the management of the House. There is no shortage of resources; staff allowances and research aids have become, if anything, too generous. Organization is the urgent problem now. Committee jurisdiction over large questions, notably in the energy field, should be consolidated. Scheduling also needs to be improved. A special commission chaired by Rep. David R. Obey, D-Wis. will be bringing some useful proposals before the House early next year.

There is another area in which problems of discipline are even greater and may be most troublesome for the leadership. That is the sensitive field of congressional ethics. The reputation of Congress has been clouded most recently by the revelations about gifts from South Korean nationals by continuing problems with slush and office accounts, and by California Democrat Rep. Charles H. Wilson's acknowledgement that he has diverted campaign funds to personal use in violation of the House code of conduct, if not the laws.

More and more legislators do recognize the need for stricter standards of conduct, full financial disclosure, better reports on lobbying and another review of the campaign financing law. Rep. O'Neill has promised to set up an ad hoc panel to draft a new, tough ethics code, and the weak House committee seems likely to be overhauled. But he may have some personal problems in this area: he was feted by Tongsun Park at a lavish birthday party a few years ago, has taken extravagant trips abroad, and is adept at raising campaign funds for political friends. Before his advocacy of new rules can be entirely credible, the new speaker will have to change his ways and make some accountings for past practices.

Whatever new standards may be approved, the real test will be whether they are enforced. The normal tendency on Capitol Hill is to leave scandals and embarrassments for the voters to judge—or for the Justice Department to pursue. That is inadequate. Abuses by individual members lengthen the shadows over Congress as a whole. Incumbents may get re-elected anyway, but public confidence in the institution will remain low until these incumbents show a real willingness to discipline colleagues who persist in cutting corners or playing fast and loose with the rules and laws.

THE WASHINGTON POST.

Priority for Panama

The 73d anniversary of the signing of the Panama Canal Treaty last month passed without notice in the United States but not in Panama. There, students and others staged ceremonial burnings of the treaty, which gave the United States control of the 10-mile-wide Canal Zone "in perpetuity." Foreign Minister Aquilino Boyd attended one such demonstration in Panama City.

Since then, Boyd has won agreement in Washington from Secretary of State Kissinger for another round of negotiations for a new canal treaty, even before Jimmy Carter becomes president next month, in an effort to narrow remaining differences between the two governments. But the Panamanians know that any substantive progress must await the new administration.

The new canal treaty is, indeed, the most critical issue facing the Carter administration in the Western Hemisphere. Unless the United States is ready to conclude an agreement that will provide for eventual Panamanian control of the territory that cuts the republic in two, President Carter and Secretary of State Vance will be unable to create an effective Washington policy for the Americas.

Panama is the issue that unites virtually all of Latin America against the Yankees and the one conspicuous symbol remaining of the era of Washington's "big stick" diplomacy and "Manifest Destiny." Latin American schoolchildren learn, even if students in the United States do not, that no Panamanian signed the treaty under which the United States took control of the zone and built the canal. Anyone who has visited the great waterway knows it could easily be disabled by a guerrilla force.

Until Ronald Reagan injected Panama into the battle for the Republican presidential nomination, the Ford administration had negotiated honorably and responsibly for a new treaty aimed at insuring freedom of access to the canal and a U.S. share in its defense against outside attack, while providing for eventual restoration of Panamanian sovereignty over the zone. It ought to be the Carter administration's highest hemisphere priority to bring those negotiations to a successful conclusion.

In campaign debate, Carter declared he would "never give up complete control or practical control" of the Canal Zone. But he promised to "continue to negotiate with the Panamanians," and eventually revised his "never" to "anytime in the foreseeable future." Under principles accepted by the last three U.S. presidents he has to be willing to set a date for relinquishing control of the zone if any negotiations are to have any chance. Carter should clarify his policy on this most critical of hemisphere issues—and the sooner the better.

THE NEW YORK TIMES.

International Opinion

NATO Defense by Words

Excellent verbal progress was made at the NATO ministers meeting which ended in achieving a fuller recognition of the deadly seriousness of the Russian threat to the West . . . Unfortunately, the NATO meeting failed lamentably to match strong words with even a modest degree of action. The long-overdue decision on the airborne early-warning system was again postponed . . . Mr. Kissinger, in his swan song, exposed the hollowness of Russia's proposal for a general pledge not to make first use of nuclear weapons. In view of NATO's conventional inadequacy, it is upon such a first use of nuclear weapons by the West that deterrence and defense depend. There is no sign of the corresponding political tightening-up of the alliance on the European side that this situation makes essential. On the American side, mercifully, there is to be no wavering in this respect. The only solid piece of good news was the specific reassurance from President-elect Carter to this effect.

—From the Daily Telegraph (London).

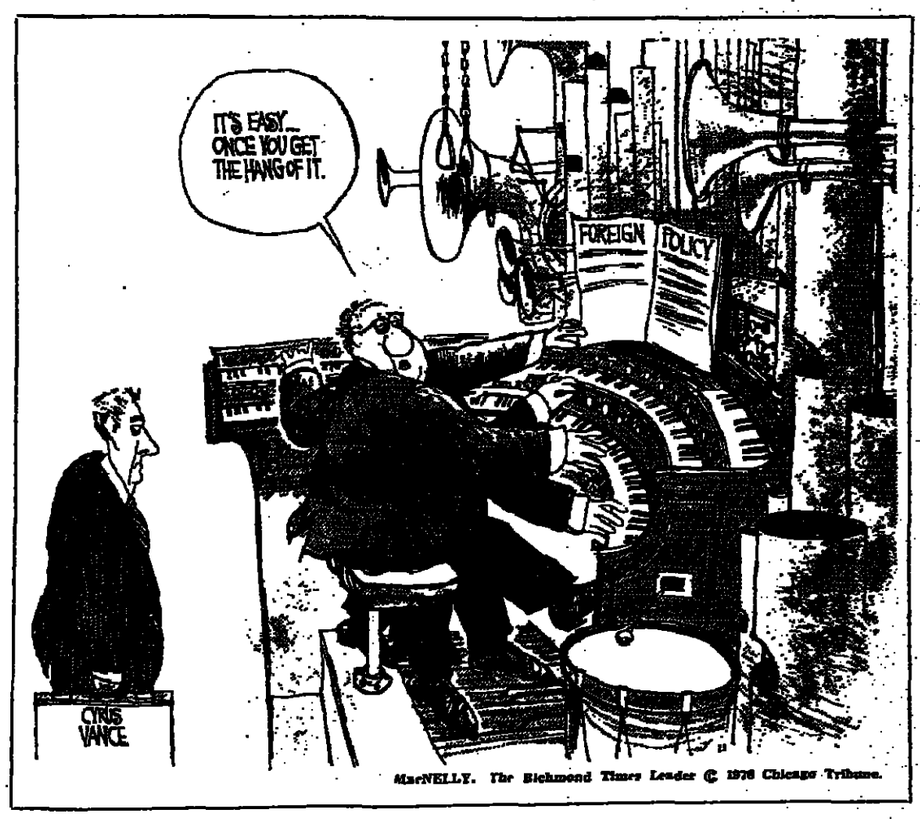
Oil Imports and the West

The best policy [in the face of the OPEC oil price increases] would, of course, have been to limit oil imports: The timid efforts of the Europeans were annihilated by the irresponsibility or the conscious determination of the U.S. leaders . . . Washington up to now seems to have adopted a policy of conserving national resources instead of a policy of energy independence, unless what is involved is an absence of any policy.

—From Le Figaro (Paris).

In the International Edition

Seventy-Five Years Ago



December 11, 1901

LONDON—The Daily Mail says: "Rightly does Mr. Brodrick assert that moderation in the war is imbecility. The time is at hand, he announces, when the Boers remaining in the field will no longer be accorded the treatment of belligerents. The nation will thank him for this strong utterance." The Daily Chronicle says: "Until peace is desired by the Boers on something like our terms, it is idle to talk of negotiations."

Fifty Years Ago

December 11, 1926

OSLO—Charles G. Dawes, Vice-President of the United States, and the Foreign Ministers of France, Great Britain, and Germany were declared the recipients of the Nobel Peace Prizes for 1925 and 1926 at a meeting of the Nobel Institute today. The prizes, worth about $34,000 each, will be shared equally among the recipients according to the announcement by Frederic Stang, chairman of the Nobel Committee.

OPEC and a Spreading Malaise

By Jonathan Power

LONDON.—We are told that OPEC is about to subvert the Western economy once more. Even a modest 10-per-cent price rise, it is said, is likely to send us rocketing into a new inflationary orbit.

But why has the West allowed the demand for oil to build up so it is now in this vulnerable position? Why is the United States this year importing 41 per cent of its oil compared with 34 per cent at the time of the oil embargo? Why are gasoline prices in the United States only one-half to a quarter of what they are in Europe? Why is it that in many Western countries the price of energy in real terms decreased between 1974 and 1975? Why are speed limits in force in only half the West European countries even though they have demonstrably reduced both oil consumption and accidents? Why is it that only one Western country, the United States, has anything approaching an organized program to promote car-pooling and ride-sharing? Why is it that trucks have been allowed to cut into the rail freight markets in virtually every Western country when they are less energy-efficient per ton/kilometer of freight moved?

There are no good answers to any of these questions. Most government activity over the last three years has gone into combating OPEC, for the most part unsuccessfully, and into research into alternative methods, mainly nuclear, of creating energy. Western governments find it difficult to note the obvious: that "a barrel of oil saved is as useful as a barrel produced—better in many respects." That quotation is from a recent report of the International Energy Agency. The report went on: "Most countries speak of 'investments' to expand supplies with all the assumed benefit of increased employment and economic growth. On the other hand, conservation expenditures are discussed in terms of 'costs' and assumed to reduce economic growth. Most careful studies indicate that investments required to achieve energy savings will have a higher return on investment, and thus a more positive effect on economic growth and employment, than many of the supply expansion alternatives being considered. This makes conservation a cheaper alternative to domestic energy production." This view is argued even more forcefully in the current issue of Foreign Affairs by Amory Lovins, a young physicist working in the British branch of Friends of the Earth. He argues that with modest social innovation and a number of technical fixes (like improved design of buildings), "we can double our end-use efficiency so that by the year 2000 we could be twice as affluent as now with today's level of energy use or as affluent as now while using only half the end-use energy we use today."

The West's attitude to OPEC is part of a wider malaise that now pervades almost everywhere, bar China: Concentrate on knocking the other man, rather than putting your own house in order. This "blame him not me" attitude has been probably more responsible than any other factor in undermining the Third World negotiating position with the West. For during the last decade while the Third World has been gathering steam for its present onslaught on our privileges, it has done two extremely foolish things. It has allowed its rural economy to run down and consequently has become almost totally dependent, in the years of crop failure, on Western food exports. It has also become overdependent on our arms factories. The Third World's military expenditures have doubled over the last 15 years. It is now finding to its cost that it is difficult to bargain toughly abroad when the granaries are empty at home and it's spending a cool $40 billion a year on guns, enough to solve most of its basic economic problems.

One also wonders why the Third World, while expending prodigious amounts of energy campaigning for the West to organize price support schemes for their raw material exports, doesn't take a few simple steps in the trade field itself.

Why don't they, as Mahbub Ul Haq, the head of policy planning at the World Bank, has suggested, "get together and, by a single stroke, create a preferential area for trade among themselves. This can be done by a uniform devaluation of their currencies by, let us say, 50 per cent vis-à-vis the developed world . . . Such action will immediately create a built-in incentive to trade with each other rather than to perpetuate the traditional patterns of depending on the developed world."

Here on the HMS Great Britain everyone damns everyone else as the ship goes down. At the moment the port side is maneuvering so it can fire last-minute salvos at the multinational corporations, the Zurich gnomes and the IMF. The starboard troops strafe the unions, the poor who live on Social Security and the soft intellectuals who mislead the workers into thinking that a sinking ship can be refloated with bigger decks. All are equally hypocritical. The British have an upper middle class who are past masters at circumventing income tax demands, mainly through fringe benefits like company cars, and even company gardeners, in the mistaken notion that they are overtaxed. In fact, 10 other West European countries are more heavily taxed than Britain. The British have workers, high and low, who are in totally unproductive occupations, ensnaring more and more activities into a web of intricate bureaucracies and restrictive practices. Britain now has far more civil servants than it did when it ran an empire that encompassed a quarter of the world's population. And it takes twice as many man-hours to build a car as it does in France or West Germany. The international bankers and foreign governments who are being bullied to bail Britain out should perhaps hold off until Britain learns how to liberate its own locked up potential.

In Northern Ireland numerous political factions and paramilitary groups over seven long years have perfected the art of blaming outside interference as the cause of their troubles. The new talk of an independent Ulster—first mooted a few weeks ago by Protestant paramilitaries, now cautiously supported by a not insubstantial number of members of the Catholic-dominated Social Democrat and Labor party—is a refreshing break with past attitudes. Perhaps left on their own, without a British Army or Irish reunification to fear, the divided communities would begin to learn that their future lies first and foremost with each other.

Robert Frost wrote:

"Two roads diverged in a wood, and I—
I took the one less traveled by, and that has made all the difference."

A little of that spirit would do the world a mighty dose of good right now.

NATO's Resolution Sags

No Way Without Will

By C. L. Sulzberger

BRUSSELS—The North Atlantic Alliance likes to comfort itself during grim moments by recalling that during 27 years it has managed to deter any thoughts of Soviet aggression against Western Europe and also that its mere existence has probably helped to stave off holocausts which might otherwise have exploded from the Cuban or Middle East crises.

Yet, during relaxed moments and agreeable thoughts, we might do well to remember that the entire strategic balance of power has altered within the same 27 years. The Soviet Union, aided by more or less efficient allies, has maintained the most dynamic conventional army on earth, has lurched to approximate nuclear-missile equality with the United States, and has developed a naval strength that is at least on a parity basis, over-all.

One consequence is that Moscow no longer needs to feel inhibited anywhere in the world (as it did in 1962 off Cuba). The air-land-and-sea operation it successfully carried out last winter in Angola is an excellent case in point. By single-minded, determined long-range planning, the Soviet Union has achieved a military revolution in less than three decades and has indicated it possesses the will to use this might if need be.

Disturbing

What is most disturbing about NATO's position, as its ministers and generals ended their annual year-end conferences here, was not the regular shortfall in troops, equipment and funds to which allied commanders have been forced sadly to adjust themselves. A more profound weakness is the sag in allied resolution, in the determination to defend our form of civilization.

Americans have been accustomed to blaming such lassitude on their European partners. But a study that has just been published in the Political Science Quarterly (by Prof. Bruce Russett and Miroslav Nincic of Yale) comes up with a startling and even gloomier conclusion, namely:

"Public opinion in the United States is now much less favorably disposed toward the use of American military force abroad than at any time since the beginning of the cold war. In part this indisposition stems from the American failure in Vietnam, but it is also a result of partial East-West détente and other changes in the world at large, and in America as well."

Twenty-five years ago (July, 1941) when the United States was still neutral, surveys used by the authors show that 88 per cent of the U.S. people were prepared to use our troops to defend Canada, 51 per cent to defend Britain and 60 per cent to defend the Philippines. The latest figures (computed in April, 1975) show this willingness has dropped to 57 per cent for Canada, 37 per cent Britain and 29 per cent for Philippines.

In October, 1949, when the Atlantic Treaty was born, 50 cent of Americans favored "military action in case of Soviet tack on American allies in Europe." In December, 1974, (last sampling) the figure dropped to 39 per cent. Moreover the authors assert:

"Surveys since December, 1 have consistently found that 40 per cent of the populace want reduce military spending, as compared with 5-20 per cent in 19 39." As early as 1969 one study showed that only one our NATO allies, Canada, enjo majority support (57 per cent) help, if attacked, from U.S. tro or nuclear weapons.

This frightening analysis fin "(1) The willingness of the Am ican public to use United Sta armed forces for the defense other nations is currently le than during the earlier cold years and is probably ap proximately the same level prevailed in the years immedia preceding American entry World War II . . ." (When st tionism was strong.)

"(2) Public willingness to ploy nuclear weapons on be of allies is extremely low, m lower than during the e 1950s."

A Footnote

It is worth adding a somew unexpected footnote. The auth find that "elite or leader samples" are far more willing act on behalf of our a than the general public . that, in the latter broad gr "willingness is greater y higher income and education."

From all this certain tr may be inferred. First, a m massive and coordinated edu tional program explaining NA and why we need it is requ in all allied countries, but p ably most in the United State

Secondly, if no such psyc logical and political effort is undertaken, the point may some be reached when there will no use in having any milit budget to produce weapons cause there won't be enough p ple left who might be willing employ them in self-defense.

The International Herald Tribune welcomes letters from readers. Short letters have a better chance of being published. All letters are subject to condensation or space reasons. Anonymous letters will not be considered for publication. Writers may request that their letters be signed only with initials but preference will be given to those fully signed and bearing the writer's complete address.

Letters

U.S. Vote and Taxes

Jean-Pierre Frankenhuis (Letters, Nov. 15) ironically complains that his American friends in France are reluctant to subject themselves to state income taxes now that "Americans abroad [have] finally obtained the right to participate fully in the political life of their state and country, after much complaining and petitioning." He concludes his letter with a rhetorical question: "Is representation without taxation, for this admittedly small segment of Americans abroad, the fine example they wish to set as a symbol of their country to their hosts?"

Although for more than 50 years the United States has been one of the only countries in the world that effectively taxes its nonresident citizens, it was only in 1975 that those citizens received finally the right to vote in federal elections in the United States. As well, although there are more than 1.2 million Americans resident overseas (more than the inhabitants of any one of the 15 smallest states in the United States), there is no single senator or congressman representing the very distinct needs and rights of this group as there is for, say, the states of Alaska, Wyoming, and Vermont (with less than 500,000 inhabitants each).

Thus it is difficult to agree with Mr. Frankenhuis' portrait of a small, self-centered and smug minority of Americans who "refuse to participate in the setting of [America's] future and their children's for opportunistic reasons."

It is worth mentioning that French citizens resident outside France are represented in both the French Senate and the Chamber of Deputies by their own proper members of those houses; and they are of course not required to pay income taxes to France for this privilege.

The Association of Americans Resident Overseas is gratified that nonresident Americans can finally vote in federal elections. As the Tax Reform Act of 1976 shows, however, we by no means escape taxation and we are far from having effective representation.

Although Mr. Frankenhuis is confused concerning the true tax and political-participation status of Americans overseas, recent legislation shows that there are a number of U.S. senators and congressmen (not to mention state tax inspectors) who feel as he does. This letter may then help both them and Americans resident overseas to be aware of their relegated status as nonresident citizens, especially vis-a-vis citizens of more progressive countries in this area, such as France.

In fact, as intimated by Mr. Frankenhuis, only complaining and petitioning seems to produce results.

BRAINARD L. PATTON, jr.
Assn. of Americans
Resident Overseas.
Paris.

The new U.S. tax law on overseas earned income (Section 911) is a dramatic example of what can result from taxation without proper representation. What could be next?

While many overseas Americans are represented in Washington through their home state, these representatives obviously cannot be expected to be able to be of much or any help on such as federal tax and passport regulations applying to overseas residents. To obtain effective and veritable constitutional representation, a citizen naturally must elect his representatives from the area in which he resides . . . in our case the world outside the United States.

As an exaggerated but not totally unreasonable example, I propose that a criminal walking the streets of his home state has more constitutional protection on such questions than we do overseas. His state automatically and otherwise protects him concerning such as federal tax laws applying to him while we overseas are fair game.

The solution seems to be up to us overseas since our present position is much our own doing. I suggest either we group as a "World United State," and fight or accept our lot . . .

KELLOGG A.P. SMITH.
Paris.

I read with interest your article (IHT, Nov. 30) in which U.S. government employees (of the Internal Revenue Service) "justified" the tax reforms relating to Americans working abroad —particularly the references to "subsidizing" us.

It would be enlightening to hear these government employees justify the fact that U.S. government employees working abroad (including IRS employees) pay no tax in the foreign country where they work but pay U.S. taxes on their incomes *before* adding "post adjustments." These "post adjustments" are what the rest of us call cost-of-living, housing, school tuition and hardship allowances—things for which we are taxed.

Why should the tax collector be taxed differently than the taxpayer? Who is subsidizing whom?

DON BIGLER.
Geneva.

I read with mounting incredulity the comments by congressional and administration officials regarding the results of The Washington Post overseas poll on the new tax law. (IHT Nov. 30).

The glib insouciance with which the arguments against overseas taxation were dismissed is yet another manifestation of the political intransigence and economic parochialism which afflicts too many of our benighted national leaders. One point I certainly can agree on, though, is that government subsidies do not necessarily increase efficiency. The quintessential example, of course, is the government's own heavily subsidised military diplomatic bureaucracy here in Western Europe. With their myriad "tax-free" benefits (housing and subsistence allotments, home leave, commissary, PX, APO, exemption from foreign taxes including VAT, and subsidized gas prices), I would submit that U.S. government employees abroad are the single most pampered group of taxpayers among our citizens.

As for the feigned outrage and righteous indignation exhibited by those "unsained" officials, well... where did you say that Tea Party was being held?

THOMAS E. MCGUIRE.
Wassenaar, the Netherlands.

Wrong Direction

I have been following with some sense of amusement the IHT recent series of letters regarding the use of gender in personal names.

I have only one personal observation to make. The fight for equal rights will not be won through playing semantic games. If anything, this will push us in the wrong direction since it tends to obscure the real issues.

MARIA P. JOHNSON
Geneva.

Goose Feathers

John W. Finney concludes his stockpile article (IHT, Dec. 7) with the snide sneer "why the United States needs to stockpile goose feathers at all." Mr. Finney has not done his homework.

Americans eat chickens. Americans love chickens, but they do not love nor eat geese. Chicken feathers have no heat retentive qualities, whereas goose down is exactly the right material for heat retaining winter military uniforms. When the Chinese intervened in Korea in the early 1950s and the U.S. forces were temporarily overwhelmed and forced to retreat, the United States lost something around 50,000 goose-down-filled uniforms which, filling unhappily, came from China itself where people like to eat goose.

Overnight the price of goose feathers skyrocketed from perhaps 50 cents a pound to $4 or $5 a pound, and the U.S. military faced the possibility of their troops freezing to death for lack of proper winter clothing. Because a future war may very well be fought under Arctic conditions, here is one retired Marine Corps officer who votes for a large stockpile of goose feathers.

Isolated Albania Faced With Fresh Pressures

By Murray Seeger

BELGRADE, Dec. 10.—A Western diplomat stationed in Tirana, the capital of Albania, wanted to make a hotel reservation in Rome. He had to drive 300 miles to a resort hotel in Yugoslavia to find a telephone connection to the west or north.

The few West German tourists who have visited Albania report that they were kept under constant supervision. "When I tried to leave the hotel at night to take a walk," one commented, "a policeman appeared and told me to go back inside."

Other sources say that, despite the bloody history and backwardness of the country, the elite are well schooled and indulge themselves by reading classic French pornography in the original language.

Such scattered, incomplete reports are about the only news to come out of Albania, Europe's most tightly closed, regimented, xenophobic and impoverished society.

But enough information has surfaced recently to confirm that the health of the country's only postwar leader, 68-year-old Enver Hoxha, has improved enough for him to consolidate his power at a time when his country of 2.4 million is facing new strains.

The small, mountainous land no longer can count on the support of China as an ideological ally and continues to view two other Communist states, neighboring Yugoslavia and the Soviet Union, as enemies.

Asked recently if this situation did not leave Albania "nonaligned," a Tirana official told a Western diplomat: "Oh, no, we are aligned with Marxist-Leninism."

The Albanians are afraid of, and full of hate for, Yugoslavia, Greece and Italy. They have been among the most consistent, single-minded members of the Communist world since their mainly Communist World War II partisan fighters won an election and formed a government in 1945.

Led by Mr. Hoxha, their general in the underground war against the occupying Germans and Italians, the Communists consolidated their power the next year with the adoption of a Stalinist-type Constitution. It ended open elections.

Enver Hoxha

The Albanians joined the Eastern European trading bloc, Comecon, in 1950, and the Warsaw Pact in 1955. But in 1960, following a visit to Peking, the Albanian leaders denounced the Soviet Communists and retired behind their mountains, confident that China would provide whatever foreign assistance they needed.

Now a new, moderate leadership in Peking is continuing a slow process of improving ties with the West and reducing its connections with Tirana. And the Albanians are more isolated than ever.

After Albania acknowledged the diminished assistance from Peking, Soviet party leader Leonid Brezhnev offered the possibility of improving relations with Moscow. For his suggestion, Mr. Brezhnev received a bitter denunciation from Tirana and a reiteration of the Albanian belief that, now more than ever, Albania is the custodian of the true Communist faith.

Premier Mehmet Shehu referred to the Moscow leader as "the present Kremlin czar, the arch-revisionist Brezhnev," and added:

"These renegades think our party shifts according to the direction of the wind. They will be bitterly disappointed once again. There is not and never will be any wind or storm that can change the course of our ship, which is always oriented by the infallible breeze of Marxist-Leninism."

Eight Purged

Sailing the course has not been easy, however. At his party's congress recently, Mr. Hoxha confirmed that eight former top officials who had dropped out of sight during the previous three years had been "thrown into the garbage dump where all traitors of revolution belong."

The purge was just the latest of several which have marked the 30-year rule of the Albanian Communists. Although no details were given, most foreign observers believe that at least one of the eight who were accused of plotting with foreign powers to take over the government, Beqir Balluku, had been executed.

Mr. Balluku also had been a partisan and, with Mr. Hoxha and Mr. Shehu, a member of the innermost ruling circle.

In his memoirs, Nikita Khrushchev, who was the Moscow party boss when Albania defected, described how the Tirana trio functioned.

"They had a sort of troika," he said. "Enver Hoxha and Mehmut Shehu would sentence the accused to death and Balluku would personally carry out the execution."

According to Mr. Hoxha's memoirs, a portion of which were published in French 10 months ago, he last saw Khrushchev in Moscow in November, 1960, and had a blistering argument with him. Mr. Hoxha accused the Russians of interfering with Albanian affairs and trying to undermine the loyalty of the army.

"The Albanians truly feel threatened," a Western diplomat commented. "In their entire history they have been dominated by outsiders and the driving force of their policy is to prevent it from happening again."

Ethnically, the Albanians are believed to be descended from the ancient Illyrians and were long ruled by the old Turkish empire. After gaining independence in 1912, Albania was subject to heavy pressures from its neighbors, especially Italy, which dominated its economy before World War II.

The most obvious contemporary threat comes from Yugoslavia, which started the postwar splintering of the Communist world in 1948 when President Tito broke with Stalin. Since then, Yugoslavia has operated a form of self-managed, decentralized Socialism with light controls on foreign cultural influences.

Interest in Yugoslavia

Under this system, the Yugoslavs have built a substantial industrial base and raised their standard of living rapidly, especially in the northern half of the country. Some of the officials recently purged in Tirana apparently were impressed with the Yugoslav system and wanted to experiment with it.

The Albanians have shown some interest in improving relations with Greece, its other mainland neighbor. Albanians in Greece generally are assimilated into the local population.

Within Albania, however, the minority Greek Orthodox believers are barred from public religious activity, as are Moslems and another small group of Roman Catholics.

The complete isolation of the country was illustrated at the recent party conference where official Communist delegations came only from Vietnam and Laos.

The Chinese party sent a message of congratulations.

Most of the Peking aid projects given to Albania have been completed but foreigners report there are still many Chinese in the country.

Lone Course

Albania belongs to the United Nations but takes part in virtually no other international organizations. It was the only European country which did not take part in the Helsinki Conference on European Security and Cooperation last year.

Mr. Hoxha is not known to have left Albania in 15 years.

A foreign source said that the French Embassy, which has better relations than others with the government, is often asked to supply copies of pornographic books to Tirana officials. The explanation offered is that the Albanians want to study "examples of the decadence of capitalist society."

Other foreigners report that copies of Le Monde, the newspaper published in Paris, are often delayed for many days in the Albanian mails, apparently because officials want to read some particular article.

"With Albania," a knowledgeable source observed, "there is no question of opening doors to the West. Even if they opened just a window, the whole system would collapse."

State of Emergency Upheld in Sri Lanka

COLOMBO, Dec. 10 (Reuters).—The Sri Lanka Supreme Court ruled today that the continuing state of emergency, declared by the Prime Minister, Mr. Sirimavo Bandaranaike, in 1971 to settle unrest in the country, was legal.

The five-judge court gave its decision in ordering the retrial of a former opposition polician, A. Amirthalingam, who had been acquitted in September by the High Court of Charges of inciting the northern Tamil minority to defy the Constitution.

Jewish Symposium In Moscow Postponed

PARIS, Dec. 10 (UPI).—Organizers of a symposium on Soviet Jewry to be held in Moscow have postponed it until Dec. 21-23 to avoid clashing with the 70th-birthday celebrations for Soviet Communist party leader Leonid Brezhnev Dec. 19, it was announced today in Paris.

In a statement issued by the Jewish Contemporary Library, Benjamin Fain, chairman of the symposium organizing committee, was quoted as saying an "intense anti-Zionist campaign" is going on in the Soviet Union. The statement included an appeal from dissident academician Andrei Sakharov for international support for the symposium, to which the Soviet and foreign press have been invited.

Discover the distinctive taste of Glenfiddich pure malt.

Unlike blended whisky, Glenfiddich has a full-bodied smoothness all of its own.

Its pure taste comes from the fact that it is 100% pure malt.

And from the fact that it's still made in the same traditional way by the fourth generation of the Grant family.

So when you discover the distinctive taste of Glenfiddich for yourself, you'll soon appreciate why it's the world's finest Scotch whisky.

It's never too soon to change to a Volvo. But any minute it may be too late.

If your car fails to cope with cold mornings, damp weather or steep hills, you can always decide to change it for something better. But if it fails to cope with an emergency there is little time for that kind of decision.

With a Volvo 242, 244 or 245 you will be well prepared for all everyday hardships, as well as emergencies. Apart from superb handling qualities you will have an advanced safety design to protect you. Triangle-split dual circuit brakes with bigger safety margins than required by law in any country. A long engine compartment that takes up collision energy.

A protective framework around the passengers, including separate bars in the doors against side impact. A steering system that yields under impact so that it does not constitute a risk in a collision. Three-point seat belts, front and rear. And the high-impact type of laminated windscreen which is elastic and has extraordinary strength – both qualities add to your protection.

It goes without saying that these safety qualities are built into your Volvo not because we believe you will take any unnecessary risks, but because we think you should have the best kind of safety margins that modern automobile technique can offer you.

Cars for people who think

LONDON THEATER

'Counting the Ways'—Albee's Curtain Raiser

By John Walker

LONDON, Dec. 10 (IHT).—Edward Albee's "Counting the Ways," receiving its premiere at the National's Olivier Theatre, was written as a curtain raiser to a longer work and it seems an inconsiderable hors d'oeuvre to something meatier. According to the flashing lights that hang above the stage, the work is "a vaudeville," which, from someone as fastidious with words as Mr. Albee, is a blatant misnomer.

I'm not sure why the author uses an indefinite article for his description—it's certainly an undefined play—but vaudeville is, or was, a succession of unrelated acts. What Mr. Albee offers is a succession of related acts, short redefinitions of love or the progress of a marriage between two somewhat unspecified people—He and She, middle-aged and tart-tongued.

They are a couple who define their relationship to each other in terms of crème brulée or picking the petals off a rose. In brief scenes, punctuated by dark and the crack of a whip or pistol shot, the two strive for advantage and superiority. He complains that he has no shirts to wear. She changes their double bed for two singles. He asks her how many children they have. She cannot remember.

And so it goes. Short sequences of dialogue couched in reasonable and civilized tones. Indeed, civilization is seen as something that has deadened natural emotions and reactions but imposing an order that is fragile and forever threatened. The two teeter on the edge of the chaos.

The short scenes, each slightly shifting the relationship, are notable both for the pedantry and imprecision of the dialogue, which is, in the worst sense, precious, suggesting a quality of experience to which the audience can have no access. The cast, Michael Gough and Beryl Reid, work a clever sleight of mouth, giving it a point that it does not possess.

Both are cast against type. Mr. Gough, as an actor, has a luminous benignity that is far from the muddled middle-aged pretentions of Mr. Albee's He. I say as an actor because halfway through the play, as lights flash "identify yourselves," Mr. Gough addresses the audience as himself—or as near as he can get to it on a stage—and then appears shy and reticent. Miss Reid, who had a notable career in music hall, seems more at ease addressing the audience directly in a comic anecdote from her past than as the haughty She.

They both perform, as Bill Bryden directs, with assurance, as if something significant were happening. But Mr. Albee's vaudeville seems an occasion for mutual hate. He appears to dislike his characters, who hate each other and also hate an audience watching them in their sourness.

Michael Gough and Beryl Reid in Edward Albee's "Counting the Ways."

In return, I imagine, an audience will dislike the play.

* * *

The policy being pursued these days at the Royal Court is to bring downstairs to the main auditorium the sort of plays and groups that used to be confined to the studio Theater Upstairs. The benefit is that the audience can sit more comfortably while watching small-scale work. And although Pip Simmons's "Dracula" occupies the Court's stage with great assurance, it has little else to recommend it.

Mr. Simmons's adaptation of Bram Stoker's novel is strenuously hysterical, concerned to enliven and present the sexual subtext of the original tale of vampirism. It proves that Stoker's repressed eroticism is far more effective than the explicit sexuality, the naked couplings that Mr. Simmons provides.

"Dracula," first presented at the Piccolo Theater, Rotterdam, two years ago, is the least effective of this group's work, perhaps because the actors seem less emotionally involved than usual.

Mr. Simmons's is a talented and inventive director, capable of a rococo theatricality. He demands a great deal from his actors, who respond admirably to his florid style—of their kind, you could not ask for better performances than Rod Beddall's Dracula, Peter Jonfield's madman, or Sheila Burnett's lustful vampire.

But it is theater that, while it may astound the sight or please the ear with some sepulchral songs, ignores the mind. And here, once Mr. Simmons has made an obvious point about the sexual nature of vampirism, all he does is repeat it, in ever more high camp variations.

* * *

At the Greenwich Theatre, David Thompson has the misfortune to direct Molière's "Tartuffe," in his own vigorous translation, just after Roger Planchon's TNP production at the National Theatre. Mr. Thompson's approach, inevitably, seems tamer and duller and less funny than usual although he has been bold enough, in his own way.

He has put the play in a stuffy 19th-century setting, the kind that Ibsen's characters inhabit, and made it a study of an almost successful conman. The production's great benefit is the performance of Leonard Rossiter as Tartuffe.

Mr. Rossiter is England's most volcanic actor, sometimes seen in continual eruption, as in the recent "Frontiers of Farce." Here he is in apparent equilibrium, although you can feel the activity beneath the surface in such tiny details as the sudden jerk of his hand when Orgon offers to make him his heir.

His acting lifts a production that otherwise tends towards turgidity.

THE ART MARKET

The 'Oriental' Flavor in Vogue

By Souren Melikian

PARIS, Dec. 10 (IHT).—The value of impressionist-inspired painting and modern "primitive" art is sliding. But since anything can happen when a 19th or early 20th-century painting has an "Oriental" flavor—a few Western professionals are speculating on the growing market for European art in the Mideast.

This was clear at a sale Wednesday at the Hôtel Drouot-Rive Gauche when Paul Renaud sold a group of 19th and 20th-century paintings. It was also clear that symbolist art is holding its own despite the doubting Thomases.

In the impressionist-type category fall paintings by perfectly competent artists such as Johannes Ten Cate, along with a debased version of the style that is only a step away from airport art. But regardless of quality, prices in this category are tumbling.

For instance, a delightful pastel landscape in grayish mauves and greens, done by Ten Cate in 1917, was sold—with difficulty—for 1,100 francs. In my opinion this is so low as to be unfair. More justified was the beating taken by Elisée Maclet's harbor scene, "Le Vieux Toulon," which sold for 3,480 francs. Not long ago, these splashy, gaudy views of the Riviera were worth two or three times as much.

Proof that "primitive"—*naïf*—art is falling from favor was the low price of 9,750 francs paid for André Bauchant's "Peasants in the Countryside"—an excellent landscape (as far as Bauchant goes), dated 1950. While the context of the sale may not have helped—the emphasis was not on contemporary art—the low price was nevertheless significant.

Commercial Favorites

Most dealers specializing in contemporary art had seen the Bauchant painting. Many of them were at the sale. One of them, Hervé Odermatt, had come not to buy Bauchants but to pick up works from the "Orientalist" school, art showing Near or Mideast scenes. These have emerged as commercial favorites this season.

Judging from the prices at several recent sales, the subject counts more than pictorial merits. A passable oil on panel by Albert-Clément-Valéry Gautier, "The Simala Moving On," went to Odermatt for 4,990 francs. And a poorly painted scene of North African horseman crossing a brook, done by Henri Rousseau in 1928 in a vaguely neo-impressionist manner, went to the same dealer for a whacking 11,420 francs. This is three times what the Maclet harbor scene fetched. It apparently made no difference to bidders that the horsemen were inferior to the "Simala."

This apparent lack of discrimination is due to the speculative nature of the Mideast market—the Western professionals seem to be aiming at the less sophisticated sectors.

Vast numbers of third-rate works, not to say junk, are believed to have been sold over the past two years in places where 19th- and 20th-century European paintings are as unfamiliar as Arab manuscripts are in the West. It takes prolonged exposure to any art school to develop the perceptiveness that characterizes the discriminating buyer.

Fragility

Such a state of affairs, however, is not likely to last. The Mideast may be a booming market, but it is a fragile one as well because the transactions involve a very small number of dealers with contacts there. This is, moreover, no telling how long indiscriminating buyers in the Mideast are going to remain indiscriminating.

A case in point is a pseudo-harem scene called "After the Bath," painted by Georges Rochegrosse (1859-1938). It is typical academic paintings produced by Rochegrosse after World War I and, as such, is not particularly attractive to Western buyers. "After the Bath" had previously been offered at auction at Drouot and had been bought in. Wednesday, it sold for a staggering 20,340 francs—with Odermatt taking an active part in the bidding, although he failed to get it.

Symbolism

Quite different is the case of the late 19th-century symbolist school which continues to rise in value despite fears that some professionals were voicing at the end of last season. The rise reflects the growing interest of the Western public in quaintness with a touch of violence and, sometimes, a kind of frozen eroticism. A drawing in watercolor and ink by Elisabeth Sonrel, illustrating a poem by Charles Cros, "The Box," made 9,290 francs, a high price.

More surprising still, Henry Groux's pastel and black chalk study made 8,248 francs—possibly because of the Blakelike feeling of bodies twisting and surging around the figure of Jesus. Painted for work by George de Feure, a Frenchman of Dutch origin (real name was Van Sluyters), possibly the best symbolist painter, continue to rise. A slightly murky 1892 landscape, "Undergrowth," brought 6,960 francs, which is about 50 per cent more than what it would have made last spring.

Every sale has its quirky item. Wednesday it was a semicircular pastel showing Loïe Fuller on couch next to the lamp made in her image by sculptor Théodore Rivière. Rivière's Loïe Fuller lamp was cast in bronze by the hundreds and is a favorite item among Art Nouveau collectors. The pastel happened to be by an American, Frederick Arthur Bridgman (1847-1928), almost exclusively known for his Algerian and Turkish scenes. The price was 19,220 francs, three times the presale estimate. It reflected the unique semi-documentary, semi-romantic appeal of the work, as well as the prospect of a substantial profit on the U.S. market.

ENTERTAINMENT IN NEW YORK

NEW YORK, Dec. 10 (IHT).—This is how critics for The New York Times rate new films and stage productions.

Plays

"Comedians," by Trevor Griffiths and staged by Mike Nichols, "is one of the funniest, and almost certainly the dirtiest, comedies to be seen on Broadway in some seasons," Clive Barnes says. It's about life and politics, the playwright "presumably, is a Socialist with a sense of humor," Barnes writes. It is set in Manchester, England, in a night school for comedians where six aspiring comedians are to perform for a talent scout. The conflict is between the teacher's vision of comedy, "a stimulant," and that of the scout, "a narcotic." "Griffiths has found a perfect form to discuss the weighty matter of comedy, its function, purpose and reward." Jonathan Pryce "gives a memorable and brilliant performance," based on the classic clown Grock, who died in the '50s. And Nichols's staging "is unself-consciously dazzling." Barnes concludes: you can go along "just for the belly laughs," or for the other level of seriousness, but "don't miss this play."

"Visions of Kerouac," a play by Martin Duberman about Jack Kerouac, is a serious attempt to show the man beneath the Beat Generation myth, says Mel Gussow. But it's a failure, with Kerouac not getting the "variegated, complex portrait" that he deserves. Duberman oversimplifies the novelist's life, suggesting that he was trapped by a refusal to admit a preference for homosexuality. Also, "there is too much wide-eyed effusiveness." Gussow points out that Kerouac is dead, hence the libel laws are not a concern. But his friends—Allen Ginsberg, William Burroughs and Gregory Corso—are alive. "It is one thing to write a theatrical equivalent of a roman à clef, and another to concoct a shaky amalgam of fact and fiction" as Duberman has done. Lane Smith plays Keronac, giving a "visceral" performance. Kenneth Frankel directed.

"The Brownsville Raid" is a "taut and most compelling" drama by Charles Fuller, staged by the Negro Ensemble Company. The play stays close to historical fact—the alleged raid by a black regiment of the Army on the town of Brownsville, Texas, in 1906. Clive Barnes points out that the raid may well have been rigged by the white townsmen to get rid of the black soldiers, who were subsequently dishonorably discharged from the Army. The hero of the play, Sgt.-Maj. Mingo Saunders, was typical of many blacks after emancipation—he joined the Army because it offered one of the few possible "careers" for men of his race. "He was an Uncle Tom with sergeant's stripes" but Fuller sees him and the other men as part of a historical conspiracy." "The performances are brilliant," Barnes says; Douglas Turner Ward plays Mingo Saunders.

Films

"Bound for Glory," Hal Ashby's film biography of one of America's greatest folk singers and composers, has a number of "very good things going for it, in particular David Carradine's dry, haunted performance as the young Woody Guthrie," Vincent Canby says. Ashby and his cameraman, Haskell Wexler, have been "immensely successful in re-creating the look of place and period from the drought-ridden Texas Panhandle of the 1930s" to the California fruit ranches. It doesn't have much of a screenplay, at least not one that matches the complexities of the central character, Canby says. Guthrie, in the film, isn't any more articulate "than your average, tongued-tied man-in-the-street." Had the dialogue been combined with "more of Woody's music, the result might not have seemed as ultimately barren and trivial but Mr. Ashby didn't want 'Bound for Glory' to be a musical." Melinda Dillon plays Guthrie's abandoned wife as well as a singing partner. Ronny Cox is one of Guthrie's sidekicks and mentors.

"Silver Streak" is the sort of comedy that leaves you exhausted "though not from laughing," says Vincent Canby. Set on a Los Angeles to Chicago train, it is about art forgery. Gene Wilder plays "a more or less straight romantic role that suits him not at all." Richard Pryor turns up in the last third of the film and has "some genial moments that are immediately undercut by what appears to be either thoughtless editing or direction." Colin Higgins's screenplay is "not witty or rambunctious or mysterious." Director Arthur Hiller may, in Canby's opinion, want to forget "Silver Streak" as quickly as possible.

Rome Duty-Free Shop

ROME, Dec. 10 (AP).—Fiumicino Airport, which serves Rome, has been authorized to have a dutyfree shop—initially dispensing only tobacco and liquor for international passengers.

Picasso's Heirs in Agreement On Sharing Painter's Estate

NICE, Dec. 10 (AP).—Pablo Picasso's heirs have reached a new agreement on sharing his billion-dollar estate, a lawyer said today.

Roland Dumas, who represents the painter's widow, Jacqueline, said that "barring a spectacular upset at the last minute," the inheritance should be distributed to the six heirs within six months to a year.

A previous agreement had been contested by Marina, Picasso's granddaughter, and a court hearing was scheduled Dec. 7 to air the case. At the last minute, however, the hearing was postponed to Dec. 21 to give time for an out-of-court settlement.

Mr. Dumas said that the Dec. court session would probably n be held.

Experts are expected to divi up the estate by lots of estima ed equal value. The heirs w then draw for the individu lots. The widow, Jacqueline, w be entitled to 34.375 per cent the total estate. The grandchi dren, Marina and Bernard, ea will receive 18.75 per cent. Th children born out of wedloc Claude, Paloma and Maya, w each receive 9.375 per cent.

The diversity of the inheritan has been one of the complicati factors. Picasso left 1,885 pai ings, 7,089 drawings, 19,134 e gravings, two châteaux, oth real estate, securities and cash.

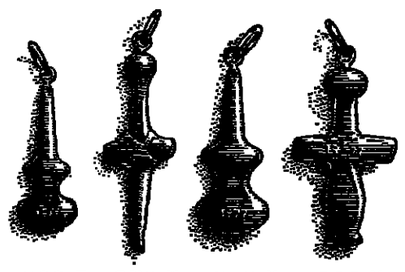
ARTS AGENDA

Hans Korte will be the stage director and Miltiades Caridis the conductor for a double bill of Karl Amadeus Hartmann's "Simplicius Simplicissimus" and Stravinsky's "A Soldier's Tale," to be given new productions by the Bavarian State Opera on Dec. 19 in the Cuvilliés Theater in Munich. On Dec. 23, in the National Theater, Günther Rennert will stage and Gabriel Chmura will conduct a new production by the same company of Bizet's "Carmen."

* * *

The American Cultural Center in Paris (3 Rue du Dragon) will complete a series of films devoted to choreographies of Murray Louis with the showing of "Time" and "Shape" at 7 p.m. on Dec. 14. The program is a continuation of the center's "History of Modern Dance in the United States" series, begun in October.

* * *



A new staging of Rossini's "The Barber of Seville" is scheduled for its first performance Dec. 29 at the Hamburg State Opera, conducted by Aldo Ceccato, staged by Gilbert Deflo and with sets and costumes designed by Italo Frigerio. Agnes Baltsa sings Rosina, Wolfgang Brendel will be Figaro, and other principal parts will be sung by Rüdiger Wohlers, Ude Kreko and Harald Stamm. The second performance is scheduled for Jan. 2.

'Chorus Line' Named London's Best Musical

LONDON, Dec. 10 (AP).—Marvin Hamlisch's "A Chorus Line" has been named as the best musical of the year by London's West End theater critics.

A British cast is replacing the original American cast as the show continues at the Drury Lane Theatre.

EMILY GENAUER

...ig, 'Unknown' Talent: ...ancy Grossman in U.S.

...W YORK.—Up creaking steps in an aging tenement in the ghetto section of Manhattan the astonishingly handsome ...lo-home of a woman artist may be one of the most ...resting and gifted in the ...ed States. She has had a ...-dozen solo shows, been in...led in group exhibitions around ...country, is represented in the ...ections of some of the most ...isticated art patrons around.

...t Nancy Grossman, at 35, ...ains almost unknown to the ...ral public and much of the ...world. Her name is not one ...the "musts" automatically in...ed in any big art-now museum ...ey. Her work is rarely dis...ed or even listed in new ...s.

...rossman is the artist who a ...years ago, before realism be...e the new, now thing, did a ...es of heads and figures of ...haelangelesque power which ...then covered with a black ...ther "skin," using zippers for ...ths and eyes. They were ...nacing, of course, but they ...e also mysterious in a subtle ...unsticky way.

...r newest works, on view at ...ler & Eckstrom's, are again ...ative (years ago she did some ...ning surrealist abstractions). ...e are collage paintings. I ...n't any idea how she gets ...mottled color on the sheets ...per she cuts into fragments ...olus with mending tape. ...fragments seldom suggest ...ic parts of the human fig... Yet they come together like ...ions, muscles, thongs. The ...so called "Landslide" could be ...ist in a Pietà, or a Deposition ...m the Cross. "Rushing Fig..." isn't going to get anywhere ...ause he seems tethered, per...ps to himself. The colors run ...pale gray or greenish white, or, ...re often, to tones rich and ...ft as time-worn minerals, like ...alachite.

The sense of the show is a disquieting blend of power, menace, mystery—but strange apprehension, too. It's when Grossman becomes more specific that she disappoints, as in a repetitious series of pastel heads, in which the faces topping strong but too realistically handled necks, are variously concealed by collages of masks.

* * *

Kathe Kollwitz was an artist who expressed her indignation against war and poverty in terms that were tender and compassionate, as well as powerful. The new Kennedy Galleries show includes some 80 drawings and prints by the German woman who was one of the major artists of the first half of the century.

There was a time when most people interested in art knew her story. Born in Germany in 1867, she married a young doctor in the Berlin slums and made the poor her life-long theme. Her son was killed in 1914 serving in the German Army. Her grandson met the same fate in 1942. Except for brief travels abroad, she remained in Germany, painting, sculpting and making prints of oppressed workers, of insurrection, of battlefields full of the dead and the dying.

In 1933, with Hitler's arrival on the scene, she resigned from the Prussian Academy of Art and, as a Socialist, was forbidden to teach. By 1936, her work could no longer be exhibited. Friends urged her to leave the country, but by then she was well into her seventies and refused. She died in 1945, shortly after her Berlin home, studio and much of her work were destroyed by bombs.

Enough remains, however, especially among the drawings and prints, to stand as a moving memorial to her genius. It was a deeply Germanic expression, rooted in tormented Gothic compositions, related to the sculpture of her friend and countryman Ernst Barlach, biting in its line, but monumental even in its shadowy forms, holding back nothing.

Nancy Grossman's "Bound Figure with Hood" (1976).

* * *

Saul Steinberg is another artist hardly happy about the state of the world. But he conveys his bitterness—because he knows nothing can be changed?—in drawings that unfailingly make their viewers happy because they are not only sardonic but extremely funny. Two shows—at Betty Parsons and Sidney Janis—are as wry and askew in their technique as in their theme. A master could write a hopeless, whither-are-we-drifting novel. Steinberg draws two lines to indicate a twisting, curving path along which, at intervals, are arrows and markers reading "too soon," "never," "next time," "but," "once more," "sometime"—and says it all. He draws a beautiful pattern of the words (there are some figures in it too, I think) "I have; I am." The load that Sisyphus is futilely and forever trying to push up a hill is simply a big question mark.

So Steinberg, in cartoons of boundless wit that go back to the '40s and interestingly trace his development to the point millions know now through their use as covers for The New Yorker and other publications, comments on a world of unanswerable questions, distorted values, and no signs of direction at all out of our ridiculous, painful mess.

Called 'Dazzling'

Russian Costume Show Opens at Metropolitan

By Bernadine Morris

NEW YORK (NYT).—The Russian costume exhibition at the Metropolitan Museum of Art is a dazzler.

It concentrates on clothes from the 18th and 19th centuries and tiptoeing into the 20th with styles from Worth and Poiret. These are, of course, court and royal-family clothes and the pièce de résistance is Catherine the Great's wedding dress, all cloth of silver with silver embroidery, and showing off a young girl's 17-inch waistline.

But equally astonishing are the peasant clothes with their meticulous embroidery and ribbon detail and all making use of a vivid shade of red. The shapes are big and voluminous and there is widespread use of layering, involving shirts, the sarafan (a kind of jumper), aprons and underskirts. An important part of the outfit was the kokoshnik or headdress, which changed shape from region to region, and was often pearl-embroidered.

A separate room is devoted to rich peasant clothes, which substitute brocade and fur for coarse cottons and embroidery but maintain the same traditional shapes.

Illustration

The costumes illustrate the way clothing, at its best, becomes art, and is worthy of presentation in a museum.

The Russian styles have, in fact, come from museums in the Soviet Union, including the Hermitage in Leningrad and the State Historical Museum in Moscow. They were accompanied by three experts, Tamara Korshunova, who is curator of the Hermitage, Luiza Efimova, curator of the State Historical Museum, and Nina Yarmolovich, a restorer in the Kremlin Museum in Moscow.

Their institutions are constantly traveling around the Soviet Union to secure examples of folk art, of which costumes are considered an important category, the women observed.

Not all the clothes in their country are anonymous, they said, mentioning Olga Bulbenkova, a court costumer at the turn of the century, who died around 1918, and Nadezhda Lamanova, who did theatrical work as well as clothes until her death in 1941, as designers whose names are known.

Slava Zaitsev is the current big name in fashion, Mrs. Efimova observed.

"I don't know whether he's a Givenchy or a Galanos—he's a Zaitse," she said, smiling.

A First

It is the first time the costumes have been shown outside the Soviet Union. The exhibition, called "The Story of Russian Costume," is the fourth of a series of cultural exchanges arranged by Thomas Hoving, director of the Metropolitan, and the Soviet Ministry of Culture a few years ago.

The Russians sent the Scythian gold exhibition here in 1975 and the Metropolitan sent 100 European and American paintings to the Hermitage and the Pushkin Museum in Moscow. Earlier this year, the Metropolitan sent a selection of pre-Columbian gold.

That clothing is part of this exchange of treasures has pleased members of the fashion industry, who aspire to art but are often mired in commercialism.

Their support has helped make the annual openings of the fashion exhibitions at the Metropolitan major social and cultural events. Under the direction of Diana Vreeland, the first one, in 1973, centered on innovative Paris designers of the early part of this century. The second involved Hollywood costumes and last year's focused on American women of style.

The Opening

The opening of the Russian costume show this week, with its undercurrent of cultural détente, was undoubtedly the grandest.

"I've always been mad about the Russians," observed Mrs. Vreeland. "When I was a child growing up in Paris, everybody was fascinated by Diaghilev's Ballets Russes.

"I was hired by the museum to plan exhibitions, and in the spring of 1975 I asked if we could do Russian clothing—I wanted to go to Russia, I'd never been there. Mr. Hoving said, 'You can go with me.' He was going to Moscow for the opening of the paintings exhibit and I went along."

To provide the proper ambiance, Mrs. Vreeland secured yards of furs to throw around the exhibition "to give the idea of savagery." She persuaded the House of Chanel to revive its "Russia Leather" scent to spray around, and she ordered the music, a tape specially prepared from the work of Mussorgsky, Borodin, Rimsky-Korsakov, Tchaikovsky and Glasunov.

Walking through the exhibition, she confessed she had always had a crush on Peter the Great—his uniforms and his caftan are on display—and pointed out the expansion of Catherine the Great's waistline from the minute handspan dimensions of her wedding dress to the matronly scope of her later court dress.

Jacqueline Onassis, who headed the benefit-opening committee, edited a book for the occasion, Called "In the Russian Style," it is being published by Viking Press.

Another Achievement of Seiko Quartz Technology.
The LC Digital Quartz Chronograph

It Tells the Time and Date and Turns into a Stopwatch at the Touch of a Button.

Seiko can do it because Seiko was first to market the quartz watch and today is the world leader in quartz. Seiko's expertise in every phase of watchmaking means Seiko can make any part of any Seiko watch, for impeccable quality control. Seiko makes quartz watches with traditional analog faces and with the LC digital readout. No matter which Seiko Quartz you select, you get the watch that's changing the world's standard of accuracy. Seiko Quartz.

EUROPEAN GALLERIES

Brussels

...Bury, Graphics and Sculp...res, Musée d'Art Moderne, ...Place Royale, Brussels, to ...an. 2.

...his is Pol Bury's first offi...lly sponsored show in Brussels. ...n in the mining region around ...arleroi, Bury now lives out...e Paris. Many of his graphics ...ture American cities—his wife ...New Yorker—seemingly men...d by clusters of giant globes ...ering enigmatically amid the ...scrapers, rolling along streets, ...itting on traffic-packed ...rge Washington Bridge.

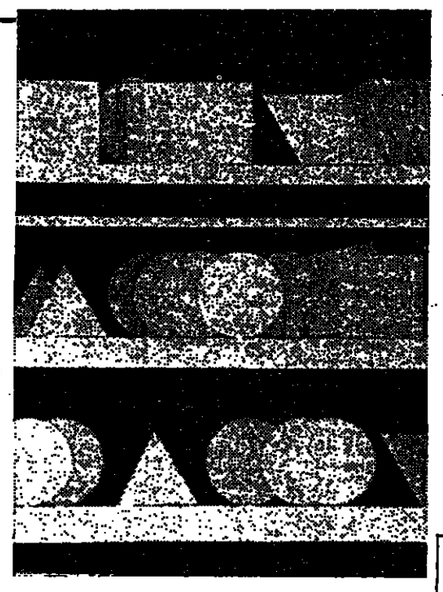
...he show, titled "From the ...nt to the Line," has many ...re graphic works than sculp...res because of restricted space. ...When Bury takes the point as ...me, he enlarges it to a full-...l circle, shrinks it to a dot, ...dicizes it by cutouts of cir..., each nudged off center by ...neighbor to create an effect ...movement. In his sculptures, ...point becomes a solid sphere ...wood or bronze, sliding for...d and back, or a tiny ball...ed cap to slender wires ...ing outward from a metal ...

...th point and line appear in ...ings, brushed into shadowy ...with the illusory effect of ...ility, in unexpectedly delicate ...alluring colors. Woodcuts ...tougher, more tangible look...the colors warm, dark and ...nite, the surfaces grained and ...ed.

* * *

...orama of Flemish Art, Hilton ...allery, Waterloo Boulevard, ...russels, to Jan. 22.

...lemish art has always been ...ng on imagination, earthy ...or, love of landscape. This ...ibition of 170 works, mostly ...intings, some small sculptures, ...s the early 20th-century ...them Saint Martin group of ...sts as starting point and ...hes right forward into con...porary art. Basic pruning ...ld have helped to even out ...quality and point up the real ...ngths and individual quirks. ...at least with a net cast so ...e, not too many have slipped ...ough. There's at least one ...k from all the first wave of ...them artists plus several of ...more interesting moderns. ...meke, the De Smet brothers, ...erys (among the expression...), Jacob Smits, Spilliaerts for ...symbolists, constructivist ...x de Boeck, a contemporary ...Permeke but startlingly subtle ...l modern in his very different ...le. Later works include the ...pantly erotic sculptures of ...l d'Haese (although, puz...gly, there are none by his ...ther Rheinhoud), tortured ...le figurines in the same style ...Houffalize. Etienne Elias, one ...the best of the younger ...mish painters, Paul Joostens, ...tly coarse, are worth track...down among the abundance.



* * *

...es, Galerie Maya, 13a Rue ...eydt, Brussels, to Dec. 31.

...or this show, the gallery asked ...ists, most of whom have shown ...e individually as painters or ...ulptors, to contribute an art ...t or box as art, leaving it ...irely up to the artist how he ...she interpreted the idea. ...The result is a happy assemblage ...variations on a theme, from ...uche's marvelously decorated ...ap cardboard boxes, every inch ...sides and lid covered with ...inted fantasies, to Monique ...ecassis's antique rustic cabinet, ...ructured with authentic looking ...rmholes, opening to reveal interior walls painted in the style of early Victorian watercolorists. The American artist Hugh Weiss provides a mobile of cardboard cutouts painted with his favorite little round men (self-portraits) and flying objects floating through space, all swinging on threads strung from a suspended box lid, with box bottom suspended beneath. Another creation is a pine commode, one shelf containing a bright pink head, a drawer open to show a hand, and lurking coyly in the open cupboard space a real green cabbage. It is by Camille de Taeye.

This is a lighthearted show, an escape from the sad self-consciousness of art without inspiration, and a new experience for most of the artists involved.

—RONA DOBSON.

Pol Bury's "3 Alignements Soulignés No 11," now on view at the Musée d'Art Moderne in Brussels.

Paris

Dubout, Librairie Kieffer, 46 Rue Saint-André-des-Arts, Paris-6, to Dec. 31.

Albert Dubout, who died in June this year at the age of 71, was no doubt the foremost humorous illustrator in France, and the one whose imaginary world attracted the broadest affection in his own country and provoked the widest public to laughter. He was neither a "mere" illustrator, nor a "mere" humorist and those authors whom he chose to illustrate were always annexed by the densely populated little empire he created. The present exhibition is devoted to his illustrations for the Marquis de Sade's "Justine." It is no doubt a relief to find some humor injected into something as basically humorless as the works of the marquis. A few years ago, Dubout did the "Kama Sutra" and his illustrations for "Justine" are much in the same vein but of course with scenes of torture added. It is probably impossible to make any scene of physical torment utterly hilarious, but Dubout has the merit of allowing the sun of derision to shine upon the dark fantasies of the dungeon. Those who read De Sade with grave respect will not be amused.

* * *

Tom Phillips, Galerie Bama, 80 Rue du Bac, Paris-7, to Dec. 18.

Tom Phillips has finished the long task which he undertook some years ago and which can be described as the illuminated, poetic transmogrification of a Victorian novel. The novel, a perfectly conventional period piece called "A Human Document", has now become "A Humument." Phillips's work consists in blotting out most of the text by painting over it (I use the term "paint" to cover all media used, none of which was oil), sometimes an abstract composition, sometimes a subject or symbol, and leaving only a necklace of random words to be read. The new text thus created is a form of random poetry, full of the delicate charm of chance encounters and lit throughout with the irony of the form itself. "A Humument" is consequently a unique undertaking in its methods and its result, and Phillips succeeds in kindling tiny sparks of poetry within the cadaver of a Victorian novel.

* * *

Gilgian Gelzer, Galerie Philippe Frégnac, 50 Rue Jacob, Paris-6, to Dec. 25.

Gelzer, who is 25, has produced her a number of nonrepresentational paintings that are full of fresh and sensitively used color. There is a thoughtful yet happy mood in them that is not hampered by the decorative value of Gelzer's art. This is his first gallery show in Paris and reveals a pleasing talent.

—MICHAEL GIBSON

Rome

Margherita Benetti, Recent Etchings. Nuovo Torcoliere. 26 Via Alibert, Rome, until Dec. 14.

Small landscapes of the Po plain, of poplar plantations and wintry river views, closeups of velvety petals of growing flowers are held in by a gentle intensity. Large abstractions are just as delicately precise. Benetti, in her latest, most beautifully executed etchings, contains a mood, a loneliness, a time of day, with poise and feeling.

— EDITH SCHLOSS.

To-day, "science fantasy" reaches your wrist:
The new Pulsar
with calculator and memory.

After the Master Time Computer, the watch will never be the same again. And nor will the calculator!

Pulsar equips you with a mini-computer, a veritable bank of information on your wrist.

The Pulsar quartz module is programmed to display the hour, *the minute, the second,* the date and the month. And when you switch to the calculator, you control a fantastic instrument. Your Pulsar adds, subtracts, multiplies, divides, works out percentages – and is capable of retaining all these calculations in "memory"! Its answers are expressed in six large red figures on the screen of your watch.

Ask to see the incredible Pulsar with calculator: it comes to you together with an exceptional three-year guarantee!

Pulsar – a product of the utmost reliability, available only from the highly qualified watchmaker who is an authorized Pulsar dealer.

PARIS, SATURDAY-SUNDAY, DECEMBER 11-12, 1976

In Third Quarter

Japan's GNP Growth Slows to 0.3 Per Cent

TOKYO, Dec. 10 (AP-DJ).—The wth rate of the Japanese gross tional product fell sharply in e third quarter to 0.3 per cent, mpared with a 1.8-per-cent wth rate in the second quarter d a 3.2-per-cent rate in the st quarter, the Economic Plang Agency said today.

The growth rate in the third arter was equivalent to an anal rate of 1.3 per cent, down arply from 5.3 per cent in the cond quarter and 13.4 per cent the first quarter of this year.

The government's Economic anning Agency (EPA) said in preliminary report that the wdown in the third quarter as due mostly to still moderate nsumer spending, depressed using construction and capital vestment, slower government ending and reduced earnings m overseas business.

In nominal terms (unadjusted r inflation), the third quarter P growth was set at 1.9 per nt over the second quarter. Sec-d-quarter nominal growth was per cent and first-quarter owth was 4.1 per cent. The ained difference between real d nominal growth last quarter flected a slowdown in the rate inflation, an EPA spokesman id.

The EPA said that a projected 9-per-cent growth rate for the al quarter ending March should post the GNP to the government's forecast of an annual growth of 5.6 per cent.

The EPA also announced that its final calculations for fiscal 1975 GNP growth showed real annual growth of 3.4 per cent, while nominal growth rose 9.7 per cent.

Last year marked the first time in 13 years that nominal GNP growth was less than 10 per cent. Nominal growth in fiscal 1974 was 17.9 per cent, while real GNP contracted by 0.3 per cent—the first fall in real terms since the end of World War II.

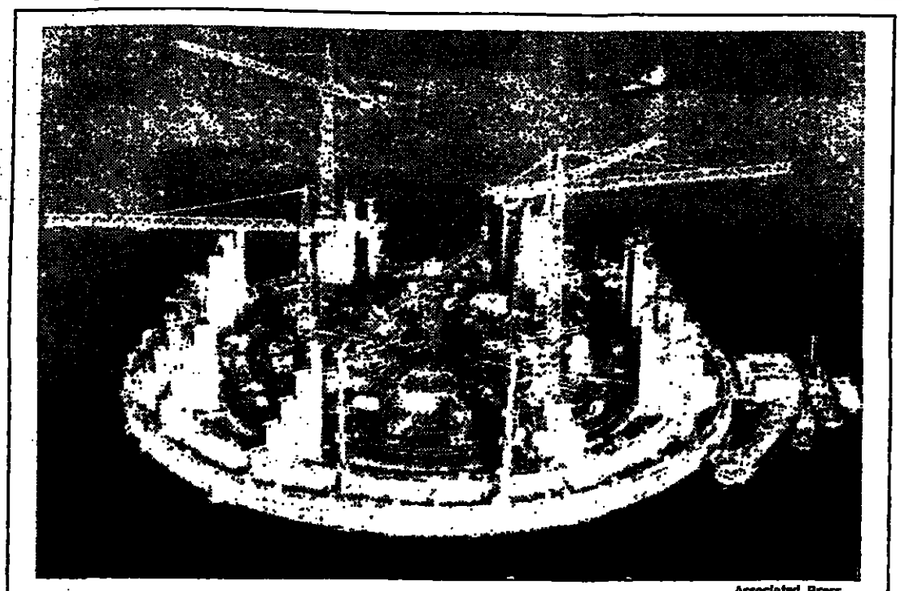
A comparison of gross domestic product—GNP minus earnings from overseas—totals among Organization for Economic Cooperation and Development nations shows Japan ranks second after the United States.

Japan's fiscal 1975 GDP totaled $490.1 billion, compared $1.514 trillion for the United States, $423.6 billion for West Germany, $326.4 billion for France, and $227.8 billion for Britain, the EPA said.

Prices Rise

In another report today, the Bank of Japan said wholesale prices rose a modest 0.3 per cent in November from October, but were 6.6 per cent above the year earlier month.

The central bank's wholesale price index stood at 168.7 at the end of last month (1970 equals 100). It was the 17th consecutive monthly rise.



The Bank of Japan said it may prove difficult for the government to achieve the official target of holding down the rise in wholesale prices this year to below 4.8 per cent.

Meanwhile, unemployment in Japan in October declined by 19,000 from September and by 40,000 from the year-earlier month to total 1 million, the prime minister's statistics office said today.

The October unemployment compared with 1.04 million unemployment in the year-earlier month.

Seasonally adjusted unemployment stood at 2 per cent in October, down from 2.04 per cent in September, showing a declining trend from the peak of 2.06 per cent record in June and July, 1976.

The office said unadjusted unemployment rate registered 1.8 per cent, down from 1.9 per cent in September and equal to a year earlier.

Associated Press.

GIANT RIG—Central platform of Chevron Oil's rig intended for the Ninian Field in the North Sea, being built at Loch Carron, Scotland. When complete it will weigh over 400,000 deadweight tons—the biggest thing afloat after icebergs.

Despite 'Questionable' Payment to S. Korean

U.S. Loan Support Seen for U.K. Firm

WASHINGTON, Dec. 10 (AP-DJ).—A "questionable" payment by Burmah Oil Corp. may cause more headaches for U.S. Commerce Secretary Elliot Richardson than it does for the company.

Mr. Richardson has concluded that Burmah paid a "questionable" commission of as much as $3 million to Tongsun Park, the businessman who is a central figure in the U.S. government's investigation of improper congressional lobbying by agents of the South Korean government.

Nevertheless, Mr. Richardson hopes to approve government loan guarantees exceeding $500 million that promise to greatly benefit British-based Burmah. General Dynamics Corp. is applying for the guarantees to build seven sophisticated tankers that will be chartered to Burmah for the hauling of liquefied natural gas from Indonesia to Japan. Three of the tankers are nearing completion.

Signing Next Month

Mr. Richardson intends to sign final, binding commitments before leaving office next month, assuming that a formal Securities and Exchange Commission investigation of Burmah's payments to Mr. Park and possibly to other parties does not turn up any further allegations.

Mr. Richardson's post as chairman of a high-level task force that is reviewing the overseas payments issue for President Ford makes it particularly touchy for him to bestow benefits on Burmah, even though the benefits are incidental to his main goal—keeping General Dynamics shipyard in Quincy, Massachusetts, in business and generating jobs.

In a sense, the secretary's expected approval of the loan guarantees could prejudge a major question that his task force is studying: Should the U.S. government refuse to assist concerns that pass under-the-table payments to government officials or to commercial customers?

SEC chairman Roderick Hills, for one, suggests wielding the government's "economic authority" to retaliate against foreign businesses that compete unfairly against the United States by paying bribes.

But Mr. Richardson's aides say that Mr. Hills's views are not applicable to the Burmah matter, and in a letter to Rep. Les Aspin, D-Wis., the secretary says there is no evidence that the company's $3-million commission to Mr. Park was part of a bribery scheme.

Help From Park

According to Mr. Richardson, a Burmah subsidiary paid the fee in 1975 for Mr. Park's help in canceling an oil-charter contract with Japan Lines, a ship company. For a payment of $59 million, Mr. Richardson's aides explain, Burmah got rid of legal obligations that were draining the company of $800,000 a week and that exposed it to ultimate losses of $150 million.

Mr. Richardson probably would prefer to delay signing binding commitments for loan guarantees to General Dynamics until all the investigations related to the applications are over.

In addition to the SEC's look at Burmah's foreign payments, the General Accounting Office is reviewing the Maritime Administration's handling of the loan guarantee program and the House Government Operations Committee has been questioning Maritime Administration staffers.

But Mr. Richardson apparently believes he must act before the Ford administration departs on Jan. 19. Pertamina, the Indonesian government's energy enterprise, could cancel an agreement with Burmah to haul the liquefied gas to Japan if the U.S. government does not announce a binding commitment for underwriting the tanker-construction loans by Jan. 31.

"Accordingly," Mr. Richardson wrote in the letter to Rep. Aspin, "it wouldn't be appropriate for me to leave this decision to the incoming administration and therefore action will be taken on the General Dynamics amended application by Jan. 19, 1977."

While negotiating that 1973 transportation agreement, a Burmah subsidiary assigned part of the profit to undisclosed participants, including a 20-per-cent cut to a company in Hong Kong that is identified in an undated Burmah document as a "reported front for Indonesian interests." Mr. Richardson's aides are in the process of gathering sworn affidavits that all the secret participants have been excluded.

U.S. Says Oil Price Rise Unjustified

By Don Oberdorfer

WASHINGTON, Dec. 10 (WP).—The State Department yesterday reiterated U.S. opposition to any increase in worldwide oil prices by the Organization of Petroleum Exporting Countries.

"No oil price increase is justified, and any oil price increase could have damaging consequences on the world's economy," declared State Department spokesman John Trattner. To back up his argument, he released a State Department study, cabled Wednesday to U.S. embassies, claiming that "higher oil prices would pose considerable risks to the already sluggish pace of economic recovery."

The official study said that a 5-per-cent increase in oil prices—about the smallest being mentioned in speculation about the forthcoming OPEC decision—would cost American consumers $1.9 billion next year, including gasoline and heating-oil increases of about eight-tenths of a cent per gallon. The study said a 5-per-cent increase would cost the "big seven" industrial nations a total of nearly $4 billion yearly and add more than $1 billion to the import costs of smaller developed countries and a similar sum to import costs of developing countries which do not produce oil.

Shah Quoted

The U.S. statements came in response to an interview yesterday in which the Shah of Iran was quoted as saying a 15-per-cent oil-price increase would cause only fractional inflation in the United States. The Iranian leader, who has been among those calling for the sharpest increases in oil prices, told the Dow Jones news service that the OPEC meeting scheduled to begin Dec. 15 would be an "open arena."

The State Department was also responding to comments by Gulf Oil Corp. chairman Jerry Mcafee that the economy of the United States and the world could tolerate a 10-per-cent increase in oil prices. Mr. Mcafee told United Press International that the Arabs "are smart cookies . . . (who) know what the traffic will bear, and they will charge it as long as they can get away with it."

One expert recently in contact with leaders in oil-producing states said that an increase of 8 to 12 per cent is probable, with the increase possibly divided in two steps taking effect now and next July.

Despite the public position, U.S. officials have little hope that some increase can be avoided. Figures of 5 to 10 per cent are being discussed here, on the basis of reports from U.S. diplomats abroad and other statements by oil-nation leaders.

It is generally conceded that, as in the past, Saudi Arabia will have the most important voice in the OPEC decision on prices because of its ability to increase or decrease production and its massive reserves.

Output Rises

Oil production in Saudi Arabia last month rose to more than 9 million barrels a day, its second straight monthly peak and a new production record, according to Arabian-American Oil Co. This evidently reflects stepped-up stockpiling of oil in anticipation of a price increase as well as a soaring demand for heating oil in the United States and Europe due to unusually cold weather.

Saudi Arabia has set a production limit of 8.5 million barrels a day on a yearly average basis. The increased production is believed to compensate for lower levels recorded in some earlier months this year.

In Caracas, Venezuelan Mines Minister Valentin Hernandez said the OPEC countries have reached a consensus favoring an increase in oil prices at next week's meeting, but that they would take into account a personal request by President Gerald Ford for moderation.

Mr. Hernandez said Mr. Ford's appeal was made during an interview at the White House early this month with Venezuelan ambassador Ignacio Iribarren Borges. Mr. Ford, as well as Secretary of State Henry Kissinger, has made personal requests along the same lines to several other representatives of OPEC countries, officials said.

OPEC's headquarters in Vienna announced yesterday that its economic commission will meet in Qatar early next week for two or three days in advance of the oil minister's meeting scheduled to begin Wednesday. The economic commission plans to "update its recommendation" on an oil-price increase, spokesman Hamid Zaheri said.

Mr. Zaheri declined to elaborate on the amount of the oil-price recommendation. He did say that "all the reports about an alleged 20-per-cent or 25-per-cent increase recommendation are wrong."

Volvo Shelves Project for Plant in U.S.

DETROIT, Dec. 10 (AP-DJ).—lvo, the Swedish automaker, s halted indefinitely its plan to ld cars in the United States. The company made headlines ree years ago when it became e first foreign automaker to nounce plans to build a full-le U.S. auto assembly plant, iced at that time at about 00 million.

Work on the first phase of the oject, in Chesapeake, Va., has ce been nearly completed, aim-g at a startup of limited pro-ction in March next year.

The decision to halt the venture such a late date reflects the t that Volvo sales have been mping, particularly in the ited States, in the last year two, and the automaker has much excess capacity in exist-g plants elsewhere that the U.S. cility will not be needed for an determined amount of time.

Not a Sound Move

"It wouldn't be economically und for us to begin U.S. assem-y at this time," Hakan Frisinger, Volvo's senior vice-president in charge of car production, d in an announcement in othenburg, Sweden.

He blamed unforeseen "drastic anges in the worldwide market-ce over the past few years" r sharply reducing demand for ropean-made cars. He specifi-lly cited the effects of the ergy crisis on the worldwide to market.

In fact, at the same time that announced it is putting its S. car-building project on ice, company also disclosed it will back sharply on its output autos in Sweden in the first lf of next year. The company d it will eliminate 15 to 20 oduction days in the first half 1977 at six different plants in eden. The cutback will affect out 15,000 workers there, the mpany said.

Volvo's decision today leaves lkswagen as the only foreign tomaker with an active plan build cars in the United States. W recently completed pur-se of a partly built former ysler Corp. assembly plant r New Stanton, Pa., and is ving ahead with completion the facility so that it can start lding cars there in the spring 1978. VW is also weighing ns to construct a new metal-mping plant in the United tes to eventually supply body ts for that plant.

Japanese Studies

eading Japanese automakers, h as Toyota and Nissan, have n studying the idea of building e in the United States, but ve not committed themselves any projects so far.

It is not known when Volvo ght reactivate its plan to build e at the Chesapeake plant. e are proceeding at this time h the intention of producing s at the Virginia facility as n as worldwide market condi-ns permit," Mr. Frisinger said. n an interview, Jan Nytzen, cutive vice-president of Volvo America Corp., Volvo's U.S. sidiary, said "it will be at least ear, maybe two or three, I can't . It depends on market condi-ns (for Volvo) worldwide, not t in the United States," he plained.

U.S. sales have slumped sharply the United States. This year expects sales of between 40,000 d 45,000 cars, down about 30 per nt from its peak sales of 60,000 t year, he said.

Fed Boosts Money Supply But Policy Seen Ambiguous

By Paul Lewis

NEW YORK, Dec. 10 (NYT).—The Federal Reserve increased the U.S. money supply in the week ended Dec. 1, wiping out the surprising decline that had occurred during the previous week.

But the figures released by the Federal Reserve Bank of New York yesterday also showed that Arthur Burns, the Fed chairman, was still managing the narrowly defined money supply, known as M-1, in a more conservative fashion than the broader measure, called M-2.

In the view of some money market analysts, this ambiguous approach to monetary policy raises the possibility of a conflict developing early next year between Mr. Burns and a Congress that may feel he is not providing adequate monetary support for the flagging national economy.

"Politically, the Fed is going to be under pressure to get M-1 moving faster early next year to head off a quarrel with Congress," said Alan Lerner, a vice-president and money market economist with Bankers Trust Co.

$2.7-Billion Rise

Yesterday's figures showed that M-1, which measures money in circulation and checking accounts, climbed $2.7 billion in the week ended Dec. 1 to $310.3 billion. This wiped out the previous week's decline.

But over the previous 13 weeks, M-1 has been growing at an average annual rate of 4.2 per cent, or below the bottom end of Mr. Burns's current target range of 4.5 per cent to 6.5 per cent.

Over the previous 52 weeks, the growth rate is still only 4.8 per cent, or near the bottom of the target range.

By contrast, Mr. Burns has been expanding M-2, which includes bank deposits, at rates around the top end of his 7.5-per-cent to 10.5-per-cent target range.

During the week ended Dec. 1, M-2 grew $4.1 billion to reach $725.1 billion, again reversing the previous week's decline.

But over the previous 13 weeks, the average annual growth rate for M-2 has been 11.3 per cent, and in the previous 52 weeks, the equivalent figure is 10.5 per cent.

In testimony before the Senate Banking Committee on Nov. 11, Mr. Burns said the discrepancy between the growth rates for M-1 and M-2 reflected administrative changes, interest rate differentials and innovations in financial technology, which tended to encourage the growth of savings deposits at the expense of demand deposits.

Prime Rate Cut

NEW YORK, Dec. 10 (AP).—Several large U.S. commercial banks cut their prime lending rates today.

Morgan Guaranty Trust cut its rate from 6 1/4 to 6 per cent, while Bank of America, Citibank and Girard Bank reduced their rates from 6 1/2 to 6 1/4. Other banks were following the move.

The last major round of rate-cutting was in late October, when the rate generally dropped from 6 3/4 to 6 1/2 per cent.

The prime rate is a bank's charge on loans to its most credit worthy corporate customers. While it is not linked directly to consumer or mortgage loans, its movements can signal the direction of interest rates in general.

U.S. Steel Firms Urge Action on Japan-EEC Pact

WASHINGTON, Dec. 10 (Reuters).—The U.S. steel industry asked President Ford yesterday to seek an end to an agreement which limits steel shipments from Japan to the European Common Market.

Industry officials said Japanese steel shipments to the United States had risen sharply this year because of the limited amount being exported to Europe.

They also asked that Mr. Ford consider interim action such as higher import duties and import quotes.

The officials told the President's special representative for trade negotiations that the additional imports from Japan had depressed domestic sales and caused heavy layoffs of American steel workers.

The price of American sheet steel products has risen more than 13 per cent this year.

Norway Prices Rise

OSLO, Dec. 10 (AP-DJ).—The Norwegian consumer price index increased 0.5 per cent in November from 124 to 124.6 points (1974 equals 100) corresponding to a price increase of 9.3 per cent in the first 11 months of 1976, the central bureau of statistics reported.

French Steel Industry Plans Large Reduction in Workforce

PARIS, Dec. 10 (AP-DJ).—The French steel industry, hit by a slump in demand, is expected to undertake massive cuts in its workforce over the next five years, industry sources said today.

Estimates of the size of the layoffs range as high as 20 per cent of the industry's 90,000 workers by 1982-83.

Several major French steelmakers announced yesterday that they would start reducing their personnel. The president of Usinor, France's second-biggest steel producer, said "a readjustment of the workforce of the French steel sector can't be avoided any longer."

He added that "it is evident that Usinor doesn't need 42,000 workers to produce some 8 million tons of steel in 1976, and prospects for 1977 aren't any better."

Sacilor, another major concern, said in a communiqué, "The outlook for the next three months is just as bad, considering the risk of a persistant unacceptable gap between expenditure and revenue."

Industry sources say they expect around 3,500 workers to be laid off by the end of the first quarter of 1977, and up to 10,000 by 1980.

Although implementation of the Common Market's anti-crisis measures on Jan. 1 may improve the situation, it is doubtful that they alone can solve the structural problems of the French steel industry, the sources added.

Swiss Jobless Rate

BERN, Dec. 10 (AP).—Swiss unemployment was up markedly during November, but with the level at 0.5 per cent of the total labor force, the rate remained the lowest among all Western industrialized countries. A total of 15,292 jobless were registered at the end of last month.

Bonn Gives Rome $200-Million Loan

ROME, Dec. 10 (Reuters).—Italy has reborrowed $300 million from West Germany out of a $500-million repayment it made on an earlier loan last September, senior banking sources said here today.

News of the new loan came three days after Italy repaid to Britain a $486-million loan.

Banking sources said Italy's gold and foreign currency reserves had fallen to between $1.7 and $2 billion.

The new $200-million borrowing from West Germany is part of a $2-billion gold-backed loan first made in August, 1974.

Spurt in U.S. Retail Sales Boosts Prices on Wall Street

NEW YORK, Dec. 10 (IHT).—Prices advanced again today on the New York Stock Exchange in active trading helped by falling interest rates and encouraging news on retail sales.

The Commerce Department reported that retail sales rose in November.

Analysts said the sales figures were encouraging more for their upward direction than for the size of the increase.

American Telephone, again active, rose 1/2 to 64. Other active issues included Occidental Petroleum, off 1/8 to 21 7/8, General Motors up 5/8 to 73 7/8, United Technologies off 3/8 to 37 3/4 and Rohr Industries up 1 5/8 to 6 7/8.

The Navy late yesterday awarded Rohr a $159.9-million contract for a new ship.

The Dow Jones industrial average closed up 2.41 to 973.15 on top of yesterday's rise of nearly 7 1/2 points. Trading volume was again heavy, totaling 25.96 million shares, compared with 31.3 million shares yesterday. Advancing issues outnumber decliners by about 895 to about 588.

BankAmerica rose 3/8 to 28 7/8, Citicorp 1/4 to 32 3/4, J. P. Morgan 3/8 to 56 3/4, Chase Manhattan 5/8 to 29 and Chemical 3/8 to 39 7/8.

IBM lost 1 3/8 to 270 5/8, Schlumberger 1 1/4 to 96 3/4, Getty Oil 1 7/8 to 193 5/8, McDonald's 1 1/8 to 53, Pepsico 1 1/4 to 80 3/4 and Coca-Cola 1 to 76.

General Electric rose 5/8 to 53 1/4, Westinghouse Electric eased 1/8 to 16 1/4 and Utah International rose 1/2 to 67.

The Justice Department said Westinghouse and GE agreed to modify pricing policies for large turbine-generators. As previously announced, GE is seeking to acquire Utah International.

Chrysler was unchanged at 19 3/8 and American Motors picked up 1/8 to 4 1/8.

The Environmental Protection Agency ordered Chrysler to recall 208,000 1975 model cars because of emissions problems related to carburetor maladjustments. Chrysler said it will challenge the order.

American Motors will extend its $253 cash rebates on some models for a month to Jan. 10.

U.S. Retail Sales Increase 2 Per Cent

WASHINGTON, Dec. 10 (Reuters).—U.S. retail sales rose 2 per cent to a seasonally adjusted $55.58 billion in November from an upward revised $54.67 billion in October, the Commerce Department reported today.

Retail sales during November were running at 10 per cent above the level of $50.55 billion recorded in October, 1975. The Commerce Department originally reported October sales at $54.1 billion.

The Commerce Department said that retail sales, excluding the automotive group, rose to $45.12 billion from $44.56 billion in October. Durable sales rose to $18.02 billion from $17.58 billion, while non-durable sales rose to $37.56 billion from $37.09 billion.

Mobil Bid to Get Ruling

LOS ANGELES, Dec. 10 (AP-DJ).—The Irvine Foundation will ask for court approval Monday of Mobil Corp.'s all-cash offer of $33.50 a share for its 54.5-per-cent interest in Irvine Co., a large southern California land developer. If Mobil acquires all of Irvine Co.'s 8.4 million outstanding shares, the transaction would be valued at $281.9 million.

Australia Lifting Import Quotas on Vehicles, Steel

CANBERRA, Dec. 10 (Reuters).—Australia will immediately remove import quotas of 90,000 units a year on assembled vehicles, the government said yesterday.

The announcement said the government still aims to retain about 80 per cent of the market for domestic manufacturers but did not say how this will be done.

The government will also remove the galvanized steel sheet tariff quota of 90,000 tons a year.

Government sources said a 10-per-cent additional duty on television sets will be removed, cutting the total duty to 35 per cent.

The government said on Tuesday that tariffs will be reduced on about 900 of 2,750 import items in order to reduce the impact on domestic prices of the Australian dollar devaluation, announced this week.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

CROSSWORD PUZZLE

Edited by WILL WENG

GLAD TIDINGS—By Henry Hook

ACROSS

1 Hingle or O'Brien
4 Lounge-chair part
7 Common 52 item
10 Korbut
14 Word of regret
16 Twice LXXVI
17 Concerning
19 Provinces
22 Vapor, old style
23 Orange throwaway
24 Yule song
26 Follow-up to 106 Across
29 Youth org.
30 Sandwich staple
31 Magwitch of "Great Expectations"
32 "Come —— come shine"
33 Menotti here
35 Faction
37 Mrs. Cantor
39 Rorem
40 Biblical animal
41 Erudite
44 Shoe width
45 —— theme, from "Zhivago"
46 Word with one or what
49 Military alarm clock
50 Mideast weight
51 Prepare wastebasket paper
53 Fencing items
56 Hesitant sounds
59 Once in a blue moon
60 Kaiser's come-on
64 " —— Majesty"
66 "Peace —— price"
67 Holiday entertainers

DOWN

1 Roast slightly
2 Hilo greetings
3 " —— to your leader"
4 Make uniform
5 Big-top big name
6 Lunchtime, in Lyon
7 Regional life
8 Dome athlete
69 Soften
70 Holiday dinner finale
71 Speared, as a fish
72 MIL award
73 Employee's quest
74 Go bananas over
75 News piece
77 Blood pathway
80 Dog in "Beetle Bailey"
81 Good loser
83 Grid scores: Abbr.
86 Uses one's gray matter
88 Taper upward
89 Wash. figure
90 Treasure-hunt aid
91 Home of Brigham Young U.
94 "Hold That ——"
95 —— of (happen to)
97 Cap- ——
100 Never's commierpart
102 Palver of "Mister Roberts": Abbr.
103 Man of triple-vision
106 What Santa's doing
110 Suit to ——
111 Tamper with a check
112 Wood fragment
113 Cry of revelry
114 —— ex machina
115 Sassy one
116 Poetic word
117 Be anise
118 Latin conjunction
119 Writer Josephine

DOWN

5 Interweave
9 Cadet
10 Mine find
11 Author Deighton
12 *Gift of sorts*
13 Namath's alma mater
15 Wise quality
16 Cheat on the final
18 Camouflage a message
20 Uses a dogsled
21 Unimportant
25 Biblical name
27 Shimmying sister
28 Quid pro quo
33 "—— may look on a king"
34 Home guest of 1985 Across
35 Recipient of a familiar visit
38 Next to R.I. in size
42 With skill
43 Madeleine, e.g.
45 Forfeit
46 "Bass off!"
47 Took the soapbox
48 Thomas Benton works
50 Autos of yore
52 Thickness
53 Ending for salmon or Cinder
54 Before shoe
55 Exist, in Paris
57 Cheap whisky
58 Most confident
60 Neighbor of Oahu
61 Eye part
62 Chimney dust, to Chaucer
63 Food treatment: Abbr.
65 Western event
67 Partisan: Suffix
68 River isle
70 Glass base
71 Pesty flier
74 Timetable abbr.
76 Fox or Rabbit
77 Form of French "to love"
78 Harem room
79 Groucho's specialty
81 Column or cord
82 Grid need
83 One of the clefs
84 What mountebanks do
85 "... a word from our —— "
87 Your, in Bonn
88 Watch parts
92 Consecrate
93 Thwart completely
95 " —— Clown"
96 Word with kilo or centi
98 Spurious: Prefix
99 Tops off a cake
101 Tearful
104 St. Louis bridge
105 Approves
107 " —— Got Secret"
108 Once-named
109 "Cave canem" sound

BOOKS

MAUVE GLOVES AND MADMEN, CLUTTER AND VINE

By Tom Wolfe. Farrar, Strauss & Giroux. Illustrated by the author. 243 pp. $8.95.

Reviewed by Anatole Broyard

IF *I've only one life, let me live* it as a—what? The original line, by a copywriter for Clairol, read "as a blonde" but Tom Wolfe finds the members of what he calls the "Me Decade" trying to recolor their very souls. They are going to live their lives, he says, as Emma Bovary or Erica Jong or, if they are men, as Casanova or Henry VIII. The notion that you can take your pick has arrived, and perhaps this is the "rough beast, its hour come round at last," that Yeats saw slouching "towards Bethlehem to be born."

To live as a "new" man or woman, as a "free spirit," a "swinger," as the "real me"; to be analyzed ad infinitum, as Hamlet was analyzed, to swoon in "an alchemical dream of the self," to watch the world turn, like a clock, to the tick of me, me, me. In an era "humid with solemnity," earnest beyond irony, in which sexology shades into theology, the common man, as he was once called, has screwed up his courage to fill in the blank, to write his own prescription.

For the first time, according to Wolfe, Americans have dared to renounce the immemorial notion of "serial immortality." Instead of living for the sake of what our parents taught us or what we hand on to our children; instead of dedicating our lives to a transcendent ideal such as patriotism, humanism, heroism or the happiness of the greatest number, we will dedicate it to ourselves only, to finding our lost souls here and now on earth. Our narcissism threatens to disrupt the historical stream, the sense of continuity that used to console us for our brief span.

Almost everything about Wolfe's new book is good except the title, "Mauve Gloves and Madmen, Clutter and Vine," which smacks of the early, psychedelic Tom Wolfe. He no longer telegraphs and cheapens his wit with capital letters, adjectives yoked together by violence and spastic punctuation. He is now so smooth that he manages to be one of our most fashionable writers while holding extremely unfashionable opinions. Whatever his politics may be, in his view of human nature Wolfe resembles such talented contemporary conservatives as Robert Nisbet, Irving Kristol, Ernest van den Haag and William Buckley jr.

"The Truest Sport: Jousting With Sam and Charlie" is a terrifying portrait of carrier-based Navy pilots in Vietnam. Such flying, the author observes, is *the medieval joust all over again*, a kind of carnage in the service of an ineffable standard of performance. Beyond politics, as Wolfe sees them, these pilots are risking their lives for "the love of the sport," for "all team sports were play-acting versions of military combat." The author's description of the pilots' *apatheia* —the taboo against displaying emotion—is like an inversion of one of Francis Bacon's paintings, turning the screen inward. His account of an F-4 coming in for a landing at 135 knots onto the pitching deck of a carrier is the perfect objective correlative for a runaway technology.

"The Commercial" shows a black baseball player caught in the cross-currents of the social revolution. Leading the league in batting by some 40 points, Willie Hammer is asked to do a television commercial for Charlemagne Cologne. Even more than his performance on the field, the commercial can make him a superstar, can add "cool" to his hot bat. But the producer wants Willie to call the cologne Charlie Magnet, explaining that it is a joke, that Willie is so confident he can make fun of himself. But Willie is not so sure he is all that confident, that they are not asking him to strike out at the plate in order to provoke a laugh that will immortalize not him, but Charlie Magnet.

In "The Intelligent Coed's Guide to America," Wolfe anatomizes the American intellectual's dogged attempt to deny the fact that, politically and economically at least, some things are looking up in the United States. While it is his opinion that we are suffering from a "happiness explosion," this is regarded by the ideological gurus of the age as a heretical contradiction of the tragic sense of life, the only thing, apparently, that gives it dignity. Accordingly, they have devised what Wolfe calls the "Adjectival Catch-up". The author's favorite "Adjectival Catch-up" originated with Herbert Marcuse, who coined the term "repressive tolerance," which Wolfe characterizes as "an insidious system through which the government granted meaningless personal freedoms in order to narcotize the pain of class repression . . ."

"Funky Chic" is an updating of Wolfe's classic essay on "Radical Chic." Funky Chic is the delusion of anti-fashion, in which the style setters substitute $75 prefaded, artifically aged jeans for slacks from Bendel's and believe they have joined hands with the creatures known as "human beings." While historians conventionally thought that "fashion is but the embroidery of history," Wolfe suggests that the opposite may be the case: that "every person's 'real self,' his psyche, his soul, is largely the product of fashion . . ."

Defining fashion as "a code, a symbolic vocabulary that offers a subrational but instant and very brilliant illumination of the characters of individuals," Wolfe suggests that the rich and the poor have changed places, one dressing down and the other up, like parallel lines, which will meet only in *infinity*.

There is much more in "Mauve Gloves and Madmen, Clutter and Vine"—more than enough to show that Tom Wolfe has evolved from a mere wit into one of the better caricaturists of the age. Perhaps he exaggerates now and again, but when he does, it is as if he is saying: What the hell. Is there any sense in trying to qualify anything in this crazy "culture" of ours?

Anatole Broyard is a book reviewer for The New York Times.

Mahre, an American, Upsets Favorites in World Ski Cup

By Bernard Kirsch

'AL D'ISERE, France, Dec. 10 (T).—Phil Mahre says that ing is not his whole life, just port that he is now enjoying that someday will lead him ewhere. Today it brought to glory.

he young man from White s, Wash., became a winner on World Cup circuit for the first e, "wiping out" the unbeatable emar Stenmark of Sweden by e than a second in the two-t giant slalom. Third in the ning men's race of the season Austrian Klaus Heidegger, Olympic gold-medalist Piero of Italy fourth and another he ski world's giants, Gustavo oeni, ending his race sprawled the snow of the first heat.

Mahre is the antithesis of a oeni, a Gros, a Stenmark, men o live skiing and have made their business; men who can walk the mountain resorts of rope without being bugged for autograph. Mahre has said, ow strange it must be 'to be tenmark or Thoeni.'"

ow Mahre's life, too, may be bit hectic, for he has gained reputation as the man who t down Stenmark. And it n't even a contest. The 19-r-old American was perform-on a course, and with condi-s that he said were ideal for a "just like at home." First e was rain and then snow wind, an icy and technical se that meant quick turns twists. But Mahre's a tough ll-field runner with ski poles football in his hands.

He led the first heat, a quarter of a mile maneuver with 80 gates, clocking 1 minute, 43.85 seconds to Stenmark's 1:44.21. He said he attacked the second heat "not as if it was a second heat, but as if it was another race." He finished the next quarter of a mile "tired but aggressive, because you have to fight to finish, you can't let up anywhere." And again he was faster than the 20-year-old Swede.

Stenmark was at the bottom of the hill after his 1:49.06 second run, watching the timer show 1:48.36 for the American. The total times were 3:32.21 for Mahre to 3:33.27 for Stenmark, who last year won the World Cup title with 249 points and then finished third in the Olympic giant slalom. Mahre, who came on strong at the end of the year, was fifth at Innsbruck after having scored 57 World Cup points.

Mahre last year had the help of his "best friend," his twin brother Steve, also a thinking man. Steve was good enough to make the U.S. team again this year, but decided against spending an entire winter away from home on the often lonely trails of Europe. Like his twin, Phil wants more from life than skiing. "I want to live a fulfilled life and skiing is just a part of it," he said. But he also said that, for now, skiing comes first and that it might well be that way through 1980 and the Olympics. "But that's looking too far ahead," he said. He is still too busy savoring today's victory.

Also left with a sweet taste was U.S. Alpine director Hank Tauber, who said, "We've been waiting many years for this." It was the first U.S. World Cup victory on European grounds since Tyler Palmer won in 1972. And after the triumph yesterday by Abbi Fisher in the women's giant slalom, it was an auspicious start for the Americans. Tauber pointed out one more good sign: "The first World Cup races ever won by Thoeni and Gros also were at Val d'Isère."

Men's Giant Slalom

Phil Mahre on his way to first place in the grand slalom at Val d'Isère.

The Weekend Outlook for Professional Football

EAST RUTHERFORD, N.J., Dec. 10 (UPI).—The St. Louis Cardinals are fighting for a playoff berth Sunday, but John McVay is fighting for his job.

The Cardinals and the Washington Redskins are the only two teams still alive in the battle for the NFC Wild-Card playoff berth as both teams carry 9-4 records into the final weekend of the season to rank second in the NFC East behind the Dallas Cowboys.

But St. Louis has lost twice to Washington this season and would need either a victory or a tie here against the Giants, plus a Redskin loss, to advance into the playoffs for the third straight year. A Washington victory at Dallas Sunday would eliminate St. Louis.

"There's nothing we can do about that Dallas game," said St. Louis coach Don Coryell. "The only thing we're concerned about is beating the Giants and hoping the Cowboys can beat Washington.

"We have to depend on another team. But maybe that's fitting since all of our games have gone down to the wire. Maybe our season should go down to the wire, too. Our job is to defeat the Giants and then wait and see what happens. Nothing will happen, though, if we don't beat the Giants."

Beating the 3-10 Giants will be a much tougher task than it appears on the surface. New York has won three of its last four games, including three straight at home.

The catalyst behind the Giants has been head coach McVay, who replaced Bill Arnsparger at midseason after the Giants lost their first seven games. McVay was given the job on an interim basis with the stipulation that his performance will be reviewed at season's end to determine if he should continue on as the head man.

McVay has had the Giants playing .500 football in his six weeks at the helm and could secure his employment for next season with a victory over the Cardinals.

pleting 11th NFL season on dismal note. It's their eighth losing campaign. Choice: Atlanta by 2.

San Francisco (7-6-0) at New Orleans (4-9-0)—Although he is fit, Jim Plunkett has been benched as 49ers quarterback in favor of Scott Bull. Team won six of its first seven and has lost five of its last six. Saints got through the year in orderly fashion and look for Archie Manning to return as quarterback. Choice: New Orleans by 3.

St. Louis (9-4-0) at Giants (3-10-0)—Cardinals will eliminate themselves from the playoffs if they lose, which seems unlikely for a team with so much talent and class. Of their last eight games, six were against playoff contenders. They won three by a collective 13 points, lost three by 21. Choice: St. Louis by 7 points.

Seattle (2-11-0) at Philadelphia (3-10-0)—The Eagles' fans are something. About 55,000 will turn out to see this alleged contest. Choice: Philadelphia by 7.

AMERICAN CONFERENCE

Pittsburgh (9-4-0) at Houston (5-8-0)—The Oilers promise to put up a battle but they have key people injured like Dan Pastorini, the quarterback, and Curley Culp, the middle guard. A victory will clinch a division title for Steelers. If they lose after eight straight victories, a lot of negative possibilities will arise. Choice: Pittsburgh by 14. (Saturday.)

Cincinnati (9-4-0) at Jets (3-10-0)—If Pittsburgh wins on Saturday, the Bengals are out of the playoffs. Don't blame the Jets should they seem bewitched, bothered, bewildered and scoreboard-watching to see how much longer the season has to last. Choice: Cincinnati by 13.

Buffalo (2-11-0) at Baltimore (10-3-0)—Colts have a problem. They have used only three running backs all season and two are now hurt, Roosevelt Leaks and Don McCauley. Both expected to play against Bills. Considering all the adversity—loss of his fullback and quarterback—O.J. Simpson's season may be his greatest. Choice: Baltimore by 6.

Cleveland (9-4-0) at Kansas City (4-9-0)—The coaches offer a contrast. Forrest Gregg's season running the Browns has been a big success while Paul Wiggin's second with the Chiefs has not. Most thought it would be the other way around. Choice: Cleveland by 3.

New England (10-3-0) at Tampa Bay (0-13-0)—Chuck Fairbanks says he will rest some battered Patriots although Sam Cunningham, the fullback who has missed four games, will play to get ready for playoffs. Buccaneers ready to make NFL history by losing their 14th game. No one has done that before. Choice: New England by 18.

San Diego (6-7-0) at Oakland (12-1-0)—Chargers have done well enough so that the coach, Tommy Prothro, was rehired. Raiders have won nine straight and are getting better and better, especially defensively against the rush. Choice: Oakland by 10.

INTERCONFERENCE

Minnesota (10-2-1) at Miami (6-7-0)—If the Vikings want the home-field advantage of their tiny ice box in Bloomington for the playoffs, they need to win this one. Dolphins expect to give them a battle, although their defense against Viking pass attack will be weak. Bob Griese will start at quarterback. Choice: Minnesota by 3. (Saturday.)

Denver (8-5-0) at Chicago (7-6-0)—Both sides have been pleased with their seasons and are looking ahead. Bears want Walter Payton to win the league rushing title and they intend to shred Broncos' four-linebacker defense. Choice: Chicago by 7.

How Steelers Conned the Raiders

By Dave Anderson

OAKLAND, Dec. 10 (NYT).—ver since Al Davis took com-and of the Oakland Raiders ganization, their motto has en 'Pride and poise". Add pro-ety.

Throughout the National Foot-l League in recent weeks, cyn-including some employed by Pittsburgh Steelers, had ndered about the Raiders' pro-ity. The theory was that the iders, perhaps subconsciously, uld surrender to the tempta-n of eliminating the Steelers, ir recent post-season execu-ners, from the American Con-ence playoffs by losing to the cinnati Bengals Monday night. ot even the district attorney uld have been alarmed because Raiders have a history of ng enough big games on merit be above suspicion. Only once e the Raiders qualified for the er Bowl game, and they lost. oe then they also have lost the C championship game six es, twice to the Steelers in the two years. No grand jury ld possibly indict the Raiders losing a big game.

but with the Steelers conning Raiders into accepting a pos-challenge in the playoffs, Raiders finally won a big e big.

The Raiders saved the Steelers, nced the cynics and subdued Bengals, 35-20, on Ken Sta-'s four touchdown passes. To lify for the playoffs as the tral Division champion, all the elers have to do now is con-r the Oilers in Houston to-row for their ninth con-utive triumph.

Do you think," John Madden asked, "that the Steelers con-your team into playing such od game?"

No," the Raiders' coach said. Football was that simple, I'd them to do it for us every k."

ut by wondering out loud, the elers had created an issue that Raiders could not escape. Per-s on a quiet Sunday some-re the Raiders might have consciously gone through the lons for a limited television ence. But under the national e of the Monday night game, Raiders had no place to hide. y did not dare go through motions—not after all the pers, not with the pro foot-public and their peers, in-ing the Steelers, watching y block and tackle.

bconsciously at least, the lers had been conned by the lers into adding propriety to r motto.

ot that the Steelers will neces-y meet the Raiders in an-r AFC championship game. On the premise that the Steelers and the Baltimore Colts will win their final regular-season games this weekend, they would collide at Baltimore in the first round of the playoffs while the Raiders go against the New England Patriots in Oakland.

"The Steelers and the Colts," Al Davis has said. "That's like the Russians and the Chinese fighting."

If the Steelers and the Raiders survive, they will meet in Oakland on Dec. 26 for the AFC title and a trip to the Super Bowl game in Pasadena, Calif., next month. The Steelers want to become the first team to win the Super Bowl three consecutive years. The Raiders hope to win the Super Bowl for the first time. Among the Raiders eager for a match with the Steelers is George Atkinson, the strong-side safety.

"To be the champs," Atkinson was saying Monday night, "you got to beat the champs."

Atkinson has already sued the champs. He has filed a $3-million slander and libel suit against the Steelers and their coach, Chuck Noll, and the Oakland Tribune. Noll was quoted as having said that Atkinson leveled Lynn Swann, the Steelers' wide receiver, "with intent to maim" when the Raiders won the season opener, 31-28. Noll also linked Atkinson with a "criminal element" in pro football.

"The suit," Atkinson said, "will have no bearing on my performance if we play the Steelers for the title. If anything, it will make me better."

Atkinson also was saying what all his teammates were saying—that they never considered eliminating the Steelers by losing to the Bengals, that their performance proved their Super Bowl potential.

"If we let down," Atkinson said, "how can we be championship material? We don't shy away from anybody. All that Pittsburgh talk, they figured we're afraid to play them, but we'll play anybody who comes in here."

That phrase "anybody who comes in here" is important. With a 12-1 won-lost record, the Raiders are assured the home-field advantage in the playoff opener and, if they qualify, in the championship game. In contrast, they have never won an American Conference postseason game on the road, losing five.

"The home field is especially important to us," Ken Stabler said. "Not just because of the home crowd, but because the weather figures to be warmer here than in the Eastern cities. We're a passing team. Warm weather helps our offense."

Stabler has thrown 27 touchdown passes, the most in the NFL this season. Against the Bengals, the left-handed quarterback completed 16 of 20 passes for 217 yards.

"And the Bengals," said John Madden, "came in here as the No. 1 defensive team in the whole NFL against the pass. We're really starting to play well now."

After the Bengals took a quick 6-0 lead, the Raiders played so well that Stabler was able to sit out the last 10 minutes without a complaint from the Steelers or Val Pinchbeck, the inspector of integrity from commissioner Pete Rozelle's office.

"I thought," Pinchbeck said, "the Raiders handled the integrity situation pretty well in the early going."

McAdoo Traded To NBA Knicks In $3-Million Deal

BUFFALO, N.Y., Dec. 10 (UPI).—Three-time National Basketball Association scoring champion Bob McAdoo and forward Tom McMillen were traded to the New York Knicks last night for $3 million and forward John Gianelli.

The negotiations between the Buffalo Braves and the Knicks were completed when Braves owner Paul Snyder, who had agreed to and turned down the same offer earlier this week, accepted the deal.

Snyder had wanted to send McAdoo, who refused to sign a new contract in an effort to gain free-agent status, to the Seattle SuperSonics in exchange for $2 million, Tom Burleson and Leonard Gray, but that deal apparently fell through at McAdoo's insistence to go to New York.

McAdoo, at 6 feet 9 inches tall perhaps the best outside shooting big man in the history of basketball, gives the Knicks one of the most formidable front lines in the NBA. With the quick development of rookie center Lonnie Shelton, who had 31 points and 19 rebounds against the New York Nets Wednesday night, McAdoo may play forward opposite powerful Spencer Haywood. However, any of the three, McAdoo, Shelton or Haywood, can play center or forward.

McAdoo entered this season averaging 28.5 points per game over four years.

The Matches

By William N. Wallace

NEW YORK, Dec. 10 (NYT).—The following games will be played this weekend in the National Football League:

NATIONAL CONFERENCE

Los Angeles (9-3-1) at Detroit (6-7-0)—If Minnesota loses earlier in the day, the Rams can become a home team in the playoffs should they defeat the Lions. That need not be hard. Detroit passers, for example, have been sacked 62 times, more than any other team's quarterbacks. Choice: Los Angeles by 7. (Saturday.)

Washington (9-4-0) at Dallas (11-2-0)—Redskins will know where they stand because the Cardinals-Giants game should be over before the kickoff at Texas Stadium. If Cardinals have won, Skins must take Dallas to reach the playoffs, which will not be easy. If Cards have lost, Washington can lose also and qualify for playoffs as NFC wild-card entry. These teams despise one another. Beginning in 1971, they have played 12 times and each has won 6. Choice: Dallas by 4.

Green Bay (4-9-0) at Atlanta (4-9-0)—Packers will give the seasoned, well traveled Randy Johnson a starting role at quarterback. Why not? Falcons completing 11th NFL season on dismal note. Choice: Green Bay by 3.

New Orleans (4-9-0) at Minnesota (10-2-1)—Vikings will be fighting to keep their home-field advantage for the playoffs. Choice: Minnesota by 14.

Detroit (6-7-0) at Los Angeles (9-3-1)—Rams will be fighting to keep their home-field advantage for the playoffs. Choice: Los Angeles by 14.

Houston (5-8-0) at Cincinnati (9-4-0)—Bengals will be fighting to keep their home-field advantage for the playoffs. Choice: Cincinnati by 14.

Miami (6-7-0) at Buffalo (2-11-0)—Bills will be fighting to keep their home-field advantage for the playoffs. Choice: Miami by 14.

Kansas City (4-9-0) at Denver (8-5-0)—Broncos will be fighting to keep their home-field advantage for the playoffs. Choice: Denver by 14.

Chicago (7-6-0) at Green Bay (4-9-0)—Bears will be fighting to keep their home-field advantage for the playoffs. Choice: Chicago by 14.

Baltimore (10-3-0) at Cleveland (9-4-0)—Browns will be fighting to keep their home-field advantage for the playoffs. Choice: Cleveland by 14.

Tampa Bay (0-13-0) at New England (10-3-0)—Patriots will be fighting to keep their home-field advantage for the playoffs. Choice: New England by 14.

Philadelphia (3-10-0) at Seattle (2-11-0)—Seahawks will be fighting to keep their home-field advantage for the playoffs. Choice: Seattle by 14.

Oakland (12-1-0) at San Diego (6-7-0)—Chargers will be fighting to keep their home-field advantage for the playoffs. Choice: San Diego by 14.

In NHL Activity

Flyers Use Checking To Overwhelm Bruins

BOSTON, Dec. 10 (UPI).—The Philadelphia Flyers returned to their relentless checking game last night to pin a 3-1 loss on the Boston Bruins. It was the Flyers' first regular-season victory at Boston Garden since their first National Hockey League visit to the Bruins' home in November, 1967.

The Flyers, who did win a pair of games in Boston last spring to knock the Bruins out of the Stanley Cup semifinals, won the game with first-period goals by Rick MacLeish and Gary Dornhoefer. Bobby Clarke added a late third-period goal.

Boston's lone goal was the game's first, a Wayne Cashman deflection of a Terry O'Reilly drive.

Neither Boston's Gilles Gilbert nor Philadelphia's Bernie Parent was busy in the game. There were a mere 34 shots taken, 18 by Boston and 16 by the Flyers.

"It was very physical in the first period," said Philadelphia coach Fred Shero, who has adapted with great success the rugged but conservative Soviet style of play. "Then it settled down.

"I think in the playoffs we play much better hockey than we did tonight. I didn't see any beautiful plays out there by either team. We just kind of slugged it out all night long. We fought it out in the corners and on the boards."

Three goals were scored in the first 11:31 of play as the Flyers took a 2-1 lead. The second phase of the game lasted 48.09 when few shots were taken and neither team could mount any offensive thrust.

The final score came with 20 seconds to play as Clarke picked up a loose puck at center ice, crossed the blue line and wound up to shoot on the vacant Boston goal. As he shot, Boston's Bobby Schmautz threw his stick in the direction of the puck.

The stick went wide of its mark and so did Clarke's shot. But referee Bruce Hood, who three minutes earlier had penalized the Bruins for a "personal remark from the end of the bench," awarded Clarke his 10th goal.

Penguins 2, Sabres 1

At Buffalo, linemates Wayne Bianchin and Blair Chapman each scored and goalie Denis Herron stopped 30 shots to propel Pittsburgh to a 2-1 victory over the Sabres.

Bianchin deflected Greg Malone's slap shot past Buffalo goalie Gerry Desjardins at 17:34 of the first period to give Pittsburgh a 1-0 lead and Chapman made it 2-0 at 5:46 of the second period when he stole the puck from Rene Robert in the Sabres' end and flipped a wrist shot past Desjardins.

Richard Martin put Buffalo back in the game with a power-play goal, his 14th score of the year, at 18:36 of the second period.

NBA Kings Are Worn Down In Display by Hawks' Hudson

KANSAS CITY, Dec. 10 (UPI).—Atlanta guard Lou Hudson needed a rest after the third quarter last night. He had worn himself out during the previous 12 minutes and wore out the Kansas City Kings too.

Hudson hit his first 11 shots of the third quarter and finished the period with 12 of 13 field-goal attempts while helping the Hawks stretch a 45-44 halftime lead into 82-75.

The Hawks then hung on for a 102-100 victory, the final points coming with 38 seconds to play when the 6-5 Hudson sank two free throws to give him 34 points and offset a career-high 38 points by Kings forward Scott Wedman.

"I usually get a rest with about four minutes left in the quarter, but not tonight," said Hudson. "When the quarter ended I asked for a blow because I was getting tired and that is as good a time as any to take a rest."

While Hudson rested, the Hawks were able to stretch their lead to 11 at 96-85 with 6:16 to play before Kansas City fought back to a 100-100 tie with 1:04 to play.

The Kings had two final chances, but Sam Lacey missed a hook shot and Boron Boone who finished with 18 points, missed a 15-foot jumper just before the buzzer.

"There's not a lot you can do about it when Hudson starts going like that," said Kings coach Phil Johnson.

Hawks coach Hubie Brown said Hudson's third-quarter performance, the best shooting effort in Hawks' history, was the best he had ever seen. "There were no cheap shots, most of them came from the outside and what made them even bigger was that we needed every one of them," Brown said.

Nuggets 104, Cavs 94

At Denver, guard David Thompson scored a game high 29 points and joined teammates Bobby Jones and Dan Issel in directing a third-quarter offensive for a 104-94 Nuggets' victory over Cleveland.

It was the fourth straight road loss for the Cavaliers as they finished a five-game road trip. Both teams were 16-7 going into the game.

Bobick-Norton Is Made Official

NEW YORK, Dec. 10 (AP).—Duane Bobick will fight Ken Norton instead of Muhammad Ali in Madison Square Garden sometime between Feb. 15 and March 2, the Garden announced.

That means that Ali's wavering retirement is still in effect, although he had signed a contract to fight Bobick.

By telephone from Louisville, Ali confirmed he was through with fighting and said, "One hundred million dollars can't get me back into the ring!"

Ali also suggested that the winner of the Bobick-Norton fight meet George Foreman to find his successor.

Baseball Rangers Send Burroughs to Braves

By Murray Chass

LOS ANGELES, Dec. 10 (NYT).—One telephone call made George Scott happy last night and another made Jeff Burroughs unhappy early today. The call to Burroughs made him an Atlanta Brave; the one to Scott secured his future as a member of the Boston Red Sox.

The Texas Rangers traded Burroughs, the American League's Most Valuable Player of 1974, to the Braves for five players and $200,000. Burroughs had believed he never would be traded and was shocked to learn that he had been.

Scott, whom the Red Sox reacquired from the Milwaukee Brewers last Monday, stood on the verge of canceling that deal until he received a call in which he learned the Red Sox were willing to give him a three-year contract worth $700,000.

The deal between Atlanta and Texas was one of the most dramatic moves of the baseball meetings. It stunned Burroughs, for whom the Braves gave the Rangers Carl Morton, Rogelio Moret and Adrian Devine, all pitchers, and Ken Henderson and Dave May, outfielders.

"Jeff was close friends with Brad Corbett [Ranger owner] and he understood that he would never be traded," Ted Turner, the Atlanta owner, explained after having lunch with Burroughs, who lives in nearby Long Beach.

Gave Assurances

Unlike Scott, who renegotiated the contract on which he had one more season remaining plus an option year, the 25-year-old Burroughs didn't ask Turner to renegotiate his contract, which has two years left plus an option year. Turner, however, said he had gone out of his way to assure Burroughs he would make him happy one way or another.

"I told him," Turner related, "that after thinking about it and talking to some of our players, if he didn't want to play for the Braves we'd see if the deal could be undone. I told him he could play one year for us and if he wasn't happy we'd trade him. If he was happy, we'd give him a new contract and include a no-trade provision. Finally, I told him, if nothing else makes him happy, I'd shoot myself as a sign of my good intentions. He said I didn't have to do that.

"He's still shocked, but he was almost smiling. He ended up cheering me up. He's going to come to Atlanta next week. I'm sure it will work out."

Burroughs was a highly sought outfielder despite his batting averages of .222 and .237 the last two seasons.

The 6-foot-2-inch Californian hit 25 homers, drove in 118 runs and batted .301 in 1974; he hit 29 homers in 1975, but slipped to 18 last season. His best home-run year was 1973, when he hit 30.

In addition to the three pitchers Burroughs brought, the Rangers also received May, who was traded from Milwaukee for Henry Aaron two years ago, and Henderson, a 30-year-old who will play rightfield.

Asked how the Braves could afford to give up all those players for only one in return, Turner said: "We didn't have anybody play out their options, so we have more players than we know what to do with. We could put a team in Washington with the guys we have left over."

For a while last night, it appeared that the Red Sox and Brewers might not have a trade. Scott has played in the majors for more than 10 years, the last five with the same club, so he had to give permission for the Brewers to trade him.

Desire for Trade

The Brewers, however, never received that permission in writing and, in trading him and Bernie Carbo to Boston for Cecil Cooper, acted on Scott's previously stated desire to be traded, specifically to Boston.

When John Claiborne, the Red Sox assistant general manager, contacted Gary Walker, Scott's agent, he learned that Scott would approve the deal only if he received the kind of contract he wanted.

Several telephone conversations ensued, and the terms of the contract sounded good enough to Scott for him to agree to the trade.

No one was discussing the terms, but it was believed the Red Sox gave Scott a bonus of about $100,000, a hefty increase over his $144,000 salary for 1977, probably in the neighborhood of $175,000, and still higher salaries for the next two years, perhaps up to $225,000.

Art Buchwald

Henry's Future

WASHINGTON—The question of who will be the new secretary of state under President-elect Jimmy Carter has been answered. He is Cyrus Vance, and almost everyone agrees he is a very nice person.

But the question of what happens to Henry Kissinger is still up in the air. How do you take a man who for the last eight years has had more power than anyone in the world and suddenly put him out to pasture? The answer is that in a free country you can't.

Buchwald

If Henry was foreign minister of China it would be a simple matter. All you would have to do is put up wall posters on Jan. 21 denouncing Kissinger as a "capitalist roader" who imported X-rated films from Hong Kong, plotted against the Carter regime with Betty Ford and tried to l·unch a cultural revolution amongst the peasants of Plains, Ga.

Had Kissinger been foreign minister of the Soviet Union he could be made the head of a power plant in outer Siberia, and his name would be scratched out of every encyclopedia in the nation.

But you can't do that to a former U.S. secretary of state, particularly one who has served his country so long and so well. Yet the United States makes no provision to let down easily someone like Kissinger and give him an opportunity to get used to being a private citizen again.

* * *

In Kissinger's case it is not going to be easy. He will lose his Secret Service men, his staff, his airplane, his helicopters and his press corps. He may still be invited to embassy parties and state dinners, but protocol will demand he sit below the salt. Henry hasn't sat below the salt for so long he has no idea what that end of the table looks like. Actually, it's not much different than sitting above the salt except that everyone notices it.

So the question is what can we do to help Henry Kissinger get through his decompression tank with the least amount of damage to his psyche.

The most unfair thing you could ask of a man who has won the Nobel Peace Prize is to suddenly start using the Eastern Air Lines shuttle from Washington to New York. This is a cruel and unusual punishment, and after the comforts of Air Force One it could send a man into a tailspin from which he would never recover.

As a taxpayer I would have no objection if we let Henry keep Air Force One for at least a year. (It wasn't generally known, but even though President Ford had custody of Air Force One he always had to ask Henry whether he was going on a trip before the President could use it.)

I would also let Kissinger keep his Secret Service men for a year—not just to keep reporters from prying through his garbage but to protect him from publishers for whom Henry has promised to write a book. When Kissinger finally signs his book contract there will be 50 publishers who feel they have been double-crossed. Henry's life will still be in danger when several editors and agents discover Henry made a deal with somebody else.

* * *

Lastly, I would give Mr. Kissinger a very large office at the State Department—as large as the one he has now.

This is not just for the sake of appearances. In the last eight years Henry has met with every head of state, almost always in private. What he has said to them and what they have said to him is still for the most part secret. It's possible that Mr. Kissinger may have made promises to these heads of state that even he has forgotten about. So it is essential for the new secretary of state, Cy Vance, to be able to get Henry on a moment's notice and say, "Henry, what the hell did you say we'd give the president of Sri Lanka if they'd paint our mine sweepers when we pulled into port?"

Vance is not going to be able to get an answer in time if he has to locate Henry on the Eastern Air Lines shuttle.

French Customs Out

PARIS, Dec. 10 (UPI).—The customs officers union today announced that members will strike Monday to support their demand for extra money for transportation to and from work.

The Gunshots Cracking Around France

A professional hunting guide who works in the Sologne area said, 'It is awful what they do, some of them. They stock the woods with specially raised pheasants, then kill them by the thousands. The poor things are too weak and unaccustomed to nature to escape.'

By James F. Clarity

LA FERTE-SAINT-AUBIN, France (NYT).—Gunshots cracked all over the French countryside last weekend as more than 2 million hunters took to the woods, bent on shooting, for dinner or amusement, virtually anything that rustled, loped or fluttered.

With the four-month game season only half over, the French urge to shoot has gained this country the distinction of having the highest ratio of hunters to population and to land in Europe and possibly the world. There are 2.4 million registered hunters, or one for every 25 acres in the country.

The game ranges from rabbits and thrush in the suburbs of Paris, to deer and wild boar in the forest near this town 13 miles south of Orléans in the Sologne, France's most elite hunting district. While all kinds of French citizens go hunting, mostly on weekends, the shooting, like many activities in this country, is organized along social class lines. Most of the hunting in the suburbs of big cities is done by community clubs open to anyone properly armed and sober

Private Preserve

But here, on a private preserve of 3,000 acres of woodland, a group of about a dozen well-to-do people, many of them members of the National Assembly, and their wives, killed wild boar and at least one deer last weekend.

The owner of the land, a wealthy industrialist and former politician, insisted that a visiting reporter not disclose his name or those of the other hunters, some of whom were supposed to be in their own districts consulting their constituencies.

The nationwide hunting is condemned by some environmentalists, defended by others. But the opinion of many of the 50 million citizens who do not hunt seemed summarized in the remark of a suburban woman: "I can't stand hunting, but I am a hypocrite, because I love to eat what they shoot."

A professional hunting guide who works in the Sologne area said, "It is awful what they do, some of them. They stock the woods with specially raised pheasants, then kill them by the thousands. The poor things are too weak and unaccustomed to nature to escape."

Another local hunter said that the wild boars on the property hunted by the Assembly members had been specially fed for weeks before the hunt and that they never attacked a human or another animal unless surrounded and threatened. The two visitors were able to watch the hunt from two sides: that of the well-dressed, well-equipped hunters—*les chasseurs*—and that of the roughshod beaters—*les rabatteurs*.

Visitors Warned

The owner of the château and his wife said that the visitors must not go into the woods with the hunters because boar hunting was too demanding an activity, too dangerous for the hunters to be bothered. It would be all right, the owners said, for newsmen to go into the woods with the beaters.

At 9:15 on a sunless morning, the hunters were driven into the woods in a Land-Rover and the owner blew a trumpet on the other side of the forest. The beaters, a few miles away, released about 20 small yelping dogs, some fox terriers, most mongrels. The beaters began hollering and hooting and the dogs raced around sniffing for boars. The 20 beaters, wearing bright-orange plastic vests, carried steel-pointed pikes or shotguns.

The beaters spent the next two-and-a-half hours pushing through thick brush while the dogs chased the boars in the general direction of the hunters. Two deer rushed past. A fat pheasant ruffled itself out of hiding into the air above the birch-tree tops. No one shot at them because this was a boar hunt.

Boars Appear

Several boars finally appeared, ranging from 60 to 150 pounds, looking like large gray pigs with long snouts. None of them had tusks.

Gunshots began to crack a mile or so away. "Where are the hunters now?" a visitor asked. "In the *miradors*," a beater said.

The visitors then saw their first *mirador* and hunter. The *mirador* was a 20-foot-high enclosed platform. The hunter was a man with a long forest-green coat and Tyrolean hat. He had just missed several boars that rushed across a clearing about 100 yards away from him.

The next hunter, also standing high above the ground in a *mirador*, is a woman. "What did I get?" she asked a beater. "I shot at something over there." The beater looked around and found a dead deer, perhaps a year old.

The next hunter in a platform was also a woman, the château owner's wife. She had killed two boars, each weighing about 50 pounds, which ran past her perch at a distance of about 75 feet. "And I missed one *just 10 meters away*," she said with a grimace.

Three dogs howled in the distance. They had encircled a 200-pound boar. The beater who rents his services and his dogs for the hunt rushed to the scene, raised his shotgun and shot the boar dead from about 6 feet away. "If I didn't kill it, it might have wounded my dogs," the beater said.

Two other men hauled the dead beast away. The proprietor would decide, a beater said, whether it would be divided *among the guest hunters or sold* to a local meat merchant.

Dozen Killed

At least a dozen boars were killed by 11:30 a.m., as the trumpet sounded again. "What are we having for lunch?" one beater asked. "Chicken," answered the chief of the beaters. The guest hunters would lunch in the château on either pheasant or on boar killed a few weeks ago and properly aged, the men said.

"You think it was hard for you running in the woods out there?" asked a hunter approaching the château, preparing to pour himself a Scotch. "What do you think it was like for us standing *still* out there in the cold in the *miradors?* I ate a big chocolate bar. I had five shots, all misses."

As they approached the turreted 19th-century château, two women hunters compared their morning activities. "It was my last shot," one said. "It got him and he just sat down, like this."

The woman gestured, her arms simulating the paws of a boar sitting down after being shot. The other woman murmured approval. They went in to eat lunch.

PEOPLE: *Dissident Soviet Amalrik Offers Carter a Chance*

Writer Andrei Amalrik, 38, making his first public appearance in the United States, offered President-elect Jimmy Carter a chance to "rehabilitate the presidency" by meeting him. Amalrik, who spent most of the past 10 years in Soviet prisons or in exile in Siberia, and his wife arrived in Amsterdam in July this year, forfeiting their Soviet citizenship. He is the author of the best-selling "Will the Soviet Union Survive Until 1984?" Amalrik was in New York to accept the human rights award from the International League for Human Rights. Noting that President Ford once refused to invite another famous Russian dissident, Alexander Solzhenitsyn, to the White House, Amalrik said that by meeting him, Carter had "an excellent opportunity to rehabilitate" the presidency. While in the United States, the writer will lecture at Columbia, Yale, Harvard and other universities.

* * *

AFL-CIO president George Meany, 82, was reported in good condition Friday in a Bethesda, Md., hospital where he had a cataract removed from his left eye. Doctors say that the surgery plus corrective lenses will give him normal vision.

* * *

The wrap-up artist Christo—full name Christo Javacheff—is being sued in San Francisco for breach of contract by his lawyer. Paul Kayfetz of Bolinas, Calif., claims that Christo, his wife and their Running Fence Corp. failed to pay him fully for services and expenses in proceedings regarding the artist's project to build a fence to the Pacific Ocean. Kayfetz claims that the defendants also broke a promise to give him a large collage of the running fence. He says that he is owed $52,047 plus interest. He wants $100,000 in exemplary damages.

* * *

Joan Mondale, wife of Vice-President-elect Walter Mondale, says that their two teen-age children will remain in private schools. All three Mondale children attended public elementary schools in Washington "and had a very good *experience*," Mrs. Mondale said. They switched to private schools when they reached junior high. Asked why, Mrs. Mondale said that their elder son, Teddy, "was not an intellectual by any means—and we felt he needed closer supervision." He has since graduated from high school. The Mondales' daug[hter] Eleanor Jane, 17, is a senio[r at] Georgetown Day School, and William Hall, 14, is a 10th-gr[ader] at St. Alban's School.

Carl Bernstein

. . more b[ooks]

* * *

Carl Bernstein, 34, Bob W[ood]ward's partner in covering W[ater]gate for The Washington Po[st, is] quitting his Post job Jan[...] Bernstein said he wanted "t[o do] other kinds of journalism." B[ern]stein joined The Post in 196[6] and Woodward wrote two [best]sellers, "All the President's [Men]" and "The Final Days." Bern[stein] wants to write more books.

* * *

During her sold-out, week[long] run in Enid Bagnold's pla[y "A] Matter of Gravity" in San [...] this week, Katharine Hep[burn] has been performing in a w[heel]chair. The 67-year-old ac[tress] broke an ankle last month [in a] fall at her home in Hollyw[ood] Hills, Calif.

* * *

Country music superstar J[oh]ny Cash is having his downs [and] ups with television. Mo[nday] night his Christmas special [was] seen on CBS in the U[nited] States. After the show, he [said] he was through with TV, [that] the special was "the wors[t in] the history of television" [and] projected a false image of [him.] Now he says he is going [to] tape another show next Ch[rist]mas. "I'm not through with [tele]vision. I'm definitely [not] through with television," [he] said Wednesday. "We were No. 1 show in our time [slot] Monday night."

—SAMUEL JUSTIC[E]

Rift Developed After Elections

Two Bonn Opposition Parties End Split

From Wire Dispatches

BONN, Dec. 12.—West Germany's two conservative opposition parties tonight patched up their feud and agreed to renew their 27-year parliamentary alliance.

They split Nov. 12, when Franz Josef Strauss, leader of the Bavarian Christian Social Union, led the 53 CSU deputies out of their partnership with the Christian Democratic Union (CDU), which has 190 seats.

He complained that the CDU fell short of a majority in the Oct. 3 general election because the Christian Democratic candidate for chancellor, Helmut Kohl, had failed to offer a clear alternative to Chancellor Helmut Schmidt's policies.

Mr. Schmidt's Social Democrats —with 214 seats—and Foreign Minister Hans-Dietrich Genscher's Free Democrats—with 39 seats—won a 10-seat majority in the Bundestag, the lower house of Parliament.

The new Bundestag meets on Tuesday and is due to elect a chancellor in a secret ballot Wednesday.

There is speculation that Mr. Schmidt, who has been in trouble over government plans to delay increases in state pensions, may not get the votes of all his coalition deputies.

The CDU-CSU decision, after a six-hour meeting today, returned the conservatives as the strongest Bundestag faction, giving them the right to name the assembly's president, a post previously held by Annemarie Renger, a member of Mr. Schmidt's party.

Mr. Kohl and Mr. Strauss said that, for all practical purposes, the parliamentary cooperation between both parties will remain unchanged from the previous legislative periods. Committees of both parties would have to thrash out guidelines for their future cooperation, however, both leaders said.

Nazis Recalled

To the West Germans, who remember how party fragmentation opened the door to a Nazi seizure of power in 1933, Mr. Strauss's secession from the CDU was unsettling.

Konrad Adenauer, West Germany's first chancellor, formed the CDU after the Nazi collapse in 1945 as a political partnership of all the various bourgeois and Christian groups that had fought each other in the 1920s.

Under Adenauer's leadership, the Christian Democratic Union became the strongest political force in the republic and for 20 years, until the Social Democrats and Free Democrats joined forces in 1969, it ran the government.

Many West Germans expressed the fear that Mr. Strauss's breaking away from the CDU would provoke similar moves in other parties.

Mr. Schmidt's Social Democrats have restless right and left wings, and Mr. Genscher's Free Democrats have similar problems.

Franz Josef Strauss (left) and Helmut Kohl shaking hands after Bonn conference.

Lower Saxony Coalition

WOLFSBURG, West Germany, Dec. 12 (Reuters).—The Free Democratic party in Lower Saxony agreed last night to enter into a state coalition with the Christian Democratic Union.

The liberal Free Democrats are the junior partners in the federal government coalition led by Chancellor Helmut Schmidt's Social Democratic party.

It is the first time in seven years that the Free Democrats have joined ranks in any state with the CDU.

A Free Democratic party conference in the state of Saarland voted last weekend in favor of opening negotiations with the CDU on a similar coalition there.

The FDP leaders, Mr. Genscher, has said that the party will stick with Mr. Schmida's SPD in the federal government for all of the forthcoming fouryear legislative term, but he has left open the possibility of switching sides in 1980.

Henry Kissinger waves farewell to Europe at London airport.

Returns to Rhodesia

Smith Scorns New Ideas From Britain at Geneva

GENEVA, Dec. 12 (UPI).—Rhodesian Prime Minister Ian Smith returned to Salisbury today after hearing some new ideas from Britain at the Rhodesian conference on black majority rule and saying he likes them no more than earlier British suggestions.

Mr. Smith, who had said on Friday that he would leave here this weekend, pulled out of Geneva after a meeting with the conference chairman, Ivor Richard of Britain. Mr. Richard had just returned from discussions in London.

"I heard a few ideas and I like them no more than the others I had heard from the British," Mr. Smith said after a 45-minute meeting with Mr. Richard.

"At the rate the conference is going, the way it is going, it is not going to get anywhere with or without me," Mr. Smith said in announcing his return to Rhodesia. He left Foreign Minister Pieter van der Byl in charge of the white minority government delegation here.

'Ghastly Thought'

Mr. Smith was asked what he thought of the idea of Britain running the army and police prior to black majority rule in Rhodesia.

"It's a ghastly thought," the Prime Minister said.

Mr. Smith said that, although the conference would adjourn soon, he and Mr. Richard had not agreed on any date or place for resumption. However, recess is necessary to give the black nationalists "time to get their feet back on mother earth and get some sanity," he said.

Mr. Richard said on his return to the conference—after talks in London with Foreign Secretary Anthony Crosland and Secretary of State Henry Kissinger—that Britain is considering what kind of direct role it should play in Rhodesia during the transitional period to independence under black majority rule.

Asked if this role would include sending troops, he replied:

"That's an iffy question. It is a possibility so far in the extremes of implausibility that one should rule it out."

Mr. Richard said he will see all the delegation leaders to fill them in on his discussions with Mr. Crosland and Mr. Kissinger. Then it will be up to him, as chairman of the conference, to call a Chirstmas adjournment, he said.

Conference officials believe the talks will recess before the end of the week and resume in three to five weeks, perhaps in Nairobi, although Geneva may well remain the conference site.

Mr. Richard said Britain will take the time to consider the views of the black delegations on the British role during the transitional period "and perhaps come up with some new ideas."

"We are prepared to play a direct role," he said, but the "precise nature" of this role remains to be determined.

Compromise Plan

LONDON, Dec. 12 (NYT).—Mr. Kissinger and Mr. Crosland yesterday concluded two rounds of strategy sessions aimed at breaking the deadlock in the Geneva talks.

Neither Mr. Kissinger nor Mr. Crosland would publicly discuss the compromise plan under discussion yesterday morning and Friday. But informed sources said ideas focused on having a British executive officer, or resident commissioner, instead of the "council of state" originally suggested to Mr. Smith by Mr. Kissinger and which has since become a major point of contention in the negotiations.

Another idea concerns a way to get around black Rhodesian opposition to white Rhodesians retaining the posts of defense minister and minister for law and order in an interim govern-

Spanish Official Kidnapped, Held By Leftist Group

From Wire Dispatches

MADRID, Dec. 12.—Gunmen yesterday kidnapped Antonio Maria de Oriol y Urquijo, the conservative president of the Advisory Council of State, taking him from his downtown Madrid office.

The kidnapping of the 63-year-old industrialist from the Basque country appeared to be a deliberate act of provocation before the nationwide referendum Wednesday that is expected to ratify the government's program of political reform.

A native of the Basque province of Vizcaya, Mr. de Oriol was appointed in 1973 to the presidency of the largely ornamental Council of State, which advises the government and parliament. He was appointed to parliament by Franco and is also a member of the Council of the Realm, which advises King Juan Carlos.

An extreme leftist group today claimed responsibility for the kidnapping and demanded the release of 15 political prisoners.

An anonymous caller, who identified himself as a member of the "Groups of Anti-Fascist Resistance—First of October" (GRAPO), telephoned news agencies to say that the organization had kidnapped Mr. de Oriol.

Note to Newspaper

He said Mr. de Oriol was well and would be freed if the government released 15 leftist prisoners.

The caller said the group's demand was contained in a note received earlier by the newspaper El Pais.

The October First group is thought to be a splinter faction of a tiny former Communist group, and takes its name from the killing of four policemen on Oct. 1, 1975.

The police have blamed it for a series of bombings on July 18—the anniversary of Franco's rising in 1936 against the Second Republic—but its very existence has been a matter of some doubt. In October, a rightist newspaper reported that the police had "dismantled" the organization, arresting 70 of its activists in Madrid, Barcelona and Gallcia.

Speculation persisted that the kidnapping could be the work of some faction of the badly fragmented Basque separatist organization ETA, although spokesmen for the group's so-called "military" and "political-military" wings in southern France denied involvement.

4 to 6 Gunmen

According to varying accounts, four to six gunmen, using two cars, carried out the kidnapping at Mr. de Oriol's third-floor office overlooking Retiro Park shortly after 11:30 a.m. The former justice minister had been driven from his home in the suburb of Aravaca escorted by a policeman, who remained in the car.

The kidnappers, saying they had been sent by a Madrid priest, were escorted by a doorman to Mr. de Oriol's office, where they pulled submachine guns from under their coats.

The doorman and a secretary —as well as Mr. de Oriol's son Antonio, who emerged from a nearby office—were forced to lie on the floor as the gunmen fled, using an exit that the police bodyguard could not see.

A priest who was on his way to the office, which houses the Oriol Urquijo Foundation, saw two "young and strong" men escorting Mr. de Oriol, looking pale and ill, to a car that sped away.

The Madrid radio reported last night that the police bodyguard entered the office just as the gunmen fled. It also said that after examining photographs provided by the police, the son identified one of the attackers as a member of the ETA.

Antonio Maria de Orioi

Truce Agreed In S. Lebanon Border Area

BEIRUT, Dec. 12 (NYT).—A truce has been worked out between rival Moslem and Christian factions in the district of Bint Jubail in southern Lebanon, near the border with Israel.

The governor of the district, Ghassan Haidar, who announced the news Friday night, said that contacts were also under way to have the truce extended to Rumeish, Ain Ibil and Dobel, which are on the border with Israel and have been the main Christian strongholds in that region.

The town of Bint Jubail, the capital of the district, had remained in the hands of Moslem leftists and Palestinian guerrillas. But nearby villages were held by the rightists.

Daily Artillery Duels

Before the truce went into effect, there were daily artillery duels, the last one only a few hours before the cease-fire was arranged, according to reports in the press here yesterday.

Mr. Haidar, whose statements were carried in the pro-guerrilla daily Al Moharrer yesterday, said gunmen had abandoned government buildings in the town of Bint Jubail and outlying villages, and that civil servants and the reactivated police force had taken over the offices.

The truce coincided with the formation of a new Lebanese Cabinet under Premier Selim al-Hoss.

The south was the only part of Lebanon which continued to witness violence after the Arab-sponsored peace plan went into effect here last month.

The Israelis had strongly objected to the presence of Syrian or Arab peace-keeping forces near their border and they declared that they would not tolerate the return to the area of Palestinian guerrillas.

2 Shooting Attacks

BEIRUT, Dec. 12 (Reuters).—Rightist leader Camille Chamoun escaped unhurt in a shooting incident here today after another Christian politician, independent Raymond Edde, survived an assassination attempt with a slight wound.

Informed sources said three of Mr. Chamoun's bodyguards were wounded in an exchange of shots with a motorcyclist who had pulled alongside a jeep in which the bodyguards were riding and tried to pass it. Mr. Chamoun, 76, was traveling behind the jeep in a car.

Mr. Edde, 63, said he suffered a slight bullet wound in a foot when an unidentified gunman fired 15 shots at him and his bodyguards as he was entering his west Beirut home just before midnight. The gunman, who was firing from across the street, got away.

Broadcasts Tell of Turmoil in Provinces

Chaos, Violence Reported in China

By Jay Mathews

HONG KONG, Dec. 12 (WP).—Wuhan, central China's most important industrial center, is in the grip of a violent factional struggle that has produced deaths and mob attacks on government offices, according to official provincial broadcasts.

A 14,000-word series of radio reports, which complain of continuing sabotage after a summer-time peak of factional fighting, provide the most exhaustive account to date of turmoil in outlying Chinese provinces hidden until now from foreign observers here and in Peking.

With equally startling but less detailed broadcasts from other provinces, the Wuhan report suggests a level of violence in China in the last few months far beyond what foreign analysts had guessed or Peking officials had revealed. Much of China appears to be going through, or has just completed, a period of passion and destruction rivaling the worst months of the Cultural Revolution a decade ago.

New nationwide appeals for discipline and restraint indicate that pitched battles have left a residue of bitterness that will be difficult for the new administration of the Communist party chairman, Hua Kuo-feng, to use.

'Chaos' Reported

The broadcasts monitored here Tuesday and Thursday said Wuhan had been "thrown into chaos." As a measure of the seriousness of the city's problems, Hua and the party Central Committee called its leaders and that of the surrounding Hupei Province to Peking for consultations.

In the Hanyang steel-rolling factory, radical activists inspired by Mao Tse-tung's widow, Chiang Ching, "organized so-called 'secret armed forces,'" the radio said. "They created white terror, split the ranks of the working class, incited armed struggles and killed and wounded class brothers."

Since Miss Chiang and her leading colleagues were purged by Mr. Hua in early October, the all support the Wuhan troublemakers received from Peking has been ended, the broadcast said. The broadcast gives few clues to the issues involved in the provincial dispute but as in other parts of China it appears to have been a case of veteran local officials—many rehabilitated after being purged during the Cultural Revolution—fending off attacks from younger cadres. The young radicals thought their elders too conservative and authoritarian and used the chance to take over their cities with the help of Miss Chiang and her Peking friends.

The resulting violent clashes created themselves throughout the summer as Mao neared death and leaders in Peking jockeyed for position.

In Hupei's northern neighbor, Honan Province, the People's Daily said Tuesday, Miss Chiang's operatives "stormed organs of the dictatorship of the proletariat and provincial and lower-level party committees." In Wuhan, a broadcast said, they "stormed offices in charge of industry, agriculture, commerce and communications and transport."

Wuhan is an amalgamation of three cities set beside the broad rivers and lakes where the Yangtze meets its chief tributary the Han. Wuhan's 3 million people and its vital commerce and steel industry have suffered for years from political infighting.

According to the broadcasts, Wuhan's troubles this year began in March when Miss Chiang forced local authorities "to apologize to her so-called 'rebels'" for disciplining them in the past.

Despite Opposition on Capitol Hill

U.S. to Vote for World Bank-Chile Loans

By Edwin L. Dale Jr.

WASHINGTON, Dec. 12 (NYT).—The United States intends to vote favorably Tuesday on two World Bank loans to Chile despite strong pressure from Congress to cast a negative vote on human-rights grounds.

Gerald Parsky, assistant secretary of the Treasury for international monetary affairs, said in an interview that the United States intends to stand by its long-standing position that World Bank loans should not be decided on "political" grounds but only on the economic merits.

While the U.S. study of the economic issues involved is not yet complete, Mr. Parsky said that the "preliminary evidence" is that the loans are sound and should be approved. He noted that, while Chile has many economic problems, its balance of payments is now fairly strong, which makes it "credit-worthy."

Farming, Electricity

The board of executive directors of the World Bank will consider on Tuesday a $35-million loan for various aspects of Chilean agriculture and a $35-million electric power loan.

Earlier this year the board had one of its rare divisions on a loan to Chile. The executive director representing the Scandinavian countries voted against the loan while the representatives of most of the other West European countries, including Britain, abstained. The loan carried, with the support of the United States and the less developed countries.

In May, in legislation providing additional funds for a separate institution, the Inter-american Development Bank, Congress passed an amendment instructing the U.S. director of the bank to vote against loans to any government that had a record of systematic violations of human rights, except in cases where the proceeds of the loan would go directly to the poorest segments of society.

As a consequence, the U.S. director voted against a loan to Chile by the Development Bank last summer. However, all of the Latin American directors voted in favor of the loan, and it was approved.

Last month, Rep. Henry Reuss, D-Wis., with eight co-signers, wrote a letter to Treasury Secretary William Simon, urging a negative vote by the United States on the forthcoming World Bank loans.

Rep. Reuss noted the amendment to the Interamerican Development Bank legislation and also the fact that "Congress has placed a ceiling on its own direct lending to the present Chilean junta because of that country's repressive policies, torture and systematic oppression of human rights." He continued:

"Although no prohibition exists to limit U.S. approval of World Bank lending to countries like Chile, which so systematically violates human rights, it is the clear intent of Congress that we not support such repressive regimes through any economic assistance channel."

Carter's Stand

Rep. Reuss also pointed out that President-elect Jimmy Carter had emphasized in his campaign that "his administration will weigh human-rights issues more heavily in determining future U.S. policy."

A week ago, Sen. Clifford Case, R-N.J., issued a statement along the same lines. He said: "It is clearly the intent of Congress that we not approve economic assistance to such countries through any channel."

Robert Mc Namara, president of the World Bank, feels that the bank will run into problems if it begins to allow political judgments on various governments to influence its lending policies. He feels that loans should be approved or rejected on economic criteria alone.

This view is shared by Mr. Simon and Mr. Parsky. "Our position," Mr. Parsky said, "is that under the charter of the World Bank, you can't inject political considerations into decisions on a loan."

Japanese Urges Soviet Talks on New Fishing Zone

TOKYO, Dec. 13 (Reuters).—A Japanese fishing industry leader yesterday called for early government talks with Moscow on the Soviet decision to introduce a 200-mile fishing zone. Japanese fishermen have caught one-fifth of their annual catch of 10 million tons in this zone.

Junichi Kanehira, chairman of the 60,000-member Hokkaido Fishery Cooperatives' League, said an official mission should visit Moscow before the next scheduled annual Soviet-Japanese fishery talks, which open in March.

Ichitaro Ide, chief Cabinet secretary, said at a press conference that the Soviet move, announced Friday, also would greatly affect Japan's fishery relations with the United States, China and South Korea.

Japan will resume fishery talks tomorrow with the United States. The U.S. 200-mile zone will be enforced in March.

Seven Are Freed

SANTIAGO, Dec. 12 (Reuters).—Jose Cademartori, Chile's economy minister under the late Marxist President Salvador Allende, flew to exile in Venezuela yesterday after three years as a political prisoner.

Mr. Cademartori, a Communist, was among 40 senior government officials detained when the military overthrew the Allende government in September, 1973. Six other political prisoners were set free and left for Europe Friday.

According to official figures, only four political prisoners now remain in jail, including Communist party leaders Luis Corvalan and Jorge Montes.

Lisbon Water Service Partly Restored

Moderate Turnout by Portuguese Voters

From Wire Dispatches

LISBON, Dec. 12.—A moderate turnout was reported today for local-government elections, treated by Portugal's minority government as a vital vote of confidence.

The elections for 45,000 town-hall and parish representatives is a virtual plebiscite on the performance of the five-month-old Socialist government of Premier Mario Soares.

Weather was generally good around the country.

During the night, water started flowing from faucets in some parts of central Lisbon for the first time in four days. Officials said other areas would be supplied during the day, but full service would not be restored until Tuesday.

Voting in the capital was expected to be reduced by the bomb that blew a hole in the aqueduct carrying 90 per cent of the city's water supply Thursday and created a major crisis.

The water cut-off closed schools and factories, hampered hospitals and created a serious fire risk for the capital. Long lines of housewives surrounded emergency water-supply points and fought in supermarkets over disappearing supplies of liquids and foods that could be cooked without water or eaten raw.

The unrest created by the bomb blast was evident in the lines outside the Lisbon voting stations where most conversations centered on the water crisis.

The elections—the third major bout of voting in eight months—could decide whether the Socialists' one-party minority government will be able to continue governing without forming a coalition with other parties.

In the elections, the Socialists were primarily fighting for control against the centrist Social Democrats and the conservative Center Democrats in the towns and villages north of Lisbon. The Communists were their main opponents in the southern Alentejo and Lisbon itself.

The voters had nine parties—four of them to the left of the Communists—to choose from, but only the big four expected to make a respectable showing. Among them they fielded more than 150,000 candidates to take over the local affairs of Portugal's 10 million inhabitants.

Most of the parties, whose finances have been stretched by previous elections, ran low-keyed campaigns and the public responded in the same fashion.

Political analysts generally feel the Socialists will drop from their 35-per-cent plurality in April's legislative elections but remain the country's first party, with a slight margin over the Social Democrats, while the Communists and conservatives should make important gains. The radical leftists of the Popular Unity Movement are badly split and should lose voters to the Communists. The small monarchist and Christian Democratic parties as well as four revolutionary leftist groups are expected to make insignificant showings.

Java Marriage Bonus

JAKARTA, Dec. 12 (Reuters).—The inhabitants of a west Java village are offering 3,000 rupiahs (about $10) to any man willing to marry one of its 22 widows, each of whom has one child, a house and a rice paddy plot, Antara news agency reported today.

'Dangerous Regionalism' Decried

Trudeau's Opponents Warn Of Deepening Canadian Crisis

By Robert Trumbull

OTTAWA, Dec. 12 (NYT).—Critics of the Liberal party government of Prime Minister Pierre Elliott Trudeau are warning that a deepening sense of crisis has developed in Canada as a result of the recent election victory by separatists in Quebec.

"The situation is serious," Premier Frank Moores of Newfoundland said in a speech in Toronto Thursday. "In my opinion, it is the most serious turn of events that has faced our nation in peacetime."

Mr. Moores, who belongs to the Progressive Conservative party, expressed concern over the economy and noted that relations between the federal government and the other provinces besides Quebec had deteriorated since the separatist Parti Québécois ousted the Liberal party from the government of the French-speaking province in the election Nov. 15.

Ammunition for Critics

The developments since then have furnished ammunition for critics of Mr. Trudeau and his federal government, whose popularity has slipped in recent public opinion polls behind that of the progressive conservatives, the official opposition group in the national Parliament.

Since the Quebec election, Mr. Trudeau has sent members of his Cabinet to various parts of the country to make speeches intended to strengthen the bonds of Canadian union.

Mr. Moores's speech, to the Empire Club, appeared to be the strongest attack on the Trudeau government since the Quebec vote. Mr. Moores said that besides threatening national unity, the outcome in Quebec had unfavorably affected "our economic prospects, our image abroad, our social programs."

Asserting that "dangerous regionalism" was developing as well in British Columbia, the prairie provinces, Ontario and the maritime provinces, Mr. Moores said that the policies of Mr. Trudeau were to blame. He cited the national government's handling of the economy, the relations with the provinces and the manner—unpopular with English-speaking Canadians—in which Mr. Trudeau fostered wider use of French.

A warning that separatist feelings elsewhere in Canada should no longer be taken lightly was sounded last week by the Premier of Alberta, Peter Lougheed, who said that such sentiment in his province had been fostered by fears that the federal government might move to take over Albertan mineral wealth.

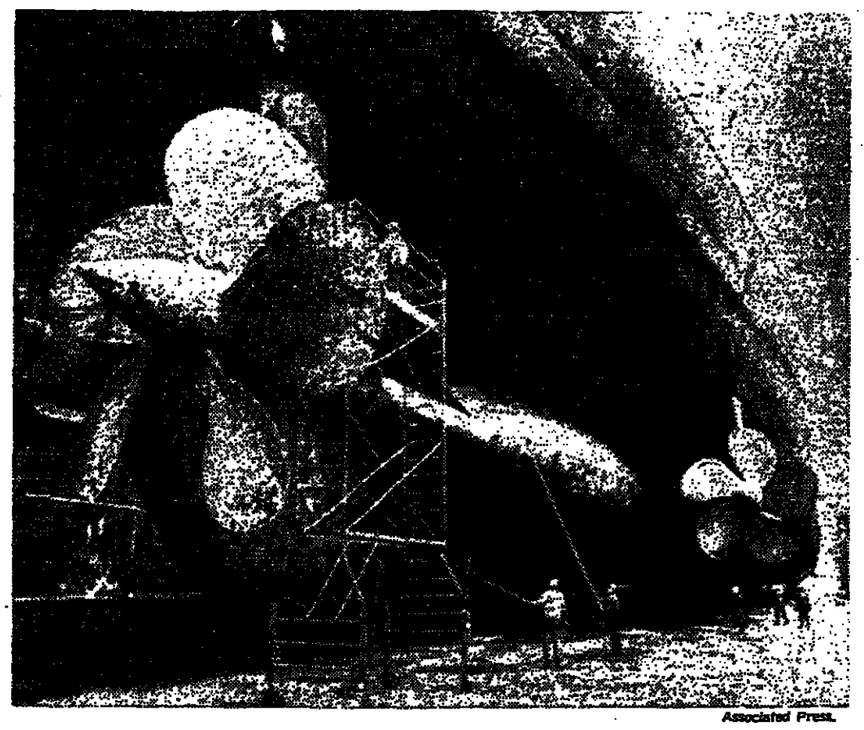
"Feelings are getting very, very intense," Mr. Lougheed, also a Progressive Conservative, told the Globe and Mail of Toronto.

"Central Canada," he added, referring to the federal government in Ottawa and the powerful industrial interests of Toronto, "had better pay attention to the Western situation or we're going to find the alienation, already very deep here, getting deeper and deeper."

In the neighboring province of British Columbia, which is also rich in minerals, there is an organized separatist movement headed by a group called the Committee for Western Independence. Its adherents say that the coastal province has closer ties with the United States and Japan, which buy most of its exports, than with Eastern Canada.

Canadian analysts warn against overestimating the importance of such Western Canadian separatist agitation but they also say that it would be a mistake to ignore it.

Mr. Moores said in his Toronto speech that indifference in Ottawa to local concerns and what he called a "confrontation approach" of the federal government in meeting with provincial leaders had fostered corrosive regionalism all around Canada.



Quebec Decides to End Abortion Prosecution

MONTREAL, Dec. 12 (AP).—The Quebec government ordered an end Friday to prosecution of Dr. Henry Morgentaler, who was acquitted of conducting illegal abortions by three juries. It also recommended that federal abortion statutes be amended.

The bearded, Polish-born doctor faced 13 abortion charges in his seven-year court battle and became a central figure in a highly emotional public debate on Canadian abortion laws. He served 10 months in jail after the first acquittal was overturned on appeal.

TB Figures in New Delhi

NEW DELHI, Dec. 12 (Reuters).—More than 70,000 of New Delhi's 5 million inhabitants suffer from tuberculosis and half of them are neglecting the disease or not seeking proper medical treatment, the director of New Delhi tuberculosis center, Dr. S.P. Pamra reports.

Russia Is Potential Beneficiary

Soviet Role in Fiat-Libyan Deal Is Hinted

By Alvin Shuster

ROME, Dec. 12 (NYT).—The Soviet Union has emerged as a potential beneficiary from the agreement by Libya to take a 10-per-cent holding in the Fiat automobile company. Some Italian newspapers also suggested that the Soviet Union, which has its own arrangements with Fiat for the production of automobiles, played a role in bringing Fiat and Libya together.

The Libyan-Fiat transaction, the first major Arab investment in Italy, involves $415 million. The issue of potential benefits to the Soviet Union was raised Friday following a sudden visit to Moscow last week by Giovanni Agnelli, the chairman of Fiat. He arrived there Wednesday, saw Soviet officials on Thursday and also met for the first time with Moamer Qadhafi, the Libyan leader.

The newspaper of the Italian Communist party, L'Unita, reported from Moscow that the injection of Libyan funds into the capital of Fiat would permit the company to overcome credit troubles and enable it to carry out a program of expansion in the Soviet Union at Togliattigrad. Fiat and the Soviet Union recently completed a new agreement of cooperation on enlargement of the Soviet automobile factory and for manufacture of heavy machinery, tractors and other items.

A Fiat spokesman denied that the Soviet Union had played any role in the agreement by Libya to invest in Italy. He did not rule out the possibility, however, that the Soviet Union could stand to benefit from the arrangement, saying only that "at the moment it would be difficult to foresee how the Russians can benefit."

Mr. Agnelli, who left Moscow Thursday and returned to his home in Turin, said in a statement that his meeting took place in Moscow only because Col. Qadhafi had been there on a visit. He said the meeting was "purely personal" and that he and Col. Qadhafi wanted to avoid the "official atmosphere" that would have followed a meeting either in Italy or Libya.

Moreover, the Fiat chairman sought to counter reports that the Soviet Union stood to benefit. But he did not deal fully with that issue, saying only that the $104 million to be loaned by Libya as part of the arrangement would not be used in the Soviet Union "or in other countries of Eastern Europe."

Mr. Agnelli added that Col. Qadhafi said that Libya and other oil-producing states might make further investments in Italy if the transaction with Fiat worked out well. The chairman noted that "no Soviet officials were present at the meeting."

The reports suggesting that Moscow stood to benefit from the Libya-Fiat arrangement said that plans for expansion in the Soviet Union had run into difficulty because of the inability of the Italian government to provide sufficient credits. Now, the Communist party newspaper and others said, Fiat was in a stronger position itself to go ahead and help the Soviet Union, clearly linking the Libya purchase to the company's business with Moscow.

Sterilization Held 'Evil' by Vatican

VATICAN CITY, Dec. 13 (UPI).—The Vatican said yesterday that deliberate sterilization of human beings is "intrinsically evil" and should not be performed in Roman Catholic hospitals.

The reaffirmation of the Catholic Church's traditional view against sterilization was made in a statement by the Sacred Congregation for the Doctrine of the Faith, written March 13 of last year, in response to a query by the U.S. hierarchy. The congregation did not explain why it waited 21 months before making the statement public.

The statement said any direct sterilization "remains absolutely prohibited under church doctrine."

6 Die on Mt. Olympus

LITOKHORON, Greece, Dec. 12 (AP).—Six Greek alpinists, including two women, have been killed by an avalanche on their climb of the 2,917-meter-high Mount Olympus in central Greece, police reported.

Nobel Protester Is Facing a Fine

STOCKHOLM, Dec. 12 (AP).—A 24-year-old man who caused a one-minute break in the Nobel Prize award ceremony here Friday with a demonstration against one of the laureates will probably be fined for disturbing the peace, police said yesterday.

The man had shouted "Freedom for the Chilean people" and "Friedman go home" to the American winner of the economy prize, Milton Friedman. The Chicago professor has lectured in Chile and his theories have been put to use by that country's military rulers.

The demonstrator, unidentified, was released after a three-hour police interrogation. He said he had used his father's ticket to gain entrance to the ceremony in a concert hall. Newspapers quoted him as saying that "I had to do it for the sake of my conscience."

Unfavorable Court Decision

Mexico Peasants Vow Revolt If Squatters Are Expelled

MEXICO CITY, Dec. 12 (UPI).—The leader of a powerful rural farm workers' organization warned yesterday that landless peasants could be forced into armed revolt if the new government attempts to oust them from private lands expropriated by former President Luis Echeverria.

Juan Rodrigues Gomez, leader of the General Union of Mexican Workers and Peasants, issued the warning in response to a federal judge's ruling ordering nearly 250,000 acres of private farmlands in Sonora State returned to their former owners.

Titles to the lands were ordered given to the impoverished peasants in the border state by Mr. Echeverria Nov. 19, only three weeks before he turned the presidency over to Jose Lopez Portillo.

Major Protest

His action triggered a major protest, not only by the affected farm owners in Sonora, but also by private property organizations and businessmen in cities throughout the nation.

It also set off seizures and blockades of 100,000 acres of private lands in the neighboring state of Sinaloa, paralyzing the farming of winter vegetables, most of which are sold to the United States.

"Those lands expropriated in Sonora will never be given back to the hands of rich landowners," Mr. Rodrigues said. "Those who support these land barons are provoking an armed uprising throughout the nation."

The ruling by Mexico City Federal Judge Carlos de Silva y Nava was made quietly Dec. 7—only six days after Mr. Lopez Portillo succeeded Mr. Echeverria.

Unusual Procedure

In a strange and still unexplained procedure, it was not announced by the court, or by the government, but by Ignacio Burgoa, attorney and legal representative of the affected private farmers and landowners in Sonora.

The ruling appeared to set the stage for a possible confrontation between peasants on the lands and government forces which presumably would have to forcibly remove them, if the judge's order is to be upheld.

Judge de Silva y Nava's annulment alleged that Mr. Echeverria's decree violated a restraining order previously issued on behalf of the private owners.

Mr. Burgos indicated the landowners—although pleased by the ruling—wanted to avoid bloodshed and were "willing to negotiate a solution" with the peasants.

"We are willing to make some concessions to the peasants so as not to frustrate their aspirations," he said.

However, how big "the concessions" might be, and whether the peasant leaders would find them acceptable, were questions that remained.

Meanwhile, the tense situation around the northern cotton center of Torreon, in Coahuila State—where police clashed with squatters Thursday—appeared to have calmed down for the moment.

But officials there warned peasants occupying lands that "they will be returned to their legal owners."

U.S. Jets Over Nairobi Mark Kenya's Independence Day

NAIROBI, Dec. 12 (UPI).—U.S. Marine Corps strike aircraft today took part in Kenya's Independence Day celebrations, once more underscoring Washington's growing commitment to this East African nation.

It was the first time any U.S. military unit had taken part in a public occasion in Kenya and the third time this year that the United States has publicly and deliberately signaled its growing military involvement here.

Earlier, Defense Secretary Donald Rumsfeld agreed, subject to congressional approval, to sell Kenya 12 supersonic F-5 jet fighters in the first step to expand and update the country's armed forces.

The $75-million deal was the largest single arms sale the United States has concluded with an African country and the first time Washington has agreed to sell weapons to Kenya.

The United States in midyear sent a naval task force to cruise off the Kenya coast and based several reconnaissance aircraft in Nairobi in an obvious show of solidarity with Kenya when a war with neighboring Uganda threatened.

During the weekend, a three-ship U.S. task force arrived in the Indian Ocean port of Mombasa and Marine Harrier jump jets from the force took part in a ceremonial flight over Nairobi yesterday to mark Kenya's 13th Independence Day celebrations.

In his two trips to Africa this year, Secretary of State Henry Kissinger conferred lengthily with President Jomo Kenyatta, although the elderly Kenyan leader is not one of the foremost leaders in southern Africa.

The United States already has a large economic stake in Kenya. More than 100 U.S. firms, ranging from banks to tour companies, are based here.

This country is now the only "friend" of Washington on the entire eastern seaboard of Africa, following the decision of Ethiopia's military rulers to pursue a radical Marxist line and loosen their country's ties with the United States.

One France withdraws from its base at Djibouti, on the Horn of Africa next year, Kenya's port of Mombasa will be the only harbor on the eastern seaboard to welcome visiting U.S. ships, which are expected to make growing use of the facilities there.

Mombasa could become increasingly important in U.S. military planning. Forces there can help keep an eye on Soviet missile facilities in neighboring Somalia and maintain contact with the growing U.S. naval base on the British-owned Indian Ocean island of Diego Garcia.

Kenya, for its part, has welcomed U.S. investment and the presence of a friendly superpower in the face of arms buildups by its potentially hostile neighbors, Uganda and Somalia.

Britain has been Nairobi's traditional arms supplier. According to diplomatic sources, Kenya switched to the United States for aircraft because it felt only Washington can supply with the range of hardware needs to rebuild its armed for

Ironically, the Marine Ha jets taking part in today's view were made in Britain. T are the only foreign fighter service with U.S. forces.

Amnesty for 10,000

NAIROBI, Dec. 12 (AP).—P dent Kenyatta announced day that he was granting dons to 10,000 criminals held Kenyan jails.

He made the amnesty announcement at a garden party at State House here, held as pa Kenya's Independence Day c lyrations.

Common Market Spikes 'Eurobeer'

BRUSSELS, Dec. 12 (Reuters).—The Common Market Commission has formally buried plans for introducing "Eurobeer," "Eurobread" and even "Euromayonnaise."

Commissioner Finn Olav Gundelach announced he was withdrawing proposals designed to harmonize ingredients permitted in certain foods. The proposals, some of them six years old, have drawn angry outbursts from European consumers, who feared that their favorite brands of food and drink might disappear.

Mr. Gundelach said the commission would instead propose measures for the uniform labeling of foodstuffs.

Israel Gets First 3 Of 25 F-15 Fighters

TEL AVIV, Dec. 12 (UPI).—After a 24-hour delay, Israel released an official account yesterday of the arrival and commissioning of the first 3 of 25 sophisticated F-15 fighter-bombers, supplied by the United States under a multimillion-dollar military-aid pact.

Israel is the first country in the West to receive the planes. Other potential clients include Australia, Canada Britain, Iran, Japan and West Germany.

S. Africa Quake Deaths

JOHANNESBURG, Dec. 12 (Reuters).—Four black miners were killed and 36 injured Friday after an earth tremor caused a rockfall at the Buffelsfontein gold mine at Stilfontein.

CIA Reportedly Is Bugging Negotiators for Micronesia

By Bob Woodward

WASHINGTON, Dec. 12 (WP).—The CIA has been conducting electronic surveillance regularly against representatives from the last U.S. colony, the Pacific island group of Micronesia, according to reliable sources.

The electronic surveillance has been used to learn the Micronesian negotiating position in talks with the United States over the future status and perhaps eventual independence for the group of 2,300 strategically placed islands in the Marianas, Carolines and Marshalls.

Under a United Nations trusteeship created after World War II, the United States has governed the islands as colonial administrator while being formally committed to promoting "self-government and independence."

The CIA and the State Department are currently locked in a sensitive, behind-the-scenes dispute over the legality and propriety of the surveillance, which is a relatively small operation involving one or two phone taps and room bugs in Micronesia.

President Ford was informed several months ago of both the surveillance and the dispute, the sources said. He reportedly did not resolve it but forwarded the matter to Attorney General Edward Levi for a legal opinion.

The Justice Department acknowledged yesterday that the attorney general was reviewing a matter concerning Micronesia for the President but said it involved attorney-client privilege and that there would be no public comment. The White House was asked for comment Friday but had provided none by late yesterday. CIA and State Department spokesmen could not be reached for comment.

Justice Department sources revealed that Mr. Levi is expected to leave the sensitive question to his successor in the Carter administration, although the Justice Department has already done substantial legal research on the question.

The State Department this summer filed an objection with the White House, arguing that the surveillance is improper, in part because the United States is in effect negotiating with the Micronesians to become U.S. citizens.

CIA surveillance of U.S. citizens is prohibited by the CIA charter. But the CIA has defended the Micronesian surveillance, noting that Micronesians are still foreigners and arguing that is the proper role of the CIA to gather intelligence abroad.

According to the sources, the CIA apparently wants to continue the surveillance in future negotiating sessions.

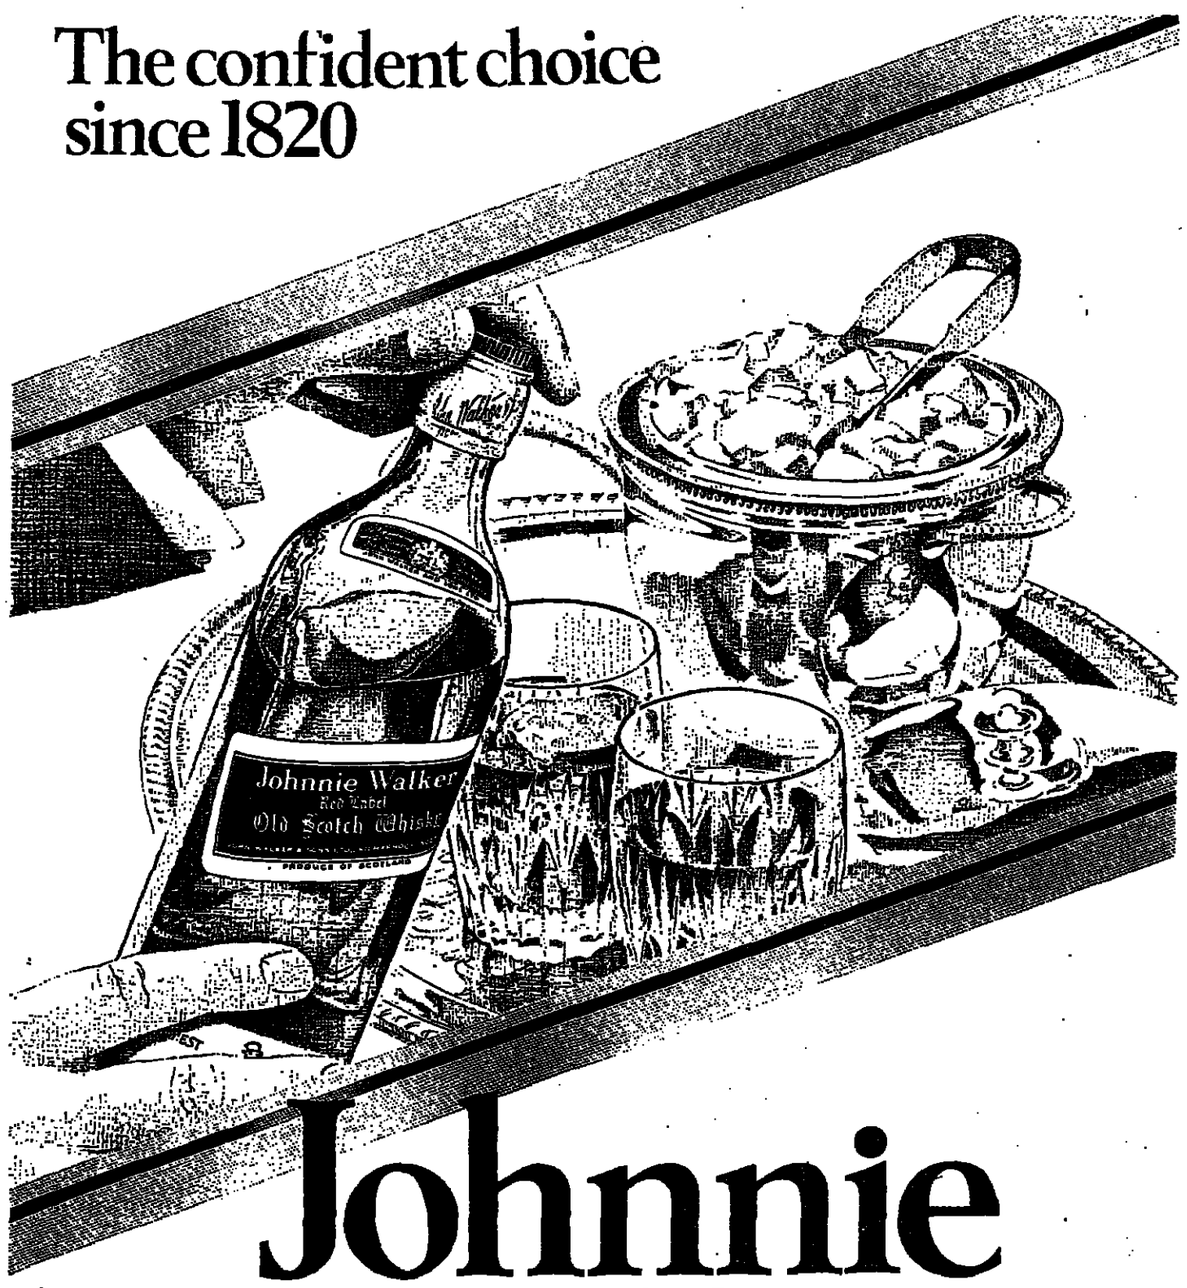
The sources said that negotiators for the United States have received regular reports on the Micronesian position, but they apparently were not informed that the information was coming from electronic surveillance. This is a standard practice so that negotiators can deny such knowledge.

Military Value

Public disclosure of the surveillance, the sources said, could cause an uproar in the UN, where the United States has already come under attack for its slowness in relinquishing its trusteeship.

Some high-level strategic planners in the government believe Micronesia has significant potential military value in the post-Vietnam period, thus justifying CIA surveillance if it helps the United States maintain control of the islands. The only U.S. military base in Micronesia is the missile test site area centered on Kwajelein atoll. The Penta has plans to build two n bases.

Micronesia has a populatio about 110,000 who live on a t of about 700 square miles of la about two-thirds the size Rhode Island. But the isla are spread over 3 million squ miles, an area the size of United States.



A U.S. high commissioner r the islands, but the people el a Congress and decids how allocate some of the $80 mill in annual U.S. aid.

Since last spring's negotiat session, the Micronesians h taken a harder line and seek independence sooner.

On the other hand, the Uni States has sought to dissolve trusteeship more gradually. U der an arrangement advocated the United States called "f association" it would continue run the foreign relations a defense matters for the islan for at least 15 years more.

In March, the Marianas lands part of the Micrones group, signed an agreement become a U.S. territory in 19 Under that agreement the M arianas would have status simi to Guam.

Symbol of Mixed-Up Youth

Girl in the Kent State Photo Turns 21, Seeking a New Life

MIAMI, Dec. 12 (AP).—Mary Ann Vecchio, the sobbing girl in the Kent State photograph, the symbol of troubled youth, was 21 this month.

"I hope my birthday separates my old life from the new one I'm trying to put together," she said. "I'm trying to change, trying to grow up. It's not easy and sometimes it scares me.

"I just want to be know as Mary, not Mary from Kent State."

She has come a long way from that day in 1970 when she knelt in the blood of a student killed by National Guard bullets during an anti-war demonstration at Kent State University.

She was a 14-year-old runaway and would-be flower child when she wept over his body and threw up her arms in despair and disbelief.

That photograph of Mary won a Pulitzer Prize and appeared worldwide. She says it turned her life into hell, with torrents of hate mail and harassment. She was called a "Communist bitch," a "dirty hippy," a whore.

"Too bad it wasn't you that got shot," wrote an anonymous person, whose sentiments were echoed many times.

Six years later, growing up is coming slowly to Mary Ann Vecchio, the girl who was equated by some with the youth movement.

"Now, I can read those things about me and not burst into tears," she said. "I can feel sorry for the person who wrote them. I can accept that some people don't like me.

"I dont have the nightmares and I try not to look at the picture anymore."

Thinking of School

For the first time in years, the high school dropout is thinking of school and has registered for junior college next month.

The grossly overweight girl in flowered blue jeans has lost 100 pounds, found a steady boyfriend and wears pretty clothes. Her once heavy face now looks strikingly gaunt, with hollow cheeks and deep but lively eyes.

She faces charges of prostitution and massaging without a license stemming from her arrest in October at a Miami massage parlor. She pleaded not guilty and was ordered to stand trial on Dec. 16.

She refuses to discuss it except to say it marks the end of a time she wants to leave behind.

In 1973, she pleaded no contest to a charge of offering to commit prostitution.

Today, Mary is living in a sub- with the family of Allen erner, former manager of the massage parlor where she was rested. She moved in after they were arrested and the place closed.

"Mary Ann is a wonderful person who needs love and understanding and needs to be left alone," his wife, Denise, said.

Mary Ann is dating their 20-year-old son, Bif, who is in training to be a security guard. Their 19-year-old daughter, Leslie, convinced Mary Ann to enter junior collge. She wants to study acting and theater.

The police drove her out of Miami, she said, and she was glad to go.

"Out here, it's more peaceful. I can watch the shooting stars at night and wish on them. I'm into astrology."

The years since Kent State have been confused. "I've been so wrapped up and troubled," she said. "I've been wary and holding back from people. I'm just starting to relate to people now."

Mary sees herself as a victim. She is bitter about "bad publicity, bad breaks, bad luck and the way my life turned out so far."

She contrasts her situation with that of Patty Hearst, saying: "Patty shouldn't have gotten breaks, but she had money. I didn't. If you're poor like me, they nail you to the cross."

She complains of police and press harassment.

But some people who have known Mary say that, from the beginning, she was a troubled girl from a troubled family and was headed for trouble, with or without Kent State.

Mary herself admits: "I don't know if I can blame it all on Kent State but that started it." And, she laughed, "It sure put Opa Locka on the map."

One of six children of a strict Port Authority foreman, Mary was restless and bored in Opa Locka, Fla., a fading, stucco city.

She wanted to get away from her family, was captivated by the anti-war movement, and ran away from home. She almost strayed into the Kent State protest and stumbled upon death.

"I didn't know what it meant to die," she said. "After that, I sort of went crazy." She ran some more, was sent home to her parents, went to a juvenile home, and ran away again.

This time, her travels took her hitchhiking around the country. She crossed it seven times during her 16th and 17th years, with stops in Haight-Ashbury in San Francisco, Telegraph Avenue in Berkeley and the East Village in New York."

"I had a great time traveling around," she said, "and I wouldn't want to be too settled down. But it's time to put away the dolls and grow up. I'm trying."

Her family has boxes of hate mail—and love mail—sent to Mary and to them over the years. To this day, letters arive whenever Mary's name appears in the newspapers.

"I couldn't throw those boxes out, even the ugliest things, even the pictures of me that have been scribbled on," she said.

"I'd let it all rot but I couldn't throw it out. It's part of my past. Sure, parts of my life I'd like to throw out." She became vague when asked which ones, but adds: "There are good parts, too, really. It's not all bad."

Mrs. Lerner says Mary's confidence is low. "When we tell her she looks pretty, she hardly knows what to say."

Mary agrees. "I never used to look in the mirror. I didn't think I was good looking and didn't think so much of myself. Now, I'm feeling better."

Her mother, Claire, and her 28-year-old sister, Joanne, say that after Kent State, Mary could not stand being around guns. Once, when she was driving with a friend, someone threw a stone at the car. Mary thought it was a gunshot and screamed for everyone to duck.

But the memories of guns are dimming.

"We were kids back then, kids," she says.

"I'm looking forward to having my own campus," she said, "but I could never go to a campus rally and I'm not interested in politics or changing the world.

"I just want a nice life and I'd like money to live nicely and help out my parents because they've stuck by me.

"And I'm going to have a good birthday. I'm going to party, party, party," she laughed. "I'm going to bake my birthday cake and light 21 candles."

Mary Ann Vecchio, who was 14 at the time, sobbing at Kent State University in 1970.

A Result of Wealth

U.S., West Europe Diets Said To Contain Perils to Health

By Constance K. D'auVin

WASHINGTON, Dec. 12 (IHT).—There is strong evidence that the "affluent diet" of most Americans and West Europeans is enough of a factor in the high incidence of heart disease and certain types of cancer that national nutrition programs such as those in Norway and Sweden should be adopted immediately, a new study reports.

The affluent diet—so named because it flourishes only where incomes range far above subsistence level, where agricultural products are in great abundance—is characterized by the high consumption of fats and decreasing consumption of fibers such as raw vegetables and whole, unmilled grain foods.

Latecomers Noted

Such a diet can overnourish the body, causing obesity, and can have the same effects as undernutrition, "reduced life expectancy, increased susceptibility to disease and reduced productivity," according to a report by Worldwatch Institute, a group partially funded by the United Nations to study global problems.

The affluent diet has become a way of life in the United States, the study says, and also has taken hold in Western Europe. There are strong indications that Japan and the Soviet Union, although late starters in the "transition away from traditional grain or potato-centered diets are quickly making up for lost time."

Those with an affluent diet eat lots of animal protein in the form of fatty red meats and dairy products; they substitute refined flour and sugar for whole grains, tubers, fruits and vegetables. They also increasingly choose processed foods over fresh produce. "Never before the present century have large numbers of people maintained such a diet," the report says.

The report, "The Two Faces of Malnutrition," compares undernutrition and overnutrition, outlining the methods governments have used and continue to use to solve the problems of undernutrition—still the overwhelming global problem. Such governmental intervention is necessary to encourage dietary changes, the study says.

So far, the only two countries to attempt to discourage high consumption of components of the affluent diet are Sweden and Norway.

The Swedish government has undertaken what Erik Eckholm and Frank Record, the authors of the report, call "a vigorous public-education program" to reduce the amount of calories, fats, sugar and alcohol that Swedes consume and to increase the amount of exercise they get.

There is a proposal in the Norwegian legislature to adopt a national food policy to promote self-sufficiency in food supplies and encourage dietary and exercise habits that would cut the mounting national toll of cardiovascular and other diseases, said Mr. Eckholm.

However, due to lack of such programs in the United States and many European countries, the governments in those countries have programs which actually encourage the affluent diet, the report says. The U.S. Congress has created an "egg board" to advertise eggs, boosting the consumption of a substance high in cholesterol, which is thought to cause arteriosclerosis. The European Economic Community's Commission has proposed a tax which would make margarine as expensive as butter, of which Western Europe has a surplus, thus encouraging more consumption of a kind of fat that is also thought to cause hardening of the arteries.

Big Arms Cache Of Rightist Unit Found in Calif.

LOS ANGELES, Dec. 12 (Reuters).—Infrared photos were being studied today for more hidden arms in the desert near here after police dug up guns and ammunition linked to a rightist paramilitary group.

"This is the largest cache of this type ever found in California and probably the nation," Los Angeles County Sheriff Peter Pitchess said of the 8 tons of munitions found in bunkers in the desert and in townships east of Los Angeles.

"There was enough equipment and weapons to man a 200-member company of military personnel," he said.

Donald Wiggins, 41, a foundry owner from Pomona, east of Los Angeles, was charged with possession of destructive devices and machine guns when police traced ownership of the land to him.

Also found in the bunkers were anti-black, anti-Semitic and anti-Mexican literature along with food and medical supplies and chemicals for making napalm and poison gas. Mr. Wiggins was a member of the Christian Defense League, which authorities have said contains a "secret guerrilla warfare unit."

Arresting Data Produced by Jail Furloughs

PARCHMAN, Miss., Dec. 12 (AP). — Mississippi State Penitentiary officials reported mixed results on the first of the Christmas season's holiday furloughs for inmates.

Fifty-two of the 55 inmates due back Friday night returned without incident and two failed to return and were classified yesterday as escapees.

The 55th inmate drove up to the prison gates and told guards he was so intent on getting back in time that he stole a car.

Californian Sure Of Major Quake

SAN FRANCISCO, Dec. 12 (AP). — A major earthquake threatening thousands of lives is inevitable in California, the U.S. Geological Survey's top earthquake expert said last week.

Dr. Robert Hamilton, chief of the USGS Office of Earthquake Studies, said the expected quake would surpass 8 points on the Richter scale and its impact "would be enormous."

"Losses could reach thousands of lives and tens of billions of dollars," Dr. Hamilton said in remarks prepared for delivery to the Commonwealth Club.

Viking Mars Mission Will Be Reactivated

PASADENA, Calif., Dec. 12 (UPI).—Viking's landers and orbiters will be "awakened" this week to begin sending back more data from Mars following a monthlong period of inactivity due to the sun's conjunction between the planets.

The two orbiters are to be tuned up by computer tomorrow and Tuesday and data will be sent back to earth beginning Wednesday.

Carter Margin Was 1,681,417 In Record Vote

WASHINGTON, Dec. 12 (UPI).—Jimmy Carter beat Gerald Ford by 1,681,417 votes with a record of more than 81 million ballots cast Nov. 2, according to official tabulations.

The Democratic candidate received 40,827,394 to the Republican President's 38,145,977, certified results from the 50 states and the District of Columbia showed Friday. Independent candidate Eugene McCarthy got 745,042 votes and a long list of minor party and write-in candidates got 963,505.

The vote canvasses were completed in preparation for certification of electors in tomorrow's Electoral College balloting.

New York Suit Rejected

NEW YORK, Dec. 12 (AP).—A federal court judge dismissed on Friday a suit brought by the U.S. Labor party to overturn the presidential election results in New York State.

Mr. Carter was awarded New York's 41 electoral votes on the basis of his 288,000-vote margin over Mr. Ford. Nationally, Mr. Carter won 297 electoral votes to 241 for Mr. Ford.

Soviet Official Sees SALT As Top Priority for Carter

MOSCOW, Dec. 12 (Reuters).—The Soviet Union's leading expert on the United States said yesterday that the top priority for President-elect Jimmy Carter should be movement in the long-stalled Strategic Arms Limitation Talks (SALT-2).

Prof. Georgi Arbatov, director of the Institute for the Study of the United States, was writing in the Communist party newspaper Pravda about current relations between the superpowers.

Recent statements by Mr. Carter and Cyrus Vance, whom he has chosen as secretary of state, on future ties with Moscow had been noted in the Soviet Union as having "a positive character," Prof. Arbatov wrote.

If the course they had outlined were followed consistently, he said, "a real possibility would open up . . . for achieving concrete movement ahead in solving the main problems of current international relations."

'Enemies of Détente'

But, the professor said, "for final conclusions to be drawn about the future of U.S. policy, much still remains unclear. All the more because the enemies of détente have still not laid down their arms."

Prof. Arbatov, who is a member of the policy-making Central Committee of the Soviet Communist party, said the "time factor" would be important when the Democrats took over the White House next month.

"The solution of a whole series of pressing problems of Soviet-American relations cannot be put off ad infinitum. And in solving these problems the ball is now in the American court [for both the present and future administrations]," he wrote.

Above all, he declared, this applied to SALT, in which a 1972 interim limiting the number of offensive missiles expires in October of next year. "This demands energetic measures to overcome the pause that has set in," he said.

Other Issues

Other questions which Prof. Arbatov listed as needing a quick solution were:

- An agreement on force reductions in Central Europe.
- "Tangible results" and "new initiatives" in implementing decisions of the European security summit conference held in Helsinki last year.
- "The creation of normal conditions for the development of economic contacts" between the Soviet Union and the U.S.
- Reconverting the Geneva conference on the Middle East.

Carter Emphasizes Funding Of Programs to Create Jobs

By David E. Rosenbaum

WASHINGTON, Dec. 12 (NYT).—President-elect Jimmy Carter as said that his "first priority" n stimulating the economy would e to channel government money nto programs to create jobs and hat any tax eduction he propos- would be a supplement to that ffort.

The President-elect said Friday at the procedure he would fol- w would be to identify the size f the economic stimulus he felt e country required.

Then, Mr. Carter said, he would etermine how much could be oductively spent in such areas public-works projects, public- rvice jobs, community-develop- ent programs and housing sub- ties.

He would ask for a tax cut, be id, only to the extent that the quired amount of stimulus could t be reached through addition- government spending.

Pentagon Steps

Mr. Carter made the remarks the economy on the steps of e Pentagon at the end of a o-day visit to Washington. He ent Friday morning meeting th groups of Democratic sena- s and representatives and spent e afternoon at Pentagon brief- gs.

Friday night, the President- ct traveled to Plains, Ga., for weekend. His aides said that would probably go to Atlanta s week to continue to interview sons for top positions in his ministration and that he would bably return to Washington thin the next 10 days.

Mr. Carter's transition staff on ursday had presented the Pres- nt-elect with a proposal to mulate the economy that en- led a $15-billion tax reduction d $5 billion in spending for ious job-creation programs.

Mr. Carter did not discuss actual figures in his brief news conference Friday but the implication of his remarks was that he was leaning toward a somewhat larger spending figure and a somewhat smaller tax cut than his aides had suggested.

The Democratic members of Congress encouraged the President-elect to emphasize spending as a means of economic stimulus. Indeed, several dozen representatives signed a letter to Mr. Carter in which they argued that a tax reduction was "an extremely inefficient way to reduce unemployment."

More Emphasis

Rep. Thomas O'Neill jr., D-Mass., who will become speaker of the House in the new Congress, said that he had urged heavier emphasis on spending in the economic recovery package.

Mr. Carter reportedly asked House members to approve quickly authority for him to reorganize the government, subject in each case to veto by either house of Congress. Other presidents have had that authority but the legislation permitting it has lapsed.

Rep. Benjamin Rosenthal, D-N.Y., said that Mr. Carter hoped for legislation that would allow him to amend reorganization plans after they had been submitted to Congress. Previous legislation did not permit such amendments.

After lunch Friday with Defense Secretary Donald Rumsfeld and members of the Joint Chiefs of Staff in the secretary's private dining room, Mr. Carter was briefed on the workings of the Pentagon communications systems used in times of crisis. Mr. Carter, who spent 11 years in the Navy, was accompanied by members of his transition team and the Vice-President-elect, Sen. Walter Mondale of Minnesota.

Iran Purchases Italian Flagships

ROME, Dec. 12 (Reuters).—The state-owned Italian Line today sold its two former flagships, the luxury liners Michelangelo and Raffaello, to Iran for nearly $18 million each.

The contract was signed in Tehran today by the Iranian Navy's chief of staff, Adm. K. Khabibollahi, and Italia's managing director, Furio Zonza, a statement here said.

The two liners will be used as floating hotels for the Iranian Navy and will be delivered in about six months, officials said. The 46,000-ton ships, which each cost about $52 million to build, made their maiden voyages between Genoa and New York in 1965. They never proved profitable and were withdrawn from service in the middle of last year.

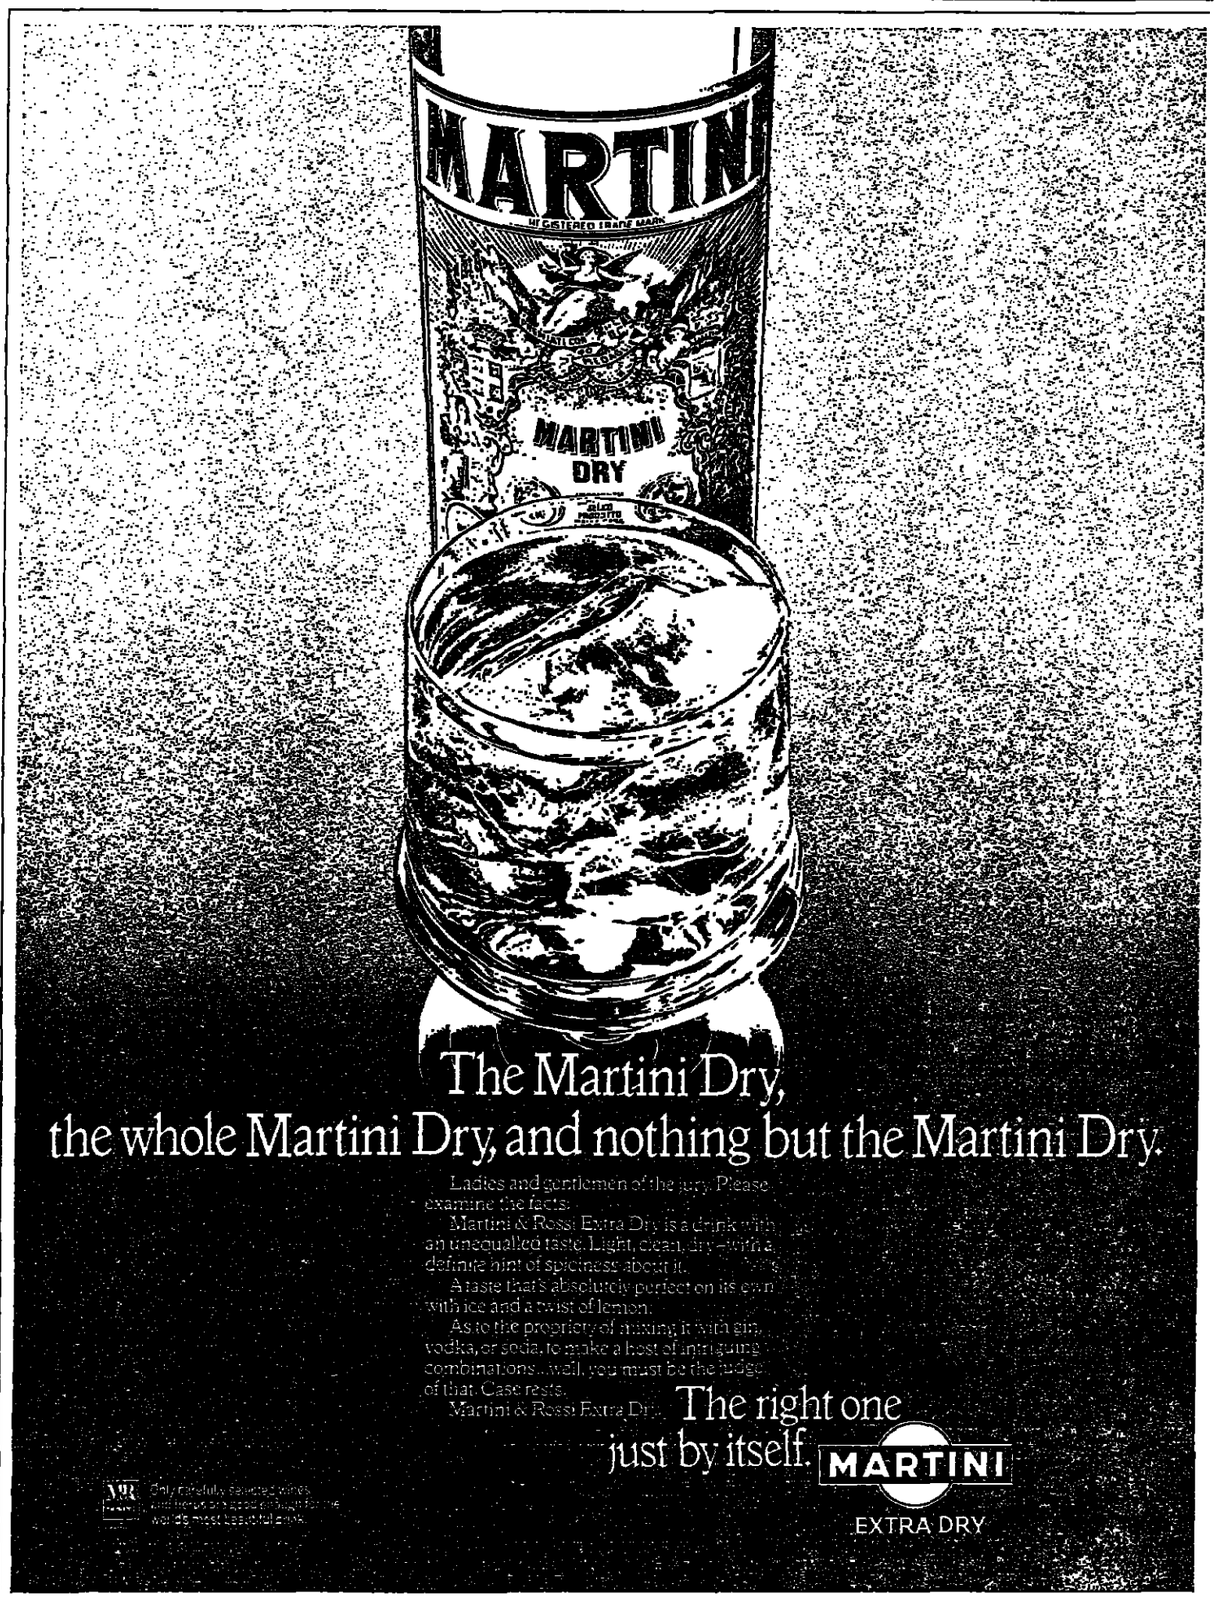
OPEC Discusses Oil Differentials

DOHA, Qatar, Dec. 12 (Reuters).—Experts from the 13-nation Organization of Petroleum Exporting Countries met here today to prepare for Wednesday's ministerial price-fixing session.

Officials said the experts discussed oil differentials—the way different grades of crude are priced in relation to a fixed marker. Differentials could prove a divisive issue, experts say.

Producers of the heavier oils argue that the current system of differentials is making their product less competitive than the light varieties, which are in greater demand on world markets.

U.S. Prosecutors Ask Quick Mandel Retrial



BALTIMORE, Dec. 12 (AP).—Federal prosecutors have filed a motion for a prompt retrial of the political corruption case against Gov. Marvin Mandel.

The trial of Gov. Mandel and four other men ended last Tuesday in a mistrial. Noting that the Speedy Trial Act provides that a retrial following a mistrial shall begin within 60 days of the mistrial declaration, they asked the U.S. District Court to ignore defense attorneys' protests that "'other commitments' will preclude for many months their availability for retrial of this case."

Boumedienne Elected

ALGIERS, Dec. 12 (AP).—Houari Boumedienne, who ran unopposed, was formally elected president, Friday by 95.23 per cent of the nation's 7.8 million registered voters.

7. Your promotion.

2.147 Billion Bushels

U.S. Estimates Wheat Crop Has Set a Record This Year

By William Robbins

WASHINGTON, Dec. 12 (NYT). —Wheat growers have produced a record harvest of 2.147 billion bushels this year, the Agriculture Department has estimated in its final production report on the crop.

This compared with last year's record of 2.135 billion bushels.

Thus, according to Friday's estimate, U.S. farmers have set records this year for the nation's two major grains. Corn output was estimated last month at a record total of 6.06 billion bushels.

A final report on the corn crop is due next month, but it is expected to show little change from last month's estimate.

Slight Change

Although the wheat estimate edged up to a record, the change from the previous estimate of 2.126 billion bushels, issued in October, was so slight that it was expected to have little or no effect on the outlook for consumer prices.

The department's economists have predicted that, because of the big wheat and corn crops, retail food prices were likely to rise no more than 3 per cent next year, about the same as this year's food inflation rate.

On the basis of the previous figures, the department had said that estimated production was larger than projected demand. It said remaining, or carry-over, stocks were expected to total nearly a billion bushels when next year's harvest begins, an increase from this year's carry-over of about 665 million bushels.

Wheat is the principal food grain for man and a major U.S. export item. However, corn, since it is the principal livestock-feed grain, has a greater impact on food prices.

Other Crops

Among other crops included in Friday's production report, the cotton estimate was raised to 10.36 million bales, compared with last month's estimate of 9.89 million bales and last year's harvest of 8.3 million bales.

Other crop estimates include:

- Fall potatoes—302.8 million hundredweight, a record, compared with last year's 288.7 million.
- Rice—117 million hundredweight, compared with last year's 128 million.
- Oats—562 million bushels compared with 657.6 million last year.
- Barley—377.3 million bushels compared with 393.9 million last year.
- Rye—16.7 million bushels compared with 17.9 million last year.

Friday's report also said that the winter wheat crop planted this fall for next year's harvest was in "fair-to-good" condition although "germination and stands suffered from subnormal temperatures and low soil moisture in many producing areas."

Study Documents 897 Illegal Acts In Nixon Years

WASHINGTON, Dec. 12 (WP). —During a 3 1/2-year period in the Nixon administration, federal agencies acted illegally in 897 instances—approximately once each working day—according to a new study.

The Corporate Accountability Research Group, based here, said yesterday it had documented that many instances of unlawful activity in a review of civil court decisons between Jan. 1, 1971, and Aug. 9, 1974.

The cases ranged from illegal Nixon administration impoundment of sewage treatment funds to illegal tax charges by the Internal Revenue Service.

The research group, founded by Ralph Nader, considered only cases in which a U.S. Court of Appeals had ruled that an executive branch agency had acted unlawfully.

The cases involved only civil suits against the government, not criminal actions, and did not include any of the actions flowing from the Watergate scandal, the authors of the report said. Nor did the study include any of the decisions involving illegal electronic surveillance or mail intercepts involving the FBI or the CIA.

Dutch Get Soviet Data In War Crimes Case

THE HAGUE, Dec. 12 (Reuters). — The Netherlands Friday received the first batch of promised Soviet documents relating to the case of Dutch art dealer Pieter Menten, wanted for questioning here about the wartime Nazi killing of Polish Jews, a Justice Ministry spokesman said.

Mr. Menten, 77, who was detained by Swiss police last Monday after disappearing from his home near Amsterdam last month just before police called to question him, is now in a Zurich prison. The Swiss government Friday received Dutch Justice Ministry documents on Mr. Menten and is expected shortly to decide if he should be extradited to the Netherlands.

Belgians Termed Top EEC Payers

BONN, Dec. 12 (Reuters).—Belgians pay the largest per capita contribution into the European Economic Community's funds, West German Deputy Foreign Minister Hans-Juergen Wischnewski said here.

He told the Foreign Press Association that he wanted to dispel the illusion that the West Germans were the paymasters of Europe.

He said that in 1975 Belgium's net contribution totaled 62 deutsche marks (about $25) a head compared to West Germany's 51 marks.

Ireland was the biggest per capita beneficiary in 1975 with 313 marks (about $126) a head. He said this was economically just, but that it was absurd that Denmark, which had the highest living standard of the Nine, should be the principal beneficiary for the first nine months of 1976 with 164 marks a head.

Associated Press.

Anti-Pollution Action by U.S. Agency

Chrysler Ordered to Recall 208,000 Cars

By Philip Shabecoff

WASHINGTON, Dec. 12 (NYT). —The Environmental Protection Agency ordered the Chrysler Corp. Friday to recall 208,000 of its 1975-model cars because of what the agency said were faulty design and maintenance problems producing excessive air pollution.

A spokesman for the agency said that the order was "precedent setting" because it was the first time that automobiles have been ordered recalled for design and maintenance rather than for manufacturing defects.

Chrysler promptly issued a statement saying it could not be responsible for the way people maintained their cars and informed the agency it would appeal the order. Affected by the agency's decision are nearly one-quarter of Chrysler's production of 1975 cars, including Chrysler Cordoba and Newport, Plymouth Fury and Grand Fury, and Dodge Monaco, charger SE and Coronet models.

Order Is Praised

Several officials of environmental groups praised the order by the agency and said they would support it. "The key issue in auto emissions is maintaining the car when it is on the road," said Rafe Pomerance of the National Clean Air Coalition. He added that there was a lot more to do, including a requirement for annual inspections to make sure auto-emission standards are being maintained.

The recall order is based on what the protection agency said were carburetor "misadjustments" resulting in excess emissions of carbon monoxide. Russell Train, EPA administrator, said in a letter to the president of the Chrysler Corp., John Riccardo, that a substantial number of Chrysler cars with larger engines were not meeting the federal air pollution emission standards of 15 grams a mile for carbon monoxide.

The problem apparently is a small screw on the carburetor that is extremely sensitive and thus very difficult to adjust when a car undergoes maintenance, according to an agency official.

Mr. Train said that his agency's investigations showed that these carburetor misadjustments are "routinely performed" by Chrysler dealers as well as by nondealer service stations and said that the agency had agreed that Chrysler cars meet federal standards when properly maintained according to specifications. "When an individual improperly adjusts an emissions control system, we are not responsible for those actions," the statement said and added, "We intend to challenge this order."

The statement also said that the design systems of the cars were thus at fault.

A statement issued Friday by a Chrysler spokesman said that "by this order, EPA is trying to require Chrysler to be responsible for the actions of private individuals. We cannot accept the responsibility or the precedent itself."

Turkish Quake Relief Impeded By Winter, Peasant Attitudes

By Steven V. Roberts

ANKARA, Dec. 12 (NYT).— The snows of winter are starting to sweep across eastern Turkey, and government officials face an extremely difficult job in providing shelter for more than 50,000 persons left homeless by the earthquake that devastated the region almost two weeks ago.

The officials want to house the victims in tent cities situated near good roads and sources of supply. But the homeless are mainly mountain people, deeply attached to their herds and their lands, and so far most of them have refused to move.

"You can't give people a new life style in one month," a foreigner aiding the relief effort said.

The quake was centered in the remote province of Van, more than 700 miles east of Ankara, the capital. The official death toll has reached 3,790 but unofficial estimates place it above 5,000. Thirty-five countries have answered an international appeal for aid and a UN specialist called the response "the most impressive I have ever seen."

West Germany's contribution included 5,000 blankets, 4,000 pairs of trousers, 175 sleeping bags and a fully equipped field medical unit, including personnel. Greece, Turkey's traditional enemy, donated 300 tents and 5,000 blankets.

The United States flew in 1,100 winterized tents and virtually rebuilt the tiny Van airport, where normally there are only three flights a week. Van has received more than 200 flights since the disaster. All villages in the region have now been reached with supplies, officials say, including 17 that lacked roads and could be reached only by helicopter.

Opposition politicians and newspapers have been attacking Premier Suleyman Demirel for confusion and corruption in the relief effort, and foreign experts say the charges are partly valid.

Concern for Herds

The government wants to concentrate the homeless in central camps. But most of the victims have all their money invested in livestock and do not want to leave their animals. The government has offered to care for the herds on state farms or buy them at good prices, but the peasants worry about what they will do next spring.

The problem is further complicated because many of the homeless are Kurds, and there has always been tension between Turks and Kurds. A government minister charged that "dissident" elements were trying to "turn the quake site into a political arena."

As a result, the new tent camps are still almost empty. Turkish officials say they will fill up when the weather gets colder and are asking foreign countries for more heavy-duty tents. The foreigners are waiting to see what happens before committing more resources to the program.

20 FBI Agents Queried on Acts Against Panthers

WASHINGTON, Dec. 12 (NYT). —A federal grand jury in New York questioned about 20 FBI agents two weeks ago about alleged burglaries and illegal wiretapping directed against the Black Panther party, sources familiar with the investigation said yesterday.

At least one agent refused to answer questions about alleged illegal wiretapping, citing his right to avoid self-incrimination under the provisions of the Fifth Amendment to the Constitution, the sources said. A source said other agents may have also refused to answer questions on Panther cases.

The swift and unexpected use of grand jury subpoenas in the Black Panther matter occurred as the Department of Justice's wide-ranging investigation entered its ninth month. Until recently, the department had concentrated on agents of Squad 47, which had been assigned to apprehend members of the Weather Underground who had fled federal or state charges.

The men subpoenaed two weeks ago were from other intelligence squads in the New York office, the sources said.

Despite the length of the investigation of FBI burglaries and other illegal acts, there have been no indictments of either present of former agents. Several sources said, however, that they expected indictments before the Ford administration left office next month.

Hispanic Ethnics In U.S. Better Off Than the Blacks

WASHINGTON, Dec. 12 (AP). —The 11 million Americans of Spanish-speaking origin are worse off economically than whites but better off than blacks, according to a new Census Bureau study.

The study showed that unemployment among Hispanic Americans in March registered 11.5 per cent, compared to 6.8 per cent for whites and about 13 per cent for blacks.

Median income for Hispanic families in 1975 was $9,551, compared to $14,268 for whites and $8,779 for blacks. Some 26.9 per cent of them were below the federally defined poverty level of $5,500 for an urban family of four, compared to 9.7 per cent of whites and 31.3 per cent of blacks. Income of Hispanic families dropped from 71.2 per cent of white family income in 1974 to 66.9 per cent in 1975.

Explaining the use of the term "white," a census spokesman said the categories are determined by what color the people designate for themselves and what they give as their heritage.

The Census Bureau estimated that Americans of Spanish origin numbered 11.1 million in March, 1976, or 5.3 per cent of the population.

Soviet Union Explains Radio Interference

STOCKHOLM, Dec. 12 (Reuters). — Soviet authorities have advised Sweden that a powerful shortwave signal which has disrupted some European radio transmission in recent months may have been caused by experiments during installation of Soviet radio equipment.

In a letter made public by Sweden Friday, the Soviet Telecommunications Ministry said it would take steps to reduce the disruption caused by the pulsating broad-band signal, which constantly shifts frequency between about 2 and 20 megahertz.

Martha's Vineyard Town Decides

U.S. Indians May Regain Some Land

GAY HEAD, Mass., Dec. 12 (AP).—Residents of this tiny town on the southwestern tip of Martha's Vineyard have voted to give up 250 acres of "common land" to the Wampanoag Indian tribe.

The 50-to-28 vote Thursday gave the tribe land it sought in a suit filed in U.S. District Court in Boston three years ago. The Indians claimed the town violated the 1790 Nonintercourse Act by failing to receive congressional approval to incorporate the 250 acres of Indian land in the 1870s.

The state legislature still must approve the transfer.

Thomas Tureen, attorney for the tribal council, said that once the Indians received title to the land the federal suit would be dropped.

The land includes Gay Head's only cranberry bog, Herring Creek and coastal land.

The tribal council president, Wenonah Silva, told the town meeting the tribe planned to seek federal aid to use the land for agricultureal purposes. She said nothing would be done to damage the environment and that the land would be kept in as near a natural state as possible.

Indians Using Rights To Regain U.S. Lands

HELENA, Mont., Dec. 12 (AP). —American Indian tribes are using their rights as U.S. citizens to reassemble Indian nations by claiming sovereignty over land long ago conquered, developed and governed by European settlers and their descendants.

In Maine, Indians claim half the state. In Washington, a court ruled they own half the fish.

On reservation after reservation, if an Indian or non-Indian breaks tribal law, the tribal court can fine or jail the violator.

At the same time, a multistate, anti-Indian organization alleges that federal Indian policy is "giving America back to the Indians."

On the other side, the National Congress of American Indians put it bluntly in a resolution passed in October: "Indian tribes possess all inherent powers of sovereignty and self-government."

'Indian Countries'

The natives do not call the remnants of their homeland "reservations" much anymore. They are now known as "Indian countries."

"I had no idea there are nations within our nation," said Kevin O'Connell, a town councillor from Mashpee, Mass., the Cape Cod resort town being besieged in court by Indians not officially recognized as a tribe by the federal government.

Mr. O'Connell made his observation at a rencent meeting here called by the 10 members of the Interstate Congress for Equal Rights and Responsibilities.

"It seems that every time someone asserts a legitimate right against someone of the Indian race, he is a bigot and anti-Indian. We are not anti-Indian but rather are legitimately being watchful of individual rights," said Howard Gray of Seattle, board member and pamphleteer for the congress.

Another visitor at the meeting said, "I think we all have a common enemy here—the radical Indian."

Tourists Scared

Bud Wolfe of Hayward, Wis., added that his neighbors and former friends, the Indians of the Lac Courte Orielles Reservation, are trying to ruin his fishing business. They circulate news releases warning tourists of white-Indian confrontations in the area each summer, he said. There have been no confrontations but fishermen have stayed away, he said.

When the leaders of Lac Courte Orielles established their own reservation law and order code, Mr. Wolfe formed a Citizens League for Civil Rights, of which he is president. He said the code has created a blanket jurisdiction by Indians over natural resources in the area and over non-Indians.

The Lac Courte Orielles code is one of dozens of similar systems which have arisen in the last few years. The impetus for such codes is one set up by the Utes of the Uintah-Ouray Reservation, now facing court action backed by Utah. When the reservation for the Utes was established, the boundaries were defined as the Uintah River drainage, assumed to be the mountain top on all sides of the area. This was later reduced by presidential order and congressional action to homesteaders.

Foes of Indian sovereignty argue that the tribal systems offer subject non-Indian citizens authority which does not always achieve power democratically. "Some tribal leaders are elevated to their position simply by birthright, others appointed and a few are elected by the standard democratic procedure," Mr. Orr said.

Merle Lucas, a Sioux and Montana's state coordinator of Indian affairs, calls such a claim "wild assumption." Mr. Lucas said he knows of no tribal government in the country which is not chosen democratically and in political contests more open than almost all other U.S. campaigns.

Aged Residents' Illegal Pipedream Becomes a Reality in Hope, Idaho

HOPE, Idaho, Dec. 12 (AP).—An attempt by a citizens' brigade in this retirement community to replace part of its municipal water line has been declared illegal because it did not involve the bureaucracy.

The Idaho Department of Health and Welfare said Friday that the elderly residents toiling on Rounding Mountain had failed to follow state law and submit the project for review in advance.

But a DHW engineer said the state would not "raise a fuss."

The 94 residents of Hope, in Idaho's panhandle, are replacing about one-third of the cast-iron pipeline that brings water from a spring on the side of the 5,149-foot mountain.

The existing pipeline—70 years old and three-fourths of a mile long—is so leaky that a water fountain erected near city hall in 1906 by the Women's Christian Temperance Union does not work well.

Residents say they are doing the work themselves because a contractor would charge $80,000 for the job and they cannot afford a tax increase. They also object to the reams of government forms necessary to secure a federal or state water-system grant.

"We haven't taken any legal proceedings," said Gary Sturm, an environmental engineer with the DHW. "By the time we were informed the city of Hope was going to do the job themselves, they had already ordered the pipe.

"It came down to the fact the city had already put money into pipe so it wouldn't help for us to raise a fuss."

The pipeline project is also illegal because it was not designed by a licensed Idaho engineer, as required by law, Mr. Sturm said, "but it is not our department's responsibility to enforce this."

New Welding Problems Pose Threat for Alaskan Pipeline

By Margot Hornblower

WASHINGTON, Dec. 12 (WP). —New welding problems along the Alaska oil pipeline could cost millions of dollars to correct and could delay completion of the project, according to House investigators.

The 800-mile pipeline is about 95-per-cent complete. Oil is scheduled to begin flowing in July.

The new problems involve the installation of defective double-joint machine welds and falsification of weld safety X-rays, the investigators said. They also said the Interior and Transportation Departments and the Alyeska Pipeline Service Co., the firm building the pipeline, may have conspired "to cover up, or at least actively ignored" the new problems.

Double-joint welds—in which two 40-foot pipe sections are joined by machines at a welding yard and then transported to the pipeline—were not part of an intensive audit and repair program of the pipeline's field welds this year.

That program, undertaken after last year's revelations of widespread X-ray falsifications, examined 30,800 welds performed along the pipeline.

Faulty Work Reported

Three radiographers from one of Alyeska's two double-joint weld yards testified Friday before the House Commerce Subcommittee on Energy and Power that as many as 200 faulty machine-welded pipes may have been shipped to the pipeline and installed.

The radiographers said that when the error was discovered they faked the X-rays, under orders from their supervisor, an employee of the Bechtel Corp. engineering firm. The falsifications occurred from February to April of last year, they said.

X-rays of every pipeline weld are required because cracks could cause the buried part of the pipeline to leak as much as 500 barrels a day into the ground without being detected. A sudden rupture could spill 60,000 barrels before being fixed. The oil could melt the permafrost and cause extensive environmental damage, the subcommittee staff said.

The radiographers' allegations made under subpoena in an executive session of the subcommittee, raised questions about the 42,000 machine welds now buried or strung on stilts along the Alaskan tundra.

Ramifications

In a memo to the subcommittee chairman, Rep. John Dingell D-Mich., the staff investigators reported, "If these allegations are confirmed, the ramifications for the basic structural integrity of the pipeline and the ability of Alyeska to satisfy government regulations in time to begin operations of the pipeline on schedule would be enormous."

Interior and Transportation Department officials will be called to testify before the subcommittee Tuesday.

The subcommittee declined to release the names of the radiographers who testified Friday because they fear for their jobs and even their lives, staffers said.

Bechtel Corp. was relieved as project manager by Alyeska in May of last year but was left with quality control responsibilities. In March, after revelations of falsification of last year's field welds, Bechtel was stripped of all quality control and radiographic duties, the subcommittee staff said.

U.S. Suicide Rate Is Rising Among Pre-Adolescents

BELMONT, Mass., Dec. (AP).—The number of elementary school pupils who commit suicide is rising at a disturbing rate, according to a Boston-area child psychiatrist.

Dr. Peter Saltzman, director of McLean Hospital's Children Center, says children from 6 to 11 most often attempt suicide after a death in the family or separation or an argument with a relative.

"The most obvious reason they do it is the same as for an adult —to get back at someone," said Dr. Saltzman, 37, who specializes in treating youngsters who attempt suicide.

"They do it to call attention to a very desperate situation usually to a loss of a loved one."

According to a study Dr. Saltzman conducted, about 75 suicides of pre-adolescents were officially reported throughout the country in 1972, the last year his study covered. Only three such suicides were reported in 1958, he said.

Better Soviet Ties Urged of Carter

WASHINGTON, Dec. 12 (WP). —A committee of businessmen, professors and former government officials appealed to the incoming Carter administration last week to take the initiative in improving relations with the Soviet Union.

In a statement drafted by former U.S. Ambassador George Kennan, the American Committee on U.S.-Soviet Relations charged that relations with Russia have been "neglected, adrift and devoid of initiative" in the last year or two.

The group did not reveal details of the agreements which it seeks, though it did give high priority to strategic arms and other military limitations and recommended exchanges in trade, science, culture and other fields.

Piracy in Venice

VENICE, Dec. 12 (UPI).—Some one stole the Venice chief prosecutor's official motorboat for a joy ride, police said Friday. Officials found the boat moored near St. Mark's Square, a few hundred yards from a police station.

Associated Press.

SPECIAL—A phone installed lower on the wall for the use of people in wheelchairs has gone into service in Munich near a rehabilitation center for handicapped.

Painter Elmyr de Hory, 65, Imitated Well-Known Artists

IBIZA, Spain, Dec. 12 (UPI).—Painter Elmyr de Hory, 65, the subject of Clifford Irving's best-seller "Fake," died here yesterday, apparently of an overdose of barbiturates.

Mr. de Hory was found dead yesterday in his home on this Spanish island. He had been in court Tuesday to fight possible extradition to France on charges in connection with alleged painting frauds.

Elmyr de Hory was very worried about the ruling," his lawyer said. If the Spanish court granted the extradition, he was afraid that he inside French prisons his life would be in danger."

Mr. de Hory, Hungarian-born, was a specialist at imitating the style of modern masters such as Picasso, Matisse and Modigliani. He insisted that he never forged paintings but merely "re-created artists' moods."

A Friend of Irving

The bon vivant was once a close friend of Clifford Irving, the U.S. author who also lived on Ibiza and fabricated an "Autobiography of Howard Hughes." But Mr. de Hory said that Irving was wrong when he wrote in "Fake" that Mr. de Hory had faked certificates and letters to accompany artistic "re-creations."

In the later years of his career, Mr. de Hory signed "Elmyr" to his works.

At the time of his death, a major show of his pictures was being held at a gallery in Madrid and enjoying great success. The paintings were going at prices of more than $10,000 apiece, art sources said.

Mr. de Hory was born in 1911 in Budapest of a family of landowners, bankers and diplomats. He arrived in Ibiza in 1961 and bought a luxury villa over the main harbor. He lived in high style, with fast cars and flashy clothes. He had a monocle that often dangled from a gold chain.

Mr. de Hory's body was found by his young companion, American Mark Forgy, the Spanish newspaper El Pais said. El Pais called the death a suicide, but there was no immediate ruling.

Peter Lisagor

WASHINGTON, Dec. 12 (NYT).—Peter Lisagor, 61, nationally known journalist who was Washington bureau manager for the Chicago Daily News, died of cancer Friday.

He was described once by the senior official" of the State Department as a "strange phenomenon."

That official continued, "You rite for a newspaper that virtually no one in Washington reads. Yet you are one of the most influential newsmen in the nation's capital. You never make heroes out of public officials—that is perhaps an understatement—yet they respect you, they seek your advice and consider you their friend. You are the Renaissance man of the Washington press—equally adept at writing, reporting, television and commentary."

Thus Secretary of State Henry Kissinger shared a widely held view of Mr. Lisagor during the award this year of the Edward Weintal Prize for diplomatic reporting at the Georgetown University School of Foreign Service.

Mr. Lisagor joined the Chicago Daily News as a sports writer in 1939 before becoming a general-assignment reporter in 1941, when he joined the United Press. He served in the Army during World War II, was managing editor of the London edition of the Stars and Stripes in 1944-45 and editor of the Stars and Stripes magazine in Paris in 1945.

He was an editor of the Paris Post before returning to the Chicago Daily News in 1946 to take up general news reporting again.

Francesco Merli

MILAN, Dec. 12 (UPI).—Tenor Francesco Merli, 90, who sang in Italian operatic productions until the age of 84, died last night, friends said.

Nino Martini

VERONA, Italy, Dec. 12 (UPI).—Italian tenor Nino Martini, 75, one of the top performers at the New York Metropolitan and other U.S. opera houses in the 1930s, died of a heart attack Friday.

Ali Yavar Jung

BOMBAY, Dec. 12 (AP).—Ali Yavar Jung, 71, governor of Maharashtra State and a former ambassador to the United States, died yesterday.

Luis E. Tiant

BOSTON, Dec. 12 (AP).—Luis E. Tiant, 71, former star pitcher in the Mexican League and father of Boston Red Sox baseball pitcher Luis C. Tiant, died at Carney Hospital Friday.

Emery Kolb

GRAND CANYON, Ariz., Dec. 12 (AP).—Emery Kolb, 94, explorer, pioneer and photographer, who made his living photographing tourists on mules at the Grand Canyon, died yesterday.

It was estimated that he took pictures of 1.5 million tourists during the 73 years that he lived here. His studio was on the rim of the canyon.

Elmyr de Hory AP.

Peter Lisagor AP.

Dan-Axel Brostroem

MEXICO CITY, Dec. 12 (Reuters).—Swedish shipping magnate Dan-Axel Brostroem, 61, died here Wednesday of a heart attack while on his way to the Pacific resort of Acapulco, a Swedish Embassy spokesman said today. He was head of the Brostroem shipbuilding group in Gothenburg, Sweden.

Mark Rascovich

WEST PALM BEACH, Fla., Dec. 12 (AP).—Mark Rascovich, 59, author of the cold-war novel "The Bedford Incident," died here Friday after a heart attack.

Mrs. Lytle Hull

NEW YORK, Dec. 12 (NYT).—Mrs. Lytle Hull, 83, philanthropic grande dame of classical music who helped establish and support some of New York City's leading cultural institutions, died yesterday in Vassar Hospital in Poughkeepsie, N.Y., from post-operative complications following an accident.

Cadets at West Point Reject Proposal to Ease Honor Code

By William Claiborne

WEST POINT, N.Y., Dec. 12 (WP).—A proposal to liberalize the U.S. Military Academy's honor code by providing second chances for violators failed narrowly in a referendum Friday. It failed to receive the required two-thirds majority.

In the wake of the biggest cheating scandal in the academy's 174-year history, the cadets preserved by only 23 votes the tradition of automatic expulsion for violating the honor code, which states that a cadet "shall not lie, cheat or steal, nor tolerate those who do."

The vote was 2,523 to 1,295 in favor of the second-chance provision. In February a similar provision received a narrower majority vote.

Last year a majority of the 800-member junior class at the 4,000-member academy was implicated—either by official charges or allegations in affidavits—in a cheating scandal following a take-home examination in electrical engineering. More than 150 members of this year's graduating class were expelled or reassigned.

Friday's measure would have allowed honor committees to recommend exceptions to the sanction of mandatory separation in honor-code violations, in certain cases.

The exceptions would have included self-reported offenses, a demonstrated lack of knowledge of the honor system, mitigating circumstances and no previous violations. The recommendations, however, would not have been binding on the superintendent.

By rejecting the referendum, the cadet corps reaffirmed a policy established after World War I by then superintendent Douglas McArthur that the disgrace of dishonor should be punishable only by separation.

On a related matter, it was announced Friday that Brig. Gen. Walter Ulmer jr., West Point's commandant of cadets, had been transferred out of the academy by the Pentagon.

Gen. Ulmer, a stern but highly respected leader of the cadet corps and an outspoken critic of Army lawyers who defended students accused in last year's cheating scandal, is being reassigned as assistant commander of the 2d Armored Division at Fort Hood, Texas, Army officials said.

Gen. Ulmer, who was regarded by some Pentagon policy-makers as politically vulnerable because of his hard-line defense of West Point's honor code, was one of the academy staff's principal supporters of the second-chance referendum that was defeated in Friday's vote.

Amnesty Charges Guatemala With Mass Execution

NEW YORK, Dec. 12 (NYT).—More than 20,000 persons, many of them political dissidents, have disappeared or have been illegally executed in the last 10 years in Guatemala, according to Amnesty International, a human-rights organization.

In a 17-page report issued by its London headquarters yesterday, Amnesty International charged that "massive killings" began in the 1960s in the name of counterinsurgency, or pacification and anti-Communism. The report quoted various Guatemalan officials who justified the killings as a response to leftist and "common criminal" violence.

The report described alleged torture of peasants and labor leaders and quoted witnesses as having said that they had found mutilated bodies in plastic bags in lakes and rivers and mass graves in the countryside.

Amnesty International charged that such practices, which it said continue in the Central American country of 6 million, were carried out by security forces or by paramilitary groups. Amnesty asserted that these groups operated with "the knowledge and, at times, close cooperation of government authorities."

Comment on the report could not be obtained yesterday from Guatemalan representatives in Washington or New York City.

UN Panel Backs Namibia Revolt

UNITED NATIONS, N.Y., Dec. 12 (AP).—A committee representing all UN members has endorsed a resolution supporting the "armed struggle" for independence in South-West Africa. It was the first time a guerrilla war has won such official backing in the world body.

The resolution, approved Friday by the Assembly's Colonial Committee, also calls for free, UN supervised elections in the territory and an arms embargo against South Africa.

The white regime in South Africa controls the predominantly black territory, called Namibia by African nationalists, against the wishes of the UN. Black insurgents of the South-West Africa People's Organization are fighting a guerrilla campaign against South African forces in the territory.

Princess Fathia 1950.

Sister of Farouk Murdered in U.S.; Husband Charged

LOS ANGELES, Dec. 12 (UPI).—Princess Fathia, sister of the late Egyptian King Farouk, who lost her royal title and later her wealth when she came to this country to marry, has been shot to death by her estranged husband, police reported today.

The 45-year-old sister of the late Egyptian potentate was shot in her apartment here shortly before noon Friday. Her body was found by one of her three children, Rafik Ghali.

Her estranged husband, Riad Ghali, 56, shot himself in the head. He was taken to UCLA Medical Center, where he was reported in stable condition and placed under police guard. He was booked on suspicion of murder.

The couple was married in 1950, when Mr. Ghali was a member of the Egyptian diplomatic corps. They were separated seven years ago. Their marriage had caused a furor in Egypt because Mr. Ghali was a Christian and commoner while the princess was a Moslem. King Farouk stripped his sister of her royal title and also took away the title of his mother, Queen Nazli, now 81, who lived with the princess here.

Ulster Wedding Party Is Bombed; 52 Hurt

BELFAST, Dec. 12 (UPI).—A bomb blast injured 53 persons attending a wedding reception yesterday in a public house at Portadown, 25 miles from Belfast.

The bride, Mary Cullen, 18, was among six persons detained in a hospital. The groom, Martin Green, 17, received cuts and bruises and his father was seriously injured.

Private Group Aids Refugees Fleeing From Vietnam by Sea

By George McArthur

BANGKOK, Dec. 12.—The number of persons fleeing South Vietnam has been rising sharply in the last three months and for the first time a rescue mission is being undertaken to save refugees whose fishing boats founder at sea.

The mission is being underwritten by the World Conference on Religion and Peace, which has a 65-foot charter craft, loaded with food, fuel and life rafts, cruising the refugee route from Vietnam to Thailand and Malaysia.

Refugees have estimated that a large number of boats have been lost at sea. While such estimates are obviously speculative, enough sinkings have been confirmed to prove that the losses are indeed large.

A refugee-aid official said that in a recent seven-day period 157 refugees landed in Thailand. More have made it to Malaysia. The official said that in September about 350 refugees reached Thailand. In October the number was 447, and in November, 625.

The two major camps in Thailand for the "boat people" now contain about 1,400 Vietnamese. There are several hundred in Malaysia and more are scattered from Singapore to Indonesia to the Philippines.

"They are still arriving faster than we can keep track of them," a refugee-aid official said.

Charter Vessel Sought

Participants in a regional meeting of the World Conference on Religion and Peace, an international nonsectarian group, decided in Singapore recently to launch its refugee-rescue program.

In addition to its relatively small vessel already at sea, the group is advertising to buy or charter a small coastal freighter of 1,000 to 2,000 tons. A spokesman said it was hoped that the second vessel could be sent out quickly.

The group intends to appeal to Thailand, Malaysia, Singapore, Indonesia and the Philippines to take more refugees. Japan, the United States and Australia will also get such appeals.

The initial rescue mission has been started with a $60,000 grant from the Japanese chapter of the religious organization.

The action of the religious group has caused some diplomatic apprehensions in the countries involved, as well as among representatives of the UN High Commission for Refugees. It is something of an embarrassment since it focuses attention on how little help is being offered the escaping Vietnamese.

Soldiers Fire at Boat

BANGKOK, Dec. 12 (AP).—Vietnamese soldiers fired on a group of refugees fleeing their homeland in a fishing boat and killed a 16-year-old girl aboard the vessel, Thai provincial police said today.

The boat, carrying 20 refugees and the body of the girl, anchored this week off Songkhla Province, 455 miles south of Bangkok, the police said.

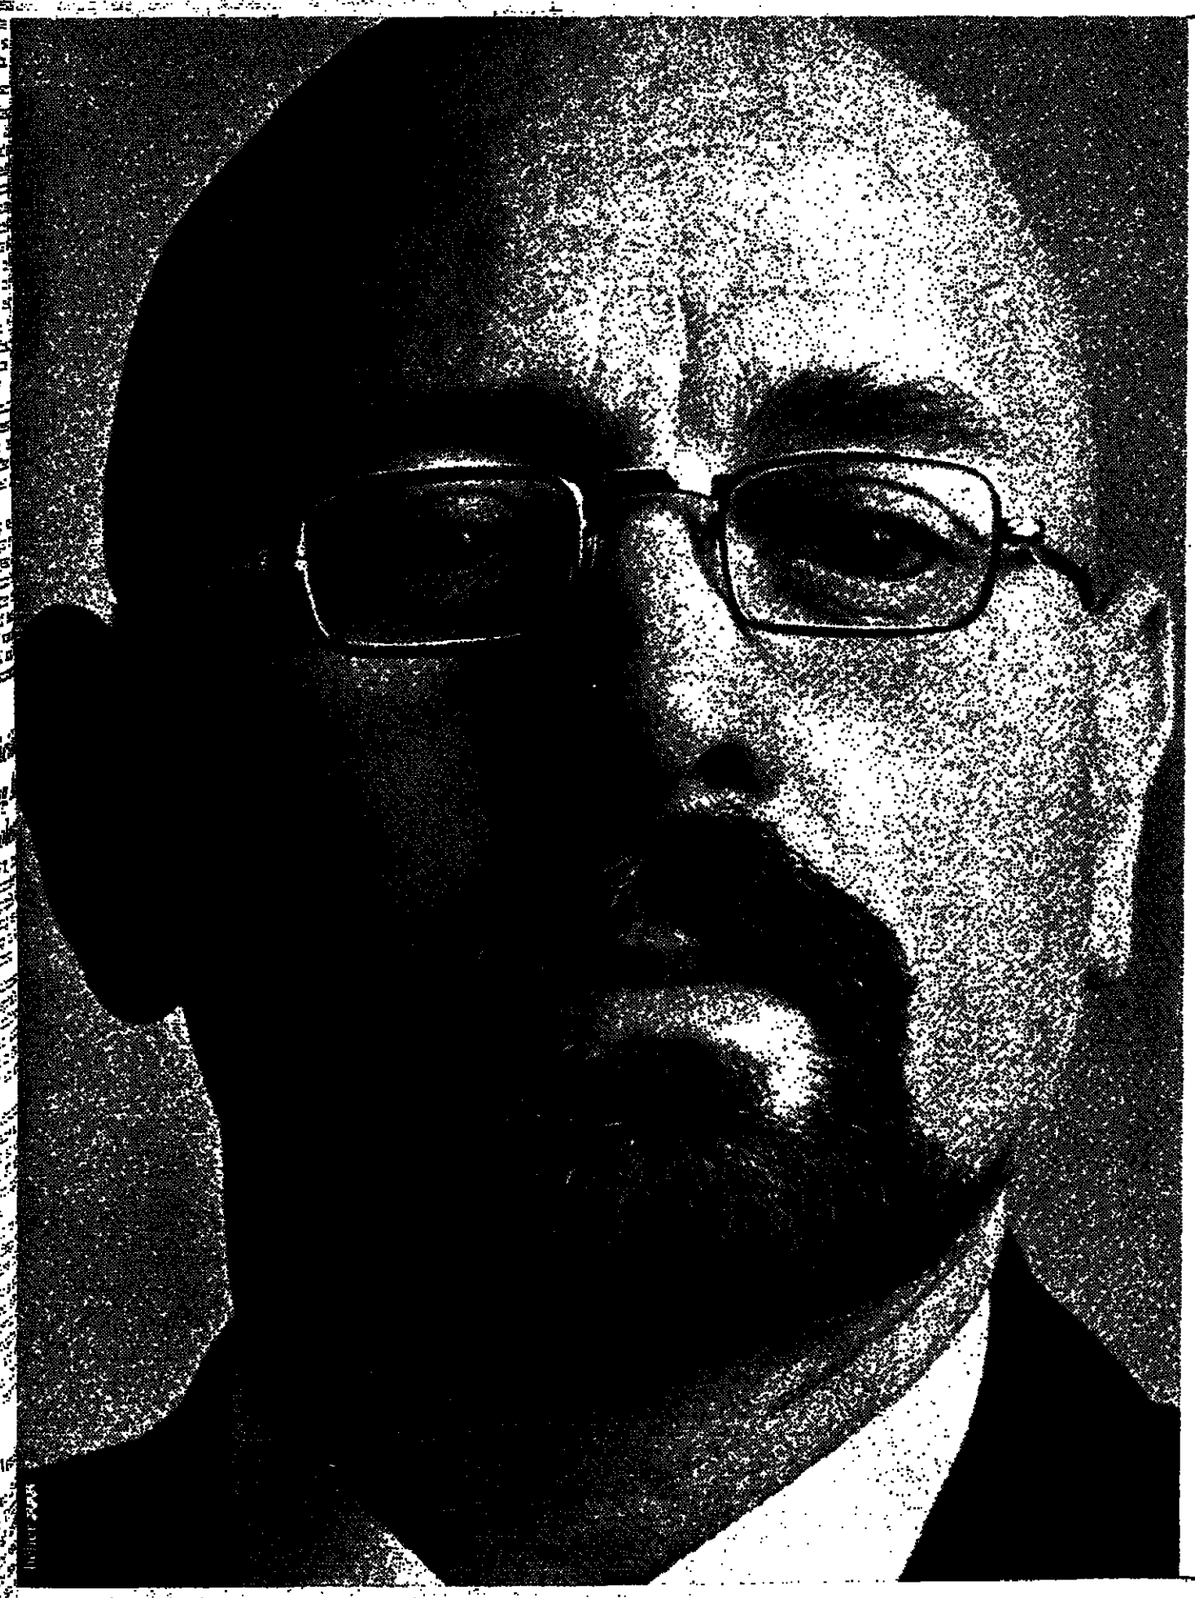
The Vietnamese told authorities they wanted to bury the girl in Thailand.

Philippine Storm Loss

MANILA, Dec. 12 (Reuters).—Tropical storms during the last week caused nearly 100 deaths in the eastern Philippines and an estimated $7 million damage.

The Soviet Press Assails NATO Bar On A-Arms Pact

MOSCOW, Dec. 12 (AP).—The Soviet press today assailed NATO's decision to reject a Warsaw Pact proposal that the two power groups in Europe pledge not to be the first to use nuclear weapons.



The Communist party newspaper, Pravda, and Tass published commentaries saying that the NATO decision Friday showed that the North Atlantic alliance is uninterested in reducing tension in Europe.

The NATO allies "pratically reaffirmed their allegiance to the 'nuclear intimidation' doctrine," Tass said. Pravda said Secretary of State Henry Kissinger and his NATO colleagues "came out against the new peace-loving proposal of the Socialist states."

The NATO foerign ministers said at the end of their two-day meeting in Brussels that they would not renounce the use of any means to defend themselves against attack. They called the Warsaw Pact proposal largely a propaganda device.

Warsaw Past Talks

VIENNA, Dec. 12 (Reuters).—Warsaw Pact defense ministers ended a two-day planning session in Sofia yesterday, and said they had reached decisions affecting alliance operations. The seven-nation alliance earlier had announced plans for closer coordination through a new joint secretariat.

Planned economies can produce tough bargainers.

Just ask any trade expert with experience of negotiating in Eastern Europe.

Potentially one of the world's most profitable markets, Eastern Europe is also one of the hardest to crack. Remember that the man opposite you at the bargaining table often wears, two hats:
he is not only a company manager but also a highrank state technician responsible for meeting the targets of the latest 5-year plan.

As the first French bank to have established active relations with Eastern Europe, Société Générale is well acquainted with this market, its people, regional differences and economic nuances.

Well represented by offices in Moscow, Berlin and Warsaw, we maintain excellent relations with the banks and Foreign trade agencies of all Comecon countries.

In France our Eastern Europe specialists can give you details on the nature of the different markets, on central purchasing offices and on precisely what the East Europeans are buying and selling. And of course they will put you in touch with the right people.

Our representatives in Eastern Europe will be pleased to assist you with market research promotion and contract negotiation.

Commercial field or finance, whatever your needs, Société Générale can help you. Everywhere.

NATO's Budget Dilemma

Henry Kissinger's valedictory address to NATO posed the fundamental dilemma that will confront the North Atlantic alliance during the Carter administration, as it has during most of the last two decades: How to maintain strong defenses and to build less hostile relationships with the Soviet Union.

"We have the task of security and the task of construction of peace," Kissinger said, "and the challenge to Western societies is whether they can pursue both policies simultaneously or slight one at the expense of the other."

The Soviet Union in recent years has been setting a fast military pace. A huge investment in strategic arms since the humiliation of the Cuban crisis of 1962 has replaced American superiority with effective parity. Since the Czech intervention of 1968 and the China border clashes a few months later, conventional forces have been increased by a million men.

New generations and added numbers of fighter aircraft, airlift planes, tanks, artillery, guided missiles, personnel carriers, trucks, and helicopters have appeared in Europe, increasing staying power as well as mobility, readiness, and the offensive capability for blitzkrieg warfare. At the same time, a coastal fleet has been turned into a blue-water navy that, together with enhanced airlift, now enables Soviet power to be projected almost worldwide.

* * *

West European military men are particularly concerned about impending deployment of a new generation of Soviet intermediate-range ballistic missiles, the mobile SS-X-20, tested with MIRV multiple warheads. The purpose of the Soviet military buildup, which now takes an estimated 11 to 13 per cent of Russia's gross national product, remains obscure.

NATO analysts discount a Soviet attack in Europe. Moscow remains intent upon détente and increased trade and credits to bring Western technology to the aid of a lagging economy. The contradiction was pointed up by Britain's Foreign Secretary Anthony Crosland, who called for restraint in commercial rivalry and Western soft loans that help the Soviet Union to divert so much of its own resources to defense.

That will not be easily achieved at a time when recession and high unemployment are accompanied paradoxically by inflation and payments deficits. Nor can Western defense budgets easily keep pace with Russia's real increase of 3 per cent annually at a time when there is an effort almost everywhere to curb inflation by reducing government expenditures. It is remarkable enough that NATO defense spending overall is not declining significantly.

But spending is not necessarily a measure of military capability. The need to modernize NATO military equipment over the next five to 10 years provides a challenge to achieve more efficient use of resources, particularly through increased standardization of weapons. With France participating for the first time in a new European program group, possibilities are now enhanced for joint arms procurement by NATO's European members and a "two-way street" in arms sales across the Atlantic, which have been 8 to 1 in America's favor.

* * *

In Central Europe, NATO countries have fielded 3 different families of combat aircraft, 22 different anti-tank weapons and seven different main battle tanks. There is not even a standardized rifle bullet, although this once existed, nor a standard nozzle that would enable jet fighters of NATO nations to refuel easily at each other's airfields. The lack of standardized communications systems saw half the maritime patrol aircraft in a recent NATO exercise theoretically destroyed by NATO's own guns.

Apart from the military inefficiency introduced by NATO's hodgepodge equipment, the economic cost of duplicating research and production programs is enormous. NATO's former supreme commander, Gen. Andrew Goodpaster, estimated in 1974 that the alliance was losing "at least 30 per cent and in some areas 50 per cent of our capability due to the lack of standardization"—a $12-billion loss.

More progress has been made in standardization in the last few years than previously. The West German-American agreement to standardize major elements of their new main battle tanks is a substantial step forward. But the bulk of the job remains to be done. The NATO ministers, meeting in Brussels, have again paid lip service to standardization. The United States will have to take the lead in buying arms from Europe as well as selling them if lip service is to be translated into reality.

THE NEW YORK TIMES.

Progress on Terrorism

Any progress toward effective international action against any aspect of terrorism, however it be called, deserves commendation. The unusual coming together of Western nations, the Third World, and the Soviet bloc behind a United Nations proposal for an international treaty against the taking of hostages is a cause for celebration. The adoption by consensus in the General Assembly's Legal Committee of the resolution advanced by West Germany and 37 other nations assures passage by the Assembly itself.

In order to achieve this rare UN unanimity, the sponsors agreed to delete a provision specifying that the treaty should require the prohibition and condemnation of the taking of hostages and the prosecution, punishment, and extradition, where necessary, of the perpetrators. In return, Libya dropped its demand that the treaty apply only to "innocent" hostages—a provision the United States and others believed would be used to exclude Jews and white South Africans from protection.

Even with the softening of the instructions to the 35-nation commission that will be established to draft the treaty, the unanimous resolution represented a step forward, buttressing the opinion on Friday by Secretary-General Kurt Waldheim that there is now "much more readiness" for United Nations action against terrorism. If this will to cooperate endures, the commission may be ready to submit a draft treaty to the 32d General Assembly next year.

Most of the credit for bypassing obstacles raised particularly by the Arab states to block previous UN initiatives against terrorism belongs to the West German government that was admitted to the UN only three years ago. Bonn diplomats worked assiduously to persuade the Arabs that the carefully drafted resolution against the taking of hostages was not motivated by partisanship in the Mideast quarrel. They also lobbied effectively for the essential support of the Soviet Union and all the developing nations.

The hard work will really begin when the commission assembles next summer. But the unusual unity displayed at the UN on Friday augurs well for what would be the first UN-sponsored, globally applicable measure against terrorism, a malady from which not one of the 145 UN members is immune.

THE NEW YORK TIMES.

International Opinion

Soviet 200-Mile Limit

Japan believed the Russian action [extending its fishing zone to 200 miles] would not come this soon . . . It came on the heels of a miserable election defeat by the ruling Liberal Democratic party. The development greatly resembled the Russian move when Japan was on the verge of defeat in World War II . .

It is now not a question of the 200-mile zone period emerging. The period has already completely emerged . .

The Japanese government's handling of such a vital issue as fishery was sloppy . . It must strive to keep the damage to Japan at a minimum.

—*From Asahi Shimbun, Tokyo.*

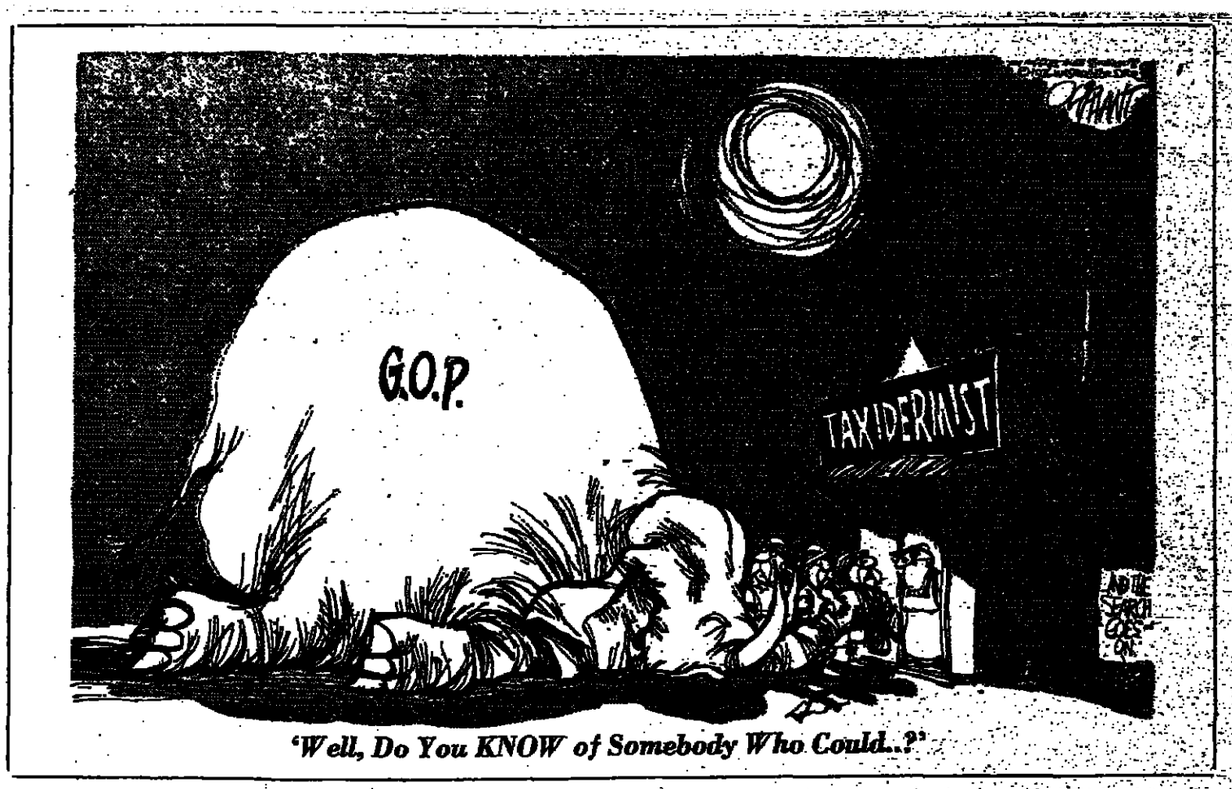
Portugal's Elections

The closing days of Portugal's crucial elections have been marred by bombings and clashes between police and left wingers. Although the identity of those who disrupted Lisbon's water supply is still unknown, their aim was clearly to undermine claims by Mario Soares, the Premier, that his minority Socialist government is the only one capable of ensuring stability. In most democracies electoral violence is counterproductive, and there is no reason to suppose that the incidents of the last few days will cost Mr. Soares votes . .

—*From the Financial Times (London).*

In the International Edition

Seventy-Five Years Ago



December 13, 1901

PARIS—The "freak" department of the Barnum and Bailey show in the Galerie des Machines has just been made still more attractive by the addition of two (or three) remarkable human specimens. One is known as Great Peter the Small, a little gentleman who tips the scales at nine pounds; the other (or others) are pretty girl twins, bound together in the same manner as were the Siamese twins.

Fifty Years Ago

December 13, 1926

WASHINGTON—By a strictly partisan vote of 14 to 10, the Ways and Means Committee of the House of Representatives definitely determined late last night that the matter of tax relief should not be considered in the present Congressional session. Through the motion the Republicans served notice on the Democrats that no surplus Federal funds would be used for "pork-barrel" projects in any way, shape or form.

'Well, Do You KNOW of Somebody Who Could..?'

Carter's Cautious Beginning

By James Reston

WASHINGTON.—The first thing Jimmy Carter did when he came to Washington after the election was to look at the transition budget of $2 million, glance over the proposed salaries of his transition staff, and then cut them all by roughly 30 per cent.

In a town where the cost of living is almost an incitement to grand larceny, this is one clue to the new skipper's approach to his job, but on other matters he has been less sudden. In selecting or psychoanalyzing the members of his team, he has turned out to be the most painstaking Cabinet maker since Chippendale, and in the process he has consulted a cast of hundreds.

Washington seems pleased with his performance so far. The period between election and inauguration is always hard on winners and losers alike. The winners have more family and official problems than they can handle and the losers have more regrets than they can bear, but everybody has behaved very well during these awkward moving days, and there is a tingle of anticipation in the air.

Ford Remote

President Ford has been a little remote, but there has been none of the grudging cooperation of the Hoover-Roosevelt or the Eisenhower-Kennedy transitions. The President has made available more information than the Carter team can swallow. He is packing up his papers and selling his house in Alexandria. And even Henry Kissinger, whose enthusiasm for anonymity is somewhat limited, has been pretending and joking about his departure.

When the secretary of state was asked during his farewell official visit to Europe to define his most important successes of the last eight years and, secondly, his most important failures, he replied, deadpan: "I don't quite understand the second part of your question."

Meanwhile, Carter and company have come to town and are available to all members of Congress, to Henry Ford and other leaders of business, and even to the press. Jody Powell goes on PBS television and discusses the cat and dog relationship between officials and reporters as if this were an inevitable and even amiable conflict.

Has there been a struggle between Hamilton Jordan and Jack Watson over the Cabinet? Sure, they say, but what's new in this? Are they not taking an excessive amount of time in picking Carter's team? Maybe, they say, but what's the hurry?

Washington hasn't seen anything quite like this since Roosevelt came to town in the early thirties, but there is a difference, sort of a cunning innocence about it all here now. Carter, for example, is taking his vice-presidential running mate seriously—an astonishing innovation! Mondale is in on the Cabinet selections, and is really being used as the first helpmate to the President-elect.

Also, there is a transition of leadership on Capitol Hill as well as downtown, and Carter, who was worried that he might have two Speakers of the House to deal with (Burton of California as well as Tip O'Neill of Massachusetts), has been consulting with O'Neill and the new House majority leader, Rep. Jim Wright of Texas, on the Cabinet and on the intricate relations between the new administration and the Congress.

Taking Time

One other thing: for the first time since Eisenhower, the President-elect seems determined to establish a Cabinet that operates as a serious executive committee of advisers on policy. He is taking his time in picking a national security "cluster" at State, Defense, Treasury and CIA that will really have something to do, and a "home-front" Cabinet at Commerce, HEW, Labor, Interior and Agriculture that will work with him as a team on the social and economic problems of the nation.

Carter, of course, is not the first President-elect who has dreamed of orderly government during the transition process. Nixon presented his Cabinet on television as a ministry of geniuses who would have both authority and responsibility, and then concentrated all power in his White House staff.

Kennedy selected a Cabinet, and then dropped men such as Abe Ribicoff into the bureaucracy of HEW, where they disappeared without a splash. Eisenhower thought of his Cabinet members as military "theater commanders" and gave them great power, but paid no attention to the awkward fact that they had contradictory philosophies. So we will have to see what becomes of Carter's well-laid plans.

About all that can be said so far is that he has made a cautious beginning, and is clearly not going to swallow his own campaign baloney. For the moment, he is reassuring all his doubting opponents and trying to create an atmosphere of confidence. He has been steadily amending his promises, and is beginning to grapple with the realities and conflicts of the budget.

Finally, there is a human courtesy in his manner—a willingness to wait and listen, a searching for talent, unmatched in any new president-elect in our time, and this has helped remove some of the doubts that attended his very close victory in the election last month.

"A president must choose among men, among measures, among methods," President Kennedy wrote just before he was murdered. "His choice helps determine the issues of his presidency, their priority in the national life, and the mode and success of their execution. The heart of the presidency is therefore informed, prudent, and resolute choice—and the secret of the presidential enterprise is to be found in an examination of the way presidential choices are made."

At this early point, Carter has made few choices, but those he has made have been reassuring to this political community.

Power, Pollution and Paralysis

By C. L. Sulzberger

LONDON.—The most dire and inescapable problem facing the contemporary world concerns allocation, use and price of energy. Moreover its ridiculous aspect is that enough time remains for every nation involved—developed, industrial, consuming lands; developing oil-rich lands; and underdeveloped lands, poor in both petroleum and industry—to agree on formulas for sharing available resources and needs.

Right now everyone seems to be moving along once again as if the 1973 petroleum OPEC embargo had never occurred. Adjustments have been made to price increases of between 300 and 500 per cent, even if these have had such extraneous effects as to put the supersonic Concorde aircraft virtually out of business because of the unanticipated exorbitant price of fuel.

The United States and other Western countries have done nothing worth mentioning about improving automobile engines so that more than 10 per cent of their fuel produces motion while the rest blows off in waste or pollution. They continue to manufacture cars too large to squeeze into their burgeoning cities.

The Thermostats

They install motors so powerful in these monsters that only fear of the law induces their drivers to observe imposed speed limits. They design and construct vast skyscrapers whose windows don't open so that they must depend on energy-consuming air conditioning, freezing occupants in summer, baking them in winter, according to dictatorial thermostats.

I recently discussed this in Brussels with various concerned persons including Viscount Etienne Davignon, Belgian chairman of a special European Community committee, Sir Christopher Soames, external relations commissioner of the Community, and Joseph Luns, secretary-general of NATO. All are alarmed.

Davignon says: "Until 1973 we lived in a dream world based on low-cost energy over which we had no control. What would we have done with statesmen who allowed us to depend for our military security on weapons over more than half of which we had no control? The 1973 oil crisis should have shaken us up but it was a missed opportunity for sane, coordinated reaction."

It produced, instead, hysterical competition among nations dependent on energy imports, regardless of price. Finally, in 1975, there was an accord to conserve fuel by decreasing consumption. But what happened? Soames comments: "It is disappointing that the brave words of the United States on energy conservation now seem to have been forgotten and have led to nothing. Both the United States and Europe should have come up with more effective programs."

No. 1 Offender

The United States is unquestionably No. 1 on the list of offenders. Almost self-sustaining in petroleum a decade ago, its imports are leading up together with its profligate over-consumption on frequently useless projects. Davignon says: "Americans, on a per capita basis, use twice the energy of Europeans and at half the price"—largely because of Washington's insistence on holding down fuel taxes.

Luns adds grimly: "NATO is worried about the energy position. The allies don't seem to realize how imperative it is to conserve fuel. Although some of our partners, like France and Holland, have taken steps, far from enough is being done. This is immensely grave. Until there is a settlement, we can always be subjected to price blackmail by producers."

Such a move is not expected right away. An imminent OPEC meeting is counted on to keep the next price rise moderate. But for how long? And, as far as that goes, do even producer countries benefit from the sudden multiplication of their wealth?

Saudi Arabia is swamped in so much money that it cannot even budget short-term or long-term use of billions in a dollar inflow not even dreamed of when the 1970s began. Why can't some of this idle wealth be loaned at cheap interest rates to industrial users of oil (who supply producers with manufacturing equipment) and at least partly donated in grants to the impoverished, undeveloped lands?

Position to Help

Meanwhile, the West is in a position to help Saudi Arabia solve its major short-term problems of importing fresh water by empty supertankers to store in reservoirs and also to educate a new technological class to start sharing in the industrial growth of their own country and perhaps in joint administration of user concerns abroad—provided these are not politically subverted.

Yet none of these dreams and projects—urgent as they are—can or will be solved without active U.S. participation and a forward-looking, imaginative U.S. energy policy. Therefore, as Davignon says (and here he speaks for much of the world): "We hope a top priority of the Carter administration will be this."

Letters

India Cult

The UPI article (IHT, Nov. 20-21), "India Sentences Five in Cult Killing of Six" is clearly a censored release from the official sources of Mrs. Gandhi's establishment in India.

It should be pointed out that the case of the Ananda Marg "The Way to Bliss" and the process of P.R. Sarkar have been investigated both by Amnesty International and the International Commission of Jurists. Various U.S. senators and congressmen, including George McGovern, have directly contacted the Indian authorities about his case because of their concern about the obvious lack of substantial evidence and disregard of proper legal procedures.

The sentence ending a six-year long process is nothing else than the confirmation that the judiciary power in India is a puppet in the hands of Mrs. Gandhi and that the wildest lies can become real offenses in order to frame Mrs. Gandhi's critics.

On June 25, 1975, when Mrs. Gandhi assumed dictatorial powers, about 2,000 centers of Ananda Marg (schools, orphanages, colleges, medical centers) were raided by the police, 500 monks and nuns and more than 1,500 others were arrested and many are still in jail waiting a process.

The only crime of the Hindu religious movement of Ananda Marg is its uncompromising stand against the corrupt system which has brought India further and further under the thumb of dictatorship.

OM PRAKASH BAHBA.

Soviet Jews

I am astonished at the apparent naiveté of Nahum Goldmann [President of World Jewish Congress]. Surely even Mr. Goldmann must know that there are no "official Jewish leaders" and there is no "official Jewish community" in the Soviet Union (IHT, Nov. 29).

Those appointed as synagogue officials (the few synagogues that the Soviets have allowed to remain) have been put there by the KGB. Not only were they not elected by any Jewish community but the Jews who want to remain Jews hold these "officials" in contempt.

The people whom Mr. Goldmann quite incorrectly refers to as "an illegal group" are the very people who are fighting for the preservation and the handing-on of Jewish national, religious and cultural values. All their activities and demands conform strictly with Soviet law and numerous international agreements to which the Soviet Union notionally subscribes.

All their efforts meet with bitter opposition, harassment, persecution and imprisonment from the Soviet authorities. What does Mr. Goldmann expect from the appointees of these very authorities?

BARBARA OBERMAN,
Chairman, Committee
for the Release
of Soviet
Jewish Prisoners.

Carter Gives New Hope To SALT-2

By Evans and Noval

WASHINGTON.—Apparent a ceptance by President-ele Carter of the Brezhnev-Kosy ger explanation for why SALT-2 agreement was n signed this year points to pr closely the same course that har liners had feared if Preside Ford were elected.

Carter recently blamed t stalled Strategic Arms Limit tion Talks on "an incompatibili among the [Ford] Cabinet ex pers" and election year politi Like Leonid Brezhnev and Hen Kissinger, the President-ele did not mention Soviet refus to budge an inch on critic points.

This position on SALT pres friendlier attitude toward t tente by President-elect Car than was shown by candida Carter add up to a positive rel tion to the Kremlin's new pe offensive. The first step could early negotiation of a SALT agreement along the lines of o pushed by Secretary of Sta Kissinger and Chairman Bre nev and opposed by the Ford D fense Department and Arms Co trol and Disarmament Agency.

Backfire and Cruise

At issue are two new weapo systems not specifically cover under the SALT-2 understan ing at Vladivostok: the Sovi Backfire bomber and the U Cruise missile. Typically, t Russians want an agreeme permitting unlimited Backfi production and virtually curta ing the Cruise missile.

Indeed, had President Fo won, he and Kissinger we ready to push just such a trea spruced up by some face-savi Carter's campaign statemen while cryptic, suggested he mig sacrifice the Cruise missile—pe haps too severe a loss for t U.S. arsenal—but only in retu for the Backfire bomber al being included under the strat gic weapons limit.

Carter's comments to Walt Cronkite on television Nov. represent a shift. Asked abo unpleasant surprises in tran tion briefings, Carter repli somewhat irresponsively b most significantly: "The lack progress in SALT because of uncertainty among the Ca inet officers and their opinio about what ought to be done. I can understand that the ele tion year in our country is time for delay, and for an a sence of commitment to the re olution of a problem."

Cronkite next posed a reveal able question: "Have you learn anything that would give you cause to believe the Soviet Uni has as much right to be suspi ous of us and our motives as w have to be suspicious of them?

Instead of snapping back a N no, Carter paused and said "I don't know how to answer th question." Then, again unresp sively but significantly, re he had asked Kissinger when the Russians had ever lied him. "And he said no," Ca reported, adding: "I know o one major falsehood could ju digitate an international cri but to know that has never o curred in Secretary Kissing experience is a very encouragi thing."

Persuasiveness

This extraordinary exchan reflects Kissinger's fabled pe suasiveness. One of many i stances where, contrary to Ki singer, the Soviets did not t the truth directly affects SAL Brezhnev's claim of a 1,000-mi range for the Backfire bomber one-third the softest-line U estimates; the more accura range may be 6,000 miles.

Carter was reacting favora to the Kremlin's peace offensi The message that Moscow thi no "test" for the new Presid but wants to pursue détente carried to him by such disparat couriers as Averell Harriman, year-old Democratic pioneer détente, and William Simo Republican secretary of t Treasury.

Whereas Ford-Kissinger a sires for a soft-line SALT agreement were opposed at t Pentagon by James Schlesinge and later by Donald Rumsfe there may be no such count weight in the Carter administr tion. Harold Brown, original frontrunner to become S cretary of defense, is an arde arms controller and foe of t Cruise missile. Secretary State-designate Cyrus Vance not renowned for swimming u stream.

Cyrus Vance and Jimmy Carter in Plains, Ga.

Respected, Unopposed

The Inevitability Of Post for Vance

By Leslie H. Gelb

WASHINGTON (NYT).—It seemed inevitable to the ...izens of the foreign policy ...id that President-elect Jimmy ...ter would select Cyrus Vance, ...o be his secretary of state, ...ng those who were consulted, ...yone respected him and no ...opposed him.

...r. Carter had made an issue ...Secretary of State Henry Kis...er during the campaign and, ...many respects, Mr. Vance rep...ented the anti-Kissinger.

...hat Mr. Carter and his aides ...rd about the tall, slender and ...ying Mr. Vance when they ...phoned around the country ...this: Solid, integrity, a heal... a liberal-moderate Democrat ... strongly favored détente with ... Soviet Union and arms con... a skilled negotiator who ... no gimmicks, cautious and ...effacing, fair, realistic in ...king within a consensus but ... a streak of moral idealism, ... former deputy secretary of ...se and diplomatic trouble...ter in the Johnson admin...tion, Mr. Vance was seen as ...reassuring figure to the world ... man able to get along with ...ongress that wanted a greater ...e in foreign policy.

...s he is called by friends, ...born a country boy with con...ions. His birth was in ...isburg, W. Va., on March 27, ... His father, John Vance, ...five years later.

Interest in Law

...hn Vance was a close friend ...John Davis, the unsuccessful ...ocratic candidate for presi... in 1924, and lawyer Davis ... Cyrus under his wing. ...nds say that Mr. Davis nur...d in him an interest in the ...and a lawyer's approach to ...lems.

...one who served with him ...e Pentagon in the 1960s re...d, "Cy wasn't a theorist; he ... the problems one by one ...hey came up, and solved ...."

...ter going to the Kent School ...Connecticut, Mr. Vance went ...o Yale. William Bundy, a ...mporary at Yale, and later ...-worker in government, re...bered Mr. Vance as "a re...able case of a guy who al...gave 100 per cent."

...Bundy specifically recalled ... playing together on the ...y team. "Cy was not a gift...ckey player, but he worked ... and became a first-stringer."

...e majoring in economics at ... he graduated from Yale ... School in 1942, then served ...stroyers in the Navy during ... War II.

...1947, he joined the New York law firm of Simpson, Thacher and Bartlett, and is today a partner in the renamed firm of Simpson and Thacher in New York City.

Ten years later, Mr. Vance was lured to Washington to help organize the investigation by the Senate Preparedness Subcommittee into Military and Space Programs. It was there that he met Sen. Lyndon Johnson, his entree into the Kennedy administration.

He started as general counsel in the Pentagon in 1961, then was secretary of the Army, then deputy secretary of defense. In the Pentagon, he developed a reputation as a good manager, an implementer of policy, a man able to get on with the military even when Defense Secretary Robert McNamara's relations with the military began to sour, and an incredibly loyal alter ego to Mr. McNamara.

He was known during those years to be a supporter rather than an advocate of the Vietnam war. His role in Vietnam policy-making is cloudy. Not until after the Communist Tet offensive of February, 1968, do former colleagues recollect where Mr. Vance stood.

In March, 1968, President Johnson gathered a group of so-called "wise men" to assess the future course of the war. At that time, Mr. Vance was among those who told the president that he had to stop the bombing of North Vietnam and begin the negotiations process.

Servedat Talks

In return for that advice, Mr. Johnson asked Mr. Vance to become the No. 2 negotiator to former New York Gov. Averell Harriman in the Paris negotiations. It was not the first time that Mr. Johnson had asked him to serve as a trouble-shooter since he left the Pentagon for health reasons in 1967.

He served as the president's personal observer in the Detroit riots in the summer of 1967 and later that year as the envoy to Greece and Turkey in their dispute over Cyprus.

Unlike many of his colleagues who left government, Mr. Vance did not write books and articles. His views on policy matters were learned mainly from those who worked with him at the United Nations Association and the Council on Foreign Relations.

All described his views as mainstream liberal Democratic: Making an effort to get along with the Soviet Union, reducing strategic nuclear armaments and conventional arms sales, being forthcoming to the developing nations in their demands for reform of the international economic system and a balanced position on Arab-Israeli issues.

Some of those who worked with him in the past consider him too much of a consensus man, waiting for positions and pressures to develop before taking a stand. Others say he has been more vigorous in stating his views in the last year. Still others like Mr. Bundy maintain that "he doesn't jump in right away but comes in before the outcome is clear, particularly on an issue with moral aspects."

Some maintained that Mr. Vance is not imaginative, but even many of these associates argued that the real need now in U.S. foreign policy was less imagination than integrity, steadiness, quiet perseverance and a willingness for self-sacrifice.

As one who has known him for a long time put it, "Cy doesn't say anything different publicly than he says privately."

Economic Pinch Forces Europe to Look to U.S.

By Flora Lewis

PARIS (NYT).—The major Western European leaders have come out publicly for an early summit meeting with President-elect Jimmy Carter. This slight breach of protocol, in advance of the inauguration, reflects the intensity of the Europeans' sense of need to know Washington's intentions, and indeed of their dependence on the plans and policies of the United States.

It is a rather drastic reversal of European attitudes from only two or three years ago. It was illustrated clearly at a recent Common Market meeting in The Hague: Instead of talking about establishment of European policies—which implies decisions made before consultation with the United States—and European power in the world, as they did in their winter meetings of 1972, 1973 and 1974, the Europeans decided in effect that they could not do anything until they heard from the United States.

The appointment of Cyrus Vance as Mr. Carter's secretary of state was a reassurance to the Europeans. But governments still feel blocked until they learn how the new administration is going to behave on oil prices, energy policy, raw-materials prices, relations with the Third World, Eurocommunism and a host of other pressing issues. The most important, perhaps, is the domestic economic policy.

Impact on Trade

"What we want to know more than anything is whether Mr. Carter is going to stimulate the U.S. economy or not," a top French official said recently. "The foreign policy questions will matter, of course, but our own economic measures at home are going to depend a lot on the American market and its impact on world trade."

Sensitivity to U.S. plans is greater now in Europe than at almost any time since the period immediately following World War II, when there was a feeling of almost helpless dependency. It used to be said in the late 1940s and early 1950s that "When the U.S. sneezes, Europe catches pneumonia."

It is no longer such a one-way situation. But the awareness of world economic trouble that no single industrial state or any small group of states can handle alone has gradually become acute.

Chancellor Helmut Schmidt of West Germany, feeling more secure than his European partners and yet most buffeted by their demands on his country's relatively strong economy, has been the most outspoken about the absolute requirement for full European cooperation with the United States.

Marginal Weight

Some other European leaders, recognizing, however sadly, their marginal weight in shaping the grand-strategy decisions ahead, have focused on narrower interests of direct importance to their own countries as they await Washington's voice—although they, too, are immediately concerned with global issues.

Thus Premier Mario Soares said recently that he hoped the new U.S. administration would go through with the substantial aid program for Portugal, not only because the economic support was essential but because of its political implications.

'What we want to know more than anything is whether Mr. Carter is going to stimulate the U.S. economy or not,' a top French official said recently. 'The foreign policy questions will matter, of course, but our own economic measures at home are going to depend a lot on the American market and its impact on world trade.'

"It's an American bet on our democracy," he said. "It means there won't be an attempt to asphyxiate us, like Chile, and everybody will understand that so it will bring confidence from others."

Spain's Socialist leader, Felipe González, was less sanguine in his hopes about U.S. policy concerning Spain, but he said: "It will make quite a difference if there is just a feeling that the U.S. isn't going to try to block democratization." The key problem, in the eyes of the Spanish political opposition, is whether the United States takes a stand, however privately, against legalizing the Communist party.

Danger Seen

Mr. González is no more pro-Communist than Mr. Soares, but he and other opposition leaders feel that it would be both improper and dangerous to leave the Spanish Communists out of the open interplay of the country's newly emerging politics. And they are convinced that the United States has supported Madrid's decision to keep the Communists underground.

Italy, whose Premier, Giulio Andreotti, rushed to Washington without waiting for formalities, is also holding its breath almost as much on the issue of Eurocommunism as on crucial money matters. In a behind-the-scenes way, Mr. Andreotti is already working with the Italian Communists.

But Washington's stand on a more open and visibly responsible arrangement will be of great importance to Italian politics, and, in consequence, to Italy's chance of a successful economic austerity program.

Israeli leaders, preparing for negotiations with the Arabs that seem more and more likely to be held in early spring, are always extremely concerned about Washington's views. At the moment they want above all to be assured that they will be consulted before new policies are decided.

Economic Questions

The biggest question marks, however, are economic, and that is the underlying reason for the shift in Europe's attitude.

The change stems from the 1973 oil crisis. First there was panic, then a frantic attempt, led by the French, to seek special relations with and therefore special treatment from the Arabs. Then there was a calmer period. Governments began negotiations about oil and other raw materials, developed domestic economic-recovery programs and tended to feel that the worst of the crisis had passed.

Now that is seen as an illusion. In the leaders' view, the basic structural changes in world economic affairs that were precipitated by the oil crisis are coming into focus. For one thing, the financial disruption caused by the sudden multiplication of oil prices is now believed to have been more or less solved by the United States, and by scarcely anybody else.

Japan rid itself of a severe balance-of-payments problem with an export drive that knocked a series of European industries dizzy. Now there is a serious Japanese-European trade disequilibrium that has led to a threat of European protectionism.

Soaring Debts

The relatively poor Third World countries have become perilously poorer, with vastly soaring debts they cannot manage.

Even the United States, whose plan for "recycling petrodollars" brought in enough oil money to leave its payments in fair shape, is now what many bankers consider a dangerously overstretched creditor to borrowers who will not be able to pay. "The fact is," a banker said, "the Arabs sent us the money, all right, for us to loan out. But they are assured of the income and we're taking all the risks."

Meanwhile, there is pressure from the oil producers for the industrial countries on pain of having to pay much more for their oil, to make far-reaching concessions to the developing countries.

The major Western European governments have given up the idea of trying first to work out a Common Market policy in response, since it is now obvious to them that it will not work except in tandem with the rest. Foreign Minister Max van der Stoel had said with bluster that the Netherlands would take a stand favoring the Third World on its own. But now even the Dutch have decided to "reconsider" such an ideological luxury and see what the others do.

France, which insisted on launching the North-South conference to work out "a new world economic order" in the first place, has muffled its voice and is concentrating on critical domestic political and economic maneuvers until the Atlantic horizon is clearer.

It adds up to a greatly increased U.S. responsibility and stake in the well-being of the West. "Give them time, let them figure out their plans," Chancellor Schmidt was overheard grumbling to European colleagues who were impatient for answers from the United States.

An Election Shows How to Get to the Top in Congress

By David E. Rosenbaum

WASHINGTON (NYT).—The surprising election last week of Rep. Jim Wright of Texas to be the majority floor leader in the House illustrates two critical points about the way party leaders in Congress are selected.

The first is that leadership races turn much less on the ideology of the candidates than on their personalities. The second is that leadership races, because they are decided by secret ballot, are inherently unpredictable.

On the first point, there is no doubt that Rep. Wright is considerably more conservative than are most of his Democratic colleagues. There is also no doubt that, over the years, he has avoided making enemies. While a sizable number of House Democrats actively dislike the two other principal contenders, Phillip Burton of California and Richard Bolling of Missouri, there are few who dislike Rep. Wright.

According to Congressional Quarterly, Rep. Wright voted against the position taken by a majority of the House Democrats 30 per cent of the time in the 94th Congress. By contrast, Rep. Burton voted against most other Democrats on only 3 per cent of the votes, Rep. Bolling on 8 per cent and Rep. Thomas O'Neill jr. of Massachusetts, who was elected without opposition to be speaker of the House, on 6 per cent of the votes in the last two years.

Endorsed Nixon

Rep. Wright consistently opposed limitations on the war in Vietnam. In 1969, he sponsored a resolution that was approved by the House that endorsed former President Richard Nixon's

Rep. Jim Wright.

Vietnam policies and, in the spring of last year, he was one of only 72 House Democrats who voted in favor of the authorization President Ford sought to use troops to evacuate South Vietnamese from Saigon.

The Texan's civil rights record is mixed. He voted against the Civil Rights Act of 1964, which forbade discrimination in public accommodations, but he voted in favor of the Voting Rights Act the following year. He has regularly supported legislation that sought to limit the use of busing to desegregate public schools.

Rep. Wright has generally favored federal spending for jobs, housing and other social programs, but he has taken the side of the major oil producers on energy legislation. He voted for the deregulation of natural gas prices, for increased crude oil prices and against repeal of the oil-depletion allowance.

Despite that moderate-conservative record, Rep. Wright clearly picked up the votes of dozens of liberal Democrats on the third and final ballot last Monday, on which he defeated Rep. Burton, 148 to 147.

There was a consensus among House members Tuesday that Rep. Wright's victory was the result primarily of votes by Democrats who were willing to vote for anyone but Rep. Burton. "I was afraid of Phil Burton; he is too hungry for power," a Midwestern liberal said.

In the Background

In the tradition of leaders of the past, Rep. Wright has stayed in the background during his 22 years in the House, smiling often, respecting his elders, aiding colleagues, making friends and seldom taking the lead on an issue that might have forced him into a conflict.

Neither Rep. Wright nor Rep. O'Neill is known as a vigorous advocate of positions on which there is strong disagreement within the party. That is not coincidental. The other leaders of the House in the last decade —John McCormack, Carl Albert and Hale Boggs—were similarly not noted for their individual legislative accomplishments.

What House Democrats seem to want in a leader is a politician who can find a consensus, not one who will try to shape it. They feel perfectly capable of deciding on their own what to do on legislative matters, but they want a leader who will help them with their political problems. Rep. Wright, in his acceptance speech Monday, promised to be a "good listener." That was what his colleagues wanted to hear.

Rep. Burton and nearly all

Rep. Thomas O'Neill jr.

others who follow the House carefully believed that the Californian had the race locked up. The conventional wisdom before the election was that Rep. Bolling, not Rep. Wright, was Rep. Burton's chief threat.

Low Man Out

There was even speculation that Rep. Burton had swung a few of his votes to Rep. Wright on the second ballot in an effort to drive Rep. Bolling out of the race under the low-man-out rule that the caucus had adopted. Indeed, if Rep. Bolling had won three more votes on that ballot, it would have been he and not Rep. Wright who faced Rep. Burton in the runoff and the Missouri congressman might well have then been elected majority leader.

Rep. Burton denied that he had intentionally thrown away second-ballot votes. Rep. Bolling remarked, "That's always a possibility but I can't prove it."

Looking ahead, it is possible to envision a number of consequences of Monday's leadership election. First, Rep. Wright clearly appears willing to follow Rep. O'Neill's lead, just as Rep. O'Neill did not challenge speaker Carl Albert during the last four years. Had Rep. Burton, or even Rep. Bolling, been elected, Rep. O'Neill might have had to concern himself with a majority leader who was attempting to construct an independent power base.

Second, the outcome could not have been better for President-elect Jimmy Carter, although there is no evidence that Mr. Carter or his aides took any part in the election. The O'Neill-Wright team seems likely to press hard for the Carter legislative program and to be less apt than others might have been to try to add their own ideological stamp to the proposals from the White House.

Election Sleeper

Finally, the sleeper in Monday's elections may have been Rep. Thomas Foley of Washington, who was elected to replace Rep. Burton as caucus chairman. Rep. Foley, who is now chairman of the Agriculture Committee, is an enormously popular, highly respected liberal whose views are much more in line with those of the majority of Democrats than are Rep. Wright's. Rep. O'Neill is 64 years old and, if Rep. Wright hopes to move up to the speakership when Rep. O'Neill leaves office, he may well be challenged by Rep. Foley.

The House Democratic elections were only the first of a series resulting from one of the most extensive turnovers in congressional leadership in history.

Next month, for example, Senate Democrats will choose a majority leader from among Robert Byrd of West Virginia, Hubert Humphrey of Minnesota and Ernest Hollings of South Carolina. Sen. Byrd believes that he is well ahead.

But, as the House elections showed, surprising things can happen when members of Congress pick one of their own by secret ballot.

U.S. in Shift On Marijuana Imprisonment

Ford Administration Questions the Policy

By Ronald J. Ostrow

WASHINGTON.—The Ford administration last week eased its stand against removing criminal penalties throughout the United States for marijuana possession, saying for the first time that the issue should be discussed.

Robert Dupont, director of the National Institute on Drug Abuse, described the change as "a very positive step" and said that it was the first time that "any presidential-level document" had taken such a stance.

The shift was announced in a 56-page policy statement issued by the Strategy Council on Drug Abuse, and entitled "Federal Strategy for Drug Abuse Prevention."

The policy previously had been that persons convicted of the federal offense of simple possession of marijuana should no longer be jailed—but that the federal government should not attempt to influence state and local authorities who enforce most marijuana possession statutes.

Now the federal government is questioning whether criminal penalties for marijuana possession are too costly a form of enforcement.

Use Is Opposed

The policy paper and Mr. Dupont stressed that federal policy remains firmly opposed to the use of marijuana and favors steps to discourage it.

Mr. Dupont estimated that there are 400,000 arrests for marijuana posession in the United States annually. "If you assume they cost [the taxpayers] only $100 apiece, a very minimal estimate, that comes to $40 million a year," he said.

The strategy paper said the threat of a criminal sanction undoubtedly discourages some potential marijuana users but that "society pays a relatively high price for this form of deterrence: high in terms of stigmatizing casual users with criminal records: high in terms of diverting limited criminal justice resources from other, more serious matters, and high in terms of contributing to an atmosphere which nurtures disrespect for the law."

The strategy paper called for studying the experience of eight U.S. states and three countries that have been experimenting with different versions of reduced penalties for marijuana possession.

Waldheim: Perfecting the Machinery of Diplomacy

By Peter Grose

UNITED NATIONS, N.Y. (NYT).—In his first term as UN secretary-general, Kurt Waldheim strove to perfect the technical machinery of diplomacy.

This, rather than any singular policy initiative, has been his contribution in world affairs. There is no "Waldheim doctrine" on any subject.

Perhaps because of the lack of flair in his work, the Viennese diplomat is often unnoticed by the general public, as he discovers to his dismay sometimes when he waits in line for an airliner during some diplomatic mission.

Criticized for a blandness that has allowed the United Nations to slip from popular awareness, overshadowed throughout his first term by the spectacular personal diplomacy of Secretary of State Henry Kissinger, Mr. Waldheim has had to struggle against a common suspicion: not that he was performing a mischievous or destructive role in world affairs but rather that he was performing no role at all.

Last Tuesday, two weeks before his 58th birthday, Mr. Waldheim won Security Council endorsement to continue in office. Official re-election by the General Assembly remains as a formality.

"So much in modern diplomacy depends on an incredible morass of formalistic detail—the shape of the negotiating table, who contacts whom first, the shading of phrases in a sensitive document," —said a senior veteran of UN diplomacy. "Most of us don't have the patience or the imagination to worry it through, yet what seems like trivia, if handled clumsily or without careful thought, could blow the whole thing up."

This is the side of diplomacy —the technicalities and procedures—in which the former foreign minister of Austria excels.

'Mailbox' Role

Mr. Waldheim himself cheerfully admits that he often feels like a mailbox. Governments these days often need a neutral party to take some initiative, he says, or to convey some communication that for any number of reasons cannot be handled directly—"So here I am."

Moreover, many of the problems now facing the world's governments are global in character —economic relations, environmental protection, hunger and population distribution. No two governments or blocs can resolve such matters by themselves. Hence the need for an international structure of institutions, with the UN secretary-general at the summit.

Each of the four occupants of the world body's top executive post has brought his own style to a job that can hardly be defined except as an extension of its holder's personal inclinations.

Mr. Waldheim's two immediate predecessors, U Thant of Burma and Dag Hammarskjold of Sweden, were deeply spiritual men. Mr. Waldheim, according to those who know him best, is first and only an activist who believes in the virtue and utility of constant motion, even when he knows better than anyone else that the motion is not getting anywhere.

As he puts it, even when governments are not yet ready to move it is better to keep them talking and exchanging messages. Then when they are ready, he says, the channel will be open and available. This is the diplomatic technique he has used repeatedly for conflicts in Cyprus and the Middle East.

Neutral Presence

Sometimes Mr. Waldheim's mere presence as a neutral person had made negotiations possible, as at the opening session of the Middle East peace conference in Geneva or the numerous levels of contact between Greek and Turkish Cypriot negotiators. The phrase "under UN auspices"—which as often as not means the person of the secretary-general —has achieved a political significance of its own in various conflict situations, including southern Africa.

Mindful of the fate of his predecessors, all of whom ran afoul of one or another of the big powers upon which the secretary-general's effectiveness depends, Mr. Waldheim, who took office in 1972, protected his standing with the five permanent members of the Security Council.

One highly combative UN delegate who has known the world body through all four secretaries-general gave to Mr. Waldheim a grudging tribute that he said could not ultimately have been paid to any of his predecessors.

"With Waldheim," this diplomat said, "we always knew that he was honestly trying to be objective."

United Press International.

Kurt Waldheim in his office at the UN.

IN THESE UNCERTAIN TIMES
only a bank like SOBI can offer you higher yields with no risk... and, above all, no worry.

8.60 to 12.20%

For the last 20 years, SOBI has been offering its depositors a choice of three different account plans based on a progressive interest-earnings formula. (Minimum deposit of 5000 francs)

Why not write for full information:

SOCIETE DE BANQUE ET D'INVESTISSEMENTS
26, bd d'Italie 601 V / B.P. 31
MONTE-CARLO (principauté de Monaco)

* Affiliated with the Société Bancaire de Paris and the Landesbank Rheinland Pfalz.

Paucity of New Issues Pushes Up Dollar-Denominated Eurobonds

By Carl Gewirtz

PARIS, Dec. 12 (IHT).—Prices in dollar-denominated Eurobonds rallied sharply last week.

The bargain hunting was helped by the paucity of new issues on offer and the generally favorable outlook for interest rates. The flow of new issues traditionally slackens just before the holidays and this year—with volume running at a record pace—the slowdown is giving portfolio managers the breathing space they sought to prepare their year-end reports.

But investors were on the prowl, looking to position themselves for the further decline in interest rates which is widely anticipated. Gains of a point (1%) were common and paper issued by U.S. companies rose 1 1/2 to 2 points. Hectic buying was also apparent in the Canadian dollar market, where prices had fallen sharply in the wake of the Canadian dollar's recent sharp loss on the foreign exchange market.

The latest report of an increase in the U.S. money supply had no effect on the demand and it is apparent that investors believe that variations in the money supply have taken a back seat to the administer performance of the U.S. economy as measured by declining industrial production.

Prime Rates Cut

This view was confirmed Friday when Morgan Guaranty Trust cut its prime rate to 6 per cent and Citibank lowered its rate to 6 1/4 per cent, both down a quarter of a point.

The consensus view is that money-market rates could decline by another quarter of a point, putting the federal funds rate in New York to 4 1/2 per cent and the three-month Eurodollar rate at just under 5 per cent. Even without this decline, coupons are likely to be driven lower by the high liquidity of investors and the wide spread between bond yields and the returns available on other types of investments, which is attracting funds to the bond market.

The most immediate threat to coupons being driven lower is anticipation that the volume of new issues next month is likely to challenge the record set last January when some $2 billion worth of issues were launched. However, the current buying spree in the secondary market would indicate that many investors believe the balance of factors favors some further easing of rates.

Among these factors is the large amount of money flowing into the market from payment of interest and principal on outstanding issues. According to Orion Bank, such "reflows" total $480 million this month, $319 million in January and $467 million in February. The February reflows can be used for purchases next month as many of those issues will be payable in February.

Another source of "new" funds for the market is the diversion of assets from the deutsche mark to the dollar. At present, the difference on the rate of interest paid on short-term deposits between dollars and DM is almost nil—an important factor in depressing the value of the dollar on the foreign exchange market to around 2.39 DM.

Expensive Proposition

The dollar has been below 2.40 DM in only two recent periods—the first six months of 1975 and for a six-week stretch in mid-1973. Thus, the likelihood of the dollar falling lower and staying there is small. This means that buying DM now looks like an expensive proposition—the more so when one considers that coupons offered on DM investments range up to almost 3 percentage points below those offered on dollar bonds. Under these conditions, investors who seek a diversified portfolio are said to be building up the dollar portion and delaying new DM investments.

While the coming calendar year is expected to include borrowers who are notorious for pushing very hard to squeeze the market for the lowest possible rates, it is very possible that they will opt for a lengthening of maturities rather than an actual lowering of coupons. The bulk of the loans floated this year have been in the five to seven-year range. But of late, there have been a number of 10-year "bullets"—issues with no provision for early amortization—and, significantly, the year is ending with two 15-year issues on offer.

Norges Kommunalbank is seeking $60 million in a 15-year issue carrying a coupon of 8 1/2 per cent. Pricing is expected to be at a slight discount. A sinking fund will reduce the average life to 9 1/2 years. While the paper of the state-owned institution is

New York Stock Market

NEW YORK, Dec. 12 (NYT).—Stock prices raced higher last week as Wall Street's sentiment was buoyed by both tangible and intangible factors.

The Dow Jones industrial average soared 22.60 points to finish at 973.15, or its best level in more than two months. Meanwhile, the broad list of stocks, including many secondary issues, performed even better than the venerable Dow.

American Telephone closed out the week with a flourish at 64—its best price in a decade. The decline in interest rates—one of the tangible fuels in last week's market—has tended to shore up the price of such interest-sensitive stocks as Bell Telephone.

On the intangible front, hopes ride high that President-elect Jimmy Carter will stimulate the economy without stimulating the rate of inflation.

"The man from Georgia," one mutual-fund executive remarked Friday in praise, "is acting more like a president than he did as a candidate."

During the week, such groups as oil and gas issues, the banks and the golds all had their turn in the sun. Wall Street's search for oil issues ranged from the stock exchanges to the over-the-counter market. For example, Equity Oil, an over-the-counter issue, was quoted at 41 1/4 bid on Friday afternoon, compared to 28 bid at the end of October.

Municipal bond prices, remaining strong, moved up to their best levels since mid-1974. Corporate bonds, meanwhile, were hit by a bit of profit-taking after their strong surge of recent weeks.

On Friday, the Morgan Guaranty Trust Company gave investors a pleasant surprise by cutting its prime rate to 6 per cent from 6 1/4 per cent, while more than a dozen other major banks trimmed their prime to 6 1/4 per cent from 6 1/2.

Big Board volume during the week totaled 133.2 million shares, compared with the previous week's 103.7 million shares.

The U.S. Economic Scene

How Things Look From Houston to Los Angeles

By Thomas E. Mullaney

LOS ANGELES, Dec. 12 (NYT).—The position, problems and prospects of the U.S. economy are seen here and in other parts of the southwestern corner of the nation in much the same light as they are viewed elsewhere, but with a few subtle exceptions.

Almost everyone in these parts agrees that the economy needs some stimulation, via the tax rate, to get economic activity into higher gear. However, there is stronger sentiment in this area for some significant tax relief for business, as well as consumers, in the interests of spurring new capital investment to create additional jobs.

There is also greater worry about the level of inflation and fears that it might be increased by the programs expected to emanate from the incoming administration and the Democratic Congress. In conversations with bankers, businessmen and economists in several states, a recurrent theme was the need to keep federal spending under control to avoid a new surge in inflationary pressures and expectations.

Everywhere, from Texas to California, there was considerable fear in the business community about the possibility that some sort of wage-price control system, mandatory or otherwise, might eventually be adopted in Washington, despite strong indications from President-elect Carter that he intends to avoid them.

Nixon Aide's View

C. Jackson Grayson jr., who was the nation's price czar during the Nixon administration's controls program and who is now on leave from the faculty of the Southern Methodist University business school, spoke strongly against a return to any such effort to control inflation.

"I don't think controls would work," he said in an interview in Dallas. "They never have. They do give some relief only for a short period, as aspirin gives some relief for a headache for a while, but you better find out what causes the headache. More productivity is the only answer for fighting inflation. Prices and wages ought to be set by the market. Society simply cannot determine what is a just price or what is a just wage."

A leading Dallas banker also spoke strongly about the effect of inflation on the recovery and particularly the role that inflation has played in slowing business spending for new plants and equipment.

Harry A. Shuford, chairman of the First National Bank in Dallas, commented: "Until we prove we have learned to control inflation, we're not going to see the recovery in the economy we need. It would be most encouraging if we could take some steps to encourage private business to create new jobs by tax incentives or some other means."

One issue on which businessmen in this part of the country seem to be in close agreement with their colleagues elsewhere is the conviction that economic activity will improve next year. No one suggested, however, that any sizable improvement lies ahead. That sentiment springs partly from the fact that business in many areas of the Southwest did not feel the recession's impact as severely as in other parts of the country.

Several businessmen echoed what Louis F. Davis, vice-chairman of the Atlantic Richfield Co., said in evaluating the outlook: "The economy should show steady, slow growth next year. No recession, but no boom either."

The same sober assessment of the outlook was given by the head of Toyota Motor Sales, U.S.A., at the company's headquarters in Torrance, Calif.

Isao Makina, president of Toyota, which has been the leader in imported car sales in the United States the last two years, said the best he hopes for next year is to duplicate the company's 1975 performance. Among the uncertainties he listed as influences in preventing stronger car sales next year were the probable level of fuel prices, the state of the U.S. economy, the high unemployment rate and the level of inflation.

Richard Marcus, president of Neiman-Marcus in Dallas, said, "We have had a good sales increase in every city in which we operate" this year and the Christmas business "will be terrific."

He expressed concern over the possible adoption of policies in Washington that might fuel inflation. Despite this year's strong business, he added, "we've planned fairly conservatively for the next six months."

Lasker M. Meyer, senior vice-

(Continued on Page 13, col. 2)

U.S. Commodities

CHICAGO, Dec. 12 (AP).—Grain futures posted modest gains on the nation's major commodity futures marts last week, but livestock futures were generally weak.

Prices in the grain pits rose during two of the week's sessions, but closed lower on three days. The big factors in the rise of prices was bitter cold and snow over portions of the country where farmers were prevented from moving grain into commercial channels. Also, export inspections and commitments were generally constructive in all grains.

On the bearish side, however, Canada, Argentina and Australia made wheat sales to customers considered generally buyers of U.S. wheat. Also, the Australian Wheat Board revised its wheat production upward for the 1976-77 season to 9.95 million tons. With the recent devaluation of the Australian currency, wheat there now is more competitive against U.S. wheat.

Soybean, meal and oil prices moved in wide swings under strong commercial and speculative demand, but declines came on profit-taking and, at times, speculative selling. There was some selling, too, on word that Peru's anchovy catch could total 4 million tons, which had been thought a high figure earlier.

Iced broiler trade, along with meal and oil, was relatively light. Corn and oats moves were generally small and both pits appeared to be geared to moves in wheat and soybeans.

At week's end, soybeans were 2 1/2 to 12 1/2 cents a bushel higher, January 6.97; soybean meal was $1 to $5.50 per ton higher, December 201.00; soybean oil was 5 points lower to 23 higher (nearly 1/4 cent a pound), December 21.53; wheat was 2 1/2 to 4 1/4 higher, December 2.63 1/4; corn was 3 1/2 to 4 1/2 higher, December 2.44 1/2; oats were 4 1/2 to 8 higher, December 1.68. Iced broilers were 15 points lower to 25 higher (1/4 cent a pound, January 36.85).

Live cattle futures fell 72 cents per hundredweight, while live hogs were 60 cents per hundredweight lower to $1.20 higher. Pork belly futures gained up to 75 points, and shell eggs were 240 points lower.

NEW YORK (AP) — Weekly Over the Counter stocks giving the high, low and last bid prices for the week with the net change from the previous week's last bid prices. All quotations supplied by the National Association of Securities Dealers Inc. are not actual transactions but are representative interdealer prices at which these securities could have been sold. Now is the time to buy in Germany's bond market

The opportunities offered by the German bond market should be grasped now because the signs are good for a further fall in interest rates and for capital gains.

Of course, an investment in bonds, as with any other securities, demands constant attention. Much more, perhaps, than the average investor is able to give. Bonds and mortgage bonds must be carefully selected to achieve a satisfactory spread of investment and the mix adjusted to meet changing market conditions. This is the kind of management that Deutscher Investment-Trust offers you.

through
INTERNATIONALER RENTENFONDS
Mutual Fund

INTERNATIONALER RENTENFONDS is one of eight Mutual Funds under the management of Deutscher Investment-Trust, Frankfurt a.M. It is widely invested in the DM-bond market, currently to the extent of more than 70%. Being based on one of the world's strong currencies, it gives excellent performance prospects. The keynote of the investment policy is flexibility to meet fluctuations on the capital market and interest rates.

The Management
Deutscher Investment-Trust has 20 years' experience and nearly 4,000 million DM under management for more than 300,000 investors. Depositary Bank is Dresdner Bank AG, Frankfurt a.M., West Germany.

Performance
Between inception in February 1969 and November 1976 there has been 54.6% growth in the Fund, including all distributions. Foreign investors have fared even better because of the continuing strength of the DM – as follows:–

US $ Investors	157.8%
£ Sterling Investors	285.6%
FF Investors	160.4%

Regular Income
INTERNATIONALER RENTENFONDS makes a yearly distribution, which in 1976 amounted to DM6.80 per Unit.

Charges
Loading: 3%. Management: 0.1% quarterly. Depositary Bank (additional to usual safe custody fee): 0.01% quarterly.

Make the most of the advantageous conditions in the German bond market. Complete this application form without delay.

Purchase of Units in West Germany
Units of the Fund may be purchased at any time. Redemption is also assured at any time by German Law. They are obtainable, in bearer form, from Deutscher Investment-Trust or from the depositary bank Dresdner Bank AG, as well as from Bank für Handel and Industrie AG, Bayerische Hypotheken- und Wechsel-Bank and Westfalenbank AG. The current offering price is approximately DM 72.

To: Deutscher Investment-Trust, Postfach 2685, D-6000 Frankfurt a.M.1

White, Weld & Co.
Incorporated

INTERNATIONAL BOND BROKER

White, Weld & Co., Inc., would like to expand its London based international bond broking team. The successful candidate is likely to be:

- Experienced in the analysis and sale of Fixed Interest Securities.
- A qualified economist.
- Fluent in German.
- Happy working in a close knit team.

Salary will be competitive and no problem for the right person.
Written applications only to:
David A. Carrie,
WHITE, WELD & CO. INCORPORATED,
P.O. Box 236, Commercial Union Building,
St. Helens, 1 Undershaft, London, EC3P 3HJ,
enclosing your curriculum vitae.

21. Sometimes letters just don't do it.
(An international call means business.)
Long Distance is the next best thing to being there.

Euromarket

(Continued from Page 8.)

rated, Norway itself is rated ble-A.

Kemsley Holdings of Aus- lia is in the market for $90 llion, divided equally between year debentures, Chaying an rage life of 11 1/2 years) car- ng a 9 1/2-per-cent coupon a seven-year notes carrying 8 1/2-per-cent coupon. A king fund will reduce the rage life of the notes to just r six years. Swiss bankers rt heavy demand for the 15- r paper.

Uncertain Outlook

ss well received is the $75 llion in seven-year notes for ell which are being offered a 9 1/4-per-cent coupon. An ted issue price of 99 would e the yield to investors to per cent. However, the vy indebtedness of Brazil, its rtain economic outlook cou- d with antipathy for its mili- y-run government is cited by kers as reasons why investors shunning the issue.

The poor reception of the $50- llion loan for Brazil's railroad ency did not help the new loan. ese seven-year notes were sold 99 with a coupon of 9 1/4 per t and finished the week at 3/4-96 1/2.

The public offering from Po- d's Bank Handlowy evoked ally unfavorable comments. It seeking $30 million for five ars in floating-rate notes aranteeing a minimum coupon 3/4 per cent in the first two rs and 7 per cent in the final e years. The spread over the r-bank rate, if the minimum ion is exceeded by market is 3/8 of a point. The ac- return to investors is greater the minimum coupons indi- as the paper is being sold 0 for each $1,000 nominally- ed security. At each six- th re-setting of the coupon, redemption price is stepped so that at final maturity in- tors will receive $1,000 for each e.

Of the recent issues, the most ccessful loan was for Gotaver- , the Swedish shipbuilder car- ng the government guarantee. e size of the notes offering was bled to $40 million and the -year paper was priced at 1/2 with a coupon of 8 per t for a yield of 7.88 per cent, lowest this year for a public ering in the dollar sector. y ended the week at 100 bid- 3/4 offered. Its companion million of eight-year 8 1/4- cent paper was sold at par finished the week at 98 3/4- 1/2.

Polysar also did well after bling the size of its 10-year ering to $50 million. It was ed at par with a coupon of 9 1/2 per cent and ended the week at 100 1/4-101.

Offshore Mining sold its $50 million of nine-year, 8 1/4-per- cent notes at par. The end-week quote was 99 3/4-99 1/4. The Korean Development Bank priced its $25 million of five-year notes at 99 3/4 with a coupon of 9 1/2 per cent.

Not Well Received

The Sandoz offering of 40,000 units, each consisting of one Sandoz bearer participation certificate (BPC) and one $1,600, 12- year convertible bond carrying a coupon of 4 3/4 per cent, was not well received. Each unit was sold for $3,040, but the price in after trading dropped to around $2,900. Bankers said investors were dis- enchanted with the net return offered on the units. Coupling the dividend to be earned on the BPC with the interest on the bonds, the net return to investors was a low 3 per cent.

Also poorly received was the $25 million, five-year floating-rate for Urquijo International. Sold at par, the notes, which carry a minimum coupon of 7 1/4 per cent, were quoted at 97. With the recent floating rate notes for other Spanish banks trading at 94 1/2, bankers say the market is ef- fectively now closed to Spanish borrowers.

In the DM market, Imperial Chemical Industries is seeking 100 million DM for 10 years with a coupon of 7 1/2 per cent. Copen- hagen just floated a 75-million loan with identical terms. Priced at 99 1/2 these notes ended the week at 98-98 3/4.

The Inter-American Develop- ment Bank sold its 100 million of 10-year, 7-per-cent paper at 98 1/2 but by end-week the quote was 98-98 3/4.

The Council of Europe's 60 million DM of seven-year, 7-per- cent notes, sold at 99 1/2, ended the week at 98-98 1/2, and Den- mark's Finance Institute for In- dustry sold 20 million DM in five- year notes carrying a coupon of 7 1/2 per cent. Issued at 98 1/4, they finished the week at 98 1/2- 99.

Elsewhere, the city of Oslo floated a loan of 75 million guil- ders in seven-year notes car- rying a coupon of 8 1/4 per cent and an issue price of par.

High Liquidity

Reflecting the high liquidity of banks at present, syndicated loans are being marketed with lower returns to the banks. Although many banks insist that they make no money on loans if the spread is less than a point over the in- terbank rate, the EEC is offer- ing to pay 7/8 of a point on its five-year $500-million loan—the lowest spread seen since 1973.

Despite the growing worries about the increasing debt burden of the East-bloc state, borrowing costs to those borrowers have declined about a quarter of a point. The Comecon International Bank for Economic Cooperation is seeking $200 million for five years at 1 1/4 points over inter- bank while the National Bank of Hungary is arranging a $150-mil- lion, five-year loan at 1 1/8 over interbank.

Elf-Aquitaine, the French oil company, is seeking $50 million for five years with the option to extend to eight years. It will pay 1 point over interbank for the first five years, 1 1/4 in each of the following two years (if it extends) and 1 1/2 in the eighth year. The company is paying a front-end fee of 1/8 of a point to participating banks.

Portugal was rumored to be seeking $300 million at 1 1/2 over interbank which was said to have been raised to 1 5/8 when no takers could be found. However, bankers close to the borrower insist that no loan is current'y being sought.

Classified List

One problem that has emerged for Portugal is that it is on the classified list of the U.S. Con- troller of the Currency (as is Italy, for example). This means that nationally chartered banks such as Bank of America, Chase and Citibank are, which fall un- der the Controller of the Cur- rency's jurisdiction, are unwilling to carry a loan to Portugal on their books.

Among other large loans on offer, Puerto Rico is seeking $100 million for seven years, offering to pay 1 3/8 over interbank for the first four years and 1 5/8 for the final three years, and the Moroccan phosphate agency is seeking $200 million for seven years at 1 1/2 over interbank. The Irish Electricity Supply Board is seeking $40 million for seven years at 1 3/8 over interbank for the first five years and 1 1/2 for the final two years.

Economic Scene

(Continued from Page 9.)

president of Foley's, Inc., a major Houston department store, said that the public was "buying qual- ity goods without hesitation, but overall, they are not splurging."

Bright Spot

The fast-growing, affluent and energy-busy Houston area is one of the brightest economic spots in the country. While business loan activity has been flat or down in many other cities, the volume of such loans in Houston was up 30.5 per cent in the first 10 months of 1975, and unemploy- ment is now down to 5.2 per cent —well below the national average. And construction activity, helped by a gain of almost 50 per cent in residential housing, shows an overall increase of 10.8 per cent so far this year.

A similarly favorable economic assessment for many areas of activity also was issued last week by the University of California at Los Angeles.

"We think that California is doing better than the United States in terms of recovery," said Prof. Larry J. Kimball, director of UCLA forecasting models. "California has had a much more vigorous housing recovery than the rest of the country, and we expect personal income here to grow slightly more rapidly than in the rest of the United States. That is going to influence retail sales rather strongly by the sec- ond half of 1977."

In its annual forecast for the nation's economy next year, UCLA ranks high among the optimists. It predicts real growth of 5.2 per cent for 1977, down one point from this year's figure, and expects inflation to move from a 5-per-cent rate in the first half of next year to 6 per cent in the second half, but the university's economics department also expects the unemployment rate to be down to 6.9 per cent by the fourth quarter, reflecting the addition of three million more jobs during the year.

African Group Wants A Common Market

KINSHASA, Zaire, Dec. 12 (UPI).—Ministers of the Organi- zation of African Unity yesterday concluded a five-day conference by recommending the creation of an African "common market."

They also recommended the formation of a bank to aid in development programs and urged various economic and cooperative institutions to work with the OAU on programs for the bene- fit of African nations.

2 Banks Offer Long-Term CDs at 6.5%

Underwritten Issues By Citibank, Chase

NEW YORK, Dec. 12 (IHT).— New ground in bank financing has been broken with two major banks for the first time market- ing long-term certificates of de- posit through underwritten offer- ings.

Citibank offered $225 million of five-year, 6 1/2-per-cent CDs, while Chase Manhattan offered $200 million of four-year, 6 1/2 per cent CDs.

It is believed to be the first time that banks have employed an underwriter to sell their CDs which, usually mature in one year or less.

"In general, short-term interest rates have fallen to the lowest in years, so the banks recently haven't had many takers for one-year CDs yielding only about 5 1/4 per cent," a dealer said. "Citibank and Chase presumably have decided to compete for the more permanent sources of bor- rowed funds and have hired two of Wall Street's major firms (Morgen Stanley and Solomon Brothers) to handle their sales," he added.

Among the prospective inves- tors are pension funds, corpora- tions and insurance concerns. These big-block buyers would have to commit themselves for even lengthier securities due in up to 10 years in other markets to match the 6 1/2 per cent provided by the long-term CDs.

"A few other banks have been offering relatively long-term cer- tificates but on an informal basis without a formal underwriting agreement," another specialist said.

50 London Protesters March Against CIA

LONDON, Dec. 12 (AP).—About 50 demonstrators marched yester- day outside the U.S. Embassy and a half-dozen London homes where they said CIA agents live. Some protesters carried signs listing the names, addresses and tele- phone numbers of alleged CIA agents.

The demonstrators were pro- testing deportation orders served on Philip Agee and Mark Hosenball Americans who the government says constitute a threat to national security. "We want to put the blame for the deportations on the CIA," a demonstration organizer said.

Says Maritime Office Did Not Inform Him

Kissinger Chides Agency Head on Soviet Pact

By David Burnham

WASHINGTON, Dec. 12 (WP).—Secretary of State Henry Kis- singer has accused the chairman of the Federal Maritime Com- mission of signing an agreement with the Soviet Union without informing the State Department.

Mr. Kissinger further charged that knowledge of the trade agreement had apparently been withheld from State Department officials in the Soviet Union until Karl Bakke, the chairman of the commission, had time to return to Washington to an- nounce it.

While the immediate subject of Mr. Kissinger's criticism was an apparently obscure shipping agreement signed by Mr. Bakke in Leningrad on July 12, the dispute involves a number of broad issues of general concern. Among them are the following:

• Just how much control should the State Department exert over an independent regu- latory agency that is dealing with foreign policy? This question was the key point several months ago when Con- gress declined to approve legisla- tion on nuclear exports that would have strengthened the Nuclear Regulatory Commission's power to license independently the shipment of sensitive nuclear materials.

• How can complex interna- tional economic questions that affect several federal agencies and their constituencies best be resolved? Can the Federal Mari- time Commission's concern about the continuing existence of the American Merchant Marine be hammered into a policy that will not raise serious anti-trust prob- lems for the Justice Department, and diplomatic difficulties for the State Department?

Copy of Letter

In Mr. Kissinger's letter to Mr. Bakke, a copy of which has been obtained by The New York Times, the secretary said the shipping agreement "was not brought to the attention of this department prior to its signa- ture."

"Indeed," he added, "there are indications that knowledge of its existence was withheld from State Department officials prior to the issuance of an FMC press release on July 19."

"The Constitution dictates that in our foreign relations the Unit- ed States must speak with a single coherent voice," he said.

Under the Constitution, the president—and by extension, the State Department—has the ulti- mate responsibility for foreign affairs, and most agencies rou- tinely submit to this authority when dealing with other nations.

Broad Scope

Mr. Kissinger further said, "Agencies of this government may not appropriately engage in negotiations leading to the con- clusion of written understand- ings without regard for the broad scope of our interests and objectives, even with respect to matters related to the agencies' particular responsibilities."

This is particularly true, he said, because "our relations with foreign governments, particularly with the Soviet Union, involve a broad range of interrelated con- siderations."

Mr. Kissinger concluded his two-page letter by saying, "I accordingly wish to make clear my expectation that in the future the Federal Maritime Commission will refrain from negotiations with foreign governments and the conclusion of written or oral understandings without the prior approval of the appropriate rep- resentatives of the Executive Branch."

In response to Mr. Kissinger's Aug. 2 letter, Mr. Bakke insisted tha. the possibility of an under- standing with the Soviet Union had been cleared with Kenneth Yalowitz, first secretary of the U.S. Embassy, before it was sign- ed. He also denied any attempt to "withhold knowledge of this agreement from your depart- ment."

Denial Noted

In his letter, Mr. Bakke said he was aware that State Depart- ment officials in Moscow had for- mally denied that the possible commercial understanding had been discussed with Mr. Yalowitz.

"I regret the necessity to re- iterate that the conversation did, in fact, occur," he wrote.

The disputed understanding was part of an effort by the commission to persuade the Soviet Union to bring its ocean freight rates and services more in line with those of U.S. and European carriers.

Simon Is Willing To Pay to Keep His Foreign Gifts

WASHINGTON, Dec. 12 (NYT).—Treasury Secretary William Si- mon said yesterday that during the last two years he has kept several gifts from foreign officials pending a resolution of his request to the State Department that he be allowed to purchase them.

The assistant chief of protocol for the State Department, Hamp- ton Davis, said that the laws regarding gifts from foreign offi- cials specified only that items valued at more than $50 must be turned over to the U.S. govern- ment. The regulations do not say when they must be turned over, he said.

Mr. Simon said in a telephone interview that he was "not trying to hide anything," and that in letters and telephone conversa- tions with Henry Catto, the for- mer State Department protocol chief, and Shirley Temple Black, the current chief of protocol, he had listed the gifts still in his possession and asked to purchase them.

Mr. Simon said the gifts he would like to purchase, because "they mean something special to me," were a Russian shotgun, a cigarette box from Saudi Arabia, two silver-colored necklaces from Israel, a set of matched pistols from Argentina, a wrist watch given to him by Leonid Brezh- nev with the Soviet leader's name engraved on it and a porcelain sculpture from Spain. Mr. Si- mon, a noted gun collector, said he had not had the items appras- ed and he could not estimate their value. With the possible exception of the necklaces, he said all of the gifts would be worth more than $50.

France Registers $2.1-Billion Gap

PARIS, Dec. 12 (Reuters).—France had a payments deficit of 10.5 billion francs ($2.1 bil- lion) in the third quarter of this year, compared with a surplus of 580 million francs in the comparable period of last year, the Finance Ministry announced yesterday.

The huge deficit for July, August and September followed a deficit of 2.54 billion francs in the previous quarter.

The ministry said the payments gap was due mostly to an in- crease in the country's trade deficit but also to seasonal factors such as vacations and cash transfers abroad. There was a sharp increase in imports, largely reflecting the deprecia- tion of the franc, the ministry said.

BOOKS

POLONAISE

By Piers Paul Read. Lippincott. 347 pp. $10.

Reviewed by John Leonard

ACCORDING to the Random House Dictionary of the English Language, college edition, a polonaise is "a slow dance of Polish origin, in triple meter, consisting chiefly of a march or promenade in couples." And that's a fair, if superficial, description of Piers Paul Read's sixth novel. He is also the author of "Alive: The Story of the Andes Survivors," which probably sold more copies than all of his intelligent fictions put together. "Polonaise" originates in Poland and spends most of its time there. It is slow: In following the Kornowskis from 1924 to 1958, it occasionally even dawdles. It is divided into three parts, and obsessed with couples: Stefan and Krystyna, Krystyna and Bruno, Stefan and Rachel, Rachel and Krystyna, Bruno and Stefan, and Annabel and Teofil. The march is to war, and the promenade is of art. Meanwhile, God is waiting in ambush.

Stefan and Krystyna are the children of a Polish Catholic aristocrat who goes bankrupt and mad in 1929, just when 17-year-old Krystyna is discovering sex and 15-year-old Stefan has decided that God doesn't exist. In severely reduced circumstances, the family moves to Warsaw. Krystyna takes a job in a jewelry shop, while Stefan goes to school, writes stories, and meets Bruno, who is a Communist. Krystyna converts to Communism because of Bruno, whom she marries. Stefan converts, albeit with reservations, because the class struggle is "an inexhaustible source of grand, heroic themes . . . the meat for his fiction." At a cell meeting, Stefan finds Rachel, who is rich and Jewish. They get married, too.

Nobody lives happily ever after. Stefan doesn't much like sex, although his stories, starting out with good intentions, usually end up obscene. (And very funny, to his consternation: The devil makes him do it.) Bruno becomes such an important functionary in the underground party that he doesn't have much time for Krystyna, even though he is devoted to their son, Teofil. Hitler is unfriendly. Bruno and Stefan go off to Spain to fight Fascism, only Stefan stops in Paris. Krystyna has an affair. Stefan comes back from Paris to become an absurdist playwright, with mur[...] in his heart. CHESS — *By Robert Byr[...]*

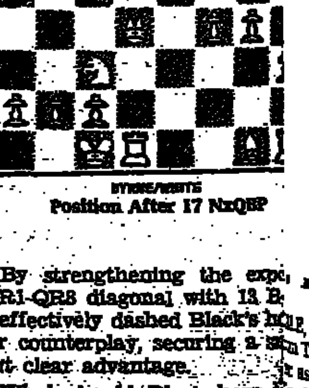
The problem that a hypermodern defense poses for the attacker is how far and how quickly he can throw his center pawns forward before they crumble under a sharp counterattack.

In the opening, moves spent building a central pawn phalanx subtract from the time that could be used getting pieces into play. Consequently, the advantage of a space-controlling pawn center has to be weighed against the disadvantage of retarded development.

The current trend is to ignore the challenge of the hypermodern defense, to be satisfied with conservative, unambitious opening formations, to forgo sharp early pawn thrusts. With this kind of play, there is, of course, no attempt at refutation of the hypermodern and none of the tension that goes with it.



In my game with George Botterill in the United States-Wales match from the final round of the World Chess Olympiad in Haifa, I stuck with the demanding Austrian attack, 4 P-B4, restricted the Black counterattack and went on to win.

The object of the rarely played 6 B-K3 (in place of 6 B-Q3) is to hinder 6 ... P-B4, but after Botterill's 6 ... N-R3—the sharpest reply—stopping ... P-B4 altogether becomes impossible.

One point of my hurried 7 P-K5 was that 7 ... PxP; 8 QPxP reduces the chance for tension in the center and Black then would have landed in an inferior end game after 8 ... QxQ; 9 RxQ. A second point was that 7 ... N-Q2 would give White time for a dangerous attack by 8 P-KR4 and 9 P-R5.

With 8 ... P-QB4 and 9 ... PxQP, Botterill chipped a pawn out of the white center, but after 10 QxP, N-R3; 11 P-KN4, the Black KN was shunted out of play. Moreover, Black could not bring pressure on the somewhat frail White KP because his other knight was also out of action.

BOTTERILL/BLACK

BYRNE/WHITE
Position After 17 NxQBP

By strengthening the exp[...] KR1-QR8 diagonal with 13 B[...] I effectively dashed Black's ho[...] for counterplay, securing a sm[...] but clear advantage.

What should Black have [...] after 15 0-0-0? If he had [...] 15 ... KR-N1, then 16 P-B[...] N3; 17 Q-R4, QxQ; 18 NxQ, B[...] would have further solid[...] White's advantage.

Accordingly, Botterill aime[...] mobilize quickly by 15 ... P[...] 16 NxP; KR-Q1, but my 17 [...] QBP forced him into an infe[...] ending—he could not play 17 [...] Q-B2; 18 QxRch, RxQ; 19 [...] Rch, B-B1; 20 N-Q5!, Q-N2, [...] N-6xPch, K-N2; 22 B-Q4ch, P[...] 23 BxPch without three pawn[...]

The fork 19 N-B6 forced [...] gain of a pawn after 19 ... [...] K3; 20 NxP. Botterill could [...] recouped material with 20 [...] BxN; 21 PxP, R-R5, yet after [...] B-K3, K-N2; 23 R-Q7, RxRP [...] B-Q4ch, K-B1; 25 K-Q2, [...] threat of 26 R-QN1 and 27 [...] N7 gives White a powerful [...]tion with dominating bishop[...] rooks.

Instead, he aimed for so[...] counterplay, but it proved [...] sufficient and in a hopeless [...]tion after my 36 K-K4, he o[...]stepped the time limit.

On 9th Straight Victory

Pittsburgh Beats Houston to Gain Playoffs

From Wire Dispatches

HOUSTON, Dec. 12.—Lynn nn, Franco Harris and quarack Terry Bradshaw each ed one touchdown and the nomistic Pittsburgh Steelers ed a near season-long comee yesterday to earn an NFL off berth with a 21-0 victory the Houston Oilers.

ree games behind division- ling Cincinnati after five es, Pittsburgh won nine ht to keep alive its chances an unprecedented third ght Super Bowl title.

a second down and 18 at Houston 21 in the second od, Bradshaw fired a touch- n pass to Swann, who was ing the field in front of two Oilers' defenders at the goal line.

In the third period Bradshaw drove his team 74 yards with a big boost from an unusual kicking penalty on the Oilers, and Harris ended the march with an 11-yard scoring run.

Houston managed to move into Pittsburgh's end of the field just three times, but was thwarted on the last threat in the fourth quarter when three passes fell incomplete.

Pittsburgh took Houston's punt at that point and moved 79 yards for another score, that coming on a one-yard plunge by Bradshaw.

Pittsburgh, 10-4, entered the game needing a victory to ensure a playoff trip for the fifth straight year. Cincinnati and Cleveland, who played today, could both finish with 10-4 records. But the Steelers made the playoffs because they beat Cincinnati twice and have a better divisional record than Cleveland.

Associated Press.

kings' Chuck Foreman goes up and over the Miami de- se during Minnesota's victory over Dolphins Saturday.

Vikings 29, Dolphins 7

At Miami, Fran Tarkenton hit rookie wide receiver Sammie White with three touchdown passes yesterday to lead Minnesota to a 29-7 drubbing of Miami and guarantee the Vikings the home-field advantage in the first game of NFL playoffs next Saturday.

The National Conference Central Division champions, who finished the regular season with an 11-2-1 record, will open the NFL playoffs at home next Saturday against the NFC wild-card entry, either St. Louis or Washington.

The Dolphins wound up their season at 6-8 for their first losing year since Don Shula became coach in 1970. It was Shula's first losing season and his worst record since his first year as a head coach in 1963 when he was 6-8 at Baltimore.

Tarkenton threw scoring passes of 9, 36 and 7 yards to White, giving the rookie receiver 10 touchdowns for the season.

The Vikings, who built a 15-0 halftime lead, also scored on a one-yard buck over the middle by Brent McClanahan and on a 30-yard field goal by Fred Cox, who was wide with his first two extra-point attempts and with a 24-yard field goal try in the second quarter.

Rams 20, Lions 17

At Pontiac, Mich., third-period pass interceptions by Isiah Robertson and Jim Youngblood highlighted a sparkling second-half defense last night that carried playoff-bound Los Angeles to a come-from-behind 20-17 victory over Detroit.

The Rams, trailing 17-3 at the half, scored two touchdowns and a field goal in the third period to finish the regular season with a 10-3-1 record as they tuned up for their playoff game at Dallas next Sunday.

James Harris, ousted as the Rams' starting quarterback earlier in the season, got his chance to redeem himself when starter Pat Haden suffered a knee injury in the first period. Harris passed 27 yards to Harold Jackson to complete a 65-yard march early in the third period to start the Rams on their comeback.

Robertson then intercepted a Joe Reed pass, which led to a 32-yard field goal by Tom Dempsey, and shortly after Youngblood pilfered another Reed toss, running to the Detroit 3 from where Cullen Bryant ran over for the winning touchdown.

Reed became the Lions' quarterback in the first period when starter Greg Landry was relieved after one of his poorest showings of the season. Reed promptly connected on a 57-yard pass to Ray Jarvis to the Rams' 5 and three players later carried over for the touchdown on a reverse bootleg run to his right.

Cardinals 17, Giants 14

At East Rutherford, N.J., Steve Jones scored his second touchdown on a one-yard dive with 6:15 left in the game today to keep St. Louis's slim playoff hopes alive with a 17-14 victory over the New York Giants.

St. Louis finished the season with a 10-4 record, not good enough for the wild-card playoff berth in the NFC unless Washington loses to Dallas later today.

Jones's ninth touchdown of the season capped a 63-yard drive which included a string of four straight pass completions by Jim Hart, including a pair to Mel Gray totaling 24 yards. Hart had his worst day of the season as he passed for only 82 yards.

Jim Bakken gave St. Louis its first lead of the day with 42 seconds left in the third quarter on a 43-yard field goal, but the Giants drove the ensuing kickoff 57 yards in eight plays to take a 14-10 lead on Doug Kotar's three-yard run.

Bengals 42, Jets 3

At New York, Ken Anderson's 55-yard touchdown pass to Isaac Curtis sparked a 21-point second-period burst and rookie Chris Bahr added a career-high four field goals as Cincinnati, eliminated from playoff contention yesterday, crushed the New York Jets, 42-3.

Cornerback Ken Riley had three interceptions for the Bengals. Anderson broke the game open with his 55-yarder to Curtis and then hit tight end Bob Trumpy with a 39-yard touchdown pass before leaving early in the third period. Bahr hit on field goals of 25, 20, 33 and 47 yards.

The loss was the 11th in 14 games for the Jets, who saw coach Lou Holtz quit on Thursday and played today under personnel director Mike Holovak.

Packers 24, Falcons 20

At Atlanta, Eric Torkelson scored on a one-yard plunge with 2:20 left to play to give Green Bay a 24-20 victory over Atlanta on a rain-soaked field.

The Packers, who had fallen behind 20-10 in the third period, had cut the gap to three points with 11:20 left in the contest on a one-yard plunge by John Brockington.

Willie Buchanan sealed the Green Bay victory when he intercepted a Scott Hunter pass at the Packers' 25-yard line with a little over a minute to go.

Eagles 27, Seahawks 10

At Philadelphia, Tom Sullivan rushed for 121 yards and two touchdowns and Mike Hogan added 104 yards to lead Philadelphia to a 27-10 victory over Seattle.

Sullivan scored first-half touchdowns of four and one yards. Wide receiver Charlie Smith ran three yards on an end-around for another score and Horst Muhlmann added two field goals as Philadelphia finished its season at 4-10.

The Seahawks, whose only touchdown came on a nine-yard pass from Jim Zorn to Steve Largent late in the fourth quarter, finished their initial season 2-12.

Patriots 31, Bucs 14

At Tampa, Fla., linebacker Sam Hunt intercepted a Steve Spurrier pass and dashed 68 yards for a touchdown in the fourth quarter, opening the floodgates for playoff-bound New England in a 31-14 romp over Tampa Bay.

Hunt's touchdown with just over six minutes to play broke a 14-14 tie. The Patriots then added a 30-yard field goal by John Smith and a touchdown by Steve Grogan.

Grogan's score, his 12th rushing touchdown of the season, broke a record held jointly by quarterbacks Johnny Lujack and Tobin Rote.

New Tiebreaker For U.S. Soccer

CHICAGO, Dec. 12 (UPI).—Team owners of the North American Soccer League have approved a new procedure for breaking ties.

Instead of using the current penalty kick with a stationary ball from 12 yards for the tiebreaker, five players on each team will employ a "one-on-one shootout" with the shooters moving in on the goal one at a time from the 35-yard line.

It will be similar to a penalty shot in hockey except that each player will have only five seconds to shoot or forfeit the opportunity.

Austria Beats Malta

VALLETTA, Malta, Dec. 12 (AP).—Austria edged Malta, 1-0, here in a qualification game for group III of the World Soccer Cup.

World Cup giant slalom winner Heini Hemmi of Switzerland is flanked by Piero Gros of Italy (left), who came in second, and Phil Mahre of the U.S., who placed third.

Swiss Tops Gros, Mahre at Val d'Isère

Hemmi Takes Giant Slalom

By Bernard Kirsch

VAL D'ISERE, France, Dec. 12 (IHT).—Heini Hemmi, gold medal skier and Swiss chocolate model, continued to earn his living today and Phil Mahre, upstart, continued to earn his reputation.

Hemmi, one of two bona fide professionals on the amateur circuit, won a World Cup giant slalom here today. The 27-year-old Swiss, winner of the giant this year in the Innsbruck Games, beat Italian Piero Gros, winner of the slalom in the Olympics. Finishing behind the two men of gold was Mahre, who showed that he is no fluke but a man to be reckoned with this season.

Mahre lost the two-heat race by almost a second and a half but retained the lead in the World Cup standings, the first American to have that honor since this circuit was formed in 1966-67. He said he doesn't expect to end the season in the top spot, for he is weaker in the other two disciplines, the downhill and slalom. He was also a little weaker today than he was on Friday when he scored another first, breaking the ice for the U.S. men in the giant slalom.

"I really was wound up the night after victory," the 19-year-old said. "I didn't realize how emotional I was until I tried to go to sleep. I was tired but sleep wouldn't come."

Two giant slaloms in three days didn't help his strength, either.

Fell on Friday

Hemmi, possibly the smallest skier on the men's circuit, was well rested. The 5-foot-3-inch, 132-pound Swiss had fallen in Friday's first heat. His balance was perfect today and he had the best times on both runs.

On the 65-gate 340-meter first course, Hemmi clocked 1 minute 22.41 seconds and then he slithered past 62 flags in 1:38.38 for a total work time of 2:50.79. Gros was at 2:51.92 with 1:23.13 and 1:28.79, while Mahre hit 2:52.19 with 1:23.52 and 1:28.67. Fourth was Italian Franco Bieler, fifth Austrian Klaus Heidegger, and defending World Cup champion Ingemar Stenmark of Sweden was sixth. Italian Gustavo Thoeni, four-time winner of the circuit, was eighth.

Hemmi, once a bricklayer in his Swiss village, now works at skiing fulltime. Along with teammate Bernhard Russi, he signed what is known on the ski circuit as a "pro contract," or a B license. The special license permits the skier to sign contracts with commercial firms and take money over the table. He said today that this system ends a lot of hypocrisy in skiing. "All skiers must be obliged to have some contracts with companies to be able to ski all season," he said.

No More Olympics

In return, Hemmi must pay the Swiss Ski Federation 30,000 Swiss francs ($12,000). Also, he cannot enter the Olympics again. But he already has his gold medal and contracts with a mineral-water firm and a Swiss chocolate company.

In most cases, national ski federations sign the contracts and give a percentage of the money to the skiers. Mahre, too, probably could pick up his share of endorsements after accumulating 40 World Cup points, nine more than 1965-66 cup Victor Gros and 17 fewer than he gained all of last season. He fits the All-American image and thinks before he speaks: "Winning isn't everything. Competing is the big point."

Mahre received much praise from his leader, U.S. Alpine chief Hank Tauber; until this year, no American male had ever finished in the top three at this meeting, Le Critérium de la Première Neige (Criterium of the First Snow).

Putting it as mildly as he could, Tauber said: "I'm in ecstasy."

In Courmayeur, Italy, yesterday, Brigitte Habersatter-Totschnig of Austria won the women's giant slalom in the second women's event of the World Cup season, rocketing down with a lead of more than three-quarters of a second.

Habersatter, 22, clocked 1 minute 40.26 seconds in her first giant slalom victory. Her previous best was fourth place.

Another Austrian, Lea Soelkner, who will be 18 Christmas Eve, was second in 1.41.07 on a day when Austria grabbed four of the first 10 places.

The course, in the shadow of Mont Blanc, was very fast over hard snow in the 59-gate, 2,027-meter event.

The U.S. team did less well than in the first event. Cindy Nelson came eighth, as she did Thursday at Val d'Isère, clocking 1:41.94. Vicky Fleckenstein came 10th in 1:42.00. But Abbi Fisher, who placed second at Val d'Isère Thursday, was down to 18th place yesterday in 1:43.07.

Annemarie Moser-Proell of Austria, on her second outing after 10 months retirement following five straight World Cup wins, dropped back to seventh position in 1:41.82 after placing third at Val d'Isère.

MEN's GIANT SLALOM

1. Heni Hemmi, Switz.	1:22.41

Green Beats Piedvache

LONDON, Dec. 12 (Reuters).—Briton Dave Green won the European light-welterweight boxing title here when Frenchman Jean-Baptiste Piedvache retired at the end of the ninth round of a scheduled 15-round fight at the Royal Albert Hall.

Griffith Wins Bout

HAMBURG, Dec. 12 (Reuters).—Five-time world champion Emile Griffith stopped West German champion Frank Reiche after 9 rounds of a scheduled 10-round nontitle middleweight boxing match here.

Golden State Over Houston, 124-112

Smith Hits 51 as NBA Warriors Triumph

From Wire Dispatches

AKLAND, Calif., Dec. 12.—l Smith hit an NBA season a of 51 points to power the den State Warriors to a 124- victory over the Houston kets last night.

mith converted 18 of 27 shots the floor and went 15 for from the free-throw line.

olden State caught fire when, 14:13 remaining in the third , captain Rick Barry was ed from the contest with two nical fouls.

Knicks 112, Suns 96

New York, Tom McMillen, rrow-in in the multimillion- r deal which brought Bob doo to New York last week, scored 18 points and grabbed a career-high 19 rebounds in leading the Knicks to a 112-96 victory over Phoenix.

76ers 108, Trail Blazers 107

At Philadelphia, Julius Erving, who finished with 23 points, dropped in a 12-foot jump shot with just two seconds left to lift Philadelphia to a hard-fought 108-107 victory over Portland.

Spurs 121, Jazz 106

At San Antonio, the Spurs ripped off 13 straight points in the first quarter and George Gervin hit on 11 of his 15 field-goal attempts for the night to send San Antonio coasting past New Orleans, 121-105.

The Spurs trailed, 8-6, when the scoring streak began, and before San Antonio was finished in the first quarter it had built up a 14-point lead.

Hawks 95, Cavs 94

At Richfield, Ohio, John Drew scored eight of Atlanta's last nine points, including a 20-foot jumper with two seconds left, to give the Hawks a 95-94 victory over Cleveland.

It was the third straight road victory for the Hawks and extended the Cavs' losing streak to five games.

Nets 115, Pistons 88

At Detroit, guard John Williamson's 30 points and Claude Terry's 19 paced New York to a 115-88 romp over Detroit.

Pacers 109, Braves 101

At Indianapolis, Indiana's Billy Knight scored 33 points as the Pacers beat Buffalo, 109-101, for the second win in a week over the Braves.

Buffalo lost to the Pacers at home Tuesday, 107-101, when it still had the services of Bob McAdoo, but the outcome was the same yesterday without McAdoo.

Bulls 84, Celtics 76

At Chicago, Scott May grabbed nine offensive rebounds and reserves Tom Boerwinkle and John Laskowski combined for 12 points in the fourth quarter to lift Chicago to an 84-76 triumph over Boston.

Barons 4, Capitals 2

At Landover, Md., Gilles Meloche stopped 31 shots to give Cleveland its eighth win of the season, 4-2, over Washington.

Flyers 4, Bruins 3

At Philadelphia, Bill Barber's second goal of the game, which came after a perfect pass from Don Saleski at 18:19 of the third period, climaxed a comeback that carried the Flyers to a 4-3 victory over Boston.

Orantes Dazzles Solomon to Gain Houston Finals

HOUSTON, Dec. 12 (AP).—Spain's Manuel Orantes dazzled Harold Solomon with a bag of tricky finesse shots Friday night for a 6-4, 6-3, 6-4 victory, to gain the finals of the $130,000 Masters Grand Prix tennis tournament.

Orantes, runner-up to Mexico's Raul Ramirez on the Grand Prix circuit this year, will meet Wojtek Fibak of Poland in the title match, with $40,000 going to the winner.

Solomon, who has beaten Orantes only once in eight career matches, could not handle Orantes's drop shot-lob pattern. The Spaniard repeatedly drew Solomon to the net with pinpoint drop shots that, if returned, were lobbed over the scrambling Solomon's head.

Yesterday, Americans Sherwood Stewart and Fred McNair, once far behind and apparently beaten, staged a comeback to defeat Mexico's Ramirez and Brian Gottfried of the United States in the doubles finals of the tournament.

Stewart and McNair won the three-hour, 10-minute match 6-3, 5-7, 6-7, 6-4, 6-4. Down two sets to one and trailing 1-4 in the fourth set, Stewart and McNair won seven consecutive games to pull ahead.

With 6-3 Victory Over Pittsburgh

N.Y. Islanders Extend NHL Division Lead

NIONDALE, N.Y., Dec. 12).—Bryan Trottier scored two s and an assist last night to the New York Islanders to victory over the Pittsburgh uins in National Hockey ue action.

e win extended New York's first-place lead to three points over Philadelphia in the Patrick Division.

Following a scoreless first period, Trottier started a five-goal Islander outburst at the 31-second mark of the second period. Ed Westfall, Garry Howatt and Lorne Henning increased the margin to 4-0 with a goal apiece.

Rick Kehoe then scored for Pittsburgh, but Bill MacMillan countered for New York. Jean Pronovost scored in the final moments of the period to close the margin to 5-2.

Stan Gilbertson pulled the Penguins within two points at 3:34 of the third period with a goal, but Trottier scored the final goal of the game.

Flames 2, Black Hawks 1

At Atlanta, Eric Vail slapped in one goal and assisted on the other two as Atlanta beat Chicago, 3-1.

Canadiens 5, Red Wings 0

At Montreal, Guy Lapointe, Jacques Lemaire and Steve Shutt scored power-play goals in the first two periods as Montreal trounced Detroit, 5-0.

Blues 1, North Stars 1

At St. Louis, Gary Unger scored at 3:58 in the third period to tilt St. Louis to a 1-1 tie with Minnesota.

Rockies 4, Canucks 4

At Vancouver, Simon Nolet's two goals helped Colorado overcome a three-goal deficit and salvage a 4-4 tie with Vancouver.

Maple Leafs 4, Rangers 1

At Toronto, second-period goals 27 seconds apart by Stan Weir and Don Ashby powered Toronto to a 4-1 victory over New York, ending the Rangers' unbeaten streak at nine games.

Sabres 4, Kings 2

At Los Angeles, Gil Perrault and Richard Martin rifled in goals 1:26 apart in the second period to give Buffalo a 4-2 victory over Los Angeles.

Ali, Citing Divorce and Faith, Again Cancels Retirement

LOUISVILLE, Ky., Dec. 12 (AP).—World heavyweight champion Muhammad Ali "unretired" again last week.

In his hometown to shoot scenes for a movie about his life, Ali had told a reporter that he was through with fighting, that he wanted to go out as the champ. Now he has announced that he has changed his mind. He cited terms of a divorce settlement with his wife, Kallilah Ali, as the major reason.

"We just settled with my wife. The divorce isn't final yet. It will be, on the basis of the agreement, a $114,000 house, a $60,000 Rolls Royce, a $400,000 building, and $2 million cash," he said Friday. "That's why I have to fight. If I fight I pay her back in one night."

Ali was exuberant after the interview when he appeared on a local television show. He spotted a reporter and shouted that "the champ returns."

"Tell 'em the champ will dance again," Ali shouted. "At 35, the champ will still be dancing."

Spreading the Word

He hinted that one reason he's staying in boxing is to spread the word of Islam.

He said, "750,000 Muslims are rejoicing. My name helps the Islam religion. I am using this as a vehicle to get to the world."

Ali first announced his retirement in Turkey three days after beating Ken Norton in Yankee Stadium Sept. 28. Last Monday, he spoke by telephone to a news conference at Madison Square Garden and said he was "through with boxing."

Friday, he said, "When I retire, I will just retire."

Who will Ali fight next?

He said his lawyers and others were working on that now, but added, "The person I'm gonna fight next is white. He's from another country."

He said it probably would be the South African champion but he added he did not know the man's name. He was referring, apparently, to Mike Schutte.

Yesterday, in Las Vegas, the World Boxing Council said Ali must fight George Foreman by the end of May or risk withdrawal of the group's title recognition. WBC president Jose Sulaiman said Ali's manager, Herbert Muhammad, had agreed that both he and the champion would sign a letter agreeing to a Foreman bout.

Rossman Defeats Quarry

LAS VEGAS, Dec. 12 (AP).—Young Mike Rossman squared accounts with Mike Quarry yesterday by scoring a split-decision victory in a 10-round light-heavyweight battle. Quarry, 25, had won a split decision over Rossman, 22, at Madison Square Garden last year.

Shavers Wins

LAS VEGAS, Dec. 12 (AP).—Earnie Shavers staggered on the verge of a knockout in the 10th and final round yesterday before coming back to flatten Roy Williams 14 seconds before the end of their heavyweight fight. Shavers has the possibility of a March title fight against Ali.

Conteh Ordered to Fight

LAS VEGAS, Dec. 12 (Reuters).—The World Boxing Council yesterday gave light-heavyweight champion John Conteh of Britain 51 days to sign for a title defense against Argentina's Miguel Cuello or face loss of his crown.

Observer

Guess Who's Missing

By Russell Baker

NEW YORK—I told them my problem and they sent me up to the Bureau of Missing Presidents.

"What's the complaint?" asked a clerk.

"I haven't been able to find a president for nearly a month," I said.

"Don't worry about it," he said. "They almost always come back."

I made a small scene. A keen-eyed man with hunter's instincts and 30 pounds of newspapers under his arm came out of a sanctum. Instantly, I recognized Mr. Bean, tracer of lost presidents.

Baker

"What's all this about losing a president?" he asked. "It's true, Mr. Bean. I've looked everywhere and the President has vanished."

"Which President is it?" he asked.

"The name is Ford. Gerald Ford."

He looked puzzled. "Ford," he murmured. "Where have I heard that name before?"

The clerk snapped his fingers in sudden remembrance. "Ford!" he cried. "Father of the WIN button! He was President back there in the fall."

* * *

"By golly, you're right, Clackers!" cried Mr. Bean. "It comes back to me now. Those debates. Standing around in the Rose Garden. What did you say his name was?"

"Ford," I said.

"I remember him. Big fellow. Receding hairline. Strong teeth," said Mr. Bean. "And you say he's flown the coop? Never fear. Mr. Bean is on the trail." And he flung himself back into his office, tore open his pack of newspapers and slammed the door.

Two days later, the tracer of lost presidents called at my rooms. "I have made a complete search of the newspapers as well as the television, and you're right," he said. "The President has disappeared."

"Have you no clues?"

"There was a rumor yesterday that a woman in Wisconsin caught a peek of him holed up in one of the back pages of the Milwaukee Journal, but I couldn't track it down. You get a lot of rumors in cases like this. Some wild man called up and said he'd seen the President on a local TV newscast in Tampa. When I phoned down there and asked about President Ford, all the newsmen said, 'President who?'."

Bean wanted a fuller description of President Ford. "He's easy to recognize," I said. "Until his sudden disappearance, he couldn't resist turning up every day all over the newspapers and every night all over the television screen. Find the man who fits that description and you've got him."

"Only one man fits that description," said Bean, "but he calls himself Carter."

"A transparent disguise!" I cried. "This Carter has to be the President."

* * *

"Unlikely," said the Great Tracer. "The one point Carter repeatedly makes—indeed, the only reason he appears to have for enjoying such extensive reportage—is that he is not the President."

We both wrestled silently with the mystery's dread implications but Bean left it for me to state them. "If the President has vanished, and the only man who looks like the President keeps insisting he is not the President," I pointed out, "it means that nobody is in charge."

"Hush," urged the Tracer. "Nobody must know."

"The country must know..."

"The country must not know. If word gets out that there is nobody in charge, think what could happen. Big steel, aluminum, duPont, natural gas, international oil and Consolidated Edison might all simultaneously seize the opportunity to take charge of the economy themselves and start raising prices."

"And betray the memory of the WIN button? Never, Mr. Bean."

"I mention only one of the worst hypothetical possibilities," said Bean. "Mum's the word on the disappearance of this President—what's his name?"

"But the country needs a president."

"One will turn up in good time. Meantime, remember—America has steel, aluminum, chemicals, gas, oil and the public utilities on its side, and also God, fortunately."

To an outsider, the interest of the film is its forthright approach to such sensitive subjects as censorship, Stalin-era betrayals and the materialism of young people.

A Candid Look at Contemporary Soviet Life

By Peter Osnos

MOSCOW (WP).—Elizabeta Uvarova is chairman of the city Soviet in a medium-sized Russian town, a former secretary of the party committee in a factory, wife of a local soccer coach and mother of two teen-age children. Her job is roughly that of a mayor, supervising housing and schools, cultural life and routine ceremonies.

A Soviet movie on the subject of Elizabeta Uvarova, her trials and tribulations, sounds as if it would be a terrible bore. But a new film about just that, called "Proshu Slovo" ("I Am Asking for a Word," which is what Russians say at meetings when they want the floor), is fascinating, certainly one of the best Soviet movies of recent years.

To an outsider, the interest of the film is its notable candor on such sensitive subjects as censorship, Stalin-era betrayals of one comrade by another, the materialism of young people and the shallowness of officialdom. Soviet society is shown in a way foreigners rarely see it—not from the perspective of alienated dissenters or official propagandists, but how, for better or worse, it looks to ordinary people.

That the movie is successful—indeed, Russians say, the fact that it was released at all—is a tribute to the work of a clearly remarkable couple: Gleb Panfilov, who wrote the screenplay as well as directed, and his wife, Ina Churikina, who plays the leading role.

The talent they demonstrated in two earlier films together must have given this effort additional cachet with the authorities. The interpretations in "Proshu Slovo" of character and theme were apparently subtle enough and the messages sufficiently complex for the film to be officially acceptable although it is so revealing—even damning in some eyes.

In one sense "Proshu Slovo" is about the dignity of a simple working woman, tapped for a difficult administrative post and equipped only with a commitment to Soviet principles. Staring at a portrait of Lenin over her cosmetics table she sighs, "Oh, how hard it is to be the first socialist state." She is the prototype of a party official who carries her responsibility heavily:

"You know, Vladimir Vikentivich," she tells the chief architect of the town, "if a carpenter or a house painter makes a mistake they are scolded for what they have wasted. If you or I make a mistake people criticize Soviet power. Therefore we have no right to make mistakes."

But, looking at "Proshu Slovo" another way, its approach is mostly negative. The film shows the system's inertia—building a simple bridge that is Uvarova's dream for the town's economic benefit requires Moscow's approval, which, in the end, is withheld. It shows the vapidness of Communist rituals (the awarding of an Order of Lenin to a dying man) and portrays bureaucratic self-protection justified as allegiance to a noble cause.

Perhaps the sharpest episode involves Uvarova's handling of a play shown to her by a local writer after it is turned down by the town's cultural overseer (the playwright, incidentally, is acted by Vasily Shukshin, who died while the film was being made. He is easily the most compelling figure in Soviet cinema of the past decade and his presence on the screen electrifies Moscow audiences).

After reading the play, she tells the writer over the telephone that his attitude towards "shortcomings" is unacceptable. "You are a writer, Feodor Vasilivich," she says, "a writer has a practical job as well. We are building houses. You are writing plays. We are doing common work. One must carry the people with him."

"But you can't cheat them," answers the writer drily.

"Listen here," she says angrily, "you keep harping on these failings... you have a good face, good hands, you belong to the working people. Where did you pick up this insistence on shortcomings. Don't we have bright sides in our lives?"

"Yes, we have," the writer replies, "I wish there were more."

"You are an artist," says Uvarova, "you must show people how it could be..."

Among other cuts she tells him that a "scene in bed certainly must be deleted," as the sort of thing that belongs "only in Paris, in Western films." Finally the writer discloses that he has been stringing Uvarova along to see how far she would go in her criticism. The play, he says, has been accepted by a Moscow theater with few alterations.

Flustered, she urges him to make all the changes anyway, "then we may stage it too."

Despite so direct a presentation of censorship, the exchange is filled with ambiguity. Is the film approving the existence of such mindless restrictions? Or is it condemning them? Russians say the answer has been deliberately left to the beholder.

A similarly equivocal sequence is one in which Uvarova brings an award to Stepan Trofimovich, a bedridden old Bolshevik whose wife says that he spends much of his pension money sending congratulatory telegrams to building sites and new factories. Gathered around in his room, his drab and mainly elderly friends listen passively to the official praise that sounds like a Pravda editorial on virtue.

Another old man appears at the door and asks to be let in. Someone inside protests: "He came to be pardoned... and you will pardon him Stepa, you are so kind." "And Piotr Nikitin, Vasya Konkov, who will pardon him in their name? There is no pardoning him for them and there never will be."

Ignoring the outburst, Stepan Trofimovich looks past the old intruder to the young grandson that accompanied him: "I hope you'll excuse us Feodor, excuse us for making such a fuss. That's the grip of our memory. Many things happened to us during our lifetime, there were great deeds and love. Cowardly and stupid things too.

"I say take care of your honor when you are strong. It will give you tranquillity in life and death."

The old man at the door had plainly betrayed his friends in the Stalin years of terror, probably to save himself. The simple sincerity of Stepan Trofimovich's remarks to the youth contrast with the banalities of the award declaration. Were they intended to do so? Maybe.

Uvarova's children (her son accidentally kills himself with a gun found in the snow) are meant to be frivolous. They listen to Beatles records full blast, they want to know why their parents don't have a dacha and complain when Uvarova brings home a tool kit from Moscow that is not the imported kind. The portrait of the next generation in "Proshu Slovo" is hardly encouraging.

It will be interesting to see whether the film is made available for sale to Western distributors. There is a recent example of a Russian film—Shukshin's celebrated story of a criminal, "Kalina Krasnaya"—which U.S. companies, at least, found the Soviets reluctant to let go. "These are our problems," the Russians told a U.S. buyer, "they would not interest you."

United Press International

The Burtons, above, and the Warners arriving in Lond[on]

PEOPLE: *Dick & Suzi & Liz & Joh[n] Share a Hotel in London*

Actor Richard Burton and his new bride, Suzi Hunt, arrived in London Sunday and checked in at the same hotel where Burton's former wife, film star Elizabeth Taylor, is staying with her latest husband. "No doubt we will be getting together for a few drinks and a chat while we are there," Burton told reporters at the airport. Miss Taylor and her husband, former U.S. Navy Secretary John Warner, arrived in London Saturday from Israel.

A spokesman for the Dorchester Hotel said the couples would be staying on different floors but that they would be at the Dorchester at the same time for about three days after Miss Taylor and her seventh husband return Monday from the countryside, where they were visiting friends.

* * *

Commerce Secretary Elliot Richardson says he wants to be the Republican presidential nominee in four years, or failing that, governor of Massachusetts in 1978. The outgoing Cabinet member told two Boston newspapers Friday that he will consult with a number of Republican leaders on his chances for a presidential bid in 1980. "I would come back to the state only for some co[m]bination of two reasons: Eit[her] to run for office and/or beca[use] there was a job there that I wa[nt]ed to do," Richardson said. [He] said a number of Republica[ns] have approached him about [the] presidency and he intends to t[alk] to some others "whose knowled[ge] and judgment I respect."

* * *

Lord Barnetson, chairman [of] the British news agency Reute[rs,] the Commonwealth Press Uni[on] and the United Newspapers Gro[up] of Britain, is to become the cha[ir]man of the Observer, the Sund[ay] newspaper has announced. [He] is one of several appointments [to] the board following the acqui[si]tion of the Observer by the [At]lantic Richfield oil compa[ny.] Other newcomers to the bo[ard] are Douglass Cater of the Asp[en] Institute, who was influential [in] the decision by Atlantic Richfi[eld] to buy the prestigious but fina[n]cially ailing paper; Thornt[on] Bradshaw, president of Atlan[tic] Richfield; former CBS preside[nt] Frank Stanton, and Lord Bullo[ck,] master of St. Catherine's Colle[ge,] Oxford.

West Bank Violence in 6th Day

Israelis Arrest Protesters

AVIV, Dec. 13 (UPI).—Israel demonstrations by in the occupied West Bank ian continued for the sixth nd Israeli troops arrested of young protesters. s burned tires and threw stones at passing Israeli cars north of Jerusalem outside the refugee camp at Kalandiya and troops broke up the demonstration and arrested some protesters, military sources said.

Merchants in Nablus, largest town on the West Bank, were out on strike and most students stayed away from schools, military sources said.

Military authorities lifted a curfew last night after imposing it earlier in the day in Nablus.

Tear Gas Used

Newsmen and photographers said they faced army roadblocks and were unable to get into Nablus today where troops used tear gas yesterday to disperse demonstrators.

Military sources said students in Ramallah also threw stones at passing Israeli cars.

The protests were triggered by the extension of the Israeli value-added tax to the administered territories. West Bankers are also angered by plans to requisition Arab lands in the territory captured by Israel from Jordan in the 1967 Middle East war.

T VICTIM—Israeli guard is helped to ambulance by w border police after being struck by a rock during sing at Kalandiya refugee camp north of Jerusalem.

Contradictions in Life Of Occupied Regions

By H.D.S. Greenway

NABLUS, Israeli-Occupied West Bank, Dec. 13 (WP).—Although teen-agers are burning tires in the Qasaba Quarter again and hurling rocks at the Israeli soldiers, buses are carrying Arabs every day from the West Bank towns to work in Israel where they make up an increasingly important part of the labor force. Civil servants still draw salaries from the Hashemite Kingdom of Jordan but they answer to the Israeli military authorities.

Such are the contradictions of life for the Palestinians who remained behind in Palestine—a normal life on the surface but the bitterness and frustration underneath sometimes bubbles up into protest.

They live in a twilight world of political impotence engendered by nearly 10 years of military occupation. Everyone has someone in the family who has turned his back on all this and gone to live a more comfortable and profitable life in Jordan or the Gulf states and many have had someone who has gone away to fight for the cause.

For those who have stayed behind, however, there is the helpless feeling that the real decisions that concern their future are being made elsewhere—in other Arab capitals, in Israel or even in the United States.

Yet the moves toward peace and a settlement with Israel now being voiced in moderate terms in the Arab world have stirred hopes here that a Palestinian state of the West Bank and Gaza may become a reality, if not next

Associated Press.

BEIRUT CEREMONY—Phalangist party chief Pierre Gemayel and son Beshir, commander of Lebanese rightist militias, reviewing Phalangist troops Sunday. A Phalangist militiaman's gun duel with another rightist provoked a crisis on the Lebanese right.

Shooting Leads to Wave of Violence

Beirut Right Tries to Avoid Split

BEIRUT, Dec. 13 (UPI).—Christian rightist leaders today worked to contain splits in their ranks after a shooting incident involving former President Camille Chamoun sparked a wave of bombings and kidnappings in Christian areas of Beirut.

A top-level meeting of rightist leaders was called to iron out the differences stemming from yesterday's shooting incident between bodyguards of Mr. Chamoun and a Phalangist militiaman. Two persons were killed and three injured in the incident, which appeared to have been provoked by a traffic dispute, a rightist spokesman said.

Tension immediately rose in Christian East Beirut as bombs exploded at two Chamounist offices, killing a man. Both Phalangist and Chamounist militiamen then accused each other of kidnappings.

Troops of the Syrian-dominated peace-keeping force moved into the eastern sector of Beirut today when bands of rival Christian militiamen began roaming the area, shooting up posters of the leaders of each other's party.

Mr. Chamoun called for cooperation between his National Liberal party and the Phalangist party of Pierre Gemayel over disagreements and said, "All parties that respect themselves should clean their ranks of dissident elements."

Mr. Chamoun's Tigers militia said that it was pulling out of the rightist forces' joint military command, but rightist leaders met today to prevent a split.

Beshir Gemayel, son of Phalangist leader Pierre Gemayel and commander of joint rightist forces, said that the incident between Mr. Chamoun's men and "one armed element" was the result of a misunderstanding.

Meanwhile, a quadripartite Arab League commission prepared to convene tomorrow to supervise collection of weapons from Moslem leftists, Christian rightists and Palestinians.

The pro-Syrian Beirut daily Al Sharq said that the committee representing Egypt, Syria, Saudi Arabia and Kuwait would "make resolutions and authorize the deterrent forces to implement them by all means, including the use of force."

With 33% of Total

Socialists Take Portugal Voting

By Marvine Howe

LISBON, Dec. 13 (NYT).—Portugal's voters gave the minority Socialist government a qualified vote of confidence in yesterday's local elections, thereby averting a government crisis.

With most of the votes counted, the Socialists emerged as clear winners, but not quite matching their 35-per-cent plurality of last April's legislative election.

The opposition Communists made a dramatic comeback to third place, while the Social Democrats held their own in second and the conservative Social Democratic Center made slight gains but dropped from third to fourth position.

A 35-per-cent abstention was seen as not only disenchantment in the 4 1/2-month-old Socialist government, but in the democratic process bor out of the April, 1974, overthrow of the rightist dictatorship. Abstentions have risen steadily from 8 per cent in the April, 1975, Constituent Assembly elections, to 16 per cent in last April's legislative election and 25 per cent in June's presidential poll.

The Socialists were well in the lead tonight with 33.11 per cent of the vote, followed by the Social Democrats with 24.49 per cent of the country's 4,035 parishes.

Communist Comeback

The Communist party's "electoral front" with two minor satellite groups made an unexpectedly strong showing with 17.65 per cent, recovering from 7 per cent in June's presidential election and bettering their combined total of 15.93 per cent in the legislative poll.

The Social Democratic Center won 16.63 per cent, compared to 15.96 in April.

A major casualty of the election was the revolutionary Popular Unity Movement, which won only 2.42 per cent of the vote. The movement's presidential candidate, Maj. Otelo Saraiva de Carvalho, came in second last June with 16.52 per cent.

The vote for municipal and parish officials does not directly affect the central government. Socialist Premier Mario Soares, however, indicated on the eve of the voting that his Cabinet would resign if his party suffered heavy losses at the local level.

Despite yesterday's electoral victory, the Soares government is now faced with even more difficulties in governing because the opposition has been considerably reinforced regionally and will undoubtedly become more aggressive on the national level.

Split Results

The country came out of the election badly split, with the Communists strongly in control of the southern Alentejo Province and a good part of Lisbon's industrial belt, and the Social Democrats and the Center Democrats predominant in the rural, conservative north.

There are conflicting results for town hall elections, with the Socialists and Social Democrats each claiming to have won more mayoral posts. It is certain that the Socialists control the main cities: Lisbon, Oporto, Santarem, Setubal, Portalegre and Faro.

Family Given Note of Spain Kidnap Victim

Leftist Unit's Demand Unlikely to Be Met

MADRID, Dec. 13 (UPI).—Antonio Maria de Oriol y Urquijo, the high government official kidnapped by leftist urban guerrillas, has sent his family a note asking them to "keep the faith," family sources said today.

Mr. de Oriol's message was relayed by his captors to a Madrid newspaper, which turned it over to the family last night. It was the first sign that the 63-year-old president of the Council of State was still alive two days after his abduction.

In a covering note, the guerrillas renewed their demand that the government free 15 prisoners jailed for terrorist acts. Government sources said there was no chance the authorities would give in to blackmail.

The sources summed up Mr. de Oriol's brief note, recognized as authentic by police, as follows:

"In the present moment my only concern is my family, whom I love more than anything in the world. The most important is to keep the faith since our destinies are in the hands of God."

Premier Adolfo Suarez postponed a visit to Barcelona today to deal with the political crisis caused by the kidnapping. Government sources said he was in constant touch with his top aides, the ministers for defense, political affairs and the interior.

In a letter to the Barcelona authorities, Mr. Suarez said he put off the visit as a result of "the gravity of some occurrences that we all know about."

Referendum Due

The kidnapping occurred just before Wednesday's national referendum in which Spaniards will decide on democratic reforms.

The reforms are opposed by both the extreme right and the extreme left, while moderate leftist parties urge abstention.

Police clashed with banner-waving leftists in central Madrid today as the incidents occurred in Plaza de Espana Square and Jose Antonio Street as more than 2,000 followers of the Maoist Revolutionary Workers' party tried to stage a demonstration against the referendum.

Mr. de Oriol's abductors said in

One-Third Present Level

EC to Tell Russia to Cut Catch ithin 200-Mile Fishing Limit

By David Haworth

RUSSELS, Dec. 13 (IHT).—Soviet Union was given today by the European nic Community's foreign ers that its trawlers must ally reduce catches in EEC r early next year.

e Russians will be told that an EEC 200-mile fishing is declared on Jan. 1, their g in these waters must be ed from its present level of 00 tons a year to 200,000

s offer will stand for three hs only. If the Soviet and Soviet-bloc fishing naeach as East Germany and d have not by the end of period negotiated reciprocal g rights within the 200one, they will be excluded these waters.

er a full discussion, it was ed the Russians should be a three-month breathing space in which to reconsider their present attitude.

For ideological reasons the Soviet Union refuses to give diplomatic recognition to the EEC and has therefore failed to respond to its requests for negotiation on fishing quotas after the 200-mile limit is declared.

British Foreign Secretary Anthony Crosland said today that the cut demanded by the EEC in Soviet fishing fleets was "very dramatic," but that it nonetheless gave Moscow and its partners an opportunity to talk to the EEC.

According to officials here, the EEC threat may not seem as tough to the Soviet Union as it sounds. They point out that the U.S.S.R.'s own decision to set up a 200-mile fishing zone makes the community's negotiating position much easier.

No Challenge Expected

No one here believes the Russians will seriously challenge the 200-mile limit to be adopted by the EEC, since they have taken a similar position themselves.

But it was clear to the foreign ministers that it would be unrealistic to order all Soviet-bloc trawlers out of EEC waters on Jan. 1.

The commissioner responsible for fishing negotiations with third countries, Finn Olav Gundelach, last week admitted as much. "You cannot tell traditional fishermen that they must cease their operations overnight," he said.

position Picks w President of nn Parliament

NN, Dec. 13 (Reuters).— Germany's Social Demoparty tonight accepted an dion candidate as president he new parliament that bles tomorrow.

spokesman for Chancellor ut Schmidt's party said that uld not contest the election arl Carstens, a retired dipand member of the Chris-Democratic Union, as presiof parliament for the next years.

spokesman said that the nt Social Democratic presiof parliament, Annemarie er, will step back into one he four deputy-president

post of president traditly goes to the biggest parntary party and is normally ntested.

Renger will step down ving the Social Democrats' in the elections from which DU emerged as the largest party in parliament.

Kohl Elected

NN, Dec. 13 (AP).—Helmut was elected today to lead combined conservative oppoin parliament. His election ally ended a threat by the ist Bavarian wing to cancel -year alliance with the tian Democratic Union.

le Kills 4 Swiss

GALLEN, Switzerland, Dec. (Reuters).—An avalanche four young Swiss and in- a fifth near Trogen, south ere, police said today.

Callaghan Pushes Home-Rule Bill in Commons Debate

LONDON, Dec. 13 (UPI).—The Labor government said today that it may allow the Scottish and Welsh people to vote in a referendum to indicate acceptance or rejection of the government proposal to give them limited home rule and their own assemblies.

"I'm not trying to dangle anything or dodge it over the question of a referendum," Prime Minister James Callaghan told Parliament. "We are looking at the practical problems involved and seriously considering them. We shall examine the question fairly and properly."

Mr. Callaghan spoke at the opening of a four-day Commons debate on the second reading of the government's so-called "devolution" bill on Scotland and Wales.

The government hopes to have the bill approved by Parliament before its current session ends next October.

Black South Africa Detainee Reportedly Hangs Self in Cell

By John F. Burns

JOHANNESBURG, Dec. 13 (NYT).—A black mining engineer who is believed to have been detained in connection with an explosion in a Johannesburg restaurant last week has hanged himself in his cell at police headquarters here, a police spokesman said today.

Wellington Tshazibane, an Oxford University graduate, was said to have hanged himself with a strip torn off a cell blanket. Associates have sought permission to have an independent pathologist present at the postmortem examination tomorrow into his death, which is the seventh among black detainees this year.

Officials have said little publicly about the explosion, other than acknowledging that it may have marked the beginning of an urban terrorist campaign by anti-apartheid militants.

But local newspapers, quoting police sources, have said that Mr. Tshazibane and another black, Johannes Mofokeng, a 24-year-old Soweto soccer star, were arrested as suspected accomplices.

The two men were said to have been former co-workers of Isaac Sigho, whom police arrested after the bombing attack on the Fontana Restaurant. All were employed in the diamond research laboratory of the De Beers Consolidated Mines Ltd.

For a time, the three men worked in adjacent laboratories at Booysens, a Johannesburg suburb. Until last February, Mr. Tshazibane was employed in the research laboratory of the Anglo American Corp. of South Africa. Mr. Sigho was dismissed in October from the electronics section of De Beers diamond research laboratory, where Mr. Mofokeng worked as a laborer until his arrest.

Mr. Sigho, 27, is recuperating in a prison hospital from injuries received in the blast, in which he lost his right hand. There were no serious injuries among white diners in the crowded beer garden where the explosion occurred last Wednesday.

Mr. Tshazibane, 30, was arrested on Thursday as he got off a flight from Lesotho, where he was working in a De Beers diamond mine. The police visited his mother, Joyce Mavuso, at her Soweto home on Saturday to inform her that her son had committed suicide. "I do not know what to say except that we will have our own doctor when the post-mortem is held," Mrs. Mavuso said today.

Shortly after Mr. Tshazibane's death was confirmed this morning, the police raided the Soweto home where he had lived with his mother. Unconfirmed reports said that at least two shots were fired, but it was not immediately known if there were any casualties.

In the absence of detailed information from the police, rumors abound. One report, carried in several newspapers, was that the restaurant explosion was a preliminary to a second bombing, planned to take place on the Day of the Covenant, which falls this Thursday, a national holiday.

Gen. Gert Prinsloo, the police commissioner, tried today to calm public anxieties prompted by the explosion. He said that the police did not anticipate the outbreak of a general campaign of urban terrorism. Last week, Justice Minister James Kruger acknowledged that the blast may have been the first blow in a terrorist campaign.

Mr. Tshazibane, the 29th black detainee to die since political detentions became common in the early 1960s, was described by Anglo American officials as "a brilliant young man."

He enrolled at Oxford on an Anglo American scholarship in 1969, after being expelled for political activities from the University of Fort Hare, a black institution. He was one of very few black men working as an engineer in South Africa's mining industry.

According to the police, he was on bail at the time of his latest arrest, having been charged in connection with the death of his wife, Elizabeth, who was found battered to death in Soweto a few weeks ago.

N. Atlantic Fares to Increase For Most Airlines Next April

GENEVA, Dec. 13 (UPI).—Scheduled airlines flying the North Atlantic agreed today to raise fares by 1 to 11 per cent as of April 1 next year.

The decision, covering 75 per cent of total North Atlantic traffic, is a "limited agreement," as the airlines of Canada, Spain, Portugal and Yugoslavia have not yet approved it, a spokesman for the International Air Transport Association said.

Airlines also decided to have only two seasons instead of three—an eight-month basic season and a four-month summer peak period.

Finally, they restricted individual fares to six types and group fares to three.

While the 14 to 21-day excursion fare will remain unchanged at $541 basic and $631 peak-season rates, there will be a 9-per-cent average increase on the 22 to 45-day excursion ticket, IATA said.

Prices for a 22-to-45-day excursion-fare round trip London-New York will be $467 during the basic season—up 6.5 per cent—and $587 during the peak period, an 11-per-cent increase.

The advance purchase excursion fare (APEX), which was reduced to a 45-day advance booking instead of 60 days in the United States alone, will go up an average of 7.5 per cent on a round trip New York-London at $350 for the basic season and $440 for the peak level.

A round-trip London-New York economy class flight, meanwhile, will cost $6[illegible] during the low season, up 3.5 per cent from present prices, and $774 during the peak season, a 1.5-per-cent rise.

The round-trip New York-London first-class fare was raised by 5 per cent to $1,312.

The price for a round-trip New York-London youth fare will be $473 during the basic period and $536 during the peak season.

The IATA spokesman said that if there is a 10-per-cent oil price increase, passenger fares would have to be raised by an additional 2.5 per cent.

Geneva Talks' 2d Round Expected for January

GENEVA, Dec. 13 (UPI).—Britain prepared today to adjourn the Rhodesia conference after seven weeks of inconclusive discussion but with a fresh start planned for early next year.

Ivor Richard of Britain, the conference chairman, held a final round of bilateral meetings with the four black nationalist delegation leaders to discuss where and when to hold a second round of the negotiations.

Mr. Richard conferred with Rhodesian Prime Minister Ian Smith yesterday before Mr. Smith went back to Salisbury.

High conference officials said Mr. Richard would adjourn the conference tomorrow and that the second phase would probably open "toward the end of January." Geneva remained the likeliest site although Nairobi is a possibility, they said.

Not a Failure

British officials said that, on balance, they do not consider the conference to have been a failure because it brought black and white Rhodesians to the negotiating table, where they were able to spell out their positions on how Rhodesia should make the transition from white minority rule to independence under black majority rule.

"We also have a deadline for majority rule which is March 1, 1978," a British official said.

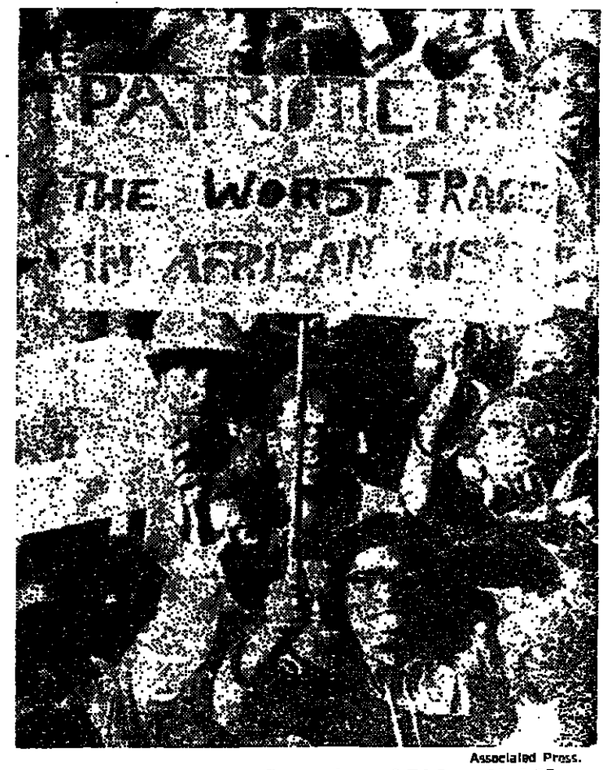
The black nationalist leaders—the Rev. Ndabaningi Sithole, Bishop Abel Muzorewa's deputies, and "Patriotic Front" leaders Robert Mugabe and Joshua Nkomo, conferred with Mr. Richard today.

Mr. Mugabe and Mr. Nkomo, after their meeting with Mr. Richard, said their position remains that Britain must transfer power to the black majority.

"We cannot accept anything less than that," the two nationalists said.

Mr. Mugabe said he and Mr. Nkomo were prepared to accept a British commissioner in Salisbury during the transitional period, "but we do not intend to have the territory taken over by Britain."

"A resident commissioner is a very honorable post," Mr. Mugabe said. "It enables the British to lower the flag while we hoist our own."



Mr. Nkomo reported that Mr. Richard said he would inform all the delegations tomorrow about the adjournment and propose a date for resumption.

Muzorewa Greeted

SALISBURY, Rhodesia, Dec. 13 (AP).—Bishop Muzorewa was welcomed home to Salisbury yesterday from the Geneva conference by about 200,000 cheering followers. It was believed to be the biggest crowd to acclaim a Rhodesian black politician.

The U.S.-educated Methodist bishop was greeted with clenched-fist salutes and shouts of "Zim! Zim!" for Zimbabwe, the nationalist name for Rhodesia. He went in a motorcade from the airport to Salisbury's black suburbs.

Bishop Muzorewa said at a news conference that he feels there is still enough goodwill between the country's 6 million blacks and 270,000 whites to work out a constitutional settlement.

Associated Press.

RHODESIA WELCOME—Supporters of Bishop Abel Muzorewa greeting their leader near Salisbury on return from Geneva conference. Sign refers to rival black group.

Fears Grow on Crime, 'Unemployables'

Jobless Youths Worry West Europe

By Clyde H. Farnsworth

PARIS, Dec. 13 (NYT).—The blight of jobless youth has fallen over Western Europe.

As in the United States, it is school dropouts—often from the least favored social strata, often with inadequate vocational training or an education mismatched with the needs of employers—who are the hardest hit.

In U.S. cities, rising youth unemployment has been associated with increased crime and other violence, suicides, drug addiction and prostitution. An investigation has found fears running deep in many Western European countries that they may be headed down a similar path.

Economic and social forces are combining to make youths into what the Organization for Economic Cooperation and Development terms "a new underprivileged group."

Slower Growth

After two decades of economic vitality, during which about 10 million foreign workers supplemented sorely stretched national labor forces, Europeans have now entered what most specialists believe will be an extended period of slower growth.

As economic activity has slumped, some foreign workers have departed. Yet unemployment is still climbing because growth now, and at the rate being forecast until 1980, is inadequate to absorb the new entries into the labor market.

Formal statistics tell part of the story. In the nine Common Market countries, those under the age of 25 looking for jobs have more than doubled since 1973 and now account for 1 out of every 3 of the 5 million unemployed.

There has been a significant increase, furthermore, in the number of youths out of work for relatively long periods, suggesting, in the words of the Common Market's Executive Commission in Brussels, "development of a hard core of long-term unemployed people."

Richard O'Brien, chairman of the British Manpower Commission, said: "Lack of a job early in one's working life means that one misses the vital formative experience of work, the essential disciplines of working life which we take for granted. In short, there is a danger of making unemployables of our unemployed." Although not as high as in the United States, unemployment totals in Western Europe have already reached levels not reached since the Great Depression of the 1930s.

Among social forces tending to work to the disadvantage of young job seekers is the position held by union leaders on both sides of the Atlantic that their principal responsibility is protection of those on the job, not those looking for one.

Another is the attitude of corporate managers. With mounting social obligations, accepted at the insistence of governments and unions, managers have found that workers, once hired, are difficult and expensive to let go. This makes them generally wary about recruiting new workers.

Machines Preferred

Against the backdrop of contracting labor needs and rising labor costs, company managers now prefer, even when openings do arise, to acquire a machine if possible rather than hire workers.

"There is too much similarity for comfort between what happened in the northern cities of the United States and what is happening here," commented the Guardian after West Indian riots at carnival time late last August in the Kensington borough of London.

West Indian teen-agers, many of them jobless, fought running battles with the police for two days. More than 100 persons were arrested and more than 200 injured.

In Brixton, another section of London with a large West Indian population, Courtney Laws, a black leader, received a reporter in the bare offices of the Brixton Community Neighborhood Association, declaring: "Youth unemployment has grown so much in Brixton that it is now genuinely reflected in delinquency, crime and anti-social behavior."

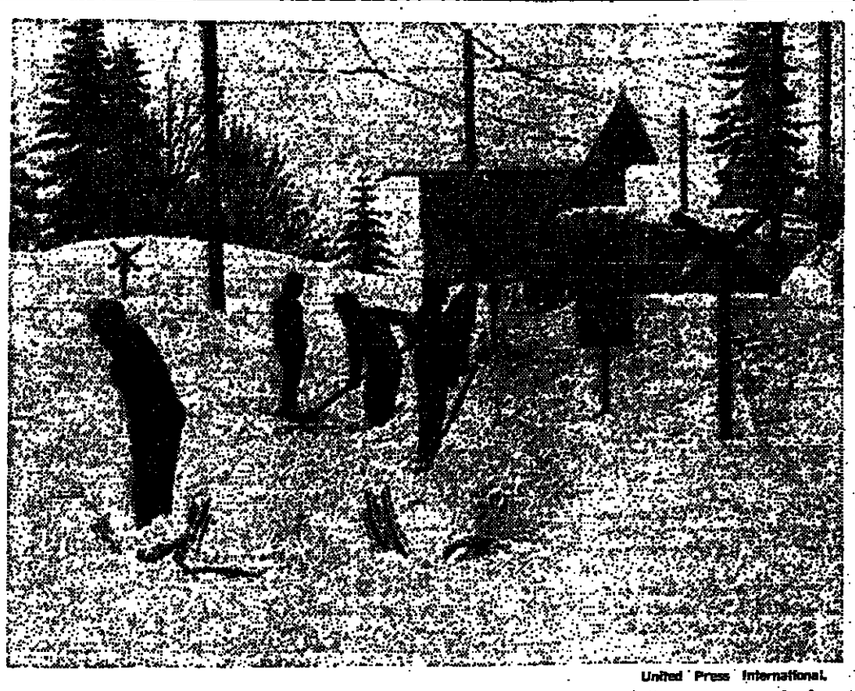
Motorcycle Gangs

In Hamburg, the Rev. Werner Jeschonowski, a Lutheran pastor, runs an unusual church rehabilitation center on the Billrothstrasse—five minutes from the Reeperbahn red light district—for motorcycle gangs of leather-jacketed youths, most without gainful employment, many with police records.

The center has twice-weekly "contact" sessions, helps the youths get jobs and tries to divert them from the violence of the streets.

Pastor Jeschonowski, who has worked seven years in the center, warned that if youth unemployment gets much higher, "I see great dangers approaching us."

The forebodings seem to be borne out by such youths as Uwe and Nils, both 20 years old, who proudly wear swastikas and Nazi medals on their black leather jackets. Hitler was someone to admire, they contend, because he improved job conditions in Germany.



Paris Warnings

Demonstrations in the streets of Paris are also flashing warnings about the explosive character of youth unemployment. Twice in recent months marchers have been called out to protest the rising number of unemployed youths.

In the spearhead of these and other demonstrations are teenagers who chant: "The only solution is revolution!"

Although the grinning demonstrators still appear more self-conscious than defiant and though they rarely clash with the police, the words cannot entirely be dismissed in France, with its history of periodic revolutions and its worker-student uprising in the spring of 1968.

The gravity of the situation is underscored in talks with such officials as a top French central banker, who emotionally observed after a particularly bleak assessment of monetary and financial conditions: "Unemployment threatens to erode the foundations of our democratic institutions."

United Press International.

BEAUTIFUL, BUT A BURDEN—Railroad workers shovel snow from tracks, trying to open line between Goldau and Klosterli in mountains of central Switzerland.

Kidnapped Spanish Official Sends a Message to Family

(Continued from Page 1)

notes and telephone calls to news media that the kidnapping was a protest against the "phony fascist referendum."

Rightists have been urging Spaniards to vote no, claiming that democracy equaled chaos. Some of them expressed the hope that the kidnapping would turn the referendum into a vote on law and order and boost the no vote.

Mr. de Oriol's abductors are an obscure far-left group signing its notes "October 1 Revolutionary, Anti-Fascist and Patriotic Resistance Group" (GRAPO). Other far-left organizations say they have no ties with it.

A small group apparently composed of dissidents of other revolutionary movements, it first won notoriety Oct. 1 last year when it killed four Madrid policemen. It has since carried out a series of bombings of government buildings and television relay towers.

"The safety of Oriol depends on the government's attitude," a note from GRAPO said. "We are prepared for everything."

GRAPO has set no deadline for the release of the 15 prisoners whom it has named in its communiqués. They include some of the persons allegedly involved in the 1973 assassination of Premier Luis Carrero Blanco as well as Basque and Maoist urban guerrillas whose death sentences Francisco Franco commuted to 30 years in prison shortly before his death last year.

Police Seek Carrillo

MADRID, Dec. 13 (Reuters).—The police have been given orders to find and arrest Spanish Communist party leader Santiago Carrillo, believed to be hiding here, Interior Minister Rodolfo Martin Villa was quoted today as saying.

Mr. Carrillo, who has lived in France since the end of the 1936-39 Civil War, was denied a Spanish passport despite a royal amnesty in July. But he surfaced here three days ago and announced at a press conference that the Communists would contest national elections next spring. He said he had been living here since February.

West Point Gets New Cadets Chief

WASHINGTON, Dec. 13 (AP).—The Pentagon today announced the assignment of a new commandant of cadets at West Point, a move apparently prompted by the worst cheating scandal in the academy's history.

Brig. Gen. John Bard, an executive to the Supreme Allied Comander, Europe, will succeed Brig. Gen. Walter Ulmer jr., the Pentagon said.

Gen. Bard is a 1954 graduate of West Point, ranking second in his class scholastically. He holds a bachelor's and a master's degree in political science from Oxford University and a master's degree in aeronautical engineering from the University of Michigan.

Ankara University Shut to End Violence

ANKARA, Dec. 13 (Reuters).—Ankara University was shut indefinitely today while the Turkish government takes steps to curb political violence on the campus. Scores of people have died in clashes between extreme leftist and rightist students.

Faculty representatives said after a meeting over the weekend that armed political acts, political murder and pressure from extremist organizations outside universities have made teaching impossible.

Qatar Tightens Security for OPEC Talks

By Eric Pace

DOHA, Qatar, Dec. 13 (NYT).—This remote Arabian sheikhdom has been taking stern security measures in recent days to guard against any terrorist assaults or incidents during a meeting this week of the Organization of Petroleum Exporting Countries.

Desert patrols have been intensified. Bulletproof steel shutters have been put up to shield the conference hall. Foreign travelers are being carefully screened by the police.

"We have a tradition of hospitality here, but we must prepare for everything," a visitor was told by Abdel Rahman Salf al-Modhadi, director of the Qatar radio.

Petroleum experts from the OPEC nations have already gathered in the capital for a preliminary meeting before the chief oil negotiators from 13 countries convene Wednesday. The talks are expected to last two or three days and probably will result in an increase in oil prices, the first in 15 months.

The price increases are of great significance for the economies of the world's industrial and developing countries.

A similar OPEC conference in Vienna last year was raided by terrorists, who abducted some ministers and flew with them to Libya before releasing them.

The desire for safety is understood to have been a main reason for the decision to meet in Qatar, a bleak promontory that juts from the Arabian Peninsula into the Gulf.

Qatar's oil wells produce a mahogany-colored and evil-smelling oil that brings the sheikhdom $3 billion a year.

No reports of impending terrorist actions have been made known, but it is thought here that extremists of many political shadings might want to attempt some spectacular act of violence during the meeting, which will bring together representatives of countries providing about two-thirds of the non-Communist world's oil supplies.

Accordingly, motorized army patrols have been bolstered along Qatar's sandy borders to try to thwart any infiltration from Saudi Arabia and the United Arab Emirates.

Foreign applicants for visas to enter Qatar have been screened more carefully than usual.

During the meeting, patrol boats of Qatar's small navy are expected to cruise the waters near the Gulf Hotel, which is to house most of the OPEC representatives.

The nine-story modern building is set on the eastern outskirts of the capital on a small headland known as Ras Abu Abdoud, which is expected to be cordoned off this week. The hotel is to be closed to unauthorized visitors.

Tall steel shutters have been fitted to the windows of the Gulf Hotel's 100-foot-long main banquet hall, where the meeting is expected to be held.

Moderate Increase

DOHA, Qatar, Dec. 13 (Reuters).—Indonesian Oil Minister Mohammed Sadli said tonight that his country would support a "moderate" oil-price increase of around 10 per cent on the current $11.51 per barrel.

Prof. Sadli, who is the current chairman of the 13-member organization, said that his country usually adopted a moderate stand.

French Reported To Menace Scots In Fish Dispute

EDINBURGH, Dec. 13 (AP).—Britain dispatched a vessel today to investigate claims that French fishermen threatened Scots with rifles in a weekend incident off the Scottish coast.

The Scottish Department of Agriculture and Fisheries said here that it ordered the Fishery Protection vessel Westra into the area.

The Westra was dispatched after Capt. Peter Duncan reported that 30 large trawlers from Boulogne harassed him and other Scottish fishermen off the Shetland Islands 100 miles northeast of the Scottish mainland.

Capt. Duncan said the French ignored signals and a rocket fired by the smaller Scottish boats to warn them they were getting too close. When the Scots moved in to protest, the French produced rifles, he said.

Indian Party Leader Freed From Parole

NEW DELHI, Dec. 13 (Reuters).—Atal Bihari Bajpayee, parliamentary leader of the Hindu Nationalist Jan sangh party, has been released unconditionally from detention under India's emergency laws, an official announcement said today.

Mr. Bajpayee, 49, was arrested soon after the state of internal emergency was imposed in June, 1975. He was held without trial until a few months ago, when he was released on parole.

New Whale Quota For Japan, Russia

TOKYO, Dec. 13 (UPI).—Japan and the Soviet Union agreed today on sharing a sperm whale catch quota given up by South Africa for the 1977 season in the Southern Hemisphere, the Foreign Ministry announced.

Under the agreement, Japan's quota for sperm whales was increased from 168 to 138 males and from 37 to 63 females. The Soviet Union's share will be 3,134 males and 707 females, an increase from 2,842 and 600, respectively.

Swiss Still Study Action on Alleged War Criminal

BERN, Dec. 13 (UPI).—The Swiss government today put off until the end of the week a decision on the Netherlands' demand for the expulsion of accused Nazi collaborator Pieter Menten, 78.

The seven-member Swiss Cabinet said that "some questions remain to be examined," and that it will discuss the case again at its next meeting on Friday.

Switzerland was faced with delicate legal problems after Mr. Menten's arrest, because its penal code does not provide for the extradition of persons charged with war crimes.

A 1965 decree, however, permits expulsion of any person suspected, with supporting evidence, of "crimes against humanity."

2 Get Death in Russia

MOSCOW, Dec. 13 (Reuters).—A court in Rostov-on-Don, southern Russia, has sentenced two Soviet wartime collaborators to death by firing squad for taking part in Nazi atrocities, the newspaper Sovietskaya Rossiya reported today.

Two others, tried with them, were sentenced to long terms in labor camps, it said.

European Parties Discuss 1978 Vote

BRUSSELS, Dec. 13 (UPI).—The chairmen of Europe's Social Christian, Liberal and Socialist parties met today to discuss campaign rules for direct elections to the European Parliament scheduled for May, 1978.

Belgian Premier Leo Tindemans, chairman of the European Popular party; Gaston Thorn, Premier of Luxembourg and chairman of the European Liberal party, and Wilhelm Droescher, president of the Confederation of Socialist Parties of the European Community, discussed a code governing spending and other aspects of electioneering.

They also talked about differences in national election laws and the use of the mass media to promote the idea of European integration.

Earthquake Rocks North Italian Town

RIVA DEL GARDA, Italy, Dec. 13 (UPI).—A strong earth tremor rumbled through this northern Italian town at the foot of the Alps today, damaging buildings and forcing families to seek shelter in requisitioned hotels.

There were no reports of injuries. The Geophysical Observatory at Trieste said the tremor hit at 6:24 a.m. (0524 GMT) with a force of 4.5 on the Richter scale.

Oil Payment Surplus Possible

S. Korea's Exports of Labo To Mideast Creating a Boor

By Sam Jameson

SEOUL, Dec. 13.—When Samwhan Construction Co. submitted its $25-million bid to build a 97.5-mile road in Saudi Arabia, "there was virtually no trade and no contacts between South Korea and Saudi Arabia," said Choi Chang-Whan, the company's president. "We didn't even have an embassy there."

That was December, 1973. By the end of October, this year, South Korea had signed nearly $3.1 billion worth of construction contracts in the Mideast and had expanded its exports to that region by 12.5 times. More than $2.2 billion have been signed in contracts in the first 10 months of this year.

Next year, South Korea could become the first oil-importing country to balance its books—or even record a payments surplus—with Mideast nations.

It is part of the story of South Korea's newest, and perhaps most successful export—labor.

At the end of October, 45,374 South Koreans were making their living overseas, excluding emigrants. In the Mideast, hundreds of additional workers were being flown into Bahrain on Korean Air Lines flights—now operating three times a week—to join the 19,182 working in the region as of Oct. 31.

Government Support

Another 13,635 South Koreans were working as seamen for foreign shipping firms and 9,452 were employed in West Germany, mostly as coal miners.

By the end of next year, around 40,000 Koreans were expected to be employed in the Mideast alone, mostly in Saudi Arabia. Construction executives said the number could easily expand to 60,000 in 1978.

The export of labor is backed up by the government through indirect subsidies and threats of fines and imprisonment for faulty work abroad. Overseas construction has become the major hope for a windfall in foreign exchange for a nation which in recent years has suffered annual trade deficits exceeding $1.5 billion.

Although officials deny charges made by foreign competitors that South Korean firms are accepting overseas contracts at cost or below, they admit the chief attraction of Mideast business is not the percentage of profit.

Foreign Exchange

Asked about foreign impressions that the construction boom was less a profit-making enterprise than an effort to obtain foreign exchange, the then Minister of Construction Kim Jae Kyu replied:

"What you have heard is pretty accurate."

Mr. Kim, who recently became head of the South Korean CIA, said that profits were running at about 8 per cent on Mideast contracts, compared with a norm of "between 25 per cent and 30 per cent" on domestic construction contracts.

"Profit is much thinner than in South Korea, but the volume is so big that the sum of money is large," he added.

Mr. Kim said, however, that President Park Chung Hee had personally instructed him to avoid becoming a "dollar-earning worm."

"The President said friendship with countries in which we carry out construction projects is more important than dollars," Mr. Kim added. "The value of the dollar changes. The value of friendship does not."

Host of Measures

Mr. Park's government has put itself squarely behind the Mideast push with a host of measures:

• A 50-per-cent corporate tax exemption was put into effect Jan. 1 for profits from overseas construction projects. Exports for such projects have been excluded from taxation completely, and long-term loans with interest rates of between 3 per cent and 12 per cent (depending on the length of the repayment period) are being provided to construction firms, Mr. Kim said.

By comparison, interest rates for large corporations seeking loans for work in South K itself run around 20 per ce

• Wages of workers on seas projects have been exem from income tax up to $1 month. And even though wo had been sending home abo per cent of their paychecks out coercion, the Park go ment on Feb. 1 made 60-per remittances a legal obligatio

• The government has the lead in seeking help foreign commercial banks guarantee bidding and p mance bonds required by governments as a prerequis the awarding of contracts.

Competition Banned

Since Jan. 1, private firms been required to submit co details of overseas contract review by the Ministry of struction before any final mitment.

Mr. Kim denied that the pose of this legal provision to prevent competitive bi but added:

"Koreans have learned experience that competition begets bloodletting among t selves."

A contractor can be imp ed for up to five years an firm fined about $10,000 if workmanship results in se damage to an overseas p during the warranty period

Licenses Required

All construction comp wishing to engage in ove work are required to secu censes, which may be re when "performance is belo censing standards" or "im national prestige by poss delayed fulfillment of a tract."

Chung Jai Suk, chairman president of the Korea Fou tion for Mideast Studies, was established only 11 m ago, pointed out that Saudi bia alone was estimated to 500,000 foreign workers to out its current five-year econ plan.

Without suggesting that S Korea intended to send any like that number to the Mi he added:

"We really have no com tion. Japan, when it bids Mideast projects, can offer fin ing and better technology we have but it can't offer labor. And it has to compete the United States, which even better technology. We offer skilled labor and a c amount of technology as and nobody else can do that.

Seventy projects are under and include a $944-million dustrial port development, a million liquefied natural gas sulfurization plant, and the struction—for $260 million—o entire university.

year, then within the foreseeable future.

This does not mean that the Palestinians have completely given up their dream of a return to lost properties in Haifa, in Lod and in other Israeli towns. But for the people of the West Bank who have not been cooped up for a generation in the dreary refugee camps of Gaza and who are not exiles in a foreign land, there is a growing willingness to compromise.

As Karim Khalaf, the mayor of Ramallah, put it: "A Palestinian state in exchange for recognition of Israel." And what of the goal of a secular state to replace the Jewish state under Palestinian control? "Maybe 200 years, maybe 2,000," he said.

His remark was typical of many who said that the cause should be put aside at least for this generation in the interest of some kind of a state of their own.

Political moods in the West Bank tend to take their cue from outside and the mood here now is, of course, directly attributable to what is perceived as the new, moderate stance of the Arab world and perhaps the Palestine Liberation Organization as well.

"We must live now in the present and not in the past," said Nablus city councilman Khaldun Abd al-Hoq. "We must agree to live within the 1967 borders without asking for a return to the 1948 borders because the mood of the Arab countries has changed."

Moderate Voices

Or as Dr. Hatam Abu Ghazala, also of Nablus, said: "No one is willing to liquidate Israel anymore."

"If we just want to get rid of Israel we will kill ourselves," said Raymonda Tawil, an outspoken supporter of the Palestinian cause who has just been released from four months of house arrest in Ramallah.

"People are saying the PLO has done what it can but now we must do what we can to save the Palestinian people. These moderate voices are being heard now and are being encouraged by the Communist party against the Rejection Front."

None of this is very encouraging to Israelis who believe that without a real change of heart, a complete renunciation of the goal to replace the Jewish state with something else, nothing has really changed and the new Arab peace offensive is just a change in tactics.

And when the Arabs talk of a return to 1967 borders it means abandoning the Israeli settlements in the West Bank and Gaza as well as giving up East Jerusalem — something Israelis are not about to do, "not even for peace," as a senior Israeli official said recently.

Growing Hope

Yet there is a growing hope in the West Bank that some compromise can be reached with the help of the Arab peace offensive and pressure from the United States.

A related question being discussed in West Bank political circles is what form the proposed state should take. Except for security matters, as an Israeli official once pointed out, the West Bank is a Jordanian-Israeli condominium. Although the Rabat summit of 1974 held that the PLO was the sole representative of the Palestinian people, Jordan still pays civil servants and teachers and, although the amount is less now, development funds as well. West Bank mayors make the journey across the Jordan, hat in hand, seeking more funds.

The Israelis hope that any state on the West Bank will be part of Jordan and, with the growing ties between Syria and Jordan, many people on the West Bank fear that Amman and Damascus have the same thing in mind.

Bitterness Lingers

Although there is private criticism of the PLO leadership here and although there is a pro-Jordanian faction, especially among the well-off who fear the radical PLO, the prevailing view on the West Bank is that there should be an independent and completely sovereign Palestinian state first and that cooperation with Jordan should be considered later.

There are some, like Bethle Mayor Elias Frati, who se confederation with Jordan as best answer. For others the terness of what amounted Jordanian occupation here in 1948-67 period is too much.

But in the long run, a diplomat said, "the questio not whether there should connection between the Bank and Jordan but how m of a connection. Every famil the West Bank has a relativ Jordan, and they are too cl linked economically. The alternative would be a con tion with Israel which not wants."

"The West Bankers are not like us in the Diaspora," an raeli Arabist said recently. "I may dream of Palestine an state but they know they have to be practical and operate with the regime in po in order to get along." Toda in the Israelis, yesterday Jordanians, before that the Eg ish, the Turks, the Crusaders so on. With that kind of a p there is optimism that perh something can be worked out the Palestinians to have a s of their own. If that can done, most people on the W Bank could accept the existe of Israel.

New Vaccine For Rabies Is Developed

French-Made Serum Has No Side Effects

CHICAGO, Dec. 13 (UPI).—Researchers have developed an effective and simplified new treatment for rabies, a Philadelphia physician reported yesterday.

The treatment, a major breakthrough, involves only half a dozen shots, with virtually no side effects, Dr. Hilary Koprowski wrote in this week's issue of the Journal of the American Medical Association.

Current methods involve 14 to 21 injections with frequent severe side reactions.

Dr. Koprowski reported on field trials in Iran in which 45 persons severly bitten by rabih dogs and wolves were treated with a new rabies vaccine produced in cultures of human diploid cells. They also received one injection each of rabies immune serum.

"This treatment," Dr. Koprowski said, "in contrast with past experience with other vaccines, resulted in protection of all individuals against rabies. Thus, almost a century after the post-exposure treatment of humans was initiated, an effective tool for protecting man against rabies has finally been developed."

The new vaccine, produced by the Institut Merieux in Lyons, is known as human diploid cell vaccine. It was sent to the World Health Organization Collaborating Center for Reference and Research in Rabies in Tehran for trials.

It was used successfully on 45 persons bitten by six dogs and two wolves in rural areas of northwestern Iran between June, 1975, and January, 1976.

Six months after the trial ended, all of the treated individuals were alive and well, with the exception of one 90-year-old man who died of a heart attack following a hard day's work five months after he received the rabies shots.

Doctors would have expected "a mortality of not less than 35 per cent among the 45 persons in our series had they not been treated," Dr. Koprowski said.

"We are convinced that a major breakthrough has been achieved in the post-exposure treatment of humans exposed to rabies infection," Dr. Koprowski said.

Tunis to Draft Women

TUNIS, Dec. 13 (Reuters).—The Tunisian Army is to begin conscripting women next year, Defense Minister Abdallah Farhat said in an interview.

Carter Seen Losing Contact With Public

By Hedrick Smith

WASHINGTON, Dec. 13 (NYT).—Direct personal contact with ordinary voters was a deliberate hallmark of President-elect Jimmy Carter's election campaign and of his tenure as governor of Georgia. But some of his entourage fear that he is now losing touch with the people.

They worry about the enforced isolation of the presidency that has enveloped Mr. Carter in a shield of security men and a horde of reporters who follow wherever he goes in public.

Greg Schneiders, who as Mr. Carter's appointments secretary probably spends more time with him than anyone else outside his immediate family, remarked the other day that it was increasingly difficult to maintain "relations with the outside world, which is getting more and more remote."

"In Iowa, when he was campaigning," Mr. Schneiders said, "Jimmy could walk up and talk to people . . . but now—since everything has grown in quantum leaps, first after the convention and even more after the election—it's become hard for him to function with people on a one-to-one basis."

Hard Man to Reach

Such public figures as Ralph Nader, the consumer advocate, whom Mr. Carter invited in the campaign to keep in touch with him, have complained that now, as President-elect, he is a hard man to reach.

Mr. Carter tried to break out of isolation by meeting groups of businessmen and prospective candidates for top posts in his administration and by making scores of telephone calls around the country to leaders with whom he is consulting about his cabinet choices. Mr. Schneiders said that in this respect Mr. Carter sometimes has spent several hours a day on the phone.

In sessions with congressional leaders and others, Mr. Carter has made a point of giving them his personal phone number and inviting them to call him. Actually, Mr. Schneiders disclosed, there is a pecking order among those granted that courtesy: The great bulk of them have been given a switchboard number in Mr. Carter's hometown, Plains, Ga., and only about 35 to 40 —including Mr. Nader—have acquired the number that Mr. Carter himself answers.

Aides Sense Tension

Some of those from outside his immediate entourage have found him composed and relaxed in their meetings with him. "He was very relaxed, almost jolly—obviously working hard but enjoying it," was the description by W.G. Clayton jr., chairman of the Southern Railway Co., one of the industrialists who met with Mr. Carter at Blair House here last week.

But Mr. Carter seemed very tense to some of the high-level transition staff members who met with him at Blair House. "He's more at ease when he's in Georgia than he seems to be in Washington," said an aide who has taken part in sessions in both places.

Mr. Carter's intensity, this aide said, has made some of his staff stiff in his presence. One reason, the aide suggested, is that senior Carter assistants have evidently been left with the impression that they are in competition for certain White House responsibilities.

The aide said that Mr. Carter *did not seem to want to relax* that air of intense competition in his staff.

The pomp and circumstance of the presidency enveloped Mr. Carter almost immediately after his election when President Ford sent him his personal jet, Air Force One, to fly him to a vacation spot on St. Simon's Island, Ga.

Security Shield

The contingent of Secret Service agents surrounding him immediately expanded and by the time he came to Washington for the first time as President-elect on Nov. 22, he was shielded from the crowds across from Blair House, where he was staying.

Most of the day, high-level Ford administration officials came to call on him as if he were a visiting chief of state.

And when the schedule called for him to walk across Pennsylvania Avenue that afternoon to the White House grounds, about 50 yards away, protocol and security considerations prevailed at the last minute. Mr. and Mrs. Carter were driven in a Lincoln Continental limousine from Blair House to the rear entrance of the White House, with agents riding cars in front of and behind them.

Secretary Back Home After Last Mission

Kissinger Era of Airborne Diplomacy Ends

By Bernard Gwertzman

WASHINGTON, Dec. 13 (NYT).—Secretary of State Henry Kissinger returned home yesterday, ending his unique era of airborne diplomacy.

When the blue, white and silver Air Force Boeing 707 jet swooped under the heavy clouds and touched down at Andrews Air Force Base, Md., a larger than usual group of State Department officials and reporters were there to honor the secretary, whose stamina had made him a legend at the State Department.

He chatted with some friends, spurned the TV microphones and then drove off to watch a football game on television. Three intensive years of shuttling around the world, to the Middle East, Europe, the Soviet Union, China, Latin America and Africa, were over.

The "Woodcutter," as the Secret Service agents identify him in their code, had logged 650,000 miles as secretary—564,000 of them to 57 foreign countries—and the last was yesterday's relaxed 3,600-mile flight from London that ended a five-day trip to Europe.

The dozen reporters on the flight, most of them veterans of more dramatic Kissinger missions, had hoped this final leg would be memorable. Two television networks had received *permission to have cameramen* aboard the flight and the secretary was pressed to speak about his triumphs and failures. But he steadfastly refused.

Likes His Job

Mr. Kissinger seems to prefer to save any discussion about his often controversial record for his own memoirs after he turns his job over to Cyrus Vance on Jan. 20. A proud man who likes his post, he appears not to want to hasten his departure by talking constantly about it.

He apparently finds it unattractive to list his triumphs and he seemingly finds it almost impossible to admit to any major mistakes.

Mr. Kissinger preferred on the flight—as he has on all the other flights in the last three years—to talk informally to reporters, either in his private lounge in the front of the plane or standing in the aisle in the rear.

There was an attempt at serious affairs of state. The Rhodesian negotiations are said to be coming along; the talks Mr. Kissinger had in London have generated some movement and some of his aides will return there later this week for more consultations.

The Russians were on everyone's mind. The suggestion was made that it was insulting for Leonid Brezhnev to have told President-elect Jimmy Carter that he would not foment a crisis next year. Also, it was suggested that Mr. Carter should be aware that the Russians will be watching his first moves carefully and that the United States must move quickly to warn the Russians if they should try to meddle in the Rhodesian situation.

Mideast Opportunity

The Middle East, Mr. Kissinger said, is ripe for settlement. But this does not mean that a Geneva conference is the best solution, since such a conference would only give the Soviet Union a free invitation to get involved in an area where it has been steadily losing influence.

If Mr. Kissinger were in charge after Jan. 20—and he says that he has no desire to be involved in any policy discussions—there might be simultaneous step-by-step diplomacy between Israel, Egypt and Syria to bypass the Palestinian problem, since Israel will not talk with officials of the Palestine Liberation Organization.

His greatest sorrow probably is what happened in Indochina two years after the 1973 accords. But even the Korean agreement of 1953 would have collapsed if there had been anything comparable to Watergate and the ensuing congressional cutoff of aid and support.

No Retirement

The Air Force stewards opened some champagne, as they had at the end of every mission, and poured it into plastic cups. There were some desultory toasts. The mood was less sentimental or emotional than at the conclusion of several of the Middle East trips when the secretary was returning home with a concrete achievement after considerable effort.

Mr. Kissinger has not retired from work. He has told everyone that he will not leave the country in the remaining six weeks before Mr. Vance takes over. And the secretary plans to begin an intensive course of bringing Mr. Vance up to date on diplomatic matters on Wednesday, when the two will meet for most of the afternoon. They will meet regularly thereafter.

Mr. Vance, the secretary-designate, has said he would prefer to travel less than has Mr. Kissinger and to delegate the responsibility for negotiations to subordinates as much as possible.

But the consensus on the Kissinger plane was that, whatever Mr. Vance's intentions in the Middle East in particular he may find it necessary to travel to that region to make any headway.

Weapons Suspect Is Freed on Bond

LOS ANGELES, Dec. 13 (AP).—A man arrested in the discovery of eight tons of munitions on his property was released on $15,000 bond yesterday, sheriff's deputies said.

Meanwhile, investigators turned up additional weapons on property owned by Donald Wiggins, 41, in Ontario, Lancaster and Pomona. Authorities said the weapons were amassed by a revolutionary rightist organization.

Sheriff's deputies bulldozing the front yard of Mr. Wiggins's Pomona foundry Saturday found a number of military rockets. Authorities said they also found a large supply of machine-gun and other weapons parts. Five tons of armaments, including explosives and ammunition, had been found last week on the Lancaster property.

Robbers Draw a Blank

TURIN, Dec. 13 (UPI).—Three armed men burst into a post office here and made away with what they thought was a sackful of money, police said. The sack contained blank forms for money orders.

Electoral College Meets in U.S. to Confirm Carter

WASHINGTON, Dec. 13 (UPI).—*Small groups of citizens met* in state capitals throughout the United States today to confirm the election of Jimmy Carter as the next president of the United States.

The 538 men and women who compose the Electoral College carried out the constitutional step established by the nation's Founding Fathers.

Their action was expected to reflect the wishes expressed by 81 million Americans Nov. 2, when Mr. Carter won 297 electoral votes to 241 for President Ford. The popular vote was 1,681,417 in Mr. Carter's favor.

After the certification ceremonies in 50 states and the District of Columbia, the electoral votes will be sent to Washington to be opened, inspected and put away to be counted by Congress Jan. 6. Fourteen days later, Mr. Carter will be sworn in.

Japan Coalition Gains Strength

TOKYO, Dec. 13 (AP).—Japan's ruling Liberal-Democratic party, which failed to win a majority in the Dec. 5 election, enlisted two more independents today, bringing its total strength to 260 of the 511 seats in the House of Representatives.

The party won 249 seats in the election and already had enlisted *nine legislators* who won as independents.

But it still is expected to have a difficult time in the house, where 271 seats are considered necessary to insure smooth control of the body and its 16 standing committees.

Warm shirts
for cold weekends

IF YOU'RE looking for warm shirts for the winter weekends, you'll find piles of them to choose *from at Lanvin 2.*

The most sumptuous are in pure cotton velvet, with stripes of contrasting colors (F 450). The most comfortable are in an acrylic angora/wool mixture (F 250). The most "country" shirts are pure wool, and they come in all the warm fall shades (F 270).

Last but not least, the most classical shirt comes from England: 50 % wool, 50 % cotton (from F 230 up).

San Francisco Crime Surge Stirs Protest on Police 'Letup'

By Bill Richards

SAN FRANCISCO, Dec. 13 (WP).—A recent surge in violent crime here—much of it apparently random in its viciousness—has upset the normally complacent residents of this city and raised serious questions about San Francisco's newly liberalized crime-fighting tactics.

The wave of shootings, rape attempts and other assaults began early this year, about the time that Mayor George Moscone took office, and appears to have coincided with what many were calling the first "enlightened" attempt at policing the city.

The FBI reported a rise of almost 32 per cent in serious crime here during the first six months of this year, compared with 3 per cent for the nation as a whole. Local police statistics for the 10 months ending Oct. 31 showed serious crime up 22.7 per cent over last year, including a 9-per-cent increase in homicide, a rise of nearly 41 per cent in attempted rapes and 21 per cent for aggravated assaults.

Crime consciousness has been raised further recently by several heavily publicized incidents. In one, three masked gunmen invaded a dinner party thrown last month by former Mayor George Christopher, beat one of the men in the group and made off with $6,000 in cash and jewelry.

Two Holdup Murders

Several days later two men—one an insurance executive of the exclusive Pacific Heights section and the other a floral worker from the working-class Sunset District—were shot to death on successive nights during holdup attempts near their homes. Neither murder has been solved.

"It's the most lawless era in the history of San Francisco," the city supervisor, Alfred Nelder, said in an interview the other day.

Mr. Nelder, 60, who was police chief here in 1970 and 1971, has been a leading critic of what he calls the top officials' lax and permissive attitude toward crime.

The supervisor said: "War hasn't been declared on crime here. I kept quiet for 10 months this year while the crime rate escalated and the arrest rate dropped by more than 1,500. But now I have to say something is radically wrong."

Public officials acknowledge that they have received a barrage of complaints. The major targets of the outcry have been Mayor Moscone, Police Chief Charles Gain, District Attorney Joseph Freitas and Sheriff Richard Hongisto.

The critics were particularly outspoken last week during a noisy public hearing conducted by the city's 11 supervisors and devoted to the crime situation.

Mayor Moscone and top law-enforcement authorities did not attend the meeting, at which residents, including businessmen and off-duty policemen, denounced the new policies. One supervisor criticized the mayor's refusal to support publicly a proposal to give the police wider authority to stop, question and search suspects at crime scenes.

The subject is a touchy one here. San Francisco police were rebuked by the courts for their treatment of suspects seized in *1973 and 1974 during a series* of racially motivated shootings known as the "Zebra" killings.

Chief Gain, who had led police forces in Oakland, Seattle and St. Petersburg, Fla., before taking over here in January, said in an interview that he would not allow police to go beyond the law in their duties, including stop-and-search operations.

"I don't care what the quantity of crime is," he said. "We cannot have police going outside the law just because of citizen or political pressure."

Mr. Gain, who described himself as "a professional, humanistic chief," acknowledged the increased pressures to revert to tougher police practices. But he added: "No amount of pressure can make me change my style."

Signs of Retreat

There are some signs, however, that officials may be backing off on the new police policies. A week ago the district attorney's office drew up a memorandum, which Chief Gain distributed to his 1,750 policemen, detailing how far the court allows an officer to go in stopping, questioning and searching a suspect.

Mayor Moscone has announced a $1.7-million plan to beef up police security. The program includes reassigning a number of officers from desk jobs to street patrol and organizing a 125-member task force to saturate high-crime areas.

District Attorney Freitas insists that he and Chief Gain have not altered law enforcement here and says: "The real furor is because everyone is frustrated and no one has the answer."

But Mr. Gain, only the second chief from outside department ranks, has irritated some policemen by blaming social problems for crime.

"Crime has many sources, not just the number of police on the street or how tough they are performing their duties," Mr. Gain said recently. "Unemployment is up, family structures are breaking down, peer-group pressure plays a part, inflation contributes. No matter what police *do, they can't reverse trends like* these."

Such statements are scoffed at by other policemen. "It doesn't work," said one veteran at headquarters. "You can have a liberal approach to a school system, maybe, but not crime."

Jamaica Censors Campaigning

KINGSTON, Jamaica, Dec. 13 (UPI).—Security forces imposed censorship on political advertising and public statements yesterday in an effort to head off violence in the last days of campaigning for general elections Wednesday.

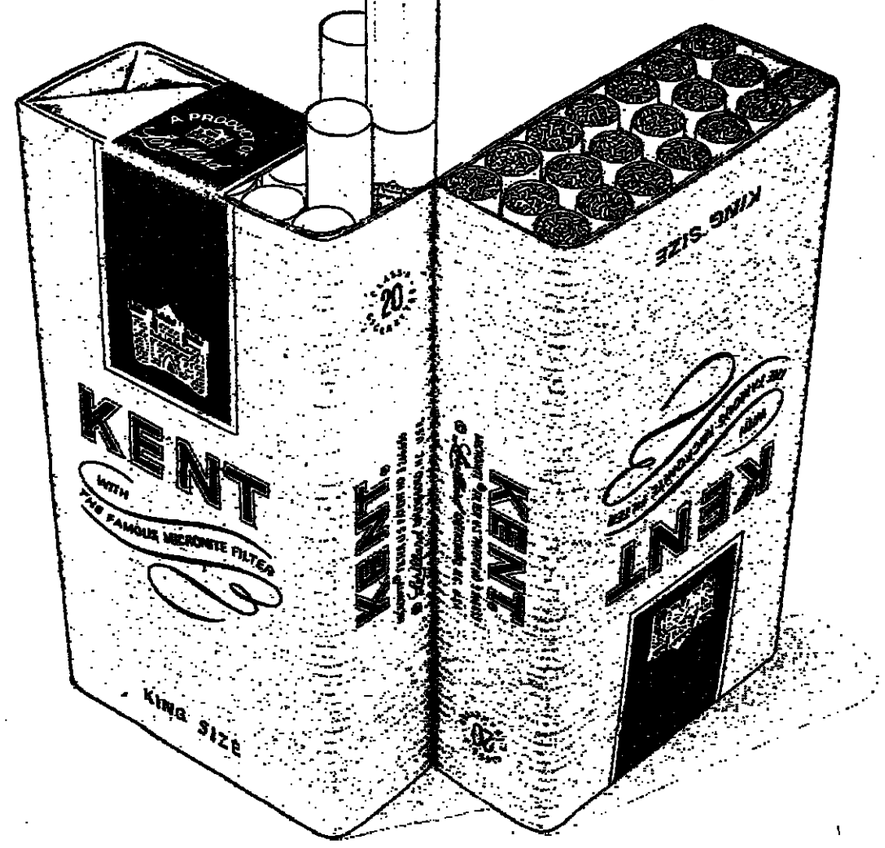
Brig. Rudolph Green, the army chief of staff, and Police Commissioner Basil Robinson said political literature must be submitted to the joint army-police command six hours before any publication or broadcast.

The joint statement said the measure, taken amid growing tension between the ruling People's National party and the opposition Jamaica Labor party, was imposed "with a view to the preservation of the peace and in order to discharge our responsibilities under the emergency regulations." Prime Minister Michael Manley declared a state of emergency last June during a wave of violence.

Iraq Reports Kurd Incidents

BAGHDAD, Dec. 13 (Reuters).—Minor shooting incidents are still troubling the peace in Kurdish districts close to Iraq's northwestern frontier with Syria, according to Information Minister Tareq Aziz.

But he said in an interview that "the question can be dealt with by the police and border guards" and there was no call for military action.



The Kurdish revolt, which had gone on intermittently for more than a decade, ended in the spring of last year after an agreement between Iraq and Iran put an end to Tehran's *support of* rebel leader Mulla Mustafa Barzani.

Gaza Strip Cholera

TEL AVIV, Dec. 13 (Reuters).—Five new cases of cholera have been discovered in the Gaza Strip, bringing the total to 28, a military government spokesman said.

Brezhnev Birthday Brings Back 'Cult' Memories

By Peter Osnos

MOSCOW, Dec. 13 (WP).—When Joseph Stalin, also known as father of the people, the greatest genuis in history, friend and teacher of all toilers, shining sun of humanity and life-giving force of Socialism, reached 70 years of age in 1949, the occasion attracted presents enough to fill a museum and so many cabled accolades that Pravda went on publishing them daily for years.

Nikita Khrushchev's 70th birthday in 1964 was more modest. Eastern European leaders were summoned to Moscow bearing their countries' highest decorations to be pinned on the ample Khrushchev chest. There was an exhibition at his birthplace and a gala banquet at the Kremlin.

Now the 70th birthday of Leonid Brezhnev is upon us. The date is Dec. 19, but in a sense the commemoration has been under way for months. Honors have been heaped upon Mr. Brezhnev. He was named a marshal of the Soviet armed forces last spring (only Stalin had achieved that distinction among previous party chiefs.)

A massive bronze bust of Mr. Brezhnev was placed in his home town of Dneprodzerzhinsk—Khrushchev, in the flush of 1950s de-Stalinization zeal, had banned statues of living Soviet leaders. And lately, Mr. Brezhnev's Communist counterparts in other lands have been bestowing medals on him, one after another.

"You, Comrade Brezhnev," said Bulgaria's party boss Todor Zhivkov as he presented him a Gold Star of the People's Republic of Bulgaria and the Order of Georgi Dimitrov, "are standing at the head of the mightiest state in the world at a time of decisions and actions which have historic implications for the destiny of mankind.

"The world once judged the Bolsheviks by Lenin. Today, the world judges the Soviet Communists and the Soviet people primarily by you, Comrade Brezhnev."

Perhaps the most significant title bestowed on Mr. Brezhnev recently carries no ribbon or even formal designation. It is "Vozhd," which means chief or leader but in a way reserved only for the most revered figures. Lenin was never "Vozhd" until he died. Stalin made the term his own. So its revival now to describe Mr. Brezhnev, in a speech at a Kremlin award ceremony in October, came as a shock.

The speaker was Andrei Kirilenko, a Politburo member who is considered Mr. Brezhnev's closest deputy. So, it is worth watching for "Vozhd."

There is talk of much more to come in the Brezhnev birthday celebrations: rumors that he will be elected an academician, the Soviet Union's highest honor for scholars; that he will get a third Hero of Socialist Labor award, entitling him to a statue in Moscow, and that a film documentary of his life will be shown on television.

Yet there clearly seem to be some limits on the adulation. The country is not being prepared for a major holiday to mark the occasion.

There is reason to believe that something grander was initially envisioned. Soviet literary sources say that a play devoted to Mr. Brezhnev's life was commissioned from Anatoly Sofronov, editor of the country's most popular weekly magazine. When the script was already in rehearsal, however, it was abruptly withdrawn and plans for a film version were also scrapped.

An unusually personalized glimpse of Mr. Brezhnev's life did, however, appear in a supplement to Moscow News, a weekly distributed in major foreign languages. Two issues last month included a "short biography" of the Soviet leader, featuring, among other surprises, a picture of a beaming Mr. Brezhnev in a sport shirt holding his great-granddaughter Galya in 1973.

Aside from portraying him as a war hero and a one-time worker—the ne plus ultras of Soviet credentials—Moscow News observes that "whatever the situation, L.I. Brezhnev is free and easy, always his natural self . . . People note his natural sense of humor, expressive mimicry and his ability to pick out what is funny.

"L. I. Brezhnev is a democratic person without a trace of conceit, as U.S. Senator Hubert Humphrey, for example, noted after a talk with him. At times, L. I. Brezhnev becomes emotional in expressing his feelings. He is an ardent hockey fan. The temperamental nature of the game, its sweeping speed, apparently, appeal to his character. He is also fond of fast driving, in which he excels."

(Mr. Brezhnev has a private stable of fancy cars, including a Rolls Royce and Mercedes, presented to him by foreign leaders.)

One of the Greats

What all this shows is that Mr. Brezhnev, once considered the quintessential "apparatchik," first among gray equals, is now intent on recognition on a par with the greatest names of Soviet, even Russian, history. At 70, he wears a hearing aid and has had health problems, but his personal powers are plainly great.

"This is already the second decade," Mr. Kirilenko told Mr. Brezhnev at the ceremony in October, "of our fruitful work under your wise leadership. . .

"Leonid Ilyich, we are glad that you are as you are and we all wish you, dear friend, good health and stay that way for years and years. . . 70 years of life is not little, but then it is not much, either. It is good that in our country, this age is considered only middle age."

That paean may have sounded chillingly familiar to Mr. Brezhnev. On Khrushchev's 70th birthday, Anastas Mikoyan, Khrushchev's close aide, said: "We are celebrating, today, the jubilee of a middle-aged man who is, as you can see for yourselves, at the peak of his strength and capabilities. . . We feel, dear friend, that you are only half way through your life."

Six months later Khrushchev was ousted on grounds of his "advanced age and deteriorating health."

Scientists Drilling Through Antarctic Ice

By Walter Sullivan

McMURDO SOUND, Antarctica, Dec. 13 (NYT).—In an effort reminiscent of the ill-fated Mohole project, scientists are drilling through the Ross Ice Shelf of Antarctica into an oceanic "lost world" cut off from the sun—and from scrutiny—for thousands and perhaps millions of years.

As with the Mohole, the undertaking—the Ross Ice Shelf Project—is designed to attack a highly diverse array of problems, physical, biological and economic. The Mohole project—a hole to be drilled through the sea floor to the Moho, or bottom of the earth's crust, was shelved when the cost became unacceptably high.

Another goal of RISP is to explore the origin of the so-called "Antarctic bottom water," which creeps north along the floors of the world's oceans. This water, through its long contact with the sea floor, becomes rich in nutrients and, where it wells up to the surface, there is a bloom of oceanic life.

Two Ice Shelves

It is believed that this water originates beneath the two great ice shelves of Antarctica, the Ronne Ice Shelf on the Atlantic coast and the Ross Ice Shelf. The origin of the Antarctic bottom water is of international interest in that, indirectly, it is responsible for much of the world's oceanic food.

The Ross Ice Shelf is roughly the size of Spain—and is an oceanic extension of the continental ice sheet of Antarctica. At the drill site, 470 miles southeast of here, it is 1,375 feet thick. Along its northern front, where it gives birth to icebergs sometimes 100 miles long, it is uniformly about 700 feet thick.

The lip of this 400-mile frontal cliff is strikingly level because the ice, once water-borne, tends to spread to a uniform thickness, like spilled molasses. At the drill site, echo sounding has shown 780 feet of water beneath the ice and a sea floor laden with at least several thousand feet of sediment.

Core of Sediment

It is planned to drive a coring device 90 feet into this bottom sediment to obtain a cross section of its layers. This should reveal the history of the shelf, including when it was grounded at that location and when there was open sea at the site.

Some scientists believe great ice shelves like the Ross shelf serve as dams preventing inland ice from flowing readily out to sea. When a change in sea level or climate tips the environmental scales for such a shelf, according to this hypothesis, it rapidly breaks up into icebergs, freeing the inland ice to "surge" into the sea.

There is currently much debate whether the Marie Byrd Land ice sheet is unstable and might "surge" into the sea if the shelves on either side of it—the Ross and Ronne shelves—should break up. It is in West Antarctica, so called because it lies chiefly in the Western Hemisphere.

Below Sea Level

Whereas the far larger East Antarctica ice sheet rests on a continental block and is largely hemmed in by mountains, much of that in West Antarctica lies on land that is far below sea level.

The ice, fed by frequent snows, flows rapidly toward the Atlantic and Pacific. The drill site was chosen to be in an area of rapid flow from Marie Byrd Land. It moves north about three feet a day.

The world's oceans are currently rising about one millimeter a year, or four inches a century, and probably the chief uncertainty as to the reasons for this change concerns what is happening beneath the two great Antarctic shelves.

Some believe that seawater is freezing onto the shelf bottoms, subtracting fresh water from the seas and causing the high salinity that makes the bottom water bug the bottom. Others say the shelf bottoms are being wasted away by ocean currents. From the ice samples obtained all the way to the bottom, this debate should be resolved.

Fishing Through Ice

RISP also involves an unusual fishing expedition. Whereas hardy winter fishermen in the northern United States drill holes in lake ice a foot or two thick, here the ice is 1,375 feet thick.

Not only will the under-ice explorers fish through the ice—they will also look and listen. An underwater television system, with videotape recorder, will be lowered through the hole, as will microphones to eavesdrop on the sounds emitted by any creatures there. The TV system has two lenses, one pointed down and one aimed horizontally. Still-picture cameras will also be lowered.

It is assumed that there are at least some forms of life beneath the shelf, although whether large animals exist there is uncertain. Air-breathers, such as seals and whales, are unlikely. But ocean currents flowing in from the Pacific should provide sufficient nutrients for many other species, some highly specialized for this environment.

While the National Science Foundation and aircraft of the U.S. Navy are providing a large part of the funds and support for RISP, other participating nations include Australia, Britain, Denmark, Japan, New Zealand, Norway, the Soviet Union, Switzerland and West Germany.

French Coal Industry Drops Yearly Bonus

PARIS, Dec. 13 (UPI).—In compliance with Prime Minister Raymond Barre's decision to hold the line on wage increases, the management of the state-run coal mines told trade unions today that the 84,000 miners will no longer get an extra 2 to 3-percent bonus above the regular adjustment of wages to the cost of living next year. The unions said they may call strikes.

A similar cancellation of such a bonus in the state-operated electric power company is due to lead to a two-hour strike tomorrow and Wednesday. Electricity is expected to be cut between 3:30 and 4:30 p.m. tomorrow and 9:30 and 11:30 a.m. Wednesday.

Sea Law Round Cleared

UNITED NATIONS, N.Y., Dec. 13 (AP).—The General Assembly by unanimous consent has approved the decision of the three-year-old UN Conference on the Law of the Sea to hold its sixth session here May 23 to July 8, with an extension to July 15 if necessary.

THRIFTY THRONG—London's Petticoat Lane market is jammed by persons making Christmas purchases before tax increases expected to be imposed this week.

France Debates Its Birthrate After Long Period of Decline

By Andreas Freund

PARIS, Dec. 13 (NYT).—Throughout 1976 France has been debating what to do about its declining birthrate.

The debate—in the press and among sociologists, economists, demographers and politicians—was opened last New Year's Eve by President Valéry Giscard d'Estaing. On presenting the traditional New Year's wishes to the nation, he warned that no country with a middle-sized population could realistically aspire to grandeur.

"In 1800," the President declared, "France was three times more populous than Britain and nearly as populated as Russia. But now . . ."

Now France's population stands at 52.7 million, Britain's at 56 million, the Soviet Union's at 245 million.

An official report, released later, noted that while French women had an average of 2.9 babies in 1964, the figure was only 1.9 in 1975.

The report warned that it took an average of 2.1 births to compensate for the current mortality rate and to keep the population stable. If the population has not diminished with the births so low, this is because of 4 million immigrants.

The report, drawn up by the National Institute for Demographic Studies, acknowledged that comparable trends were prevalent in most of Europe and in developed countries around the world.

Debré for Increase

In the public debate, a Gaullist, former Premier Michel Debré, came out for policies that could lead to a doubling of France's population. He was among those who linked national grandeur to size of population, pointing out that in 1789, the year the French Revolution began, the French population of 27.6 million constituted 17 per cent of the European total. In the long victorious Napoleonic wars, it was recalled, the French were seldom outnumbered, even by the combined armies of their foes.

Prof. Alfred Sauvy, a prominent demographer, argued for a population increase on economic grounds. He forecast that in a static population with an increasing number of old people resulting from progress in medicine, the economic burden would eventually become unbearable for the younger people.

The economic argument used by Prof. Sauvy in advocacy of a population increase has to do with the French pension system. Old-age pensioners here are essentially supported by a part of the earnings of the present active population, not from their own past contributions to any pension fund. Presently, 42 per cent of Frenchmen support the rest of the population of young and old.

Some sociologists have questioned this approach. They say that if more French women have more children this will increase the total population but not necessarily the active portion. The fewer children, the more women will hold jobs, they argue.

Warnings on Trends

Pierre Chaunu, a historian, warned that, if France and Europe continued the present demographic trend, the West would soon be hopelessly outnumbered by the Third World. He said that a dangerous political imbalance could result from a growing disparity in population sizes between north and south.

Prof. Georges Tapinos of the Institute of Economic Sciences here, argued that political equilibrium was more a case of regional than global balance.

If Mexico's population overtook that of the United States or Algeria's population overtook France's—both distinct possibilities—this alone would affect power balances, he said.

French public opinion at this point favors keeping the population at its present level. Sixty-five per cent of people questioned said so in a recent poll, with only 23 per cent in favor of a population increase.

In this mostly Roman Catholic country, none of the political parties has ever gone on record against a higher birthrate.

It has long been government policy to give some financial encouragement to families with children, and there is now talk of stepping up that aid.

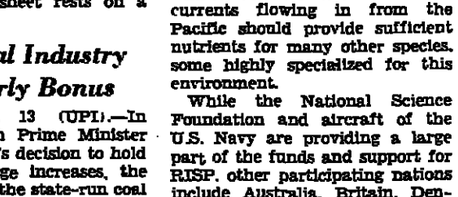
Meanwhile, according to provisional figures, the French birthrate for 1976 looks as if it will go up a little, with about 80,000 babies more than in 1975.

Bank Nominee Indicted in Israel

TEL AVIV, Dec. 13 (AP).—Asher Yadlin, a former financial figure, was indicted here today on nine counts of fraud, tax evasion and taking bribes.

Mr. Yadlin, 53, former chairman of Kupat Holim, a giant national health service, was about to become governor of the Bank of Israel when he was arrested two months ago. He was accused of taking a $300,000 kickback for giving a large construction contract to the Solel Boneh Company.

He was also charged with accepting $11,000 from a Kupat Holim lawyer for sending business his way, and $6,000 in kickbacks from a real estate agent.



On the bribery charges alone, Mr. Yadlin faces up to 10 years imprisonment.

Mr. Yadlin was further indicted on charges of evading real estate tax and of using fraudulent means in buying and selling medical facilities for his health service.

The defendant's sister, Sarah Hari, was indicted on charges of being a go-between in the alleged briberies.

Jack Cassidy

Jack Cassidy, 49, Movie, Stage, TV Star, Dies in Fire

WEST HOLLYWOOD, Calif., Dec. 13 (UPI).—Jack Cassidy, 49, a Broadway movie and television star for three decades, was burned to death yesterday in a fire that swept his penthouse apartment. Apparently he had fallen asleep on a couch following a party.

Mr. Cassidy, who had starred in dozens of musical comedies, dramas, TV specials and movies, lived alone on the top floor of the four-story building in West Hollywood.

Mr. Cassidy was divorced several years ago from actress Shirley Jones. They had three children. His son, David, born of a previous marriage, has become a rock singing star following his appearances on TV in "The Partridge Family."

Mr. Cassidy had been a show-business personality since he got his start on Broadway at 16 in Mike Todd's "Something for the Boys." He recently completed two movies, one of which was "W. C. Fields and Me" in which he played the part of John Barrymore.

The fire, of unknown origin, caused an estimated $150,000 in damage.

Customs Shed Burns

VEVEY, Switzerland, Dec. 13 (Reuters).—A fire razed a customs storage warehouse here last weekend and destroyed an estimated $4 million worth of bonded goods, police said.

Relief Supplies Allegedly Misused

U.S. Catholic Agency Accused Of Aiding Military in Vietnam

By Marjorie Hyer

WASHINGTON, Dec. 13 (WP).—During much of the Vietnam war, Catholic Relief Services (CRS) abandoned its apolitical humanitarian role and became an accessory of the U.S. military effort, a Catholic weekly newspaper has charged.

The charges, which will appear in the Dec. 17 issue of the National Catholic Reporter, grew out of a yearlong investigation of CRS by the newspaper's Washington correspondent, Richard Rashke.

In his account, Mr. Rashke alleges:

• That the CRS turned over vast quantities of relief supplies—food, clothing and medicines—to both U.S. and South Vietnamese military units to be used as pay for irregular forces and "incentives" for intelligence gathering.

• That U.S. military personnel worked in CRS offices, where they had access to CRS field reports that contained information valuable to military intelligence but possibly disastrous to the Vietnamese civilians whom the CRS was chartered to help.

• That as much as 90 per cent of the relief agency's budget came from the U.S. AID program in Vietnam, with the understanding that the church organization would reciprocate "by accepting U.S. policy without criticism and by sharing information with U.S. AID personnel," the Reporter said.

• That the CRS supplied rations for interrogation centers and political prisons, including the Con Son Prison, with its infamous "tiger cages."

• That the U.S. military "built CRS into its refugee program" of forcing Vietnamese civilians from homes and farms into refugee camps, which were supplied by the CRS.

• That the CRS "encouraged" its staff members to live rent-free in housing on AID compounds and used the CIA's Air America for staff travel and shipment of relief goods.

Bishops' Role

All of this was taking place at a time when opposition to the war was mounting in the United States, and the Catholic bishops, who are ultimately responsible for the direction of the CRS, were increasingly critical of the war policy and demanding U.S. military withdrawal.

The Most Rev. James Rausch, general secretary of the National Conference of Catholic Bishops, to which the CRS is ultimately responsible, said he has not yet seen the newspaper's account and therefore could not comment. He said that if the charges are substantiated, the bishops would "certainly want to take action."

Information in the Reporter was derived largely from government reports and interviews with former CRS-Vietnam personnel as well as staff members of other voluntary and government agencies who served in Vietnam.

The CRS, whose headquarters are in New York, refused to make any of its files or reports available, Mr. Rashke said.

The CRS is supported in part by collections in all churches on a designated Sunday, usually in late March. Like other worldwide relief agencies, it also derives a large part of its budget from the contribution by the government of surplus foodstuffs under Public Law 480.

Church Collections

Last year, Church members gave $6.5 million to the CRS, or 3 per cent of its worldwide budget.

The CRS worked in Vietnam from 1954, when it moved in to help feed, clothe and resettle the nearly 1 million refugees who fled south after the French pullout, until the fall of Saigon last year. Although there were earlier charges of mishandling of relief goods, the Reporter account deals primarily with the situation from 1967 on, when the agency's Vietnam operation was directed by the Rev. Robert Charlebois.

In 1967, Catholic writer Michael Novak reported after a visit to Vietnam that the CRS, at the request of Gen. William Westmoreland, was supplying 7,000 tons of food and clothing a month to 150,000 Vietnamese militiamen and their 550,000 dependents. The supplies were requested by the military to provide what Mr. Novak said was 25 per cent of the monthly wages of the Popular Forces-Regional Forces, nicknamed the "Ruff Puffs" by the Marines.

Defended the Policy

At first, according to the latest account, Father Charlebois defended the policy, saying in a Saigon news conference: "As long as they need food and do not receive it from anywhere else, will not refuse them."

After seven months of grow criticism, the CRS in New Y ordered an end to paying R Puff salaries with relief supp Mr. Rashke's article charges t instead of changing its po CRS-Vietnam "merely chan the accounting procedures."

Father Charlebois, who handles negotiations between CRS and the government in Mr. Rashke he had "no choice to make for his administration CRS-Vietnam.

Father Charlebois' primary concern was "to feed hungry and give aid to the and needy. It was impossible as to be the Christ in Viet without the logistical supp which was, in fact, controlled two governments."

Party Session Opens Today In Vietnam

By David A. Andelman

BANGKOK, Dec. 13 (NYT).—Top-level delegations from so of the world's major Commu parties arrived in Hanoi dur the weekend for tomorrow's op ing of the fourth Congress of Vietnam Workers party—the l gest Communist meeting in In china in nearly two decades.

A large Soviet delegation led by Mikhail Suslov, a mem of the Politburo of the So Communist party and the So party's leading theoretician, Vietnam News Agency, monito here, reported that a provisi member of the Politburo and least three other Soviet pa Disciples Central Committee members w included in the Soviet delegati Le Duan, first secretary of Vietnam Workers party, a other senior Politburo membe Truong Chinh, Pham Van D and Vo Nguyen Giap, met de gation members at the airp throughout the weekend, revie troops and watched as b quets of flowers were present by young girls.

Among the early arrivals a large Laotian delegation hea ed by Premier Kaysone Phom han, although the Vietnam sent no top-level representat to the Laotians' first anniver celebration in Vientiane la week. Other delegations meta ed Romania, the Swedish Co munist party, the Popular Mov ment for the Liberation of A gola and the Mozambique Libe ation Front.

Chinese Awaited

Western diplomats here and Hanoi still awaited the arrival the Chinese delegation, which not yet been announced and expected to provide a signific indication of the extent to wh the Vietnamese have sought rapprochement with China.

However, the level of the Sov delegation seemed to most dip matic observers to indicate th any such rapprochement has been at the expense of the f ditionally close ties with the Viet Union.

A detailed, 40-page draft of political report of the Vietnam party's Central Committee is pected to be the centerpiece the discussions at the session provides a vast blueprint for future economic and political velopment of the country, both the first five-year plan that spelled out in detail and dar the next 20 years.

Attention Is Paid

Extensive attention is be paid as well to the unified dev opment of the country and need to expand the membersh and composition of the Comm nist party. The party seeks recruit the largely excluded e ments of the young and populations of the newly acqu ed urban areas in the south, p ticularly Saigon.

This thrust has become a parent in the last several we during which the 1,008 delega to the party congress have be selected at provincial-level mal ings throughout the country.

Prison Foils Plot Of IRA Women

LIMERICK, Ireland, Dec. (UPI).—Limerick Prison offici reported yesterday the thwarti of an escape plot by revolutionary art thief napper Marian Coyle, 20.

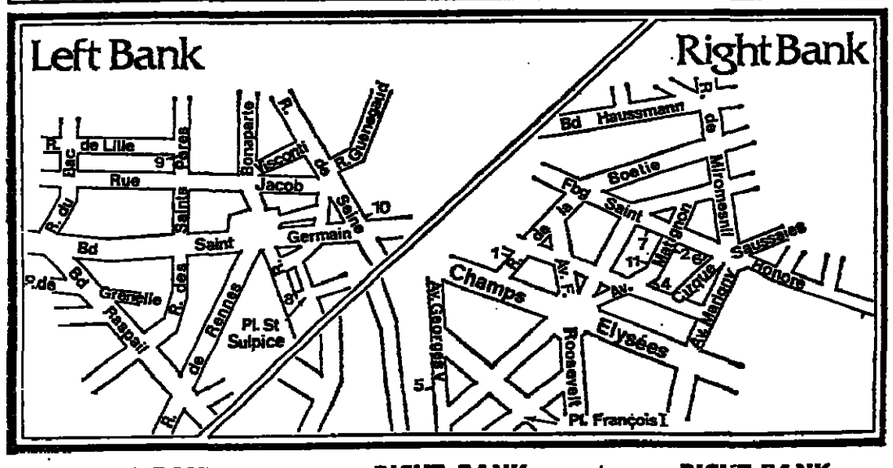
Miss Dugdale, a British m Rohaire's daughter, who espous the IRA cause, received a nin year jail term in 1974 for her ro in an $18-million art robbery a a helicopter hijacking. Miss Coy is serving 15 years for the 19 kidnapping of Tiede Herrema, Dutch industrialist, whose a ductors demanded the release three IRA members held prison.

Prison officials said yesterd that the two women were belie ed to have planned to seize young woman prisoner as hostage to persuade authoriti to release them. The woma prisoner has since been tran ferred to another jail, they sa

Several IRA Bombs Are Set Off in Ulster

BELFAST, Dec. 13 (AP).—The Irish Republican Army today opened a pre-Christmas bombing campaign in Northern Ireland by setting fire to a hotel and a cafe in Belfast, planting a couple of bombs in a Belfast brush factory and scattering other bombs throughout the province.

There were no casualties from the bombings but a man thought to be a security guard was shot dead when he surprised a gang planting the bomb in the factory. The hotel was the Lansdowne Court, engulfed by fire from a couple of bombs planted by four men who escaped in thick fog.



Mrs. Luis E. Tiant

BOSTON, Dec. 13 (UPI).—The mother of Boston Red Sox pitcher Luis C. Tiant collapsed and died today shortly after visiting a funeral-home wake for her husband, Luis E. Tiant, a former pitcher in the Mexican League. Mrs. Tiant was 71.

The Zen Master in Europe —Teaching Concentration

By Susan Heller Anderson

ARIS, Dec. 13 (IHT).—In the garish setting of the Hotel ko, with its shocking pink aluum ceilings, sparkle-plenty quoise walls and painted stic "flower gardens," more n 1,500 persons participated s past weekend in "Initiation Zen."

t is morning and some 200 rs of shoes sit in neat rows side an improvised dojo, the m in which zazen is practiced. ide, some 200 pairs of legs ain into the cross-legged lotus ture in which knees are pressed the ground and heads to the . Two hundred derrières perch the edges of thick cushions d 200 backs are ramrod aight. Left hand is cupped by ht, palms upward, thumbs ting against each other to m an oval. Eyes stare at the und or droop drowsily. A lf-hour passes, interrupted sole- by thwacks made by monks rying long sticks and smit- the shoulders of "worthy" servers. Time floats by, the unfortable sitting position fades m the mind. Everything, in inciple, should fade from the nd.

Bells ring, and the rustle of k as Taisen Deshimaru, the neral master of Europe, enters s dojo to teach zazen, this mbination of posture, breathing d concentration which is the e of Soto Zen. The meditative ol of Buddhism which has had strong influence on all aspects Japanese cultural life, Zen is vided into two sects: Rinzai, ich uses the koan—unsolvable ddles with nonsensical propositions—as a method to shock the lower into enlightenment; and oto, which uses zazen to free the irit. Master Deshimaru was nt 10 years ago by the Soto adquarters in Tokyo to bring m to Europe.

1,000 Disciples

If numbers indicate success, aster Deshimaru counts 48 dojos roughout France, Belgium, Switzrland, Morocco, Italy, England d Portugal. He estimates at ast 1,000 disciples and thinks at at least 100,000 Europeans ve practice zazen. He plans a ojo in Spain in the near future. The son of a well-to-do Samud family, Master Deshimaru, 62, the disciple and successor of Master Kodo Sawaki, a man of modest origins who provoked a Zen renaissance in Japan in the 1920s.

Despite his lofty position, Master Deshimaru led a rather bourgeois earlier life. He studied economics at the University of Yokohama and philosophy at the University of Tokyo. He then worked for the Mitsubishi Mining Company and was sent by it to Indochina during World War II. Married, with three children, one of whom is a well-known Tokyo television personality, he was a businessman for 15 years before he became a provisional monk.

"You must not become a monk right away. It is too narrow. You must experience everything," he says. His wife, with whom he no longer lives, has become a Zen nun.

"I don't forbid marriage," he says in the office of the Zen Association of Europe, which he founded. "I don't demand sacrifice. During training to become a monk, it is very important to harmonize with society." Although Zen is very much of this world, its basic philosophy discourages excesses. "Sex is not a hobby. Too much alcohol is not good," Master Deshimaru says. "We must purify our lives. But these things are possible in moderation." A chain smoker, he explains that this is not forbidden.

Speaking in a mélange of English, French and Japanese, he tells how Zen meshes with modern life. "Everyone is too anxious. In zazen, when you concentrate on posture and breathing, self-consciousness stops and the subconscious takes over." He insists, "Zen is not contemplation but concentration."

He observes that Zen has a special appeal for young people now. "They are critical of their lives. They want a spiritual way but don't like organized religion." The master's mostly young disciples work in outside jobs, many are married and only some shave their heads. "Shaving off the hair is a symbol of the decision to become a monk or nun," he pats his own bare pate.

Léonie Mazzinghi, a 24-year-old model, explains the ritual. "The first time you shave, you leave one lock which the master removes." She was ordained only two weeks ago and is married to a nonfollower. "It's hard for someone who hasn't experienced zazen to understand," she says.

A Claim

Relaxing in his modest apartment above the Zen center, Master Deshimaru is surrounded by ancient and new books and manuscripts (he himself has written more than a dozen books in French and Japanese), examples of his own graceful painting and calligraphy and gifts from disciples. Smelling of aftershave, he samples several scents of incense while talking about bringing Zen to this mostly Catholic country. "We have many Catholic monks who come to zazen. One priest left the church to follow me," he recalls. He claims he has taught meditation to Pope Paul VI.

During the weekend "initiation," Master Deshimaru also teaches the walking posture, which follows zazen. Unseeing eyes fixed straight ahead, the fist of the left hand, thumb tucked in, is clasped by the right hand and pressed to the sternum, elbows parallel to the ground. This walking posture is also the classic stance for the martial arts.

"Zen transformed the art of killing into a spiritual art," Claude Durix, author of "One Hundred Keys to Zen" and martial arts instructor, says. Kendo, with its fearsomely long swords and sticks, is the oldest. Master Deshimaru was a seventh-degree practitioner (there are 10 kendo degrees). "Fear, doubt and indecision must be banished," Mr. Durix says. His daughter and the kendo champion of France demonstrate, their costumes identical to those worn by warriors for hundreds of years. Uttering terrifying cries as they strike, their eyes glued to each other's faces, these adversaries give a glimpse into another aspect of Zen.

Raphael Jruit.

Taisen Deshimaru, Léonie Mazzinghi at Paris ceremony.

OPERA IN PARIS

Dusting Off a Zany Rossini

By David Stevens

PARIS, Dec. 13 (IHT).—While French cultural authorities ponder what to do with the Salle Favart, the venerable home of the now defunct Opéra Comique, the overstaffed Opéra has rented the house and dusted it off with a lively new production of Rossini's "Le Comte Ory."

Rossini had plenty of practice rejigging some of his Italian operas into French versions, but this scintillating comic masterpiece was the first opera he composed directly to a French libretto—and the last but one of all his operas. It was a success at its first performance in 1828, by the Paris Opéra and with the great Nourrit heading an impressive cast, and the Opéra played it more than 400 times in the next six decades before it plunged into an oblivion from which it has emerged relatively recently.

For this revival the staging was entrusted to Robert Dhéry, whose zany revues like "La Plume de Ma Tante," loaded with sight gags, have made him as well known in New York as in Paris. Predictably, this was a gag-loaded production, but Dhéry also succeeded in making a company of opera singers into a company of singing comedians capable of zipping around the stage with an almost Feydeau-like deadpan precision, and without missing a beat.

The Scribe & Co. libretto invites broad treatment. The lecherous Count Ory, disguised first as a hermit then as a mother superior, lays amorous siege to the Countess Adèle, who with her female companions has been left alone in her château by the departure of their men on a crusade. Their return ultimately foils Ory after a variety of frustrated attempts.

A number of Dhéry's gags, although hilarious, were rudimentary or downright irrelevant. His masterpiece, however, was a side-splittingly successful solution to the scene in which Ory mistakenly makes love to his page, who in turn is turning on the Countess. All this took place in a bed stood on its foot, so that the performers could sing standing up while appearing to be recumbent. The preceding scene, in which Ory and the "nuns" in his entourage get drunk on the house wine, also was pulled off amusingly yet without the usual excesses of sober singers pretending to be stoned.

As a final gag, Ory and his men escape from the castle while the returning master of the house struggles unsuccessfully to get out of a full suit of armor that seems to have rusted shut during the Crusade.

Bernard Daydé designed simple and attractive sets, with a clever array of folding panels for rapid scene changes, the whole giving the impression of a child's toy cardboard castle.

The cast is headed by Michel Sénéchal, whose comic talents and remarkable *voix mixte* and head voice make him just about indispensable in the tenor title part. Eliane Manchet was an accurate, if thin-voiced Adèle, and an amusing comic in the dumb blonde tradition. Renée Auphan as Isolier, the page, Roger Soyer as the Governor, Yves Bisson as Rimbaud, and Jocelyne Taillon as Ragonde, the Countess's companion, all carried out their duties in fine voice and with plenty of comic elan. Michel Plasson conducted the excellent orchestra with fine pacing and infectious momentum.

Musicians' Strike Halts N.Y. Ballet

NEW YORK, Dec. 13 (AP).—A musicians' strike has forced the New York City Ballet to suspend performances.

The traditional, popular Christmas-time presentation of the "Nutcracker Suite" may be among the casualties.

The walkout by Local 802 of the American Federation of Musicians began early today in a dispute over a wage increase and reduced work schedule.

Ancient Marble Head

ATHENS, Dec. 13 (UPI).—West German archaeologists excavating on the island of Samos have unearthed a marble head, part of a 5th century B.C. statue of an athlete. The statue once stood in the sanctuary of Hera on the island.

WAVERLEY ROOT

Foie Gras—Finding the Real Thing

FOIE gras, one of the most luxurious foods in the world, was once a by-product of the goose; has since performed the unfilial feat of turning mother into a by-product of foie gras. "The ose," wrote Ch. Gérard, in "L'Ancienne Alsace Table," "is a sort of living hothouse." It is indeed ue that when a goose, even in normal circumances the fattiest of all barnyard poultry, is rce-fed to produce the hypertrophied livers which ake foie gras, it becomes entirely too greasy for asting. In southwestern France, one of the two eat centers of foie gras production, the rest the bird goes into *confit d'oie*, salted goose oked and preserved in its own fat. What Alsace, e other center, does with the residue I don't ow.

Foie gras is not made simply by stuffing any rt of goose: a special species is required, known southwestern France as the Toulouse goose, which the Alsatian goose is a subspecies. It is ich heavier than the ordinary goose, built close the ground, and, as it has an upright posture, equently seems to be sweeping the soil with its r. A distinctive feature which predestines it to e production of foie gras is the *bavette*, which a child would be a bib, but on a goose is at looks like a loose fold of skin on the belly. is constitutes a sort of reservoir for goose ase, enabling the bird to expand sufficiently make room for the fat which results from the r-feeding necessary to produce a luscious olien liver. The fattened goose may exceed 25 unds in weight and have a liver of 2 1/4 pounds, arly one-tenth the weight of the whole animal. e biggest livers, however, are not necessarily e best: from the point of view of tastiness, the imum weight seems to be about 1 3/4 pounds. The foie gras goose is a martyr to the gluttony man. Geese are never reticent about eating, those destined to produce foie gras are fed beyond their desire for nourishment. Beginning the age of 6 months, they are crammed three es a day with as much food as can be pushed wn their gullets over a period of three to five eks. Classically, the goose was held between knees, a funnel was forced into its mouth, d a round stick thrust through the funnel was ed to tamp the food down through the goose's k. Then someone invented a funnel equipped h a crank, which speeded up the process of ding the goose: even so it took one person and a half hours a day to feed one goose, ich is why, along with other factors, foie gras so expensive.

The quality of individual livers varies greatly. ofessional buyers choose them largely by color, ough there are other criteria—they may be dded or squeezed to determine their firmness. the quality of the liver may be judged from quality of the goose which produced it—for, ception made for local or seasonal deviations, *whole goose with its liver* is sent to market. d a buyer who wants the liver has to take goose.

Southwestern foie gras, by the time it reaches consumer at least, is firmer in texture than t of Alsace. Southwestern foie gras is subjected a minimum of manipulation. Its best grades pressed into their containers by hand, and sist of single unmutilated livers; if the conner is too large for one liver, great care is en to match it with another liver of the same or. Alsatian foie gras is made of parts of ferent livers, kneaded into a somewhat charerless softness. The southwest limits its seaing to salt and pepper, whereas Alsace sometes puts in spices, an error in my opinion. ce there is nothing which can be added to a od foie gras which will improve it—even the *mmon combination of foie gras with truffle*. All imported livers show a grain less fine and darker color than those of France, but if you ler foie gras from Alsace or from Périgord, you ll almost certainly receive liver which, if it ld speak, would do so with the accent of garia, Hungary, Poland, Czechoslovakia, Austria, ael or Luxembourg. France consumes 600 tons foie gras every year during the Christmas-New Year's holiday season, when eating it is traditional, three-quarters of the yearly consumption of 800 tons. It exports about 2,200 tons, making a total of 3,000. Since the country produces only about 700 tons of foie gras a year, 2,300 tons have to be imported, to be processed with French know-how and, as is economically more important, distributed through the world under the prestige of the French label, which makes it worth about 20 per cent more than if it had been marketed from its native country.

If you want to get really French foie gras, buy the produce of the Landes, the strip of sand and pines running southward along the Atlantic coast from Bordeaux towards the Pyrenees, and of the Gascon territory just south of it. This area produces about 400 tons a year, eaten mostly in France itself. Firm and fine in grain, showing a rosy blush against a faint beige background, it is probably the most delicious foie gras in the world. It will cost 10 to 15 per cent more than foie gras made from imported liver, but it is worth the difference.

Since most of the foie gras bought throughout the world comes from France, even when it is on the rebound, while much of the rest, wherever it comes from, is labeled in French, the lingua franca of foie gras, it is useful to know exactly what French trade terms mean. The best foie gras may be labeled simply that and nothing else; the principle is that any additions or manipulations must be reported, so if there is no supplementary explanation, the foie gras should be pure. Nevertheless, since it is a good selling point, many processors take the trouble to describe this top-quality product as *foie gras au naturel*, which means that it has been neither kneaded nor worked into a purée, but is a foie gras which has not been tampered with apart from being pressed by hand into its container. If it is marked *foie gras naturel entier* so much the better, for *entier* means that you have a single liver with nothing cut away from it. Otherwise you may have *foie gras au naturel en morceaux agglomérés*, which is less homogeneous, and may even contain some liver which has been puréed to fill the can, but in any case what you have is 100 per cent pure foie gras.

The second best foie gras is labeled *bloc, lingot, massif, parfait, pavé, tombeau* or *terrine de foie gras*, names which cover preparations made from pieces of solid foie gras encrusted in a stuffing which may be made from finely ground veal, pork or chicken, perhaps with a binder of poultry or meat jelly, milk, or even (here we raise the eyebrows) potato starch.

Third comes *crème, mousse* or *purée de foie gras*, all of which mean the same thing—pieces of liver themselves puréed and mixed with the stuffing. French law requires that the contents include a minimum of 75 per cent foie gras; processors jealous of their reputations use more. The higher the percentage of foie gras, the better the product.

Category number four is labeled so much like number three that the unwary may miss the subtle distinction: The label this time reads *crème, mousse* or *purée de foie d'oie* (goose) or *foie de canard* (duck). The word "gras" does not appear. The law nevertheless requires a minimum of 50 per cent of foie gras.

Finally we have *crème, mousse* or *purée de foie:* not only has the word "gras" disappeared, but so has the identification of the liver as coming either from geese or ducks: so far as the label is concerned it could come from chickens. A very conscientious producer might give you up to 50 per cent of foie gras in this case, but he isn't required to exceed 15 per cent—in which case you are getting 85 per cent of unidentified filling.

In all of these categories except the first, which must be almost-pure 100-per-cent goose foie gras, there may be an admixture of duck foie gras. This is an excellent product, whose presence, when it is mixed with goose foie gras, is almost undetectable, but if you do not benefit by a price differential when it is being used, somebody is taking advantage of you: Duck foie gras is much cheaper.

(c) 1976 Waverley Root

In the world of foreign exchange, you need the wisdom of the Pyramid.

In olden times, the pyramid stood for a kind of knowledge that few possessed.

In today's world of foreign exchange, the Bankers Trust Pyramid stands for very much the same thing.

For half a century, the knowledge and experience of our traders has been one of the cornerstones of our reputation in the field.

This experience is extremely valuable in dealing with the complexities of day-to-day trading, and becomes crucial in times of political volatility or in other circumstances which affect the markets.

While our traders operate out of offices in the seven principal foreign exchange centers of the world (among others), our capacities are global. We are effectively making markets around the world 24 hours a day.

The quality of our execution is another hallmark of our reputation. Because we are constantly buying and selling, as well as handling large trades, we can often maintain—even during periods of currency and monetary crises—an access to markets that not every bank can claim.

To back up our traders in key locations, we have market trend advisors with an additional sort of expertise. They keep our customers informed and current on developing trends in the market, focusing on the nature and scope of their risks.

But our expertise isn't limited to foreign exchange. Wherever you see the Bankers Trust Pyramid, you're dealing with a full service bank in the fullest sense of the word, with the capacity to raise, lend and manage money worldwide.

Whatever your needs, a visit to the Pyramid can be a rewarding experience.

Oil and OPEC, Again

The governments that sell oil are once again about to gather, this time in the minuscule but well-heeled sheikhdom of Qatar, to raise prices. There were reports that the meeting might be delayed a few days to see whether the United States could be moved to sweeten its last offer at the North-South Conference. That, you will remember, is the affair in Paris—still stalled on dead center—at which the southern hemisphere is trying to extract a global redistribution of income from the industrial nations of the north. For the poor countries of the southern half of the world, OPEC is now the great commanding example of the way to achieve social justice. Returning the compliment, OPEC hints occasionally that it will use its considerable influence on the industrial countries at Paris.

But for the present OPEC has apparently accepted the logic that the United States can't move until the new president takes office. What else does this logic suggest to OPEC? A low increase in oil prices? A high increase? One increase now and the threat of another later if the Paris conference doesn't start to move in the southerners' direction?

* * *

The truly dismaying thing about it is that the choices are entirely up to OPEC. Three years after the great oil revolution and the embargo, OPEC still holds the initiative and the United States still has no very clear ideas for recapturing it.

OPEC's pricing decisions remain wholly political. The market has very little to do with it. When the U.S. steel companies tried to raise their prices earlier this month, they apparently found that buyers wouldn't go along. Competition is less than perfect in the steel industry, but it prevails sufficiently that, in slack times like the present, buyers usually find that they can face down new prices. *In contrast, the world oil cartel has* shown that it can make its prices stick. The huge increases in oil costs through 1973 and 1974 contributed heavily, of course, to the recession and its residue of high unemployment throughout the industrial world. But that is not OPEC's concern. It keeps raising the prices of its oil, and the United States keeps buying more of it. What conclusion would you draw from that interesting phenomenon, if you were the finance minister of a Gulf emirate?

With the price about to go up again, it is easy to conclude gloomily that the past three years have been wasted and that the United States will continue to blunder toward economic catastrophe. But things aren't quite so bad as that. In 1973, Americans were genuinely stunned when oil prices began to soar. Perhaps we needed three years to get used to the idea that things have changed in the world, truly and fundamentally. We needed time to try the easy solutions and see for ourselves that they won't work.

Consumers have seen that it isn't merely a conspiracy by the oil companies. The Ford administration has learned that it can't merely talk prices back down. Congress has demonstrated that its efforts to hold oil prices artificially low, through controls, only undercut any serious attempt at conservation. Hardly anyone, by this time, fails to see the danger in this country's rising dependence on imports from the Gulf.

The United States now appears to be ready for basic changes in energy policy, even at the cost of disrupting some of our well-established national folkways. It is a moment of great opportunity for the incoming Carter administration.

The President-elect is now reported to be considering the choice of James R. Schlesinger, the former secretary of defense, to take charge of energy policy. If Mr. Schlesinger is not the nominee, it will have to be someone of similar intellectual grasp and administrative skill. It is not fanciful to believe that the public decisions to be made on oil and energy over the next four years will affect U.S. national security more deeply than those made at the Pentagon.

* * *

The Nixon administration proclaimed Project Independence three years ago, but nobody did anything when oil imports kept rising. The secretary of the Treasury warns of dire capital shortages ahead, but the Ford administration has been pushing energy research, and financing schemes sharply tilted toward nuclear power and synthetic fuels, the most capital-intensive of all energy sources. The last Congress commanded the automobile industry to produce small cars—but it simultaneously rolled back gasoline prices, professing utter amazement when the sales of small cars fell off. The Carter administration has nowhere to go but up.

Americans owe a certain measure of gratitude to OPEC for the jolt that it is about to deliver to them. OPEC is reminding them all how large a national interest they have at stake in the world politics of energy—and how little they have done to protect that interest.

THE WASHINGTON POST.

Arms Sales Momentum

There were few subjects on which President-elect Jimmy Carter spoke with greater feeling during the presidential campaign than of the urgent need to curb "the almost completely unrestricted sales" of U.S. arms to other countries. Yet the Ford administration in its final weeks is taking a number of actions in line with the policies that have established the United States as the world's leading arms merchant, with annual sales *over $10 billion.*

Any administration runs partly on momentum and President Ford must continue to govern until Carter takes the oath; but in keeping with the incumbent's promise of a smooth transition he ought to put off decisions that could embarrass or compromise his successor. A case in point is the authorization given by the State Department to a U.S. company to try to sell jet fighter-bombers to India.

Even this first step in the sale process—a license to the McDonnell-Douglas Aircraft Corp. to make its pitch—represents a turnabout in U.S. policy, which has hitherto banned arms sales to the increasingly repressive government of Prime Minister Indira Gandhi. If the sales of the A-4 Skyhawk planes materialized, the transaction would inevitably provoke alarm in Pakistan and intensify that country's pressure on the United States for more sophisticated aircraft.

Only a few days after the November election, it became known that the U.S. Navy was supporting a projected $4-billion sale by the Northrop Corp. of a land-based model of a new Navy jet fighter plane to Iran. A week later, giving the formal notification now required by law, President Ford declared Sudan eligible to buy U.S. arms and said such sales "will strengthen the security of the United States and promote world peace."

We have commented on the administration's abortive agreement to furnish President Marcos's authoritarian regime in the Philippines with $500 million in arms, and on earlier arms deals with Spain, Turkey and Greece.

These actions may be a case of an administration continuing to do what has become all too natural in recent years. But the President and his aides cannot be unaware of the President-elect's strong feelings about what he regards as indiscriminate and excessive arms sales. They ought to take greater care to freeze a policy that could cause serious problems for the incoming administration and trouble for the United States.

THE NEW YORK TIMES.

International Opinion

Madrid Kidnapping

Spain has progressed farther along the road to democracy without a new coup d'état or civil war than many people would have predicted a year ago. But it has not yet escaped from the cycle of terrorist and counterterrorist violence which marked the last years of the Franco regime. The latest spectacular incident, presumably timed to have the maximum impact on the referendum on Wednesday, was the kidnapping in Madrid on Saturday of the president of the Council of State, Mr. de Oriol . . . Clearly extremists of right and left share an interest in preventing a peaceful and orderly transition to democracy. By maintaining a climate of violence and disorder they hope to force the army, with or without the King's approval, to restore authoritarian rule. The extreme right wants this for its own sake, while the extreme left believes that it would further radicalize the working class and so improve the chances for an eventual proletarian revolution.

It now looks unlikely, however, that the extremists are strong enough to achieve their aims on their own . . . If the kidnapping has any effect, it is more likely to rally people to the support of the government than against it . . . The government can look forward with reasonable confidence to a comfortable if not overwhelming endorsement. . . .

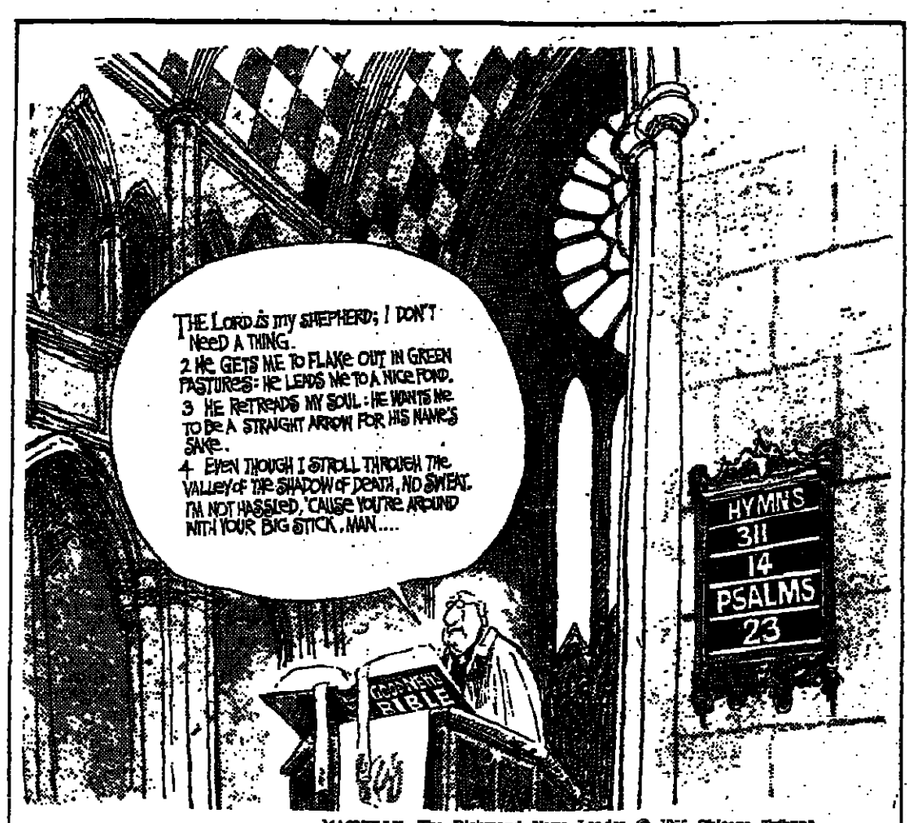
In the International Edition

Seventy-Five Years Ago



December 14, 1901

PARIS—Considering his age and the perspective of a long reign which seems to be spread out before him, Alfonso XIII is one of the most interesting sovereigns in Europe. It is very natural that, on the eve of the day upon which his majority is to be officially declared, all eyes should be turned on the young King of Spain," said yesterday's editorial in the Journal des Débats.

Fifty Years Ago

December 14, 1926

LONDON—An attempt to establish on this island a Socialist state in sympathy and alliance with Moscow will be resisted by whatever means and measures may be found necessary, Winston Churchill declared in an article in a West Essex constitutional and political broadsheet, published in his constituency, wherein he forecasts government action against present trade union privileges.

MACNELLY, The Richmond News Leader © 1976 Chicago Tribune.

Chirac Fiddles, Giscard Burns

By James Goldsborough

PARIS.—The French political situation has been changed substantially by the formation, by Jacques Chirac, of the Gaullist Rally for the Republic. A few months ago, the government's only political threat came from the left. As the New Year begins, however, it is being challenged as well from the right. Of the two, the latter may ultimately prove more devastating.

The transformation of the old UDR Gaullist party into the new Rally is an open attempt by the Gaullists to set up a parallel government. It is a shadow cabinet that has no intention of staying in the shadows. And the Gaullists love it. Two years after being nearly extinguished by Mr. Giscard d'Estaing, they have come back to steal his thunder. Mr. Chirac, like Plato's demiurge, is ready to bring order out of chaos.

All this is highly unusual behavior for the Gaullists and for the Fifth Republic. If De Gaulle left one durable legacy, it was the Gaullist institutions, and the cornerstone is the President of the Republic. Unlike the United States with its equal branches, the Fifth Republic's President stands alone, supreme arbiter—guide was De Gaulle's word—directing affairs throughout his seven-year term no matter what the mutations and whims of parliament might be. The Gaullist constitution made him supreme because parliamentary government in France over the years had led from one disaster to another.

Ambition

Mr. Chirac knows all this, and since his ambition is to replace Mr. Giscard d'Estaing as President in 1981, he must not go too far in weakening the office. Yet, convinced that Giscard d'Estaing's policies would lead to a victory of the left in 1978, which would make his own prospects for 1981 *very unsure, Mr. Chirac has begun* his move. This might have been avoided if Mr. Chirac had succeeded in convincing the President of the need for holding legislative elections immediately, instead of waiting for 1978, but he was unable, and, failing, resigned in pique as prime minister last August.

He has hardly gone into the eclipse reserved for most former prime ministers—the "crossing of the desert," as it is called here, or the "reserve for the Republic" where De Gaulle unceremoniously deposited Georges Pompidou after firing him. In three months, Mr. Chirac has managed to convince the party elders to support him—or at least not to oppose him—in forming his *Rassemblement pour la République*, a mass movement similar to De Gaulle's 18 years ago, with an appeal aimed beyond party lines, to all Frenchmen in times of peril. That De Gaulle's own efforts were branded fascist, and failed, has not deterred Mr. Chirac.

What is Chirac reproaching Mr. Giscard d'Estaing for? The answer is not so complicated as might appear. Basically, Mr. Chirac, the Gaullist, wants to fall back on traditional Gaullist strategy that has kept them in power since 1958: It is known variously as the Communist scare, the "us" or "them" dichotomy, or free enterprise vs. collectivism. The strategy has been infallible historically, most noticeably in 1968. It willingly exploits the division of France into two camps, indeed, seeks to perpetuate and accentuate it.

Mr. Giscard d'Estaing, no Gaullist, has tried another approach. It is curious that the one former Gaullist prime minister not supporting Mr. Chirac is also the one who tried the same approach as Mr. Giscard d'Estaing while in office. That is, of course, Jacques Chaban-Delmas, who was disgraced and dismissed by President Georges Pompidou for trying to woo the left and blur the distinctions with his *"nouvelle société."* Mr. Chaban-Delmas's chief social adviser at the time, Jacques Delors, is now a member of the Socialist party's politburo.

As the drama unfolds, Mr. Giscard d'Estaing appears ever more isolated. An unusual president for France, worldly in a provincial nation, reformist in a conservative nation, a man of consensus in a nation that likes to have things its own way, he is determined that events will proceed in an orderly way, with elections in their time, parliament in its place and a reform here and there that might still win some leftist support. As band leader, the music will go on, though the Gaullists already see the waters bubbling through the ballroom.

They also have made a virtue of necessity. The Gaullists see a certain justice in these events, for their memories stretch back to 1969 and the defeat of De Gaulle in the referendum on decentralization. What member of the majority, former minister under De Gaulle, leader of the Independent Republicans in parliament, spoke out against the referendum, saying it should be voted on its merits, which he couldn't see, and not as a plebiscite for De Gaulle? His name was Giscard d'Estaing and there is hardly a Gaullist alive who does not blame him for the defeat and the bitter retreat of De Gaulle to Colombey-les-Deux-Eglises.

So the government must now beat back both left and right, give in enough to Mr. Chirac that the majority's divisions do not seem so great as those of the opposition. Mr. Giscard d'Estaing will not have his hands entirely free until 1978. He will press for measures such as direct election to the European Parliament, for he knows that the Socialists and Communists disagree on that, yet he cannot press too far, for the Gaullists also disagree with him.

The President's belief was that his way could have beaten the left in 1978, that France has come too far to see a Communist menace at every election. The Gaullists, however, are going to do it their way. The one thing they have accomplished so far is that for the first time since Mr. Giscard d'Estaing's election, the majority is more divided than the opposition.

Perfection and Promises

By Anthony Lewis

WASHINGTON.—Last spring an unusual combination of liberals and conservatives in Congress joined the attorney general, Edward Levi, in a new approach to an intractable old problem. They introduced a jointly drafted bill to control wiretapping and electronic eavesdropping for foreign intelligence purposes.

The bill was amended and approved last summer by the Senate Judiciary and Intelligence Committees. But there was opposition from some liberal members and from such outside groups as the American Civil Liberties Union, and the bill never reached the floor before Congress adjourned. I think the liberal opposition was mistaken. A curious episode at hand indicates why.

Last week a story in The New York Times quoted unnamed "senior intelligence officials" as criticizing Levi for his refusal to approve electronic surveillance. They said there had been six proposals in the last year to wiretap Americans or resident aliens believed to be in touch with foreign agents—and Levi had approved none.

Past Abuses

For anyone aware of past abuses, that story was a high compliment to Edward Levi. It made clear that he had actually put effective controls on eavesdropping for "national security" purposes—a practice that went on for decades without meaningful standards or scrutiny.

What Levi has done, with President Ford's full support, is first of all to guarantee that the attorney general himself will pass on any request for surveillance to obtain foreign intelligence. He will do so not by hastily signing a piece of paper—as often used to happen—but only after learning the reasons for the request in detail and having them studied by an advisory group.

Under Levi's standards, surveillance may be directed at an individual only when there is "probably cause to believe he is a conscious agent or collaborator of a foreign power." That rule would have prevented the tapping of journalists and White House officials designated by Henry Kissinger because of news leaks.

But suppose we have, someday, an attorney general less meticulous and determined in these matters than Edward Levi. Or suppose we have a president less committed to his attorney general than Gerald Ford has been, or more susceptible to pressures from intelligence officials.

Those are hardly far-fetched suppositions. In the intelligence business, claims of urgency are inevitable. Resisting the pressures—sticking to the rules—will almost certainly require something more permanent and awesome than one attorney general's policy. The something more is legislation.

Levi remarked the other day: "Over the long run, I don't think attorneys general can adhere to such a policy without the support of a legislative framework." Indeed, the public complaint by "senior intelligence officials" looks like an attempt to soften up the Carter administration—on the assumption that there will be no legislative framework.

The bill put forward by Levi and others—notably Sen. Edward Kennedy—aims first at accountability within the executive branch. Any request for surveillance would have to come from the president's assistant for national security affairs or from a presidential appointee in the national security area, who is subject to Senate confirmation. He would have to certify that he seeks "essential" foreign intelligence information that "cannot feasibly be obtained by other investigative techniques."

If the attorney general approves, a surveillance order would then be sought from one of seven designated federal judges—a procedure paralleling that used to get wiretap orders in domestic criminal matters. The judge could approve only if he found probable cause to believe that a citizen or resident alien who was the target was knowingly engaged in—or conspiring for—terrorism, sabotage or clandestine intelligence activity on behalf of a foreign power.

Liberal criticism of the original draft brought about highly useful amendments tightening definitions and procedures. For example, surveillance would be limited to suspected criminal activity except for a narrow category of persons acting for foreign intelligence networks.

A respected professor of constitutional law, Paul Mishkin of the University of California, Berkeley, has called the bill "a truly major step toward effective guarantees against improper government intrusion" and toward "constitutional governance." It undoubtedly would be an enormous improvement on existing law, but some continue to oppose it as less than perfect.

In this instance as in others, perfectionism seems to me an enemy of progress. In the 1960s some liberals opposed moderate bills to regulate domestic wiretapping, and then something much worse passed in the heat of passion over crime in the streets. The danger now is that we may lose the chance for wise legislation on this most difficult problem of liberty and security.

Letters

Britain's Woes

Prof. Stern, in "When Britannia Waives the Rules" (IHT, Dec. 10) follows out the logic of mistaken premises to sets of mistaken conclusions. He seems to reveal that habit of mind which is abstract because it failed to be concrete.

The various solutions to Britain's problems will not rest in further political theory. The solutions rest in a simple return to concrete life, to a striving to be efficient and to be productive.

The West Germans, the Americans, and the Japanese produce automobiles: but they produce more than the British. We know now why that is so: the British take more man-hours to produce an automobile; they are also forced to produce with outmoded manufacturing equipment.

Prof. Stern gives in to the popular myths: that inflation has been contained in Britain. It has not. It is alive and very well indeed... Three years ago I purchased four radial tires and the cost then was £56. I now own another automobile, and went to purchase the same brand and size of tires this week: the cost was £147.

It might very much help the United Kingdom if it were denied the $3.9-billion IMF loan. Britain needs a dramatic lesson as was experienced in the United States in 1929. It needs to learn that it must produce goods and not simply raise its prices to hide its productive inefficiency.

Prof. Stern seems to imply that the English are their own best critics. I disagree with that premise. They are not their own best critics. . . .

If one wants to read a critical press one turns to the various U.S. journals for sounder and deeper writing . . . Prof. Stern simply propagates the current political myths.

J.M.B. CRAWFORD.
London.

Andrew Hargrave From Glasgow:

. . . An English-based Tory victory at the next election could be a truly Pyrrhic one, leading to a breakaway Scotland.

GLASGOW.—The resignations of Scottish Tory front-bencher Alick Buchanan-Smith and devolution spokesman Malcolm Rifkind were motivated by deeply felt convictions—but also by worry over the home base. For both hold constituencies of slender majorities and are members of a dwindling band of Scottish Tory MPs. Being comparatively young (Rifkind is barely 30 years of age), they are understandably keen on hanging on to them.

Buchanan-Smith saw the seat immediately south of his own going Nationalist for the first time in October, 1974, and his own majority slashed from 7,451 in February of the same year to only 2,551. Rifkind had a similar experience, his majority dropping from 4,602 in February to 1,257 in October. As for the Tories in Scotland, their strength declined from 36 seats out of 71 in 1955 to 16 seats in October, 1974.

There have been signs, however, of a Tory revival in Scotland. Opinion polls have placed them roughly level with Labor and the Scottish Nationalists which compares well with their position of bad third in October, 1974. (One poll, admittedly a restricted one, even placed them ahead of the other two.)

Little Impression

This seems to have made little impression on Margaret Thatcher, the Tory leader. With thumping by-election victories recently in two reputedly safe Labor seats in England and a good chance of taking a third one, that of European Commission president Roy Jenkins's former seat in the spring, Scotland cannot have figured high in the party's thinking when deciding on its devolution tactics. This has been amply confirmed by appointing Glasgow MP Teddy Taylor, a strong opponent of parliamentary devolution, to replace Buchanan-Smith.

Devolution is unpopular in large sections of England, both Tory and Labor. What the merits of the case is may be reckoned to be a vote-loser in England. For Mrs. Thatcher, an eye on Downing Street, facing the controversial and complex Devolution Bill, which is about its long parliamentary passage this week could pay a considerably higher electoral dividend than letting her small and divided Scottish contingent (who themselves split 11 for devolution and five against) off the hook by backing the bill in principle. There are, of course, considerations in the devolution issue which far transcend the short-term electoral prospects of the Tories or indeed the fate of the present Labor government.

The question of devolution in Scotland is inextricably tied to that of rising unemployment. Nationalists say openly that without a Scottish government of substantial economic powers (which, of course, are virtually absent from the bill) the proposed Scottish Assembly would have little to watch it over further, helpless. They say that without power over taxation, including some North Sea oil revenues, the assembly would be unable to forge a distinctive strategy to halt economic decline. The reason for the Nationalists' support for the Devolution Bill is simply the hope of the assembly becoming a forum for Scottish grievances and consequently the first stage to independence.

The change in Tory tactics from one of emasculating the Devolution Bill to total opposition is grounded in just that fear. This, coupled with the expectation that once a Tory government returned to office and Britain's economic fortunes took up, the SNP menace will automatically fade. This at any rate is how it seems from the view in Westminster. But in Scotland the political prospects look rather different.

Mrs. Thatcher's arithmetic is probably correct. Even if the Tories lose a few more seats of their meager 16 in Scotland these should be considerably more than offset by gains in England. Moreover, Labor, with 41 seats at stake, might be damaged far more and so increase further a Tory majority won in England.

What Mrs. Thatcher and the rest of the Tory shadow cabinet seem to have ignored is that those seats Labor and Tory would probably be gained by the Nationalists, who would thus become not only the largest single party in Scotland but gain an overall majority of seats. The Nationalist parliance this would become a "mandate for independence."

This is not as farfetched as it sounds. A relatively small increase in the Nationalist vote could swell their representation in Parliament but out of all proportion under the present "first past the post system."

It is as well to remember that in October, 1974, the Labor party gained 57 per cent of all Scottish seats with a 37-per-cent share of the popular vote while the Nationalists, with over 30 per cent of the vote, won only 11 seats. (The Tories' 16 seats were won with less than 25 per cent of the vote.)

Unity of Britain

So, as far as the unity of Britain is concerned, an English-based Tory victory at the next election could be a truly Pyrrhic one, leading to a breakaway Scotland. For the Nationalists, like the French-speaking brethren in Quebec Province of Canada, thrive not only on economic distress but the alienation of confrontation from the center. Tory move against the Devolution Bill, acid exchanges across the floor of the House of Commons by English back-benchers (both government and opposition) over the next few months could fuel infiame Scots anger, feed Scots suspicion and so swell what is now called the Scottish backlash.

It is this nightmare that prompted not only Buchanan-Smith, Rifkind and four other leading Scottish Tory MPs (whose resignations were refused by Mrs. Thatcher) but former Prime Minister Ted Heath to speak out for devolution and against the present line. History may well prove them right.

...Lower Costs in U.S. ...ure Alien Investment

By Jack Egan

...Y YORK, Dec. 13 (WP).— ...nited States is an increas... ...e for foreign direct invest... ...because it is becoming a ...ly lower-cost place to pro... ...according to a survey of ...-owned companies here.

...r factors drawing foreign ...ment capital to the United ... include an abundance of ...aterials, and the "stability ...olicies of this country's sys... government, reports James ...thy in the new issue of the ...ence Board's monthly mag... Across the Board.

...part of this trend, foreign investors are both buying U.S. companies—such as Saks Fifth Avenue, Stouffer Foods, Bantam Books, Foster Grant, and Grand Union—or building U.S. manufacturing facilities.

Examples of the latter include West German Volkswagens planned production plant in Pennsylvania (though Volvo, the Swedish carmaker, last week postponed the opening of its assembly plant in Chesapeake, Va., for at least a year), the French-owned Michelin Tire Corp.'s $800-million investment in five U.S. manufacturing facilities, and the U.S. plants now operated by Sony and Panasonic, the Japanese television and radio giants who once forced U.S. electronics companies to expand in the Far East to stay competitive.

More Competitive

Now, however, the trend has been reversed and the United States has become more cost-competitive, says Mr. McCarthy, who carries out international economic research for the Conference Board, a private business research organization.

In 1975, for the first time ever, the U.S. Bureau of Labor Statistics' annual compilation of labor costs in 10 industrial countries did not put the United States at the top but in third place, and in a virtual tie with Canada and West Germany for number four and five.

"In fact, virtually all categories of cost, from energy and materials to executive compensation, look relatively lower in the United States to some foreign investors because the U.S. dollar has depreciated vis-à-vis their currency," according to Mr. McCarthy. This is particularly true of the German, Japanese, Swiss and Dutch currencies.

100 Biggest Listed

The article offers a list of the 100 largest foreign-owned companies in the United States as of the end of 1975. A breakdown by nationality shows 25 of them to be owned by the British, 24 by Canadians, nine by West Germans, eight by Swiss, eight by French, seven by Dutch, four by Japanese and the rest by a variety of nationalities. None are controlled by Middle Eastern investors.

The 10 largest companies on the list (which includes only industrial, surface-transportation, retail and service companies at least 50-per-cent-owned by foreign investors and excludes banks, airlines, and shipping and trading concerns) are:

Shell Oil, owned jointly by Royal Dutch Petroleum Co. of the Netherlands and Shell Transport & Trading Co. of Britain; Brown & Williamson Industries, owned by British-American Tobacco, Britain; Joseph E. Seagram & Sons, owned by Seagram Co., Canada; Grand Union Supermarkets, owned by Cavenham Ltd., Britain; National Tea Supermarkets, owned by George Weston, Ltd., Canada.

North American Philips, owned by Philips' NV, the Netherlands; International Nickel Co. (U.S.) Inc., owned by International Nickel Co., Canada; American Petrofina, owned by Petrofina SA, Belgium; Ciba-Geigy Corp., owned by a parent of the same name, Switzerland; Nestlé Co., owned by Nestlé Alimentana, Switzerland.

The top seven companies each had 1975 sales of $1 billion or more but the total sales of the 106 companies together were $44.7 billion last year.

The article concludes that "many major foreign firms have not yet taken the plunge" and that as long as the economic trend holds the "potential for further foreign investment in the United States is vast."

...ustralia Lifts ...ollar's Value ...8 Per Cent

...nch Industrial Output Off ... Per Cent in Latest Month

...S, Dec. 13 (IHT).—Indus... ...oduction fell 4.65 per cent ...ber, the Finance Ministry ...today. It said over half ...decline was due to a ...ent reduction in natural ...l oil product production. ...ndex, at 123 on the 1970- ...dex, was 8 per cent above ...l of a year ago.

...ministry said that output in the intermediate goods sector was off by just over 3 per cent in October, due largely to strikes in the paper industry, where production fell 12 per cent.

According to an official survey published today by the national statistical institute, production continued at a low level last month. Demand for industrial goods in November was slower than that of last June, when the index also registered 123.

Demand for intermediate goods was "very moderate" last month, the government agency said, while demand for consumer goods was "still good but lower" and that for capital equipment was lower.

The only bright spot in the survey was the view of industrialists that prices in the coming months should increase at about 0.6 per cent a month at the production level, down from 0.8 per cent between June and last month.

Meanwhile, in another official report, the Finance Ministry said that official reserves at the end of last month totaled 36.52 billion francs (about $17.33 billion), up 34 million francs from October.

FINANCIAL NEWS AND NOTES

Ford Motor Cuts Sales View

Ford Motor has cut its prediction of how many new cars the U.S. auto industry will sell next year and again scaled back its estimate of what this year's final volume will be. The less optimistic forecasts replace ones made only six weeks ago. Ford officials expect total U.S. sales of domestic and foreign autos to rise only 6 per cent next year, to about 10.6 million units from "just over 10 million" this year. At the end of October, Ford had placed next year's industry sales at about 11 million units. The latest reduction to "just over 10 million" indicates final industry sales this year will be up about 17 per cent from last year's depressed volume instead of a 33-per-cent jump once expected. The reductions reflect the recent unexpected slowdown in the pace of the auto sales recovery. In the past months, auto sales have been falling short of what auto executives had been expecting. The failure of sales to live up to expectations recently has caused all four major Detroit auto makers to scale back hastily their production of certain new cars, primarily smaller models, by temporarily closing some assembly plants and laying off workers.

Pye Sells Units to Philips

Philips Electronic & Associated Industries Ltd., majority shareholder of Pye's Holdings Ltd., plans to acquire for cash Pye's radio and television business in Britain. Financial details of the transaction were not available. This will concentrate Pye's efforts mainly in professional electronics and specialized components and will remove certain U.K. activities which are at present running in the red. Philips of the Netherlands, the parent company of Philips Industries, also proposes to acquire for cash the Pye group's 50-per-cent holding in Coronet Industries Ltd. of Hong Kong, giving Philips full control. Pye says the transactions, plus the proposed sale of its interest in Pye Industries Ltd. of Australia, would, if carried out on Jan. 1, 1975, have reduced 1975 annual group turnover by approximately a third. There would have been a small increase in net profits and a significant increase in retained surplus.

W. German Auto Industry Optimistic

The West German motor industry this year is forecasting it will achieve the highest profit-to-sales ratio in seven years, but the outlook for 1977 is clouded by the possibility of slackening demand in both domestic and export markets. A spokesman for the industry association says the profit-sales ratio this year is estimated at 3.4 per cent, against 0.9 per cent last year and 3.6 per cent in 1969. The industry expects production this year will probably grow about 20 to 25 per cent from last year's 2.91 million units. But the likelihood of lower foreign demand after the expected rise in oil prices means the production figure will be hard to repeat in 1977, the spokesman adds. Exports, at 1.84 million units, will be about 25 per cent higher than last year, but still about 15 per cent below the 2.17 million in 1973.

Metallgesellschaft Earnings Up

Metallgesellschaft, the West German nonferrous metals firm, says 1975-76 group earnings rose, despite further losses in its aluminum and manufacturing sectors. Provisional group sales were up 18 per cent at 6.18 billion deutsche marks. Chairman Karl Gustav Ratjen says profits will also rise, but he gave no figures. Consolidated group net profit in 1974-75 was 25.1 million DM. Informed sources say the company will probably maintain its dividend of 5 DM and increase its reserves. Domestic turnover in the latest year rose 9 per cent to 3.72 billion DM, but export sales were 34 per cent higher at 2.46 billion DM. Mr. Ratjen says the company improved its earnings position by adopting structural improvements and by finally arranging to dispose of its 50-per-cent stake in the loss-making Leichtmetall to the Alusuisse group effective Jan. 1. Proceeds from the sale were above the aluminum-producing firm's book value of 60 million DM. Its losses to date had cost Metallgesellschaft 107 million DM.

But Saudis Could Boost Production

Pinch on Oil Supplies Said to Be on Way

NEW YORK, Dec. 13 (AP-DJ).—For months, two questions have plagued the oil-importing nations: When will the cost of that oil go up and by how much?

A third question is whether there will be enough oil.

Absurd as such a query might first seem, it is already being asked by a number of Western oilmen and economists. For the answer, they have turned not to OPEC but to the cartel's most powerful member, Saudi Arabia, and what they hear so far is disturbing: By as early as next year, there may well not be enough oil to meet consumer demand.

Saudi Arabia, oil observers agree, has emerged as the key both to petroleum prices and to adequate petroleum supplies. That is because its known oil reserves are by far the largest in the world.

But ever since it started the 1973-1974 oil embargo, Saudi Arabia has maintained a limit on the volume of petroleum it will allow to be produced by Arabian American Oil Co., a consortium that currently accounts for over 95 per cent of the kingdom's oil output.

Although it could produce much more, Aramco is restricted by the limit to an average annual output of 8.5 million barrels a day. So the puzzle for consumers is whether the Saudis will allow the ceiling to be breached when, as many expect, the need arises next year.

Curb Seen Continued

Key Saudi officials publicly maintain that the production ceiling will be continued because their vast oil reserves, estimated to be at least 150 billion barrels, are finite and because their already overheated economy simply cannot absorb additional oil revenues.

Of course, the Saudis' real intent regarding the production limit has yet to be tested. During the recent worldwide recession, demand for its oil was less than buoyant, but now, observers say, such a test seems imminent.

Reflecting demand revived by the economic recovery, Aramco is already nudging the production ceiling, making up for the days earlier this year when it produced below quota, by pumping 9.1 million barrels a day during November for an 11-month daily average of 8.3 million barrels.

It is ironic that there is talk of tight petroleum supplies at a time when the world continues to enjoy something of an oil glut. New sources of crude oil such as the North Sea and, soon, Alaska's North Slope are coming into production to supplement the roughly 14 million barrels daily produced in the non-Communist world by non-OPEC nations. And not only Saudi Arabia but also many of its 12 fellow OPEC members still have spare producing capacity.

Surplus Declines

But with free-world oil demand at about 47 million barrels a day and growing by an estimated 4 per cent or more annually, OPEC's surplus producing capacity is beginning to shrink fast.

At times during the past two recession-racked years, OPEC nations have had excess capacity totaling as much as 10 million to 12 million barrels a day, reflecting production levels as low as 26 million barrels a day.

But by October of this year, OPEC production was hovering near the November, 1973, peak of 32.9 million barrels daily, and this month, cartel insiders predict, its production will average 33 million barrels a day.

Felix Rossi-Guerrero, a petroleum engineer who is an oil spokesman for Venezuela, an OPEC member, says such rates mean that the difference between OPEC's production and producing capacity is now down to 4 or 5 million barrels a day. "That is the physical, not the 'political', limit (of the excess capacity)," he stresses.

A few other oil traders are even more pessimistic about the true range of OPEC's surplus producing capacity. The chairman of one international oil company worries that there is "sustainable" surplus producing capacity of only 3.5 million to 4 million barrels a day in the entire world. "You could see increased consumption next year chew up at least 2.5 million barrels a day of that excess capacity," he says.

Unless the Saudis lift the current quota of 8.5 million barrels a day, oil consumers could soon face a supply pinch. Though some think the pinch will not occur until 1978, a recent study by the London office of Walter J. Levy, the international oil consultant, suggests that it could come before the middle of next year.

New Oil Leases In U.S. Reported Big Aid to Needs

BOSTON, Dec. 13 (AP-DJ).—Oil and gas from proposed new leases on the U.S. outer continental shelf could ease the nation's energy problems significantly by 1985, but they cannot of themselves provide energy independence.

That is a major implication of a study by Arthur D. Little Inc., international consultants, for the Department of the Interior's Bureau of Land Management. The study, based more on projections and estimates than on hard geological data, is designed to help the government negotiate future sales of leases for offshore oil and gas drilling.

Assuming a wellhead price of $12 a barrel for oil and $1.25 per 1,000 cubic feet of gas, adjusted for inflation, the outer continental shelf could produce 1 billion barrels of oil and 2.5 trillion cubic feet of gas in 1985, the study says.

That is about one-third of total current U.S. oil production of around 3 billion barrels and 12 per cent of the total gas production of around 20 trillion cubic feet posted in 1975, according to the American Petroleum Institute.

The Arthur D. Little study notes that the flow from currently producing oil and gas wells will have significantly diminished by 1985, and that would add importance to outer-shelf production.

The additional oil from the outer shelf could reduce U.S. crude oil import requirements 10 to 15 per cent in 1980 and 10 to 30 per cent in 1985, the report says, but it did not give a specific estimate of what those requirements would be.

Last year, the United States imported about 1.5 billion barrels of crude, according to the Petroleum Institute.

Prices Firm In N.Y. Amid Profit-Taking

Interest-Rate Drop Is Help to Market

NEW YORK, Dec. 13 (IHT).—Prices were firm amid profit-taking and portfolio switching on the New York Stock Exchange today.

Analysts said there was little in the news to move the market off dead center, although they said a number of investors may have moved to the sidelines awaiting an oil-price decision from the Qatar meeting of the cartel on Wednesday.

The market continues to be aided by declining interest rates, which have improved the yield of common stocks relative to bonds, analysts said.

Analysts also noted that quality second-tier stocks continue to outperform blue chips.

The Dow Jones industrial average was up 1.09 at 974.24, after trading erratically throughout the day. It was up 3.08 at 3 o'clock.

Volume totaled 24.83 million shares, compared with 25.96 million Friday.

At the close gainers outnumbered losers by about 872 to about 624.

Active American Telephone was unchanged at 64 and Continental Telephone was unchanged at 16 1/8. The U.S. Supreme Court refused to hear appeals from a suit by ATT and others against the Federal Communications Commission related to policy on interconnection equipment in the interstate telephone network.

Petroleum and chemical issues gained but electronics, copper and drug issues declined.

Burroughs lost 2 5/8 to 85 1/4. It introduced two new computer systems and communications processors.

IBM lost 7/8 to 269 3/4, Fairchild Camera 1 1/4 to 41 3/4, Digital Equipment 5/8 to 53 1/8, and Hewlett-Packard 5/8 to 88 1/8 but Motorola rose 1 to 52.

Stocks moved higher in active American Stock Exchange trading. The index gained 0.16 to 103.36.

Soybean futures tumbled 8 cents a bushel on the Chicago Board of Trade and marked the third session of falling prices in this commodity.

Most other commodities closed on lower levels, but wheat closed independently higher, gaining more than 2 cents a bushel.

Money Supply Is Key To Future, Study Says

WASHINGTON, Dec. 13 (NYT).—A new congressional staff study, the first of its kind, has concluded that variations in ... growth of the nation's money supply explain most of what has happened in the economy over the last 30 years, particularly the varying rates of inflation.

This overtly "monetarist" conclusion was supported by new evidence in a report by the staff of the monetary policy subcommittee of the House Banking Committee.

The essential conclusion of the staff study was that the rate of growth in the nation's money supply "isn't all that matters" but that it "matters very, very much." There are times when import prices can have an important effect, as in 1973-74, and other times when a sudden surge of spending—an increase in the velocity of money—can run up prices, as in the 1950-51 period after the outbreak of the Korean war, the study found.

But by far the most important explanation for changes in the consumer price index—its rate of rise—was changed about two years earlier in the growth rate of the money supply, the report concluded. It also found that a sudden tightening of monetary policy, aimed at slowing money growth as inflation picked up, was a major cause of turning "economic expansions into recessions."

These were some other conclusions, often at variance with widely held beliefs:

- Federal government deficits were not a significant cause of inflation.
- The inflation rate is not much affected by the state of the economy—high or low unemployment, recession or expansion.
- The economy's pricing system is not "explosive." While the rate of inflation in one year has a "carryover" effect into the following year, this momentum rapidly diminishes and disappears after two years.
- Fiscal stimulus for the economy, through tax reduction or higher government spending, has some effect, but the effect is small and "dissipates quickly."

High Inflation, Jobless Rates Will Continue, Friedman Says

STOCKHOLM, Dec. 13 (AP).—Nobel Prize-winner Milton Friedman said today that Western countries have failed to grasp the existence of a new environment in which attempts to hold down inflation increase unemployment.

Prof. Friedman, winner of this year's prize for economics, was guarded against possible demonstrations by 10 plainclothesmen as he gave his Nobel lecture at the Stockholm School of Economics.

He said many countries now appear to be in a transitional period, perhaps decades long, in which higher inflation is often accompanied by higher unemployment.

"The public has not adapted its attitudes or its institutions to a new monetary environment," he said. "Inflation tends not only to be higher but also increasingly volatile and to be accompanied by widening government intervention into the setting of prices.

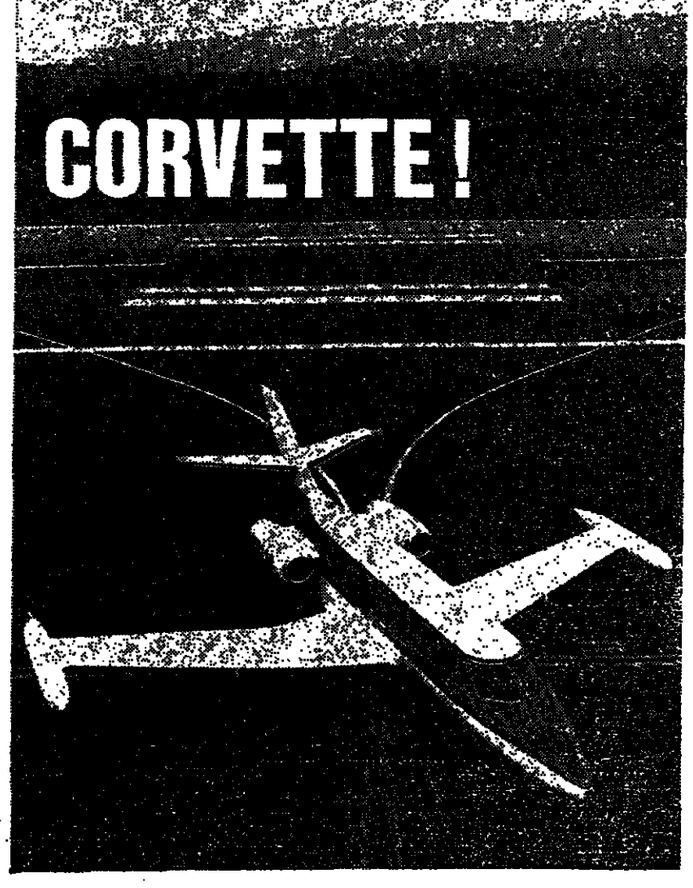
"The growing volatility of inflation and the growing departure of relative prices from the values that market forces alone would set combine to render the economic system less efficient, to introduce frictions in all markets, and, very likely, to raise the recorded rate of unemployment."

Because of his market theory of economics, which is judged reactionary by some economists, Prof. Friedman's choice as Nobel laureate has met with considerable protest.

Leftist groups also accuse him of aiding the Chilean military regime of Gen. Augusto Pinochet. The leftists demonstrated during the Nobel award ceremony Friday, but there were no incidents at today's lecture.

Discussing the condition of economies in the West, Prof. Friedman said, "The present situation cannot last. It will either degenerate into hyperinflation and radical change; or institutions will adjust to a situation of chronic inflation; or governments will adopt policies that will produce a low rate of inflation and less government intervention into the fixing of prices."

IF YOU ARE IN THE PROCESS OF SELECTING A BUSINESS JET



DON'T ALLOW ANYBODY TO LET YOU FORGET THE

Did you know that the CORVETTE operating cost per flight hour makes it an economical aircraft to have? There is no magic, though. Just ask about our low fuel consumption and our low maintenance costs and you'll understand.

Did you also know that the CORVETTE cabin can be rapidly — in less than two hours — changed over to comfortably accommodate six VIP passengers? Or perhaps a relaxed arrangement for 12 customers or company personnel in a flight to your new plant?

CEMENT THE SKY'S THE LIMIT.

Long-term trends are favorable for the portland-cement industry. And Lone Star, as the Western Hemisphere's leading cement producer, is in a good position to take advantage of the situation. We call that being in the right place at the right time.

LONE STAR INDUSTRIES

Sales figures are unofficial.

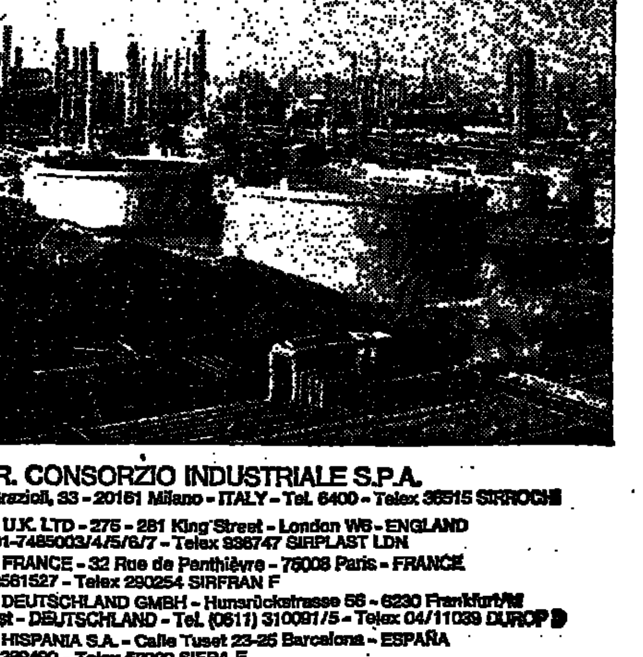
Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.



Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

SIR

45 years of chemistry

S.I.R. CONSORZIO INDUSTRIALE, with a consolidated turnover of approximately *$ 700 million, is the third Italian* petrochemical company. The largest complex of factories is to be found in Sardinia while other plants are situated in Lombardy, Veneto, Umbria, Campania and Calabria.
S.I.R. CONSORZIO INDUSTRIALE is active in
- ***basic chemistry* (ethylene, propylene, aromatics etc.)**
- ***primary chemistry* (chemicals, plastics, rubbers, fibers)**
- **fine chemistry (catalysts, auxiliaries and household products)**
- **manufacturing field (industrialized building, textiles, packaging, plastic films, foamed polyurethane)**

North Korean Debt

TOKYO, Dec. 13 (Reut[ers]) — A Japanese delegation of b[...] manufacturers and trade[rs ...] for Pyongyang to negotia[te] the re-scheduling of N[orth] Korea's overdue debts to [Japa]nese companies, estimat[ed at] about $70 million, [...] sources said today. North K[orea's] total trade debts to Ja[panese] companies total around [...] million, of which an esti[mated ...] million is overdue.

of the newsstand price
(Depending on your country of residence)

Take advantage of the International Herald Tribune's 25% Introductory Discount on the regular subscription rates. That's a big saving. But remember that the newsstand prices are always higher than the subscription rates. When you compare the reduced subscription rates with what you have been paying at the newsstand, you find that your saving is a lot more—you can save up to 47% of the newsstand price. In the Herald Tribune you'll find unsurpassed international news coverage and respected and influential columnists including James Reston, C.L. Sulzberger, Anthony Lewis, William Buckley, Art Buchwald, Russell Baker, Red Smith and Brian Glanville. In addition, you'll find special reports from the principal cities of Europe including Claire Sterling from Rome, John Dornberg from West Germany and Peter Lennon from London. You'll also find excellent important coverage of international business and economic news. And complete, daily Wall Street stock tables. Complete the coupon below and mail it to us with your check or money order today.
As the world gets smaller, everyone needs a newspaper with a bigger point of view.

These are the special rates after deduction of the introductory discount.

THIS OFFER FOR FIRST TIME SUBSCRIBERS ONLY

This offer valid through February 1, 1977.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

EUROPEAN DIRECTOR OF FINANCE
AND
MANAGER INTERNATIONAL FINANCIAL PLANNING

An international computer company with exceptional growth and profitability is seeking two financial oriented, aggressive individuals for management positions.

- The European Director of Finance will be based in the Netherlands and should be multilingual. A knowledge of U.S. accounting principles, foreign exchange, cash management and familiarity with European taxation are prerequisites, together with a proven track record and two to five years experience in these areas. An accounting degree is a minimum educational requirement.
- The Manager—International Financial Planning will be based in Orange County, California, and will serve as an assistant to the Chief Financial Officer. A knowledge of foreign exchange exposure management and international banking, as well as analytical financial experience are minimum requirements. Degree(s) in accounting and/or economics are also required. Minimum experience of two years in related position.

Salaries are commensurate with experience and qualifications. Excellent fringe benefits and advancement opportunities.
Qualified candidates should submit resumés, together with salary history and references, to:

Box D. 5,604, Herald Tribune, Paris
An Equal Opportunity Employer.

GENERAL APPOINTMENTS

Une organisation privée à vocation internationale, recherche, pour son département intervenant dans le domaine social (enseignement, santé) une

SECRETAIRE-ASSISTANTE DE DIRECTION

D'excellent contact humain, de formation supérieure, secrétaire de direction confirmée (5 à 10 ans d'expérience), elle sera de langue maternelle ou principale anglaise, parfaitement bilingue anglais-français (avec sténos). Avoir déjà abordé les problèmes touchant à la gestion et au financement d'universités, d'hôpitaux, etc... serait un avantage. Le lieu de travail, actuellement centre de Paris, sera, en 1977, une ville très agréable de la grande banlieue Nord et la titulaire du poste sera amenée à se déplacer assez fréquemment à l'étranger.

Ecrire avec C.V. à A. Leclercq, Réf. 8062,

MSL - CRES 73, boulevard Haussmann 75008 PARIS

Glaxo
Increasing strength in world markets

In his annual statement to shareholders of Glaxo Holdings Limited, Mr. Austin Bide, the Chairman, reported that Group sales for the year ended 30th June 1976, excluding wholesaling, were £319 millions, an increase of 30% and overseas sales, including exports, were 33% up at £256 millions. The profit before tax at £73.9 millions was 78% higher than last year.

Work on prospective new products proceeds apace in the research and development and commercial areas of the Group and the present rate of spending worldwide on research and development is about £17 millions per annum.

Commenting on developments overseas, Mr. Bide said:

Plans for a new factory in Spain have been approved and facilities for both primary and secondary operations are being created there. In Greece, construction of a factory for secondary production has now started. Our two Kenyan companies, Glaxo East Africa Limited and Murphy Chemicals (East Africa) Limited are going ahead with factory extensions.

The Group's shareholding in its associated Japanese companies has increased: in the case of the Shin Nihon Jitsugyo Company Limited to 44%. Safesa Iberica S.A. which was an associated company in Spain is now a wholly-owned subsidiary.

For some while now we have been making a close study of the United States market with a view to achieving a direct presence there and some of our newer compounds are now progressing through the registration procedures of the U.S. Food and Drug Administration.

Glaxo's ten year record

Since 1967 we have:

- Increased our total annual sales from £71 millions to £411 millions, with markets in more than 150 countries.
- Committed the expenditure of over £83 millions in capital and running costs for worldwide research and development.
- Developed eleven major new products, including widely prescribed cephalosporin antibiotics and two important new treatments for asthma — Ventolin and Becotide.
- Employed, on average, over 28,000 people throughout the world.

If you would like a copy of the full Chairman's Statement, together with the Report and Accounts, please apply to the Secretary,

JUMBLE® THAT SCRAMBLED WORD GAME

by Henri Arnold and Bob Lee

Unscramble these four Jumbles, one letter to each square, to form four ordinary words.

ENSIO

CATHY

THYROW

INTOAR

Now arrange the circled letters to form the surprise answer, as suggested by the above cartoon.

Answer here: ○○○ A ○○○○○○○

(Answers tomorrow)

Yesterday's Jumbles: BISON CHUTE STOOGE AMPERE
Answer: Politicians often have a whale of a time doing this — "SPOUTING"

BOOKS

PREJUDICE AND LITERATURE

By J. Mitchell Morse. Temple University Press. 193 p.

A CIVIL TONGUE

By Edwin Newman. Bobbs-Merrill. 207 pp. $7.

Reviewed by Christopher Lehmann-Haupt

LORD knows it's easy to fault people for their mistreatment of the English language, as the newscaster Edwin Newman continues to do indefatigably in "A Civil Tongue," a sequel to his widely read first book, "Strictly Speaking: Will America Be the Death of English?" Good language requires clear thought, as teachers of composition used to tell us in the days when composition was still taught; and it's as hard to think clearly as it is to identify your feelings, which takes about a lifetime of groping here and there in the murky interior of your behavior. As the composition-teachers also used to say, one's writing style reflects one's character, or, more succinctly, the style is the man.

Still, one wants a diagnosis or two from the doctors of our tongues — something to tell us why we're abusing language as well as what we're doing wrong. That's why I admire J. Mitchell Morse's "Prejudice and Literature," the latest collection of essays by the Temple University English professor who stunned us a few years ago with the blunt but eloquent truth of "The Irrelevant English Teacher."

In "Prejudice and Literature," Morse isolates a single malfunction in whatever circuit connects our language with our feelings — that is, our tendency to generalize by creating metaphors and then to take those generalizations literally. He shows us the consequence of that malfunction — how hard it becomes to discern the individual case once it has become clouded by metaphor. He takes some of our culture's most prevalent metaphors and breaks them back down to concrete cases — among them, the irrational female, the beastly bourgeois, the noble savage, the evil intellectual, the alienated artist, and the brotherhood of man. In short, he offers some surprising antidotes to what he thinks is a lot of silly thinking and writing.

I won't attempt in this space to explain exactly how Morse works his way back to concrete particulars. His account of how women have come to be thought of as irrational involves a review of medieval scholasticism, not to speak of instruction in post-Platonic philosophy. His quarrel with "the seemingly innocuous metaphor 'our cultural heritage'" takes him all the way from a comparison of the careers of Vladimir Nabokov and Malcolm X, to a critique of John Dewey's "clumsily worded and thus poorly conceived" philosophy of education. And in "The Beastly Bourgeois: or The Discovery of America," he chastises everyone from Charles Baudelaire through D. H. Lawrence to Jacques Barzun.

Nor shall I attempt to account for some of the surprising judice and Literature stance, Morse's claim is largely misunderstood for 2,000 years he's been literally, with the res inestimable loss of pleasure in the West and a disastrous heaviness in the Weste or his categorical ass among those who have erately guilty of intoler udice against Jews or both are such import as Eliot, Pound and Si

All I can say is s is stimulating, refres above all unpredict loathes authoritarianis can't abide the excess education. He heaps on the popular notion artist must be anti-bo achieve greatness, yet considers James Joyc dign of the antibourge one of the greatest n the English language. literature, yet he is to subsume art under gory of moral conduct, you can't turn J. Mitc into a generalization a nior, except perhaps t he provides medicine t ed thinking.

As for Edwin Newm Civil Tongue," he als diagnosis or two to a why Americans mist guage so. They aren't clearly. They don't rea communicate (especially politicians). They seek obfuscation because s minds that "we become more open about ourselv like Morse, Newman em worthy principle that " safer when language i It improves our chances ing what is going on."

But for every ounce nosis in "A Civil Tong is a ton of symptom, w the form of page upon the sort of gobbledegou and outright nonsense t to be increasingly destru attempts to talk with other these days. And weighs heavily on th Certainly, one apprec points that Newman m —that words such as constituency, controversy eter, [and] hopefully" to extend their straight that the addition of ar suffixes such as "de "un-," "-ize," "-wise," "-ed" (as in "Nadia was medaled") tend to high crimes and mis against innocent and m elements; that most sp should be sent back school to start over, all politicians and b that insist on imitati and that redundancy i everywhere. And I enjoys Newman's pun mor, though it gets p rather too quickly.

Still, the objective fa what with all the sympt 50 per cent of "A Civil is composed of the most language imaginable. of its purpose, that n writing is enough to reader sick.

Christopher Lehmann-Haupt is book reviewer for York Times.

BRIDGE — By Alan T.

On the diagram, South heard strong bidding on his left and repeated club bids from his partner. Most players would be content to pass three clubs, which would have been a safe spot, but South ventured three hearts.

North naturally raised hearts to game, and one might have expected East to double. However, it was West who took that action, confident that his partner held a useful trump holding and hoping to confuse the declarer.

South was not at all confused. He knew that if West held a few hearts as well as spades and diamonds, his second action would have been a takeout double rather than two spades. After West had led the diamond ace and followed with the queen, perhaps that his partner could declarer won with the dummy and ruffed a d

He then ruffed a spa entered his hand with lead to the king to ruff spade. The club ace w leaving this position:

edskins Make It to Playoffs by Rallying Against Cowboys

William N. Wallace

NG, Texas, Dec. 13 (NYT). Washington Redskins are playoffs again. This team, thrives on adversity and beat the Dallas Cow-27-14, yesterday to nail he eighth and last place National Football League's gin competition, which on Saturday.

Redskins accomplished ential victory because of they said later, and be-ey moved the football to ht places on four vital that came within 46 sec-of action in the final

as been the toughest sea-'e ever had," said George the Washington coach. risis after another. But I e team a month ago this be our most rewarding

nonth ago the Redskins upset by the lowly New iants and they seemed to o chance. But the next week they upset St. Louis and then they beat the Eagles, the Jets, and the Cowboys, and here they are.

"I don't care where we go," said Allen, "as long as we go." They go to Bloomington, Minn., where they will play the Vikings on Saturday in the first of four division playoff games this weekend.

The Redskins are the wild-card team, the division second-place team in the National Conference with the best record. They wound up with a won-lost mark of 10-4, the same as the Cardinals in the National Football League, but the tie was broken in their favor because they had beaten St. Louis twice this season.

Bill Kilmer, the 27-year-old quarterback, was the primary hero. Kilmer had been arrested for drunken driving in Fairfax, Va., late Friday night but Allen had told him: "Don't worry about that. We've got to get ready for Dallas. That's the least of my concerns."

Kilmer was ready for Dallas. As usual, it took him a while to get going, but he had the Redskins moving through the second half and after the fourth quarter began, with Dallas ahead, 14-13, it all came his way.

The first key play found the Redskins on the Cowboys' 38-yard line midway through the last period on third down and 10. The Cowboys inexplicably put 10 men on the scrimmage line against a wise old quarterback. Kilmer changed the called play with an audible signal and managed to get a high soft pass away in the face of a Cowboy rush.

Mike Thomas had broken into the empty secondary and caught the ball on the 26. Randy Hughes tackled him from behind at the Dallas four. After two penalties, Calvin Hill, a onetime Cowboy star, scored from the 15 on an end sweep and Washington was ahead, 20-14, with 4:34 to play.

Roger Staubach, the Dallas quarterback whose performance was, for him, amazingly inept, next found himself passing in a crowd from his nine. Diron Talbert batted the ball upward at the scrimmage line and it came down in the hands of his teammate, Dennis Johnson, at the Dallas three. John Riggins, the former New York Jet who played his best game of an indifferent year, scored on a sweep from there. Washington was in the playoffs and the Cardinals, back home in St. Louis by now after their victory over the Giants, were not.

"We live and thrive in crisis," said Brig Owens, the seasoned Redskins safetyman. "I wonder what the crisis will be next week."

Kilmer said: "This is a great team—43 men hung together. Some of you guys counted us out."

The Cowboys, who had won 11 of their 13 prior games, will play the Los Angeles Rams here Sunday in the first round of the playoffs leading to the Super Bowl.

The Redskins, with a 9-4 won-lost record as the game began, had a careful game plan set up for Kilmer, quarterback finishing his 15th and possibly last season in the NFL. Kilmer chose to roll right and left away from the punishing Dallas pass rush led by Harvey Martin from right end.

Bill Kalinchak, who had been out of football the last two years and was signed a month ago by Washington, provided the first break. He grabbed a punt by Danny White, a kick that went only three yards, to the Dallas 18.

The Redskins reached the eight before Moseley kicked a 25-yard field goal as the second quarter began.

Dallas went ahead, 7-3, on a 12-yard touchdown run around left end by Doug Dennison, ending a 10-play, 48-yard drive.

Then Kilmer staged a brilliant scoring drive in the last minute and 42 seconds, completing passes to Thomas, Frank Grant and Fugett for 15, 14 and 17 yards. A second pass to Fugett from the six was good for the touchdown with 47 seconds left before halftime. The 52-yard drive had taken only 55 seconds. So Washington led at the half, 10-7.

The Cowboys were not behind for long. A 42-yard pass from Staubach to rookie Butch Johnson was good for a spectacular touchdown in the third minute of the third quarter. Now Dallas led, 14-10.

A good punt return by Eddie Brown placed the Redskins on their 45 and Kilmer quickly passed 16 yards to Riggins and 20 more to Fugett. Moseley kicked a 27-yard field goal to bring Washington within a point, 14-13.

Later, under a big rush at his 38, Kilmer threw the ball high in the air to Mike Thomas, who had escaped into the open Dallas secondary. Thomas caught the ball for a 34-yard gain to the Cowboys' four. Calvin Hill, the former Cowboy who replaced the injured Thomas, then scored twice but the first one was called back on account of a penalty. The second time Hill swept right end for 15 yards behind a block by Larry Brown and that completed a 50-yard drive. Washington led, 20-14, with 4:25 to play. Then the Redskins tallied again, Riggins going three yards for the 27-14 final score.

In other games reported by UPI:

Raiders 24, Chargers 0

At Oakland, Calif., backup quarterback Mike Rae passed for three touchdowns and the Raiders' defense permitted San Diego to pass the 50-yard line only twice to lead playoff-bound Oakland to a 24-0 victory.

The triumph gave the Raiders a 13-1 record, best in the NFL this year. The Raiders will face the team that handed them their lone loss, New England, in the first round of the American Conference championship here Saturday.

Rae, subbing for regular Ken Stabler, connected on scoring passes of five yards to Cliff Branch and six yards to Dave Casper in the first half. He hooked up with Morris Bradshaw on a 25-yard scoring pass in the third period.

NFL Playoff Lineup

SATURDAY

NFC

Washington (10-4) at Minnesota (11-2-1).

AFC

New England (11-3) at Oakland (12-1).

SUNDAY

AFC

Pittsburgh (10-4) at Baltimore (11-3).

NFC

Los Angeles (10-3-1) at Dallas (11-3).

Borowiak in Form

SEATTLE, Dec. 13 (AP).—Unseeded Jeff Borowiak disposed of hometown hero Tom Gorman, 6-4, 7-6, yesterday in the finals and won the Seattle tennis classic without having lost a set against four opponents. Borowiak, 27, beat Charles Pasarell, Marty Riessen, Rod Laver and Gorman.

he individual competition, ayers were grouped three behind Perez Acosta's Pate, Pinero, Barnes, Hayes ew Zealand's Simon Owen. Spaniards, who began the e stroke behind the lead- mericans, saw their play r ninth hole as the key ory. Ballesteros eagled the hole, chipping into the om 60 feet, while Pinero 30-foot putt for a birdie. ay, I was putting fantasti- said Pinero, who carded -putt greens on his way 68, the day's lowest score l only by Barnes. o said Ballesteros, at 19 ars his junior, had helped enendously all week by encouraging him and building his confidence.

Pinero thanked everybody—the tournament organizers, the press, the marshals, the drivers, waiters in the clubhouse. Everybody. He paused and a shy, sly smile crossed his face.

"And I'd like to thank the United States team, too," he said, "for making double bogey and bogey on the 17th hole."

The Americans had gone ahead by one stroke at the 15th with a pair of birdies following a bogey by Pinero at the 14th and by Ballesteros at the next.

But Pate and Stockton stumped off at the end of the round, disgusted with their poor finish. Pate, 22-year-old U.S. and Canadian Open champion, said: "I just putted horrendously all week."

The fast hilly greens on the desert course caused problems for most of the competitors, but Perez Acosta said they were the making of his success.

Severiano Ballesteros, right, and Manuel Pinero embrace after their victory over U.S. in World Cup golf.

Orantes and Television Master Fibak in Final

By Neil Amdur

HOUSTON, Dec. 13 (NYT).—Trailing two sets to one and 1-4 in the fourth set, Manuel Orantes of Spain staged another memorable comeback and won the Grand Prix Masters tennis title yesterday.

But a costly technical blunder that occurred during the telecast of the match may have had as much to do with unnerving Wojtek Fibak of Poland as any of the lobs and passing shots that lifted Orantes, 27, to a 5-7, 6-2, 0-6, 7-6, 6-1 victory.

The unfortunate episode occurred during a court changeover, after Fibak had broken Orantes for the 4-1 lead in the fourth set and appeared headed for the $40,000 first prize and the most significant victory in his amazing rise to international prominence during the last two years.

As the players took their customary one-minute rest, Vic Braden, a teaching professional, began interviewing celebrities at courtside, asking them for opinions on the match and who they felt would win. One of the celebrities interviewed was Kirk Douglas, the actor.

The interviews were piped over the public-address system to the crowd of 13,500 and shown on two telescreens at each end of the summit. None of the interviews produced any startling information, but Fibak said it shattered his concentration, particularly since the match was being beamed "live" to Poland and 61 other countries.

"Instead of only thinking about the Masters, about the last tournament," Fibak said, "instead of putting all my thoughts on the match, I was thinking about the TV to Poland. I was caring how it looked and what was to be said, especially when they had those interviews."

Orantes said he also heard the interviews but said they didn't disturb him. "How can they disturb me then?" he said, suggesting the futility of his chances at that point.

Orantes broke Fibak at love. By the time the 24-year-old Pole reached, 5-4 serving for the match, "I was very, very afraid something might happen."

It did. In another display of his courage and tactical experience, Orantes attacked at every opportunity, forced three backhand errors and broke serve with his pet shot, the topspin forehand lob.

For all practical purposes, the match was over. Orantes won the tiebreaker for the fourth set, 7 points to 1, and needed only 29 minutes to sweep the final set, running off the last 10 points.

"I think he got a little too anxious in the fourth set," Orantes said. "He never played one important match like this."

It was a disheartening defeat for Fibak, who was ranked 95th on the final 1974 world rankings and 51st after 1975. His lapse yesterday was because of inexperience, yet no player has made more dramatic strides in such a short time.

Orantes said the interview with Kirk Douglas and wife helped him. She had said, "You can't count Orantes out—he is a great fighter."

"When I heard them say that I was a fighter, I decided to really fight for the match. I told myself 'Let's give everything inside me,' and that's what I did," Orantes said.

Orantes, troubled with a sore arm during the early part of the year, said that he was more pleased with winning the Grand Prix title than the U.S. Open in 1975.

"All my life I've been trying to prove something," he said. "When I started playing tennis, they said I would never be a good player. They always said Manuel Santana was better than I was. They said I would choke up in close matches."

The Past, Present Are Good For Gilbert of NHL Rangers

NEW YORK, Dec. 13 (UPI).—Memories . . . sometimes pleasant, sometimes painful.

Memories of the Japanese doctor who saved his career . . . of the established star who stayed after practice to help him along . . . and of Tubby, who sharpened the players' skates.

The flickering memories of a brilliant career.

And while some 15,000 fans stood on their feet and cheered him for several minutes last night, Rod Gilbert said he thought of the people and the places that added up to 1,000 games of memories.

"I had a lot of flashes in my head," Gilbert said after his three assists helped power the New York Rangers to a stunning 5-2 victory over the Montreal Canadiens. "During the ovation I thought of the old Garden, and of moving here. And I saw a lot of people.

"I saw Dr. (Kazuo) Yanigasawa—I was hoping he could have been here. Without him I would have played only four years. I saw Andy Bathgate, who helped me so much when I joined the Rangers. Tim Horton flashed in my mind. He was such a great influence when he was here.

"I was getting these flashes all day. I wasn't thinking goals and games. I was thinking of a lot of people who made my career, friends who encouraged me."

Gilbert became only the 14th player in the National Hockey League to play 1,000 games with the same team, and later he said, "I want to play another thousand and feel this good when I reach it."

Nevertheless, there was a time he said he thought his career would be over before it even started. Twice the dark-haired, Montreal native underwent spinal fusion surgery, and he credits Dr. Yanigasawa, who has since died, with restoring him to health.

Trades Are Down, Problems Up During Baseball Meetings

By Joseph Durso

LOS ANGELES, Dec. 13 (NYT).—After five days of continual meetings and occasional namecalling, the people who run baseball went home and added up the score: Fewer trades were made than at any time in the last five years and no teams were relocated yet to solve the sport's urgent problems in geography and politics.

"I've been sitting on committees all week and still don't know what's happening," said Clark Griffith of the Minnesota Twins. "The world thinks of us as one organization, but in reality we're two—the American and National Leagues—and one is trying to dump its problems on the other."

"They're not trying to dump their problems on us," said John McHale of the Montreal Expos. "They've already done that. We're all past the time when we can fall back on that complaint. Now the two leagues have common problems, but I feel we're going home with some movement to settle them."

When the executives of the 26 teams gathered here earlier in the week, their No. 1 "common problem" was the players' revolution.

Nobody could do much to solve that because the courts had ruled that unsigned players were free to auction themselves, and 19 have already done so for long-range packages worth $2 million or more in some cases.

One immediate result of the active market in free agents was a slow market in unfree agents: players under contract who still might be traded. Five years ago, a bull market in trades broke out when 68 players were exchanged in 19 deals, some of them blockbusters involving stars like Frank Robinson and Dick Allen. Last year at the "winter meeting" of baseball, 84 players changed sides in 28 trades. Then came the free-agent revolution, and players began arranging their own "trades." So the bull market between clubs slowed down, and this week only 40 players were swapped—in 14 transactions.

Moreover, few stars were involved in this traffic because more of them were being locked into long-term contracts by their teams. The biggest names traded were Jeff Burroughs, from the Texas Rangers to the Atlanta Braves; Ken Henderson, from the Braves to the Rangers; Richie Zisk, from the Pittsburgh Pirates to the Chicago White Sox, and George Scott and Bernie Carbo from the Milwaukee Brewers to the Boston Red Sox.

As the trading deadline neared last midnight, the Pirates traded Zisk, one of the National League's top-hitting outfielders, and Silvio Martinez, a rookie pitcher, to the White Sox. In return, Pittsburgh got two established pitchers who suffered last season—Rich Gossage, who won nine games and lost 17, and Terry Forster, who was 2 and 12. The trade thwarted a New York Yankee deal for Zisk, who hit .289 and batted in 89 runs.

The trade of Zisk meant that the Pirates will be without four of its 1976 starters. Manny Sanguillen is with Oakland, and free agents Dave Cash and Rick Hebner have signed with Montreal and Philadelphia, respectively.

In another trade Friday, the St. Louis Cardinals have reacquired third baseman Ken Reitz from the San Francisco Giants in exchange for right-handed pitcher Lynn McGlothen.

The Cardinals, who traded Reitz to the Giants at these same meetings a year ago for southpaw Pete Falcone, now will move rookie Hector Cruz from third base to the outfield. Reitz, 25, batted .267 for the Giants last season with five homers and 66 RBI, while McGlothen, 26, compiled a 13-15 record and a 3.91 ERA for the Cardinals.

McGlothen will join John Montefusco, Jim Barr and Ed Halicki in the Giants' starting pitching rotation. Jack Clark, a 21-year-old rookie, will get a chance to replace Reitz at third for San Francisco.

In another transaction, Cleveland obtained Andy Thornton, 27, a first baseman, from Montreal for Jackie Brown, 33 a pitcher.

"The chief reason for the quiet market," said Peter Bavasi, general manager of the new Toronto Blue Jays, "is the uncertainty over players' contracts. In the past, you were interested primarily in the ability of players in your trades. Now you have to consider the status of players—their legal status, their seniority status, their option status. There's still a great deal of confusion on the mechanics of the basic agreement between the players and clubs.

"Another reason for the caution now is that the teams will have a second chance to make interleague trades, between Feb. 15 and March 15. In the past, you were generally finished after the winter meeting. But now there's the extra month, and it will come at a time when you'll know more about the ability and availability of players during spring training."

With the talent traffic relatively slow, the baseball brass spent more time this week wrestling with their other "common problem"—franchises. This involves geography, because some areas like San Francisco-Oakland have two teams and few cash customers. And it involves politics, because Washington has no team and several angry members of Congress.

In an apparent effort to apply one problem against the other, the top dogs of baseball suggested several plans to bring the "national game" back to the national capital. Twice in the past, American League teams have left Washington, once for Minnesota and once for Texas; and for the last five years, there has been no baseball in the capital.

But, under growing pressure from the House Select Committee on Professional Sports, the major leagues offered these tentative solutions: The Baltimore Orioles, 40 miles away, would play some of their games in Washington; or, failing that, an American League team might move into Washington and also into the National League.

If the "designated team" happened to be the Oakland A's, two problems might be solved at once. The San Francisco Bay area would lose one of its financially pressed clubs, and the Chesapeake Bay area would gain back its missing club. Besides, if the A's also switched leagues, then the two leagues also would regain their balance—13 teams in each. Right now, the American League has 14 and the National has 12.

"But that plan also would raise four problems," one executive of an American League club pointed out. "You would have the problem of getting Finley accepted by the National League, unless he sold his club first. You would have the problem of getting his club to accept the deal. You'd have the problem of working out a schedule involving interleague play, which you would need with two leagues of 13 teams each. And you would have the old problem of getting the National League to accept the designated hitter."

So the owners headed home, and Charley Finley described the situation in baseball as "chaos." The commissioner, Bowie Kuhn, described it as "an opportunity." Their conflicting versions will surface again Wednesday in Federal Court in Chicago when Finley opens his $3.5-million lawsuit against Kuhn—and when most of the problems of baseball again will be argued under one roof.

choslovaks eated on Rally WHA Champs

NIPEG, Canada, Dec. 13 The Winnipeg Jets show- npionship form yesterday ey scored six goals in the riod to erase a 4-0 deficit eat Czechoslovakia, 6-5, in bition hockey game.

Rangers' Thompson, 28, Dies

ARLINGTON, Texas, Dec. 13 (UPI).—Danny Thompson, infielder for the Texas Rangers, died in Rochester, Minn., from leukemia. He had been battling the disease since 1973.

When Thompson, 28, arrived at Arlington Stadium last summer, Thompson told his new employers, the Rangers, he would be willing to sign a contract for $35,000.

Rangers' general manager Dan O'Brien asked him if he would accept $38,000.

"I was flabbergasted," said Thompson, who explained Minnesota owner Calvin Griffith's best offer to him last spring was a $500 pay cut to a salary of $27,500.

Thompson signed with Texas and in his first game at Arlington Stadium he collected four hits, including a home run. But after that debut, the season became a tedium of pain and bench warming. He finished with 70 hits for a .226 average. The homer in the opener was the only one he hit all season.

But he nevertheless figured in the Rangers' plans for 1977.

In 1974 Thompson won the Hutch Award, given annually to the game's most courageous player.

"I'm a lucky man," he said. "I'm playing in the big leagues. I never thought of quitting baseball. This is my life. I love it."

RESPONSIBLE WOMAN ..... loves children (6 months & 2 years) needed NOW. Own quarters in quiet country home outside Cleveland. English a must. 1-2 years minimum; fare after 1 year. Resumé & references to: Ingalls, Oak Hill Farm, Chagrin Falls, Ohio 44022, U.S.A.

YOUNG NUDIST EXECUTIVE couple, childless, seeks English girl, 18 years minimum, to cook evening meal, 2 hours of housekeeping a day. Care of small dog some evenings. Family atmosphere, room & board+small salary according to qualifications. References and photo demanded. Write to: FIT, No. 4, 12 Bld. Poissonnière, Paris-9e.

Art Buchwald

No Southern Jokes

WASHINGTON—"You should have a ball with the Carter administration," many people have told me.

"Why do you say that?" I always ask.

"Well, it's the first time in ages we've had a president from the Deep South and there has to be endless material in that."

Buchwald

There probably would be except that Carter's election, instead of giving some Southerners a feeling of self-confidence, has made them even more sensitive to any levity about the South.

Even my Southern friends in Washington see no humor in Carter and Plains, Ga.

I have a friend, a distinguished newscaster, who comes from Georgia and he doesn't want to read any allusions to the South for the next four years.

"Making fun of Carter's Southern background is just a cheap shot," he told me.

"But we used to make fun of Johnson and his Texas background," I protested.

* * *

"Texas isn't Georgia," he replied. "Texans are used to being made fun of—Georgians aren't."

"Why not?"

"Because it's taken us such a long time to get respectable again and we're not going to blow it just because the next president of the United States comes from there."

"But," I protested, "it's an American tradition to make fun of a man's background. Look what we did with John F. Kennedy's Hyannisport and Johnson's Pedernales Ranch and Nixon's Watergate."

"Nixon didn't come from Watergate," my friend said.

"We still aren't sure of that, are we?" I said.

"It was different with those men. What you're dealing with when you write about Carter is a man who comes from the red clay of a Southern state, who rose to the highest office in the land despite prejudice and suspicion. You don't heal the wounds of a civil war by writing about grits and peanuts and Good Ol' Boys."

"Then what do you write about?"

"A new South that has risen on the ashes of the old one—a South that takes pride in its tall buildings and its paved highways and its great football teams."

"There is nothing funny about that," I said.

"That is exactly my point. There is absolutely nothing funny about the South and if you say there is you're just making it up."

"There must be something humorous about the South. It can't be the only part of the country that isn't funny."

"We're not going to stand for it," he warned me. "The South is not a joke. Jimmy Carter proved that."

"I guess that means we can't laugh for the next four years, then?"

"I didn't say that. I just said it's going to be harder, because we Southerners don't think jokes about the South are funny."

"Don't Southerners tell jokes about themselves?" I asked.

"That's different. It's all right for us to tell Jimmy Carter jokes amongst ourselves. What we resent are Northerners telling Jimmy Carter jokes to us."

"Boy, you people are no fun at all."

"That is a typical example of your prejudice. Just because we don't like Northerners to tell Southern jokes you accuse us of no sense of humor."

"OK, no jokes about Carter and his Southern background. Did you hear the one about the traveling salesman whose car got stuck in the snow in Mondale's hometown in Minnesota?"

"No," he said, laughing for the first time. "What happened?"

Cimabue Work Restored

FLORENCE, Italy, Dec. 13 (UPI).—A crucifixion painted by the 13th-century master Cimabue will be restored to its central place in the Basilica of Santa Croce Wednesday after 10 years of restoration work to repair flood damage, officials said today. The crucified Christ, painted on a cross-shaped piece of wood, was heavily damaged along with other art works when waters from the flooding Arno River raged through the church.

'The imagination must find its own path. But one can fervently wish that they—that we—would come back from the periphery. We do not, we writers, represent mankind adequately.'

Bellow's Search for 'True Impressions'

By Bernard Weinraub

© David Levine, Opera Mundi.

STOCKHOLM (NYT).—Saul Bellow walked to a lectern at the Swedish Academy late Sunday afternoon, smiling modestly at the wave of applause in the chandeliered chamber from Swedish officials, writers, diplomats, students and fellow Nobel Prize-winners.

He loosened his tie and, speaking softly and a bit nervously, delivered a 70-minute Nobel lecture on literature—a lecture that embraced his views on the novel and art, that chided some critics, expressed disappointment in modern writers and urged artists to find and unravel what is somehow "fundamental, enduring, essential" in the turbulence of the 20th century.

"One can't tell writers what to do," said the 61-year-old Nobel Prize-winner. "The imagination must find its own path. But one can fervently wish that they—that we—would come back from the periphery. We do not, we writers, represent mankind adequately."

"Writers are greatly respected," Bellow said. "The intelligent public is wonderfully patient with them, continues to read them and endures disappointment after disappointment, waiting to hear from art what it does not hear from theology, philosophy, social theory and what it cannot hear from pure science.

"Out of the struggle at the center has come an immense, painful longing for a broader, more flexible, fuller, more coherent, more comprehensive account of what we human beings are, who we are, and what this life is for." He continued:

"At the center humankind struggles with collective powers for its freedom, the individual struggles with dehumanization for the possession of his soul. If writers do not come again into the center it will not be because the center is preempted. It is not. They are free to enter. If they so wish."

Bellow, a trim white-haired figure, was one of seven Americans who made a clean sweep of this year's Nobel Prizes, each amounting to about $150,000. Traditionally, each winner gives a lecture in his field during a week of parties and ceremonies in Stockholm.

Sunday, the Montreal-born novelist—the author of such books as "Dangling Man," "The Victim," "Seize the Day," "The Adventures of Augie March," "Herzog" and "Humboldt's Gift"—spoke in the packed chamber in Stockholm's old town. Bellow's wife, Alexandra, as well as three sons, his brother and wife, his sister, his mother-in-law, two nephews and three nieces, attended the lecture.

Bellow opened and closed the lecture citing one of his favorite authors, Joseph Conrad. He also praised D. H. Lawrence, Hemingway, Proust, Tolstoy, Joyce and Dostoevski, writers "who would not give up the connection of literature with the main human enterprise."

Current writers, he indicated, have somehow severed the connection, failed to examine "attitudes or orthodoxies," have not yet coped with the wreckage and terrors of mankind.

"What is at the center now?" Bellow asked. "At the moment, neither art nor science, but mankind determining, in confusion and obscurity, whether it will endure or go under. The whole species —everybody— has gotten into the act.

"At such a time it is essential to lighten ourselves, to dump encumbrances, including the encumbrances of education and all organized platitudes, to make judgments of our own, to perform acts of our own."

"Our very vices, our mutilations, show how rich we are in thought and culture," Bellow said. "How much we know. How we even feel. The struggle that convulses us makes us want to simplify, to reconsider, to eliminate the tragic weakness which prevented writers—and readers—from being at once simple and true.

"The essence of our real condition," he said, "the complexity, the confusion, the pain of it is shown in glimpses, in what Proust and Tolstoy thought of as 'true impressions.'

"The value of literature lies in these intermittent 'true impressions,'" Bellow said. "A novel moves back and forth between the world of objects, of actions, of appearances, and that other world from which these 'true impressions' come and which moves us to believe that the good we hang on to so tenaciously—in the face of evil, so obstinately—is no illusion."

Bellow concluded: "No one who has spent years in the writing of novels can be unaware of this. The novel can't be compared to the epic, or to the monuments of poetic drama. We can no longer raise such edifices. But it is the best we can do just now.

"It is a sort of latter-day lean-to, a hovel in which the spirit takes shelter," he said. "A novel is balanced between a few true impressions and the multitude of false ones that make up most of what we call life. It tells us that for every human being there is a diversity of existences, that the single existence is itself an illusion in part, that these many existences signify something, tend to something, fulfill something; it promises us meaning, harmony and even justice.

"What Conrad said was true, art attempts to find in the universe, in matter as well as in the facts of life, what is fundamental, enduring, essential."

Bellow, smiling said that as an undergraduate 40 years ago, he habitually read Conrad in his economics courses. "I have never had reason to regret this," the writer said. "Perhaps Conrad appealed to me because he was like an American—he was an uprooted Pole sailing exotic seas, speaking French and writing English with extraordinary power and beauty.

"Nothing could be more natural to me, the child of immigrants who grew up in Chicago's immigrant neighborhoods—a Slav who was a British sea captain and knew his way around Marseilles and wrote an Oriental sort of English. But Conrad's real life had little oddity about it."

PEOPLE: *Activist Mrs. Carter Will Need Bigger Staff*

Barbra Streisand

... her c

Rosalynn Carter plans to be "a very active first lady" and she will need a larger staff than her predecessor, Betty Ford, according to Mrs. Carter's press secretary. "It will be difficult for Mrs. Carter to do what she wants to do without a bigger staff than [Mrs. Ford] has now," Mary Finch Hoyt said. Mrs. Carter has not yet decided just how big the staff will be, but has received about 300 résumés from persons seeking to work for her. President-elect Jimmy Carter has often talked about cutting back on big government. The White House said Mrs. Ford now has a staff of about 25.

Jacob Malik, the Soviet Union's representative at the United Nations for the past six years, ended his UN career and headed home Sunday. Malik got the Order of Lenin a week ago to mark his 70th birthday.

* * *

President Ford presented a special silver medal last week to retired Air Force Brig. Gen. Charles Yeager, the first person to fly faster than sound. The award, recently approved by Congress and equivalent to a "noncombat Medal of Honor," was presented at a private White House ceremony. It cites Yeager, now 53, as having "contributed immeasurably to aerospace science by risking his life" to crack the sound barrier—he did it 29 years ago in an XS-1 research plane launched from a B-29 at an altitude of 20,000 feet. In 1952, Yeager became the first pilot to travel at twice the speed of sound. He retired from the Air Force on March 1, 1975.

* * *

Italian Premier Giulio Andreotti is stepping down as editor of the political publication Concretezza. The twice-monthly magazine will suspend publication. Andreotti, who edited it for 23 years, made the decision because "the increased pressure of government activity" did not leave him enough time for journalism.

READY FOR THE VOTING—A giant electronic board was set up outside Madrid's general post office yesterday to announce the results of the Spanish referendum.

Approval Of Reform Is Urged By Suarez

MADRID, Dec. 14 (UPI).—Premier Adolfo Suarez tonight urged Spaniards to approve his program of political reforms in tomorrow's referendum. He said that criminal acts such as the kidnapping of a high government official three days ago will not deflect the nation's march toward democracy.

"We want the Spanish people to control and direct, through their freely and democratically elected representatives, the destiny of our fatherland," Mr. Suarez declared in an address on national television and radio.

"The government of his majesty the King asks for a "yes" vote in the referendum so that political matters in this country can reflect its realities," Mr. Suarez said.

"We ask for a "yes" because this country has a right to institutions based in the popular will."

Universal Suffrage

Mr. Suarez spoke 11 hours before polling stations throughout the nation oper for the balloting. More than 22 million eligible voters will decide whether to approve proposed changes in the constitution creating a Western-style parliamentary system based on universal suffrage and the existence of political parties that were banned under the late Generalissimo Francisco Franco.

Referring to the kidnappers' demands that the government free 15 jailed leftist militants in exchange for the life of kidnapped Minister of State Antonio Maria de Oriol y Urquijo, Mr. Suarez said:

"Faced with this criminal act—like any other of blackmail or coercion—this government stakes its authority on preventing that violence succeeds in imposing itself on a state of law . . . or that these acts—so often unavoidable in our times—are manipulated in the interest of certain groups."

The group that holds Mr. de Oriol captive warned the government last night that if it keeps "stalling" on dealing with its demands, "we will have to do something which we do not want to do"—probably to kill Mr. de Oriol.

The faction, which calls itself the "Anti-Fascist Resistance Group 1st of October," gave the warning in a note that was left last night in the restroom of a Madrid café.

The group said that Mr. de Oriol was "well" and "neither physical nor moral suffering has been inflicted on him." It again named the 15 prisoners it wants released and flown to Algiers. These include Maoist and Basque guerrillas serving long jail terms or awaiting trial.

During the referendum campaign, the backing for a "no" vote came from the ultraconservatives on the grounds that, in Spain, democracy equals chaos. Their slogan is "Franco would have voted no."

They seized on the kidnapping as alleged proof that the increase of political freedoms is turning Spain into a land of rising lawlessness.

The government was winding up a big "get-out-the-yes-vote" campaign with air propaganda drops over the capital.

The leftists have been urging Spaniards to abstain in the referendum.

Small groups of pro-abstentionist youths demonstrated in Madrid today for the fourth straight day. Clashes last night between demonstrators and police were some of the fiercest in recent months.

Saudis to Oppose Increase

OPEC to Open Price Talks Today

By Peter Kilborn

LONDON, Dec. 14 (NYT).—Three years ago, just before Christmas, representatives of six Mideast countries that surround the Gulf met in Tehran and doubled the price of a barrel of light Arabian crude oil. On top of smaller increases of a few months earlier, that decision, in the view of many experts, probably changed the world as much as any event since World War II.

Tomorrow representatives of those six countries, along with officials of the seven others that make up the price-fixing cartel known as the Organization of Petroleum Exporting Countries, will meet in Doha, capital of the tiny Gulf sheikhdom of Qatar, with the declared intention of raising the price again. This will be a different kind of meeting.

• Report by Swiss bank says OPEC's purchasing power has increased, rather than fallen. Page 9.

"The circumstances this time are much less dramatic," a Western diplomat here said. "There was the Arab-Israeli war then. They dealt with dramatic circumstances with dramatic action. Everything is much quieter now."

For that reason and for many others, experts here doubt that the OPEC will raise the price this week by more than 8 to 11 per cent, which some Western officials have privately said they could tolerate.

[On arrival in Qatar tonight, Saudi Arabia's Oil Minister, Sheikh Ahmed Zaki Yamani, said his country will oppose any increase in oil prices at the start of the new year, Reuters reported.

[Saudi Arabia would like to see oil prices remain frozen for a further six months, he said.]

Some of the experts predict that the OPEC will vote for a small increase now and keep its options open for another price meeting next spring, when they hope to have a clearer reading of what the policies of the Carter administration will be.

"If Ford had been elected," said a leading British oil industry consultant, "Saudi Arabia

ARRIVING FOR TALKS—The Kuwaiti delegation to the OPEC talks was welcomed yesterday to Doha, Qatar.

Carter Chooses Treasury Chief, Sees a Tax Cut

ATLANTA, Dec. 14 (AP).—President-elect Jimmy Carter today named Michael Blumenthal, chairman of the Bendix Corp., to be secretary of the Treasury, and Rep. Brock Adams of Washington to be secretary of transportation.

Mr. Carter also said that he probably would announce before taking office the outlines of a job-creation, tax-reduction program to deal with economic problems he called very severe.

He said "my own preference is to concentrate on job opportunities" as the first step in coping with the worsening economic picture, and to do it through existing programs for the sake of swift effectiveness.

Giving a nationally broadcast news conference, Mr Carter said additional stimulation would come through a tax cut. "I don't know yet what figure might be appropriate for overall stimulation of the economy," he said. Nor, he said, does he know the prospective breakdown between job creation and tax reduction programs.

He also said that he would not be announcing his secretary of defense this week. There have been reports that the post is likely to go to Harold Brown, president of the California Institute of Technology and a former Pentagon research director. Mr. Carter neither confirmed nor denied this speculation.

Michael Blumenthal

Brock Adams

Mr. Carter also said:

• He was confident Congress would give him authority early in his administration to draw up government reorganization plans, plans that would go into effect unless rejected by the House or Senate. "I've had overwhelming support for reorganizing government from Congress," he said.

• He would carefully assess any new federal programs for their budget impact over four years, and he repeated his campaign pledge to balance the federal budget by the end of his first term.

• He had not studied various weapons systems enough to say whether some, such as the B-1 bomber and certain missile systems, might be eliminated as a means of cutting the defense budget.

Mr. Carter introduced Mr. Blumenthal and Mr. Adams for short statements.

Mr. Blumenthal told reporters he had made no arrangements yet for disclosure of his finances, but "my financial disclosure will be an open book for everyone to see."

Mr. Adams said he had already begun discussions with Ford administration officials on such transportation issues as whether to continue to allow the British-French Concorde SST to land in the United States.

Beame Is Reassured

Sen. Carl Curtis, R-Neb., said he was informed of the Blumenthal choice in a telephone call from Atlanta. Sen. Curtis is ranking Republican on the Finance Committee, whose approval is needed for his Treasury nomination.

Sen. Curtis said he could not comment on the choice because he does not know Mr. Blumenthal, an economist with experience in international trade negotiations.

New York Mayor Abe Beame, one of the big-city mayors who asked Mr. Carter earlier in the day for a $12.3-billion federal spending plan to create new jobs, said the President-elect told him: "I've got my secretary of the Treasury today and one of the first things he will look at is New York's problems."

The city is trying to reduce its long-term debt through a program of budget cutbacks aided by three years of interim federal loans.

Mr. Adams, a Democrat, was chairman of the House Budget Committee during the last session of Congress. He traveled from New York, where he had a speaking engagement, to Atlanta before the President-elect met with reporters.

Post Declined

Mr. Carter, it was learned, had asked Jane Cahill Pfeiffer, a former IBM Corp. vice-president, to serve as his commerce secretary. She would be the first woman to occupy the post since it was created in 1913. But Mr. Carter said at the news conference that Mrs. Pfeifer "will not be a member of my cabinet, because she asked not to be considered."

John Dunlop, who resigned as labor secretary in the Ford administration, is a leading candidate to return to that post under Mr. Carter.

There were reports that Rep. Andrew Young, D-Ga., would be asked to be ambassador to the United Nations, although Rep. Young earlier said he wanted to stay in Congress. Rep. Young acknowledged today that he is actively considering accepting the UN post, the Atlanta Journal said.

"For me, leaving the Congress is like the end of my elected career," he said. "It's even almost a cut in salary. And with four kids that I'm expected to educate, that's something I have to consider."

...nts Step-by-Step Approach

...Meaningful' Talks on Mideast ...reseen by Peres in Late '77

By Bernard Gwertzman

...SHINGTON, Dec. 14 (NYT). ...top Israeli leader predicted ...day that there will be ...ningful negotiations" in the ...d half of next year between ...l and its Arab neighbors, for ...ments short of a comprehen... Middle East settlement.

...Taking in an interview, ...se Minister Shimon Peres ...it clear that he preferred ...r negotiations along the line ...e "step-by-step" diplomacy ...ed by Secretary of State Henry Kissinger rather than the wide-ranging Geneva conference approach that is advocated by Arab leaders and is officially endorsed by Israel.

Mr. Peres, who a year ago predicted correctly that there would be no diplomatic progress in 1976, was asked about 1977.

He said he believed that "meaningful negotiations may take place between us and the Arabs" and that only step-by-step diplomacy was a realistic method.

The defense chief, who commands a significant political following in Israel, may seek to become the ruling Labor party's candidate for prime minister in elections that are expected to be held next fall.

Political Path Open

Mr. Peres said at a meeting with Israeli journalists yesterday that he was keeping his political options open.

In recent weeks, Prime Minister Yitzhak Rabin has spoken of Israel's willingness to attend another Geneva meeting on the Middle East and to negotiate a comprehensive agreement.

But because the Arab states still insist on the return of all lands occupied by Israel since the 1967 war, as well as the establishment of a Palestinian state on territory occupied by Israel, it has been unclear how such a comprehensive accord could be achieved.

Israel insists on keeping at least some land for security reasons

First Full Party Meeting in 16 Years

Vietnam Red Congress Vows New Direction

By David A. Andelman

BANGKOK, Dec. 14 (NYT).—Vietnam opened its fourth party congress today—the first full-dress gathering of Vietnamese Communists after 16 years of war—its leaders pledging a "new direction" of development and reconstruction for the nation.

Le Duan, first secretary of the Vietnam Workers' (Communist) party, set the tone for the sessions in a six-hour recitation of economic and political plans for the country including extensive expansion of industry and agriculture, encouragement of trade and investment and a substantial strengthening of the apparatus of the Communist state both in the North and in the newly acquired areas of the South.

Nearly 30 delegations representing Communist parties from throughout the world—from the Communist bloc, Western Europe, Africa, even the United States—were also present for the opening sessions that saw, first, a brief welcoming speech from Vietnam's President Ton Duc Thang and then the presentation of the "political report" by Mr. Duan.

Statue of Ho

About 1,000 delegates chosen in the last two months in party caucuses in provinces throughout Vietnam also gathered in Hanoi's sprawling Ba Dinh Convention Center, draped with banners and lights, huge portraits of Marx and Lenin and dominated by a large statue of the late President Ho Chi Minh.

There were no surprises for the well-orchestrated and well-prepared opening session that has been the focus of official energies for the Vietnamese for months.

"There have been lots of problems in Vietnam since the end of the war," observed in Bangkok a Western diplomat with close ties to Hanoi. "They are quite willing to acknowledge them as they did today and have been doing in the weeks leading up to today. But they acknowledge the problems only to point up the means by which they feel they must be solved."

Last month, a 40-page draft political report with detailed information on the first five-year plan (1976-1980) was released by the Vietnam News Agency—basically the same document read today by Mr. Duan.

But last week, an even more revealing look, clearly for Western consumption, was provided by an old-line Hanoi intellectual and historian, Dr. Nguyen Khac Vien, in a detailed three-part examination of Vietnam "20 months after liberation."

Between the glowing production statistics and pledges of new efforts by bridge builders and rice farmers, Dr. Vien also noted

(Continued on Page 2, Col. 8)

For Military Concessions to Soviet Union

Tito Is Said to Have Rebuffed Brezhnev Bids

By Murray Seeger

BONN, Dec. 14.—Soviet Communist party chief Leonid Brezhnev made two specific military demands that were rejected by Yugoslav President Tito at their recent Belgrade meeting, Western diplomatic sources confirmed today.

In one of their private meetings, without advisers present, Mr. Brezhnev asked that the subjects of expanded use by Soviet forces of Yugoslav naval ports on the Adriatic Sea and of Yugoslav airspace be opened for discussion.

President Tito, according to the sources, rejected the requests so that the two sensitive topics were not brought up before other members of the delegations. His response was so firm, the sources said, that the meeting took on a chilly atmosphere and the conversations were shorter than originally expected.

This action apparently enabled Yugoslav spokesmen to tell correspondents later that the subject of expanded naval rights had not been included in the talks.

It was also learned that soon after Mr. Brezhnev's visit, President Tito awarded major decorations to two leading officials of the Yugoslav party, Aleksandar Grlickov and Vladislav Obratovic, who successfully negotiated the statement on party principles issued by the European Communist parties at their June conference in East Berlin.

Berlin Statement Upheld

Considered to be a major victory for President Tito and the independent faction of Western European Communists, who have rejected Moscow's claim to lead the revolutionary movement, the statement affirmed the right of individual parties to follow their own theoretical paths to power.

One section of the statement ending the Tito-Brezhnev talks in Belgrade last month endorsed the Berlin document. This conclusion was taken by Western experts as a sign that President Tito had refused to back down on his insistence on the independent position of national Communist parties.

The Western diplomats recalled that Moscow has long sought expanded port facilities to replace the harbors it used in Egypt until last April to service the Soviet Mediterranean fleet.

Under a law approved two years ago, the Yugoslavs permit any foreign power to send three combat and two auxiliary vessels into Yugoslav waters at any one time. Parts of the Yugoslav Adriatic coast are closed entirely to both foreigners and natives as security zones.

Western experts have charged that the Russians sometimes disguise military vessels in order that more of them may use the Yugoslav ports.

Belgrade granted the Soviet Union overflight rights in 1973 when Moscow sent emergency military supplies to Egypt. In November, 1973, President Tito went to Kiev to remonstrate with Mr. Brezhnev for abusing the

(Continued on Page 2, Col. 3)

Old Gold, New Coins—and a Probe

Did Someone Make a Mint Out of Austria?

By Paul Hofmann

VIENNA, Dec. 14 (NYT).—When Austria issued its first gold coins in 40 years a few weeks ago, people lined up outside banks to pick up at least one of the new 1,000-schilling pieces, worth about $58.

Now the state mint is embroiled in a scandal involving the metal that went into some of the new coins. It is gold, all right, but it came in ingots that are said to have been smuggled into the country from Switzerland and the Soviet Union.

A dealer in precious objects has been arrested, the chief of the state mint has requested that he be subjected to a disciplinary inquiry and Finance Minister Hannes Androsch is under attack by the parliamentary opposition and some newspapers. Critics of the minister charge that he tried to sweep the gold affair under a bureaucratic rug.

Police and criminal-court investigators are proceeding on the suspicion that the mint bought 1.2 tons of illegally imported ingots and processed the contraband gold into coins—replicas of historic Hapsburg ducats and perhaps some of the new 1,000-schilling pieces as well.

The transaction is said to have been profitable both for the smugglers and the mint. Coined gold is known to bring a substantially higher price than the market value of gold.

The new 1,000-schilling coin, while it is legal tender for the equivalent of $58, has enough gold for only $45 at the present world market price. However, collectors and other buyers have even paid premiums of as much as $12 to lay their hands on one of the new coins.

Opposition members of parliament have charged that some of the new gold coins turned up abroad even before they were officially issued here at the end of October. Under the law, it is forbidden to take the new gold coins out of Austria, though tourists with a couple of souvenir pieces in their pockets are not expected to have any trouble.

The law also bars importation of gold ingots without a special government license. The police say that a smugglers' ring brought ingots into Austria illicitly and sold them to the state mint, receiving freshly coined ducats in payment.

It appears that the ingots were falsely described as "gold scraps" in entries in the mint's records. Fiscal regulations were also violated, causing the state to be defrauded of $1.4 million in taxes.

An unlikely folk hero has emerged from the scandal. Last summer, Werner Altmann, an assistant accountant at the mint, became puzzled by the process by which gold ingots became scrap first and then ducats. He called his superiors' attention to the strange metamorphosis.

Soon afterward, he was dismissed. This week, the finance minister stated after a meeting of the Council of Ministers that Mr. Altmann had been reinstated.

Factional Fighting Continues

Bomb Destroys Leader's Car In Lebanese Rightist Violence

BEIRUT, Dec. 14 (UPI).—A bomb today destroyed the car of a high-ranking Phalangist official as rival rightist groups quarreled despite efforts by their leaders to patch up their differences.

The bomb destroyed the car of Karim Pakradouni, a high official of the Phalangist political bureau, shortly after he left the vehicle early in the morning, party officials said.

It was the latest incident in the wave of violence that has swept the Christian rightist eastern sector of Beirut since a shootout between a Phalangist militiaman and bodyguards of former President Camille Chamoun. The militiaman and the Chamoun bodyguard were killed in the clash Sunday.

This immediately provoked a spurt of bombings and kidnappings and troops of the Syrian-dominated Arab peace-keeping force have increased their patrols in the area.

Phalangist leader Pierre Gemayel quickly declared that "only God can shake the unity" of his party and the Chamounists. Despite the proliferating violence and increased tension in the area, leaders of both groups called the wave of shootings, bombings and kidnappings "isolated incidents."

Urgent Meeting

Rightist leaders held an urgent session today in an effort to contain the spreading violence.

The leftist, pro-Iraqi Daily Beirut caricatured the proclamations of unity by rightist leaders by running an eight-column cartoon showing Mr. Chamoun and Mr. Gemayel clinking champagne glasses in a sandbagged bunker as their militiamen fired rockets, mortars and machine guns at each other.

The leftist National Movement, led by Kamal Jumblat, said in a statement that "provocations [in the eastern sector] are a violation of the peace plan."

The leftists condemned armed demonstrations by rightist militiamen, shooting incidents, and the "refusal of rightist forces to put down their arms until certain conditions are met, including the withdrawal of the deterrent forces."

The Arab League commission representing Egypt, Syria, Saudi Arabia and Kuwait met today to discuss the collecting of heavy weapons from the various factions.

All factions have been called on to store their weapons in designated areas, outside Beirut, under the joint supervision of the party concerned and the Arab peace-keeping force. The rightists say they will not hand in their weapons until the Palestinians do the same, while the leftists say they will not turn over theirs until the rightists do.

Khaddam Better

DAMASCUS, Dec. 14 (UPI).—Syrian Deputy Premier and Foreign Minister Abdel Halim Khaddam and his wife left a hospital last night after 13 days of treatment of wounds they received when unidentified gunmen shot at their car in a Damascus suburb, Damascus radio said Tuesday.

Associated Press.

RECONSTRUCTING THE CRIME—Police in Rome mark off the scene of the shootout.

Policeman, Terrorist Slain in Attack on Rome Official

ROME, Dec. 14 (AP).—A policeman and a bandit were killed in an attack on a high official of the anti-terrorism police squad early today. The official, Alfonso Noce, was injured, the police reported.

The attack took place as Mr. Noce was leaving his apartment in the Gianicolense quarter and was entering a waiting car with three police escorts.

The police said four men waiting inside a small truck began to shoot at Mr. Noce and his men. In the ensuing gun battle a policeman and a bandit were killed. The three remaining attackers fled.

Mr. Noce was taken to a nearby hospital with three bullet wounds. Doctors said his condition was not serious.

Later the police identified the slain attacker as Martino Zicchitella, a member of the ultra-leftist organization Armed Proletarian Nuclei (NAP). Zicchitella escaped from jail several months ago. He was imprisoned on charges of having carried out a number of terrorist actions.

Tito Is Said to Have Rebuffed Brezhnev Bids

(Continued from Page 1)

privilege because the Yugoslavs discovered that Moscow was sending material and manpower not authorized by the agreement.

In last month's meeting, Mr. Brezhnev requested unrestricted rights for Soviet aircraft to traverse Yugoslav territory, according to the sources.

These new pressures apparently were an inspiration for the spate of recent statements emphasizing Yugoslavia's determination to maintain its independence after President Tito, 84, leaves the scene.

A week after Mr. Brezhnev left Belgrade, President Tito reaffirmed his policy set in 1948 when he was expelled from the international Communist movement by Stalin. This policy was reiterated at the conclusion of the recent visits to Belgrade by French President Valéry Giscard d'Estaing, U.S. Commerce Secretary Elliot Richardson and Dutch Foreign Minister Max van der Stoel, who represented the European Economic Community.

After Mr. Richardson's visit, U.S. officials also said that issues that had clouded negotiations for possible arms sales to Belgrade had been cleared up.

Yugoslav sources confirmed that Mr. Brezhnev asked President Tito to negotiate a "friendship treaty" with Moscow, but that the Yugoslav President demurred. Under the original postwar Soviet-Yugoslav friendship treaty, President Tito reportedly told Mr. Brezhnev, Moscow sent too many spies to Belgrade.

Kosygin at Opening Of Plant in Poland

WARSAW, Dec. 14 (UPI).—Soviet Premier Alexei Kosygin today attended the opening of a steel plant that was praised by Communist party leader Edward Gierek as an important factor in strengthening Poland's independence.

The plant, in the industrial area of Katowice, was built with Soviet assistance. "The construction of the Katowice steel works is one of the most important factors in strengthening the power and independence of Poland," Mr. Gierek said in a speech.

Rabin Wins Knesset Test

(Continued from Page 1)

opposition on the left and the atheist factions on the right" jumped on board in order to create a political free-for-all.

"There was no desecration on the part of the Prime Minister," Mr. Burg said.

Mr. Rabin told the Knesset that the welcoming ceremony for the fighter planes ended 17 minutes before the onset of the Sabbath and that, in any case, it was too late to alter the scheduled arrival of the aircraft.

The event also resulted in a dispute between the Foreign Press Association here and the army spokesman's office. The FPA issued a statement today severing "any organizational contact with the army spokesman's office."

It complained that "until the last possible moment the army denied press access to the planes' arrival and finally permitted an unsatisfactory token representation.

"There was no secrecy attached to the arrival of those planes and no reason to exclude press coverage of an event of great public importance witnessed by several hundred Israelis and foreigners," the association said.

First Train Reaches Hanoi From Saigon

TOKYO, Dec. 14 (AP).—The first train on the 1,055-mile trans-Vietnam railroad starting from Saigon arrived at the Hanoi railroad station yesterday amid applause by thousands, the Vietnam News Agency said.

In a broadcast monitored here, the agency said a freight train was carrying apatite to Saigon from Hanoi at the same time.

New Rice in China

HONG KONG, Dec. 14 (Reuters).—Chinese scientists have developed a hybrid rice with a yield of 20 to 30 per cent more than local varieties, the New China News Agency reported today.

Two-Part Increase Is Seen Possible

OPEC Will Open Price-Rise Talks Today

(Continued from Page 1)

would have gone directly for its own ceiling of 10 per cent. But, with Ford gone, they're faced with a new diplomatic challenge. If you're dealing with an unknown quantity, you first want to fence."

Animosity toward Israel still seethes among the Arabs in the OPEC. But, after a virtual standoff in the last war, other issues have been chipping away the ideological glue that held the Arab oil exporters together three years ago.

The structure of these countries has given way to pushes and pulls over how some of them spend their surplus wealth and how others develop their largely backward economies. Social and political attitudes within each country are changing. So are the relationships among these nations and with the rest of the world.

The United States, for example, was affected so severely by supply cutbacks and ultimately an Arab oil embargo that service stations ran out of gasoline. The automobile companies started building smaller cars and power plants switched from oil to coal. But the United States today is a trusted peace broker to some Arab leaders and a vital supplier of arms, factories, refineries, schools, hotels and investment advisers.

'Process of Developing'

"The OPEC countries are in the process of developing their economies, and for that they buy from the West and Japan," said Pierre Shammas, a Lebanese consultant to Arab governments and editor of a newsletter on their attitudes that he sells to Western bankers and oilmen.

"The more you buy and the more you depend on Western technology," he said, "the more you become involved in the fate of your supplier."

Iraq, he said, may still be linked ideologically to the Soviet Union, and the Soviet Union may still provide its arms. But, in the three years since the big price increase, the Soviet Union has shrunk from its status as Iraq's No. 1 supplier to No. 8 behind several Western countries.

"We have found that the only countries that can deliver," Mr. Shammas said, "are Japan, the United States, West Germany and countries like that. We have come to understand why the Soviet Union has been asking for détente and for help from the West."

It is that business with the West, in fact, that underlies the wealthier Arab countries' endorsement of an oil-price increase at all. The prices of the goods they have been buying, some argue, have been rising far faster than the price of oil—which is now $11.51 a barrel—so they are only trying to keep pace.

Meanwhile, the oil exporters' desire for large price increases has been compromised by their position on the side of non-oil-producing developing countries in the so-called North-South talks in Paris with the leading industrialized nations.

Poor Hard Hit

An oil-price increase affects poor countries often even more severely than rich countries because they, unlike the Western nations, have little to sell the Arabs to get back the money they pay for their oil.

An oil industry executive said the Arabs think now and then of establishing a dual price system—high prices for the rich countries and low prices for the poor. "But they don't know how they would enforce it," he said. "How could they tell whether the oil they sell to India stays in India?"

The 1973 price increase was probably more responsible than anything else for the massive debts that developing countries have amassed with industrialized countries, a growth from only $1.5 billion in 1972 to $14 billion last month.

The oil-price increase caused other important disruptions that have not yet permeated the world economy, said Ulf Lantzke, executive director of the International Energy Agency in Paris, a group that leading developed countries created two years ago to devise common energy policies.

"Why is it that our economic recovery has been so unstable?" Mr. Lantzke asked. "Why all the balance-of-payments problems? Why the world indebtedness? Why the high unemployment? The oil-price increase wasn't alone responsible, but it was one of the reasons."

Members of the OPEC differ greatly in their attitudes and interests, far more than they did three years ago. At one extreme are the populous, semiliterate countries of Iran and Iraq and at the other are the super-rich countries such as Saudi Arabia and Kuwait.

Members' Positions

Here is how oil and Middle East experts view the positions of some of the important oil-producing countries as they approach their conference in Doha:

Saudi Arabia—This is the leader of the surplus-revenue states, which include Kuwait, the United Arab Emirates, Libya and Qatar. Saudi Arabia, with the greatest oil-production capacity, is the most influential OPEC member . . . It would just as soon put the whole meeting off . . . A price increase means more cash for the Saudis, which means giving some away to poor countries afflicted by the increase and could also mean jeopardizing investments in developed countries . . . If Saudi Arabia can't prevent a price increase (and it probably can't), it might accept 8 per cent now and a little more at a meeting in the spring . . . It wants no more than 10 per cent for all of 1977.

Iran—This is the leader of the medium-revenue states, which include Iraq and Venezuela . . . Normally Iran is a hawk on prices, but it is wary of antagonizing Western arms suppliers and of provoking retaliatory price increases on goods imported from the West . . . Although Iran needs funds for internal development, it is more interested in bartering its oil and gas for goods.

Algeria—This is the leader of the revenue-short states, which include Indonesia, Gabon and Ecuador . . . Algeria is hungry for cash for development of its manufacturing industry and large gas reserves . . . It could join with Iran in a compromise with the Saudis on a modest price increase now but would then want a substantial increase in the spring, more than the Saudis would willingly accept.

Practical View

Iraq—This country probably has the largest reserve potential after Saudi Arabia . . . Socialist, and ideologically tied to the Russians, Iraq nevertheless finds itself edging closer to the West, at least on business matters . . . Although Iran favors large price increases —15 or 20 per cent—it takes a pragmatic view of prices, discounting when necessary to assure continued oil sales.

Venezuela—Here are limited, shrinking reserves . . . Venezuela, like Iran, needs things more than money to develop its economy . . . For instance, it wants technological aid to develop the Orinoco tar sands, which could turn out to hold vast reserves of oil and gas.

Libya—In the past, this country was the most vociferous anti-Western, most radical member of the OPEC, but it is quiet today—Libya wants a substantial oil-price rise, in part to generate funds to develop large reserves . . . Like Iraq, however, Libya takes a pragmatic view of prices and will undercut other OPEC nations when necessary . . . Libya has just bought a 9-per-cent stake in Fiat, the Italian auto manufacturer, perhaps signaling a change in attitude toward the industrialized countries.

Peres Predicts Arab Talks

(Continued from Page 1)

and rules out a separate Palestinian state.

In the interview, Mr. Peres said he could see returning to Geneva to inaugurate new step-by-step negotiations or to "crown them," but he said it was unrealistic to look for the comprehensive accord sought by the Arab states.

"I'm skeptical about Geneva," Mr. Peres said. "Geneva may divide us immediately." He added: "My approach is more pragmatic and holds open more possibilities of success."

Because of strong public appeals by the Arabs—the Egyptians, in particular—the United States has been talking of reopening the Geneva conference. But privately Secretary Kissinger is known to be skeptical about the value of such a meeting.

Soviet Wedge

Mr. Kissinger not only worries about the potential for a breakup of the talks but also does not look forward to giving the Soviet Union, the Geneva co-chairman with the United States, an opportunity to regain some lost influence in the Middle East.

Mr. Kissinger will probably advise President-elect Jimmy Carter's administration to seek some way to combine the Geneva approach and step-by-step diplomacy.

Mr. Peres said he would like to have Israel and Syria negotiate first a follow-up on the June, 1974, agreement that returned to Syria the land lost to Israel in the 1973 war and a sliver of land taken in 1967. In the past, Mr. Kissinger has been unable to get such talks going because of Israeli reluctance to return significant amounts of land on the Golan Heights.

After a Syrian accord—or simultaneous with it—Mr. Peres would negotiate an interim agreement with Egypt, moving the cease-fire line farther east in the Sinai. For agreements with Egypt and Syria, Israel should be entitled to obtain an end to the state-of-war declarations, he said.

Hanoi Party Pledges New Direction

(Continued from Page 1)

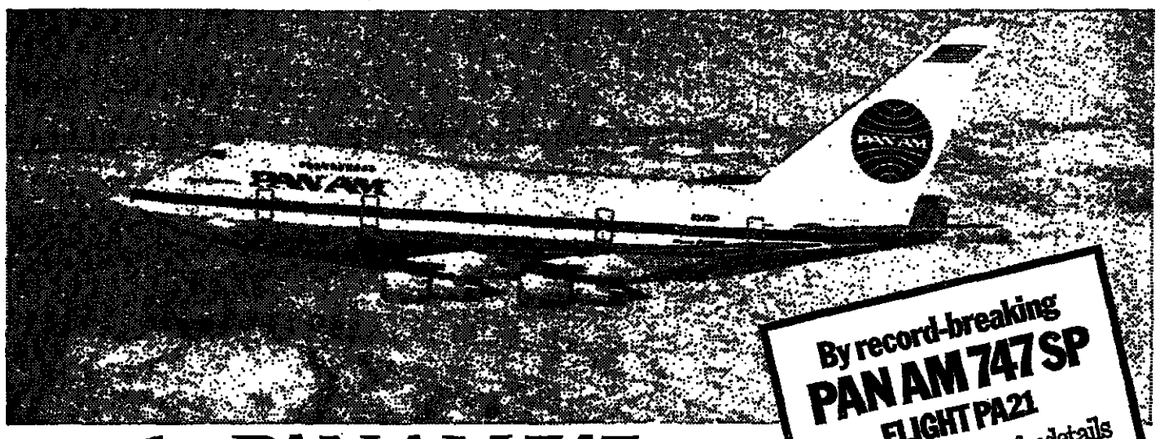
some of the pressing problems the new Vietnam that remains to be solved:

● "At least 150,000 tons of unexploded bombs and shells which are still daily causing loss of life; several million acres of rice fields, gardens and forests destroyed by bombs and chemicals; permanent threat of epidemics (malaria, plague, cholera, typhoid).

● The registration and control of about a million persons, including about 40,000 officers, in South Vietnam as well as the job placement of about 2 million persons "comprising the huge military, police, administrative, economic, ideological and cultural machine" left over from South Vietnam.

● The creation of the so-called new economic zones to be populated by emptying large populations from the cities—about 500,000 from Saigon, according to Dr. Vien's report, as well as about 60 per cent of the population of Da Nang and "tens of thousands" from Hue, Nha Trang, and Can Tho."

Progress of Irrigation



But all accounts, Dr. Vien's as well as the more formal declarations such as that of Mr. Duan before today's opening session of the party congress, also emphasize the progress in expanding irrigation capabilities in the lowlands to allow two and even three crops a year, and reunification of more than 7,000 small and medium-sized industrial enterprises and more than 11,000 handicrafts groups in Saigon alone.

Nevertheless, Mr. Duan made clear today that such small-scale production would simply not suffice for the Vietnam envisaged by the party's Central Committee as a central economic and, though unstated explicitly, political and military power in Southeast Asia.

"There are two tasks which are both fundamental and urgent," Mr. Duan told the thousands of delegates and observers today, "to insure the minimum needs of people's life while carrying out accumulation of the necessary tempo to build the material and technical basis of Socialism."

In his opening announcement to the congress, Vietnam's President Ton Duc Thang said that the sessions would make decisions on modifications to the party constitution, elect a new party central committee and a new politburo, though there were no significant changes expected in either body.

In Terse, 5-4 Decision

Supreme Court Lifts Stay Against Gilmore's Execution

By Lesley Oelsner

WASHINGTON, Dec. 14 (NYT). The Supreme Court, splitting 5-4 yesterday, vacated its 10-day stay against the execution of Gary Gilmore.

The court's action thus sends the Gilmore case back to the Utah state courts and leaves to them the question of whether, and when, Gilmore, 36, should be put to death.

Gilmore had insisted for weeks that he be executed as sentenced, as punishment for the murder of a motel clerk in Provo, Utah.

Last week, however, his lawyers intended in a Utah court that Gilmore should be relieved of that sentence altogether because of what the lawyers said was the state's failure to execute him within the time period specified for executions under Utah law.

The Supreme Court did not express an opinion on that contention, and, at least theoretically, could itself eventually be asked to rule on it—should Gilmore press his point, and one side or the other appeal rulings on it up to the Supreme Court.

The justices did say, though, in effect, that they would no longer be the cause for any delay in Gilmore's execution, at least on any of the grounds that have been presented to the court up to now.

A one-page, unsigned order for the court's majority said:

"After carefully examining the materials submitted by the state of Utah, the court is convinced that Gary Mark Gilmore made a knowing and intelligent waiver of any and all federal rights he might have asserted after the Utah trial court's sentence was imposed, and, specifically, that the state's determinations of his competence knowingly and intelligently to waive any and all such rights were firmly grounded.

"Accordingly, the stay of execution granted on December 3, 1976, is hereby terminated." The court had given only a temporary, albeit indefinite stay.

The justices voting in the majority were Chief Justice Warren Burger and Associate Justices Lewis Powell jr., John Paul Stevens, William Rehnquist and Potter Stewart.

Dissenting were Justices Byron White, William Brennan jr., Thurgood Marshall and Harry Blackmun.

The voting breakdown contrasts with the 7-2 decision of the Supreme Court July 2 upholding the death penalty as a constitutionally permissible punishment, at least for murder—the decision that gave rise to the move to execute Gilmore. In that ruling, only Justices Marshall and Brennan dissented.

Prisoner Said Happy

SALT LAKE CITY, Dec. 14 (AP).—Gilmore, said to be "very happy" over the ruling, broke his 26-day hunger strike after hearing the news.

Attorney Ronald Stanger also started a further action in court today to request his client's freedom under the state law requiring that executions be carried out no later than 60 days after sentencing.

Mr. Stanger said Gilmore, who has lost 38 of his 178 pounds since Nov. 19, did not express "a desire to die as such" when he saw him last night. But he said Gilmore instructed him to use "no delaying tactic whatsoever."

Court Rebuffs Killer Of King on Plea Shift

WASHINGTON, Dec. 14 (UPI).—The Supreme Court has rejected James Earl Ray's attempt to overturn his guilty plea in the 1968 assassination of civil rights leader the Rev. Dr. Martin Luther King jr.

The justices acted in a brief order without comment, letting stand lower-court rulings that Ray's guilty plea was voluntary and that he was not denied effective counsel because his attorneys had financial arrangements with the author of a book about the King killing. Ray got 99 years for the slaying.

Reagan Wins A Single Electoral Vote

OLYMPIA, Wash., Dec. 14 (AP).—Spokane lawyer Mike Padden says that he cast one of the state's electoral votes for Ronald Reagan as an exercise of personal conscience.

Mr. Padden, 30, the youngest of the GOP electors, used his vote as an anti-abortion protest. Despite the murmurs of some of his surprised fellow electors, his action was allowed to stand.

The lawyer said that electors have the legal right to use their own discretion in balloting. He added that he wanted to attract attention to the abortion issue and to vote for the politician whom he considered to have the best view on that issue.

Humphrey Says Carter Does Not Abandon Pledges

MINNEAPOLIS, Dec. 14 (AP). Sen. Hubert Humphrey, D-Minn., said that President-elect Jimmy Carter is not backtracking from his commitments to social programs but is taking pains to reassure businessmen that the Democrats are not going to "run amuck."

Sen. Humphrey said the reassurance is necessary because "the business community gets itself whipped into such a frenzy about what would happen if the Democrats were in power."

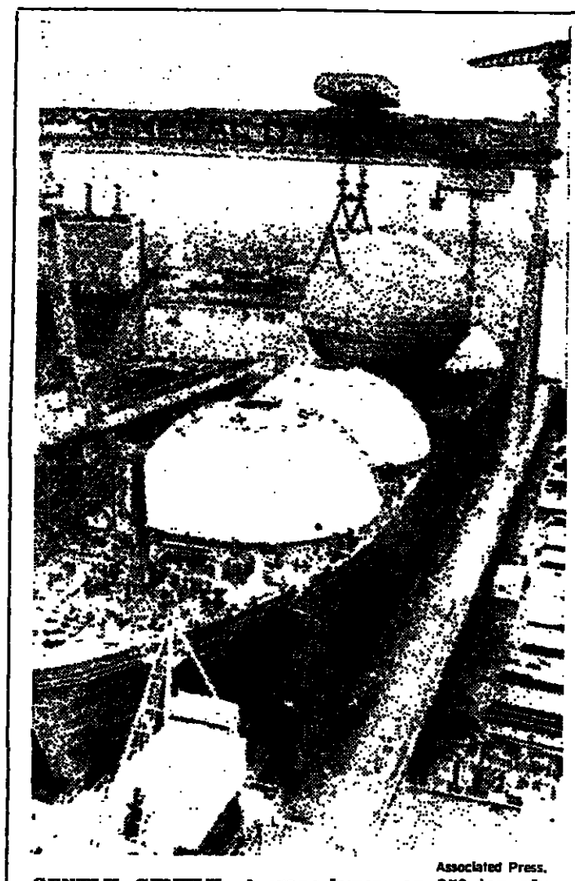
The senator said on ABC's "Issues and Answers" that the Democrats favor private enterprise and realize the economy needs a healthy private sector.

"We know that jobs must be in business. We can't have people living in government jobs," he said. "Government jobs are at best a supplement.

"All Mr. Carter is simply saying is, 'Look, you businessmen have done awfully well under Democratic administrations. Cool it.' That's all. We're not going to run amuck here."

Mr. Carter has taken pains to reassure business that he does not intend to impose wage and price controls.

Consumer activist Ralph Nader charged last week that Mr. Carter is bowing to big-business interests to keep them from raising prices and "rocking the economic boat."



Irish Foreign Minister Visits the Soviet Union

MOSCOW, Dec. 14 (Reuters).—Garret FitzGerald arrived today for the first official visit by an Irish foreign minister since Moscow and Dublin established diplomatic relations three years ago. Mr. FitzGerald is expected to start two days of talks here tomorrow with Soviet Foreign Minister Andrei Gromyko. After those sessions he will visit Tbilisi and Leningrad before leaving for Amsterdam next Monday.

Wind Lashes Lesbos

Jamaican Candidate Shot As Violent Campaign Ends

KINGSTON, Jamaica, Dec. 14 (AP).—The most violent political campaign in Jamaican history neared its end today, and the government banned election-eve political meetings following the shooting of a candidate and a mob attack on another.

In a final telecast before the election of a new Parliament tomorrow, Prime Minister Michael Manley paid tribute to the wounded candidate of his People's National party and many other "unsung heroes" he said had died as a result of political violence.

The police said Ferdie Neita, an automobile mechanic, was shot in the side as he was helping put up a speaker's stand in Spanish Town. He was reported in serious condition. The police said they picked up eight persons from the local office of the opposition Jamaica Labor Party for questioning.

The JLP, headed by Edward Seaga, reported that a mob surrounded a car in which Colin Williamson, one of its candidates, and two of his supporters were riding, riddled it with bullets and fire-bombed it. It said Mr. Williamson was not hurt but that one of his companions was hacked with a machete and critically injured.

State of Emergency

The security forces announced that a ban on motorcades and marches had been extended to political meetings. Mr. Manley said the ban was ordered to free the police and the army for deployment during the balloting.

The island has been under a state of emergency since June because of mounting criminal and political violence. Mr. Seaga claimed Sunday that nine of his men had been killed since the campaign began three weeks ago; at least four or five of Mr. Manley's supporters have been reported killed. Dozens of supporters of both parties have been injured.

Mr. Manley, who has been in power since 1972, urged the voters not to let fear of violence keep them at home. The election is rated as even, with the government party given a slight edge. A heavy turnout is expected to help it.

Both parties developed out of the trade-union movement, but the JLP is more conservative. Mr. Manley has campaigned for another five-year term to expand his program of "democratic socialism," which he claims is narrowing the gap between rich and poor.

Mr. Seaga has attacked the ties the Prime Minister has developed with Cuban Premier Fidel Castro, accusing him of leading Jamaica toward Communism.

New Tremor in Italy

RIVA DEL GARDA, Italy, Dec. 14 (AP).—Another tremor, the second in 24 hours, struck the northeast side of Lake Garda today, sending hundreds fleeing from their houses. No injuries were reported.

Magnet Field Of Sun Found Near Pluto

Pioneer-11 Records It 4 Billion Miles Away

By Thomas O'Toole

WASHINGTON, Dec. 14 (WP).—The Pioneer-11 spacecraft on its way to Saturn has detected the sun's magnetic field reaching all the way to the distant planet Pluto, 4 billion miles from the sun.

The unmanned spacecraft, which left earth more than three years ago, recorded the sun's magnetic forces last month as it moved through unexplored space almost 1 billion miles from earth and 100 million miles above the earth's orbital plane.

"The magnetic field that originates on the sun flows radially outward," said the Jet Propulsion Laboratory's Dr. Edward Smith, whose magnetometer is on Pioneer-11 "just like the quills on a porcupine."

Magnetic Spiral

This is a surprise because close to the sun its magnetic field spirals in and out. No spacecraft had ever observed anything different until Pioneer-11 flew so far above the orbital plane of earth and sun, which brought it out of the sun's equator.

Dr. Smith said the spiraling is probably due to the rapid spin of the sun at the equator, which twists the magnetic lines of force in at least two different directions as they are swept from the surface of the sun by the million-mile-an-hour solar wind.

Just as surprising is the discovery that the sun's magnetic field reaches all the way to the end of the solar system. Pioneer-11 did not measure the field out that far, but the fact that it was found near the orbit of Saturn, 900 million miles from the sun and 100 million miles above the sun's orbital path, suggests that it extends its influence all the way to Pluto.

The discovery also suggests the sun is divided into two hemispheres by a rippling electric current that swirls around its equator, carrying deep into space the magnetic forces built up by the sun's rapid rotation.

The earth is literally engulfed by the sun's magnetic field, which creates magnetic and electrical storms all across the earth's atmosphere.

Dr. Smith said the inescapable conclusion of finding the sun's magnetic force present so far away is that changes in the sun's magnetic field have a lot more to do with phenomena on the earth than anybody suspected.

Carter Says He'll Keep Wearing Blue Jeans in the White House

NEW YORK, Dec. 14 (AP).—President-elect Jimmy Carter says he will bring informality to the White House, jogging for exercise in the morning and wearing blue jeans when he is relaxing.

"That's my normal attire. I did it all the time, all the time I was governor, you know," he said in an interview with ABC television's Barbara Walters. "I would not embarrass the nation by having a formal conference with the French ambassador and my wearing blue jeans and his wearing a morning coat. I would do the proper things about dress."

The interview was taped at the Carters' Plains, Ga., home Nov. 27 for broadcast tonight.

Mr. Carter said he and his wife, Rosalynn, intended to continue sharing a bedroom in the White House. "I'd hate to change after 30 years."

"Do you sleep in a double bed or twin beds?" Miss Walters asked.

"Double bed . . . always have," Mr. Carter replied. "Sometimes we sleep in a single bed by ourself. It's much more comfortable in a double bed."

Asked to describe her husband, Mrs. Carter said, "He's handsome and exciting and never a dull moment."

Miss Walters asked her if she worried "at all now about assassination, about any harm coming to your husband or your children?"

"Well, I think you always worry about it . . a little bit," Mrs. Carter said. "It's not near to me because we've had security since '71 when Jimmy was governor, except for a short period early in the campaign. And it's something that always is kind of in the back of your mind. You can't worry about it every minute, though. I just have to kind of consider that the way I would something happening to Jimmy in an automobile accident."

"Do you pinch yourself sometimes now and say, 'My Lord, I'm going to be president?'" Mr. Carter was asked.

"No," he said. "I got over that quite a while ago . . ."

Pepsico Admits Payments Abroad

NEW YORK, Dec. 14 (Reuters).—The soft drinks firm Pepsico said that it paid $1.7 million to foreign officials over the last five years, though at least $700,000 of this could be properly accounted for.

The company revealed the payments in a report filed voluntarily with the Securities and Exchange Commission.

The report did not name any of the officials or countries involved in what it called possible "questionable payment practices" over the five-year period investigated and gave no details how the money had been spent. The firm has 186 subsidiaries and does business in 135 countries.

Int. Harvester Payments

CHICAGO, Dec. 14 (UPI).—International Harvester Co. says one of its foreign subsidiaries improperly paid commissions of $43,000 to an official of an unidentified foreign government.

The payments were made between 1972 and 1974 in connection with three transactions, the farm implement manufacturer said Friday. The firm also reported that some foreign subsidiaries paid about $5 million in kickbacks to foreign customers during the last five years.

Zarb Quits FEA

WASHINGTON, Dec. 14 (UPI).—President Ford yesterday announced the resignation of Frank Zarb as head of the Federal Energy Administration—exactly two years after appointing him to the post.

But Trudeau Rejects Levesque Projection

Quebec Independence Seen 'Irreversible'

By Henry Giniger

OTTAWA, Dec. 14 (NYT).—Premier René Levesque of Quebec declared here yesterday that the independence of his French-speaking province "appears to be irreversible," but Prime Minister Pierre Trudeau rejected such a development.

The first direct meeting between the two leaders since Mr. Levesque led his separatist party to power on Nov. 15 occurred at a conference of provincial premiers and federal officials at which a long-standing dispute over the control and distribution of tax revenue was discussed.

But the highly technical discussion was turned into a fundamental debate on the future of the Canadian federation by a statement from Mr. Levesque rejecting the present relationship. The Quebec premier reiterated his commitment to allow the province's people to decide on independence in a referendum. He said his election victory was part of an increasingly rapid process in which Quebec society and its relations with others were being redefined.

"Such a dynamic development obviously has caused and still does cause some apprehension, especially to those who do not understand it," Mr. Levesque said. "But it now appears to be irreversible."

Purse Power

Mr. Levesque cited the money disputes, in which Ottawa has sought to reserve as much power of decision as possible, as an example of a kind of confrontation that could be ended only by changing the present political institutions.

"In our opinion," he said, "the objectives we are seeking—political sovereignty and an economic association—far from being an obstacle to the charting of a better future, will on the contrary be a true beginning, much more so than could be the ever more illusory preservation of the past."

Mr. Trudeau's reply was short and courteous but nontheless a firm rejection of Quebec independence. He denied he was seeking to preserve the past or an "immutable status quo."

"Our task is to build a more enriching federalism to guarantee even more firmly the liberty, self-realization and well-being of the people and communities of Canada," he said.

"When I speak of Canada," Mr. Trudeau continued, "I do not have in mind an identity that competes with that which a French Canadian and Quebecer, conscious of his or her specific history and roots, holds dear."

He explained that he thought "rather of a political society, the ideals of which are liberty, equality and, yes, fraternity.

"I think of a society which, by securing the cooperation of our people, by pooling the resources of our different regions, by making possible the free development of the different cultures of our communities, makes our individual liberty, capacity for self-realization and well-being more secure and better guaranteed than they would be if each community were to attempt to achieve this alone."

Mr. Trudeau's position was weakened by the fact that the nine English-speaking provinces had adopted a common position with Quebec on revenue-sharing problems. The position, which calls for greater local control over tax income, was established last week at a meeting of federal and provincial finance ministers.

Mr. Levesque indicated yesterday that he had little interest in continuing that discussion, but had come to seek general support and understanding for a new relationship marked by Quebec independence.

Abortion Debate Renewed in Rome

ROME, Dec. 14 (Reuters).—The long controversy over proposals to legalize abortion in Italy reopened in Parliament yesterday when the Chamber of Deputies began to debate a new plan for abortion-law reform.

The bill would allow free abortions on demand within the first 90 days of pregnancy, leaving the decision entirely with the woman concerned. A Constitutional Court ruling two years ago allowed the termination of pregnancies for reasons of physical or mental health.

Nine months ago, a bitter parliamentary row over the issue brought down the government and forced early elections, in which pro-abortion parties won a four-seat majority.

Associated Press.

THAT TIME OF YEAR—Thoroughbreds at a farm near Munich enjoy a snowfall.

Miki's Party to Elect A Successor Dec. 23

TOKYO, Dec. 14 (AP).—The ruling Liberal-Democratic party decided today to hold a meeting of its Diet (parliament) members Dec. 23 to select a new party president.

The party then will convene an extraordinary five-day session of the Diet to elect a new Premier to succeed Takeo Miki, who is also president of the party.

PLO Modifies Its Demands for New State

By Henry Tanner

DAMASCUS, Dec. 14 (NYT).—The leadership of the Palestine Liberation Organization listed today for the first time the creation of an independent Palestinian state as one of the "legitimate rights" of the Palestinian people and hence, by implication, a goal to be attained by the organization.

But a declaration issued at the end of a three-day meeting here of the Palestine Central Council stopped short of proposing such a state or defining its borders.

Palestinian sources called the declaration a "watershed in Palestinian policies". They said that until today the term "Palestinian state" had never been used in an official declaration.

The sources said that what was meant was the creation of a Palestinian state on the West Bank of the Jordan and in the Gaza Strip. PLO chief Yassir Arafat and his aides have in recent weeks declared the Palestinian willingness to create a state on the West Bank and in Gaza, both areas that are occupied by Israel.

The Palestinian sources noted that the council's declaration did not contain any mention of a secular state, covering all of Palestine, for both Arabs and Jews. The concept of such a secular state, which implied the disappearance of Israel, had been official PLO policy until now.

Mr. Arafat attended today's meeting, along with 37 other members of the Palestine National Congress, the parliament of the PLO. Zohair Mohsen, the head of as-Saiqa, the Syrian-controlled Palestinian guerrilla organisation, was also present. It was the first time since the intervention in Lebanon by Syrian and as-Saiqa forces that Mr. Mohsen and Mr. Arafat had attended a leadership session together.

A photograph of Syrian President Hafez al-Assad and Mr. Arafat sitting next to each other, flanked by other Palestinian and Syrian officials, was published today on the front pages of the government-controlled Syrian press.

The picture's publication, informed Syrian sources said, was meant to signal an accommodation between the Syrian leadership and Mr. Arafat.

Ouster Bid Dropped

A few weeks ago, the same newspapers demanded that Mr. Arafat step down as PLO leader, but the Syrian regime has since abandoned the idea of seeking his ouster, the Syrian sources said.

The fact that the council session was held here in the Syrian capital was meant to make it clear that the accommodation between Syria and el-Fatah, the main PLO guerrilla organization, is holding up, Palestinian sources said. Mr. Arafat is also the head of el-Fatah.

This accommodation was effected on orders by Saudi Arabia at the end of October. It was consecrated at Arab summit conferences in Riyadh and Cairo.

Mr. Arafat has since taken a moderate stance in public statements about Syria and has made it clear that he wants personally to steer the PLO toward participation in the negotiations for a Middle East settlement—talks that are expected to start in the spring.

Main Issue

The most heated discussions in the council's closed sessions here involved Syrian and Jordanian demands that the Palestine National Congress be enlarged from 174 to 400 or 500 members.

El-Fatah and its allies have a majority in the existing parliament and would like to see the number of new members limited to less than 100. They argue that enlarging the congress to 400 or 500 members would involve packing it with men who live in Jordan and Syria and support the regimes in those countries.

No agreement was reached on the dispute, according to informed sources. As a result, it was decided that the next parliament session, originally scheduled for Cairo this month, will be held in February at the earliest.

Strikes Disrupt Public Utilities Around France

PARIS, Dec. 14 (UPI).—French gas, electricity and postal workers went on strike today for varying periods to protest Prime Minister Raymond Barre's refusal to grant salary increases.

Workers for government-owned utilities shut down current to homes and industries throughout Paris and other parts of France. Mail was delivered, but mail sorters started a week-long strike that was certain to tie up Christmas mail service.

An estimated 13,000 gas and electric workers blocked downtown traffic with a protest march against Mr. Barre's orders to hold wage raises down to 6.5 per cent at most next year and eliminate public workers' special wage bonuses.

Power cuts lasting up to two hours this afternoon disrupted work in many industries throughout France, and interrupted Paris Métro and suburban train service. A similar two-hour power cut was scheduled for tomorrow morning. Many households also had no electric power and cooking gas for up to 2 1/2 hours.

OECD Strike Begins

PARIS, Dec. 14 (Reuters).—The 1,300 staff employees at the Organization for Economic Cooperation and Development (OECD) went on strike today for more pay.

Last Summer in Shansi Province

China Says Chiang Backers Kidnapped, Beat Officials

By Fox Butterfield

HONG KONG, Dec. 14 (NYT).—China has disclosed that the first party secretary and several other top leaders of Shansi Province were apparently kidnapped and beaten up last summer by local supporters of Chiang Ching and three other now-disgraced Politburo members.

The disclosure, made in a broadcast by Shansi radio, is one of many recent indications that factional troubles in China's provinces, dating to the Cultural Revolution in the late 1960s, were far worse than analysts had realized.

Shantung radio reported last week that local followers of Miss Chiang and her three associates in the port of Tsingtao attacked the party headquarters in July and beat up the army guards stationed there. When city authorities tried to arrest the "ringleaders," they fled to Shanghai and Peking, where they were said to have been protected by other aides to the four Politburo members.

Altogether, at least 12 of China's 29 provinces, autonomous regions and special municipalities have reported serious factional problems related to the conflict between the four "radicals" and the veteran party bureaucrats and army officers who triumphed with the four's arrest in October.

Troops Sent In

In the worst case, in Fukien Province opposite Taiwan, China's new Communist party chairman, Hua Kuo-feng, was forced to dispatch troops there last month to occupy cities, villages, schools and factories.

Honan Province has reported that its party leadership at many levels was "paralyzed" by the factional fighting and Hupeh has claimed that supporters of Miss Chiang actually set up a rival party committee.

Whether the situation was really this bad or whether some of these reports are exaggerations, intended to be used as evidence against the four and their supporters, is unclear.

In any case, the provinces are now in the midst of an extensive investigation of local followers of the "leftists" and are believed to be purging the most troublesome cases. Many of these seem to be younger cadres with worker backgrounds who were promoted to middle-ranking positions in the provincial party committees during the Cultural Revolution. They may have grown frustrated by the rehabilitation and return to power in the last few years of veteran cadres purged in the Cultural Revolution who are now blocking their path to further promotion.

According to Chinese Communist sources and travelers, the situation varies greatly from province to province. In some areas, like Canton, where the veterans had maintained themselves in authority during and after the Cultural Revolution, there have been few targets in the new campaign.

But there are indications that large numbers of people are being purged in Shanghai, the home base of the four "leftists," and Liaoning Province in the northeast, where Mao Tse-tung's nephew, Mao Yuan-hsin, was a party secretary. A recent traveler in Shanghai reported that the purge there was "full-scale, from top to bottom, possibly [involving] thousands of people."

The kidnapping incident in Shansi surprised analysts here, since there had been no previous indications that the situation in Shansi had reached such proportions.

According to Shansi radio, "The black hands of the 'gang of four' in our province in a planned and premeditated way caused the incident of beating, wrecking and looting on Aug. 23, kidnapping and beating up the principal leading comrades of the provincial party committee."

Conspiracy Smashed

The next day, the radio reported, the party central committee in Peking dispatched a special directive supporting the provincial leadership and "smashing this conspiracy." It was unclear from the broadcast exactly who had been kidnapped, but in Chinese Communist parlance, the term "principal leading comrades" usually means the first party secretary and the other senior officials.

In Shansi, the first party secretary is Wang Chien, a veteran official who was purged in the Cultural Revolution as a rightist and rehabilitated in 1973. During the anti-rightist campaign earlier this year, Chinese Nationalist sources in Taiwan reported that Mr. Wang had come under attack in wall posters as a "petit bourgeois revolutionary democrat who wormed his way into the party."

There was some evidence that the troubles in Shansi might be connected to factional fighting and labor unrest in the province's railroads that had continued since the Cultural Revolution.

Pope Urges Support for Human Life

VATICAN CITY, Dec. 14 (AP).—Pope Paul VI, in his annual message on world peace, today appealed for support of life against the threats of the arms race, abortion and political suppression.

"Do you want peace? Then let us defend life," the 79-year-old Pope said in his message to global leaders for the World Day of Peace Jan. 1.

Giving Hiroshima as an example of the illogical separation of life and peace, the Pope said, "The ancient saying, which has taught politics and still does so—'If you want peace prepare for war'—is not acceptable without radical reservation.

"With the forthright boldness of our principles, we thus denounce the false and dangerous program of the 'arms race,' of the secret rivalry between peoples [illegible] military superiority."

His condemnation of abortion was made as the Italian Parliament debated a measure to legalize abortion in Italy.

"It is not only war that kills peace. Every crime against life is a blow to peace, especially if it strikes at the moral conduct of the people, as often happens today, with horrible and often legalease, as in the case of the suppression of incipient life, by abortion," the Pope said.

He added that there are a "hundered forms in which offenses against life seem to be becoming normal behavior." He cited organized crime, terrorism and torture.

Plea by Ukrainian

VATICAN CITY, Dec. 14 (UPI)—The spiritual leader of Ukrainian Catholics told Pope Paul VI yesterday his church has been "sentenced to death" in the Soviet Union and its priests imprisoned and deported.

The Pope in a cautious response praised the Ukrainians' "heroic" fidelity to the church but said it would be unwise to set up a Ukrainian patriarchate in exile.

Josef Cardinal Slipyi, who was freed by Soviet officials in 196[illegible] after 18 years of imprisonment and torture, has often criticized the Vatican's policies in Eastern Europe.

Eduard Claudius Dies; E. German Author, Diplomat

BERLIN, Dec. 14 (UPI).—East German author Eduard Claudius, 65, a long-time Communist, has died, the East German news agency, ADN, said today.

Born in 1911 in Gelsenkirchen, Mr. Claudius joined the German Communist party in 1932, fought in 1936 against the Fascists in Spain and after World War II served, as press chief in the Bavarian Ministry for De-Nazification.

Two years after the end of the war, Mr. Claudius settled in Potsdam, in East Germany, and began to write novels, including "Gruene Oliven und Nackte Berge," (Green Olives and Naked Mountains), and "Menschen an Unserer Seite," (People on Our Side), ADN said.

Mr. Claudius was appointed deputy president of the East German Academy of Fine Arts after holding the posts of general consul in Syria and ambassador to Vietnam between 1959 and 1963, ADN said.

Friedrich Foertsch

GOSLAR, West Germany, Dec. 14 (UPI)—Gen. Friedrich Foertsch, 78, a former commander in chief of West Germany's armed forces, died today. Gen. Foertsch held the post of general inspector while serving as commander in chief from 19[illegible] to 1963.

John Wilkins

BERKELEY, Calif., Dec. [illegible] (AP)—John Wilkins, 51, former general counsel for the U.S. Agency for International Development and an expert in international law at the University of California at Berkeley, where he was the first black law professor, died Sunday of cancer.

Lee Payant

PARIS, Dec. 14 (UPI).—Lee Payant, 52, actor, director, guitarist and folk singer, died in Paris today.

A native of Seattle, Mr. Payant came to Paris in 1949 and established, with Gordon Heath, its folk song club, l'Abbaye. He appeared in the Studio Theater Paris productions and was [illegible] seau as an actor in "Kennedy's Children."

ce Raid Home at Night

ack Editor in South Africa zed, Freed After 8 Hours

By John F. Burns

JANNESBURG, Dec. 7.—South African securice today detained Percy editor, but released him ight hours saying that he en questioned in the course outine investigation.

Qoboza, who returned earis year from a fellowship rvard University, was ar- at his home in the black n of Soweto at 3:30 a.m. s taken to police headrs here and released short- noon. He was not immeavailable for comment.

e he was still held, the head of the security Brig. C.F. Zietsman, told Qoboza's newspaper, the "We want to talk to him information he may have at will happen in the coun- He gave no details of the under investigation.

Qoboza was the sixth er of the newspaper's staff detained. Last week the news editor, Gordon Mohwas released after several in detention, during which s not questioned. Four of per's reporters are still held laws that require no trial. editor's wife said that the and their five children wakened by loud banging windows. When they opendoor, six policemen pushr way into the house and sking Mr. Qoboza about books he had in the she said.

"He told them that he got most of his books by mail, and some were books that he used when he did a course in the United States," Mrs. Qoboza added. Under South African law, all books sold or imported into the country are subject to review by censors. Thousands have been banned.

The arrest prompted an outcry among opponents of the country's racial laws. Helen Suzman, a member of Parliament, said the police should hav requested Mr. Qoboza visit them during normal working hours. "I regard this as simply another method of intimidation of the press," she said.

Harvey Tyson, editor of the Star, a Johannesburg newspaper owned by the same company as the World, said in a statement: "This kind of action is unlikely to intimidate Mr. Qoboza or many of his colleagues. Instead the unnecessary night raid on an internationally known citizen is likely to hurt South Africa's name abroad and stir up further antagonisms at home."

Mr. Qoboza spent nine months at Harvard as a Nieman Fellow. In September, he was one of a group of South African blacks who met in Pretoria with Secretary of State Henry Kissinger. In his editorial in the World, which has a circulation of 220,000, he has consistently opposed violence by opponents of apartheid.

His arrest came as the police announced the arrest of two black mine workers in connection with the discovery of a cache of dynamite in an abandoned gold mine shaft in Booysens, a suburb between Johannesburg and Soweto. The arrests, on Friday, came two days after an explosion in a Johannesburg restaurant.

The police continue to remain silent on their investigation, but it was noted that the site where the 40 sticks of dynamite and 20 fuses were found was only a short distance from the mining laboratories where three of those arrested in connection with the explosion worked.

One of the three, Wellington Tshazibane, an engineer, is said by police to have hanged himself in his cell within hours of his arrest. Today, the Anglo American Corp. of South Africa Ltd., his former employer, announced that it would pay for an independent pathologist to conduct a postmortem examination on the body. Details of the postmortem, which was performed later in the day, have not been made public.

rstens Gets ndestag Post

NN, Dec. 14 (UPI).—The West German parliament toelected Karl Carstens, a er of the opposition Chris- Democrats, speaker alh the parliament is con- d by the government coali- of Social Democrats and Free Democrats

Bundestag, lower house of ment, adhered to the tradithat the president, or speakchosen by the party with ost seats. Mr. Carstens, in ith this tradition, was un- d.

was the first time in the ment's 27-year-history that mber of an opposition party elected speaker. Mr. Carswho was 62 today, was d by a vote of 346 to 110, 24 abstentions.

Mr. Troyanovsky interpreting for Premier Khrushchev in a visit to Iowa in 1959.

Troyanovsky Appointed Soviet Ambassador to UN

MOSCOW, Dec. 14 (AP).—Oleg Troyanovsky, a career diplomat who as an adviser-interpreter accompanied the late Premier Nikita Khrushchev on U.S. visits, has been appointed this country's ambassador to the United Nations, Tass reported today.

Mr. Troyanovsky, 57, whose appointment was expected, succeeds Jacob Malik. Mr. Malik, 70, returned here yesterday after a series of farewell visits with long-time colleagues at the UN, where he served as envoy from 1948 to 1952 and from 1968 until now.

Mr. Troyanovsky is an expert on Far Eastern affairs, having served as Soviet ambassador to Japan from 1967 until earlier this year.

He also has lived and studied in the United States, where his father, Alexander, became the Soviet Union's first envoy in 1933. While his father was assigned there, the younger Troyanovsky completed high-school studies in Washington and later studied for a year at Swarthmore College in Pennsylvania. His father also served as envoy to Tokyo and the son attended an American school there for five years.

The new UN envoy is a graduate of the Soviet Foreign Language Institute and attended Moscow University. He was official interpreter for Stalin and then served as a deputy foreign minister before becoming a traveling adviser to Khrushchev. Mr. Troyanovsky is believed by some to have worked to tone down some of Khrushchev's more rough-edged remarks and occasional outbursts.

UN Assembly Votes to Strengthen Sanctions Policy

UNITED NATIONS, N.Y., Dec. 14 (AP).—The General Assembly acted yesterday to strengthen sanctions against "the racist regimes in southern Africa," as it calls Rhodesia and South Africa.

By a vote of 113-1, with 14 abstentions, the Assembly adopted a resolution calling for "all possible aid" to enable Angola, Mozambique and "the African countries surrounding the racist regimes" to apply such sanctions fully.

There is a mandatory UN economic embargo against Rhodesia and a nonbinding arms embargo against South Africa.

The resolution was one of five against racial discrimination that the Assembly adopted on recommendation of its Social Committee. Another, on continued planning for a world conference against racism to be held in Accra, Ghana, in the next few years, was approved by a vote of 110-2, with 16 abstentions.

Canada and Israel both voted against the latter resolution. Israel also voted against the one on sanctions. Mrs. Ilana Ben-Ami, an Israeli delegate, said both resolutions were "contaminated" by the Assembly's declaration of Nov. 16, 1975, that "Zionism is a form of racism."

The United States declined to vote on either of the resolutions.

Three EEC Countries To Extend Fare Cuts

BRUSSELS, Dec. 14 (UPI).—Belgium, France and Luxembourg will extend reductions in rail fares for members of large families to the families of migrant workers from other community countries this month, the Common Market Commission said

The measure is a result of a preliminary ruling by the European Court of Justice in favor of a claim by an Italian woman living in France. The other European Economic Community states do not give such reduced fares for large families.

Scottish Pubs' Hours Extended by New Law

EDINBURGH, Dec. 14 (Reuters).—Drinkers in this homeland of Scotch whiskies and ales will be able to consume alcohol in bars for an hour longer, under a new licensing law.

Scotland's 7,000 hotels and bars can now stay open until 11 p.m.—the time when most London taverns close but a half-hour later than bars in other parts of England. Authorities have appealed for moderation in drinking in this country, which already has an alcoholism rate estimated to be double that of England's.

Honestly, With Big Majority

Singapore Leader Calls Vote He Is Certain to Win Easily

By George McArthur

BANGKOK, Dec. 14.—The coldly efficient Prime Minister of Singapore, Lee Kuan Yew, has called an election which he is certain to win—quite honestly and with an embarrassingly large majority.

It is equally predictable that opponents in Singapore and critics abroad will extend none of the victory tributes that such a mandate could be expected to produce elsewhere.

It will be contended that the electoral majority was too predictable to be credible. And yet, well before the Dec. 23 election date was announced yesterday, the most eminent opposition leader, J.B. Jeyaretnam, conceded that about 60 per cent of the votes should go to Mr. Lee's Political Action party.

Defeatist Assessment

Most political observers in Singapore think that the majority will be larger, but other opposition leaders quickly denounced Mr. Jeyaretnam's assessment as "defeatism."

The fact is that the opposition has not won a single seat in the legislature for 12 years although the combined opposition parties polled a respectable 30 per cent of the votes four years ago. Some redistricting and discontent in districts most affected by urban renewal may permit the opposition to pick up a few seats this year, but even that would be a surprise.

Such one-party mastery over such a period of time understandably has raised problems. In addition, the little city-state of Singapore, with a population of 2.3 million, has always attracted interest because of its strategic location, and because of the hard-driving manner of its Prime Minister.

It also comes partly because Mr. Lee was once a Marxist who changed his stand to make Singapore a showpiece bastion of capitalism. In that process, he discarded a lot of old ideas and old friends who are not inclined to forgive. However, he still insists on a leftist label and the most recent of his party's campaign tracts is entitled "Socialism That Works—The Singapore Way."

Mr. Lee has made his political machine a marvel of success and his city one of the most smoothly run cities in the world.

It is true that the rules of Singapore politics—written and unwritten—were largely made by Mr. Lee himself and often imposed with a heavy hand. He wrested control of Singapore in some tough and sometimes bloody battles when the city moved from World War II into a partnership with Malaysia and then out again as an independent state.

Still Mr. Lee satisfies the voters of Singapore—whom he also often berates—who have learned that whatever his failings, the Prime Minister can keep wages rising, a staggering number of public housing units going up, and the birth rate down.

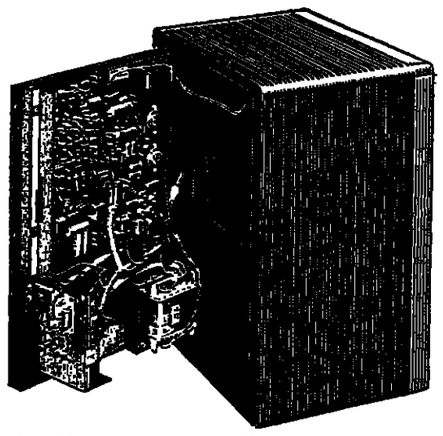
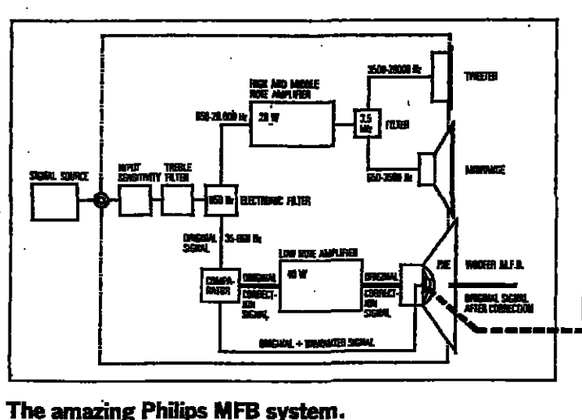
LOOK

We think the Philips RH 544 is one of the best speakers you can buy today. And tomorrow.

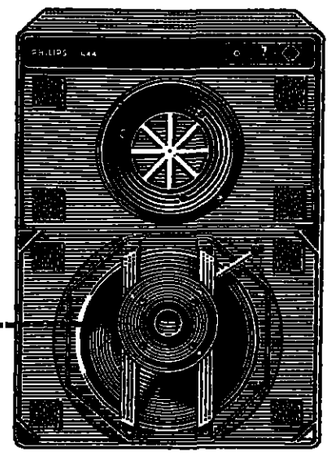


PHILIPS



LISTEN

But maybe you're more interested in the opinion of the HiFi specialist press.



Two built-in amplifiers: 40 W + 20 W output power!
The Philips RH 544 loudspeaker system is based on the principle of professional studio monitor loudspeaker systems. Perfect sound reproduction with a high sound pressure level is achieved by means of the built-in amplifiers which are matched to the various loudspeakers.
In the authoritative American periodical AUDIO (February 1975) Bert Whyte reports on the remarkable reproduction quality of the MFB system: "In summing up the sound quality of the MFB, it impresses most with its exceptionally smooth overall response and neutral character."

The speaker unlimited.
The MFB loudspeaker offers you wide scope. A few examples: the RH 544 can be connected directly to preliminary and normal amplifiers. With this speaker you can easily increase the output power of your existing HiFi system.
In the American periodical HIFI STEREO BUYERS' GUIDE Martin Clifford says: "I've listened to these units in small rooms, in large rooms, and in what could be described as a fair-sized hall. I have listened to the Philips MFB speakers in my home. I would say that Philips has made a dramatic break-through in sound reproduction."

The amazing Philips MFB system.
With the Motional Feedback System, spurious speaker vibration is automatically corrected by means of an accelerometer in the bass speaker (see arrow) and by a special correction circuit. That's how the MFB system makes fuller bass note reproduction possible - from 30 Hz on.
The reviewer of the British journal GRAMOPHONE (April 1976) writes about this amazing system: "Technically, the Philips MFB speaker has performed very well and might therefore be judged by high standards on listening tests. Certainly its bass performance is all it is claimed to be: smooth, full and not too lightly damped.
Middle and treble responses are quite smooth."

Stimulating the Economy

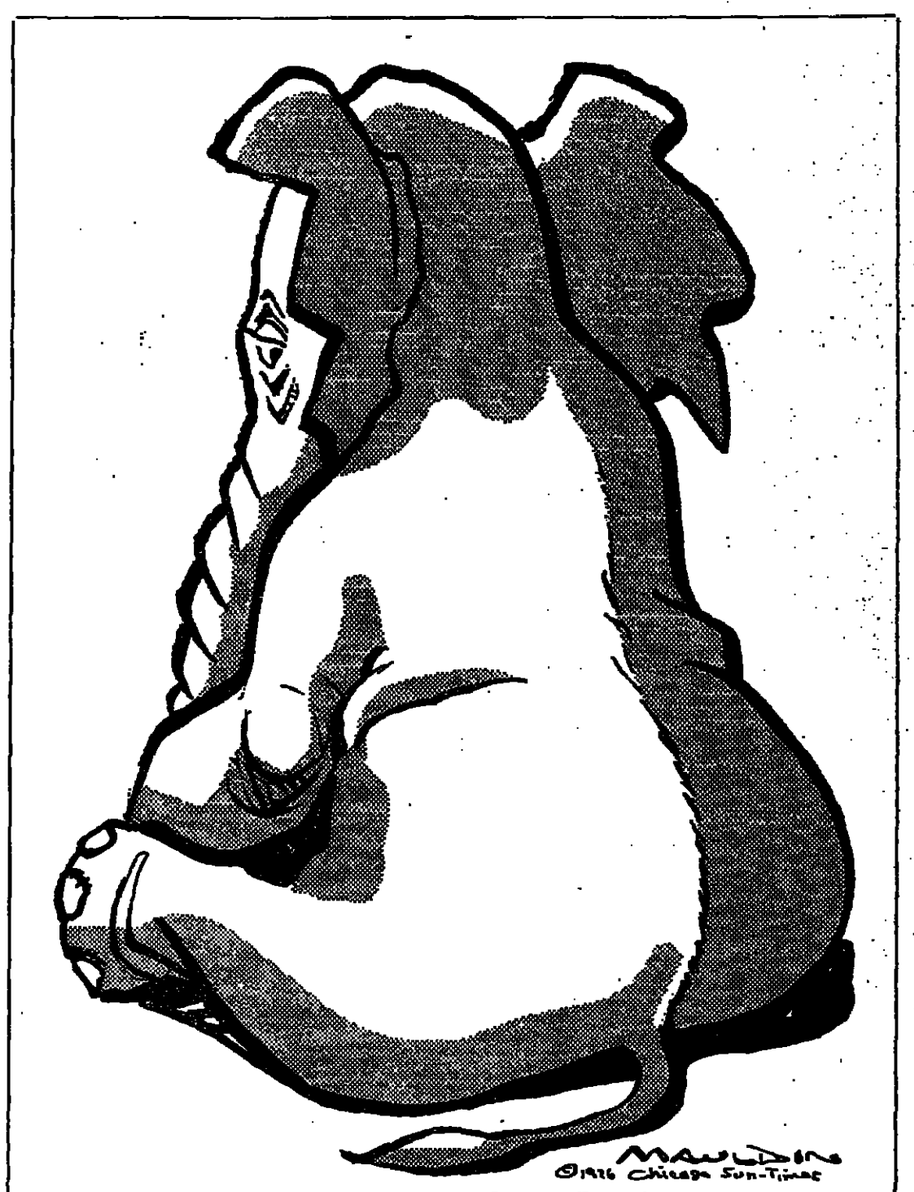
A consensus is forming on the size, composition and timing of the fiscal stimulus needed to get the national economy moving ahead and thereby to reduce unemployment. Mr. Carter's transition staff and the chief executives of 15 major corporations have offered the President-elect remarkably similar plans combining three basic elements: personal tax cuts, tax incentives for business investment and federal spending increases focused on the jobless.

There are indeed some differences between the proposals. Ironically the businessmen's fiscal package is larger than that of Mr. Carter's economists—$23 billion against $20 billion. The business executives want the personal income tax cuts to be permanent, while the Carter staff recommends that part of the cut be a rebate on 1976 taxes and part a reduction on 1977 tax liabilities.

Mr. Carter's staff has offered several options to spur business investment in new equipment. The businessmen were divided among themselves on whether the investment tax credit should be raised permanently or temporarily. Some held that a temporary increase would be more likely to accelerate capital spending. The transition staff and business executives both called for $5 billion in various job-creating programs

From these proposals Mr. Carter should be able to construct a program to attack the short-run economic slowdown without unduly sacrificing long-run tax revenues. To achieve that purpose, he ought to accept his staff's plan of combining tax rebates on this year's income with lower tax withholding from next year's income This would also seem safer than putting all his eggs in the one basket of a single tax rebate.

While economic research indicates that increases in "permanent income" have a bigger effect on consumer spending than temporary increases (resulting from temporary tax cuts), there is no evidence that temporary tax cuts have no effect at all. Increasing the fiscal package to achieve the desired short-run effect makes more sense than sacrificing revenues permanently—and with them hopes of funding future welfare reform, health care, housing and other social programs, facilitating tax reform and achieving budgetary balance.



For this reason, we think Mr. Carter would also be well advised to propose tax incentives for business investment that promise to deliver early returns without permanently surrendering future tax revenues.

* * *

The tax-cutting approach has been sharply criticized by Professor John Kenneth Galbraith and others who believe that the whole fiscal stimulus needed to end the slowdown ought to be focused on the expenditure side of the budget There is, indeed, strong reason to concentrate public expenditures directly on job-creating programs—and Mr. Carter has indicated he will give priority to that approach. But putting the entire fiscal program into wage subsidies for private employment and public-service jobs might delay and dissipate the impact on the private economy and require huge additional infusions of federal money.

Given Mr Carter's hope of spending the more than four hundred billion dollars already in the federal budget more effectively, we believe it would be unwise to use the entire fiscal package to increase total federal spending and thereby ease the pressure for economizing and reordering priorities in the existing federal budget.

THE NEW YORK TIMES.

'I Suppose I Should Develop a Broader Base.'

Standoff in Portugal

Premier Mario Soares has claimed a "Socialist victory" in Portugal's local elections; and his party did lead the field comfortably for the fourth straight ballot test since the overthrow of authoritarian rule in 1974. But the Socialists dipped slightly under their showing in parliamentary elections of last April, while the Communists rebounded into third place. thus remaining a force capable of harassing a minority government in a country buffeted by inflation and high unemployment.

Given Portugal's grim economic situation and the austerity measures the government has been forced to impose, it was a considerable accomplishment for the Socialists to poll 33 per cent of the votes The question Soares must now confront once again is whether it makes sense to continue trying to govern in such trying times with the assured support only of his own party.

In the local balloting, the Social Democrats —formerly known as the Popular Democrats —duplicated their 24-per-cent poll of last April, easily holding second place by a wide margin over the Communists The Social Democrats are a slightly left-of-center reform party that shares most of the policy objectives of the Socialists Together, the two parties command the support of 58 per cent of the electorate and a robust majority in parliament.

The task of building a durable democratic system after 50 years of the corporate state would be formidable in any circumstances. Soares must cope simultaneously with the effects of decades of economic stagnation, more than two years of drift and confusion after the 1974 military take-over, and the problems of depression and inflation that afflict most Western countries. Voter disillusionment with the new democracy was reflected in the local elections by a record 35-per-cent abstention.

A coalition of Socialists and Social Democrats would seem to offer the best possible prospect for political stability, for economic recovery and development, and for reinforcing Portugal's fledgling democracy against attack from either end of the spectrum.

THE NEW YORK TIMES.

Bugging the Micronesians

What kind of shabby government is it that would take the dependent Pacific-island peoples of Micronesia under its wing, open ostensibly arm's-length negotiations with them on their future relationship with the United States, and then bug them for years to see how their negotiating position was developing? The CIA, which evidently planted what few bugs and phone taps were considered necessary, assured itself it was gathering foreign intelligence The State Department negotiator found the information thus garnered "useful," he shamelessly told a reporter, "because the Micronesians are tough negotiators." The Justice Department, it seems, could not find legal grounds to object—as though one needed legal grounds. Inexcusably, President Ford, informed of the bugging and of an intragovernmental dispute over it, could not bring himself to end it.

So totally discredited is the Ford administration's Micronesian policy that it matters little what is done about it now. The new administration will have to prepare for the next round of negotiations, and to try to minimize the immense diplomatic damage already done. How will the United States convince the Marshall and Caroline Islanders—not to speak of Americans—that it's negotiating in good faith and not just conspiring mean-mindedly to trick people into a deal meant to keep Micronesia safe for U.S. bases?

There are questions for the CIA, too. Why should the United States, without even a whisper of probable cause, be bugging a dependent ward that had been formally delivered into its care by the United Nations? When will the government learn that no secret act which does not command a broad bureaucratic consensus is leak-safe? Bugging foreigners may not count as a CIA "operation," but since its disclosure can have the impact of disclosure of an operation, should it not also be passed through the additional screen of congressional review?

THE WASHINGTON POST.

International Opinion

NATO's Dilemma

It is precisely NATO's democratic character that gives rise to its principal difficulties. Under Brezhnev's sway it is possible for huge items of military expenditure to be approved by dictate of the leadership, even when the civilian population has to go without comforts as a result. But NATO generals, defense ministers and foreign ministers take note every year of what ought to be done, only to be frustrated by their own finance ministers, who in turn have one eye on parliaments and voters. Electorates nowadays have inherited the political privileges that in earlier times belonged to the aristocracy, but do not at the same time seem to have inherited any realization that in the long run their freedom and high living standards are entirely dependent on readiness to make sacrifices in the interests of defense.

—From the Neue Zuercher Zeitung (Zurich).

In the International Edition

Seventy-Five Years Ago

December 15, 1901.

WASHINGTON.—Mrs. Theodore Roosevelt gave her first public reception at the White House this afternoon. Although the weather was rainy, a great crowd assembled, the line reaching far beyond the grounds. In view of the advice of many persons, hand-shaking was dispensed with, and there will be none hereafter at public receptions. Mrs. Roosevelt was assisted by Mrs. Smith, wife of the Postmaster-General and Mrs. Knox, wife of the Attorney-General.

Fifty Years Ago

December 15, 1926.

LONDON.—Knowledge of 11 languages, including Arabic, Hebrew, Greek and Russian, is an advantage for anyone hoping for a post in the telephone exchange at Jerusalem, according to the Daily Chronicle. Palestine has in addition to the three official languages, English, Arabic and Hebrew, several other languages in common use, such as French, Greek, Spanish, Italian, German, Russian, Armenian and Romanian. Most operators speak three languages and handle figures in the rest.

Wanted: A World Energy Policy

By Gerald L. Parsky

WASHINGTON.—Today, we are not living in a world of one power or two powers or even five powers. Instead, through the development of natural resources in countries like Brazil, and through thee transfeer of financial resources to the oil-producing countries, the world is much more complex—it is truly interdependent. We in the United States need not fear such interdependence—we can and must build on it. We must build through cooperation, not confrontation, but we can only do so if the United States exercises leadership.

No subject illustrates the interdependence of the world, and the need for cooperation, more than energy. Three years ago, the oil embargo shocked the world, and for the first time, nations awakened to their energy problems. Unfortunately, the end of the embargo has put many back to sleep. The age of cheap, plentiful energy is over, and an effective energy policy in our interdependent world must involve three interrelated parts: (1) The development of sound domestic energy policies to reduce reliance on insecure foreign supply; (2) cooperation among the oil-consuming countries; and (3) cooperation with the oil-producing countries.

Increased Demand

The free world has made little progress since 1973 in reducing its reliance on imported oil. With the economic recovery, demand has been increasing and in 1977 it is expected to rise by nearly 5 per cent over 1976 levels. For such trends to be reversed, the United States must assume a leadership role. Unfortunately, we have done just the opposite. Demand has been increasing, production declining, and our imports have grown. In 1973, we were importing 29 per cent of our oil; in 1976, the figure is 41 per cent. Not only has U.S. reliance on imported oil increased, but the proportion from OPEC has risen from 71 per cent of oil imports to 82 per cent.

Most Americans would agree that our goal should be to reduce our vulnerability to a cut-off in supply. Not enough people understand what is required to achieve that goal. Americans must realize that to reduce our reliance on foreign oil, adequate incentives must exist to develop alternative sources of supply. We should not be seeking zero imports. We can eliminate vulnerability through diversifying supply and developing storage and emergency measures. However, if prices for oil and gas continue to be artificially controlled; if we continue to threaten divesting oil companies; if an adequate return on energy investment is not provided, the capital necessary to bring on supplies simply will not flow.

At the same time that the United States must get its own energy house in order, we must pursue further cooperation among oil consumers. Commitments have been made to share oil in an emergency. We should also formulate group objectives for reducing oil imports; undertake joint research and development projects; and, more importantly, remove barriers to investment in energy.

The third interrelated element in energy policy must involve cooperation with the oil-producing countries. Although producers and consumers have different views on oil price, there are many interests that are complementary. We should aim to develop such interests in various ways. First, the oil producers want to diversify their economies. They need goods and offer the fastest growing market for oil-consuming-country goods. Second, to industrialize, OPEC desires consumeer-country technical skill which producers are willing to pay for. Third, to assure growth of industries, oil producers will want consumer markets. Finally, to assure profitable investment for surplus funds, producers are looking to consumer markets at a time when consumers need capital. The focus of consumer relations with the producers should be to strengthen each of these common bonds.

Confrontation

At a time when OPEC unquestionably has the ability to set oil prices unilaterally, we should not be pursuing a policy of confrontation, calling for embargoes or economic warfare. Instead, we should bring producers and consumers closer, which will create greater understanding of each other's needs.

Our objective should not be the destruction of OPEC through the creation of a politically oriented counter-cartel. Our objective also should not be to negotiate a price for oil. Rather, we should be striving to create the objective conditions which will bring about an expanding supply of energy at market prices.

Some in OPEC now argue that prices have been frozen for too long; that their import prices have risen; that they need revenues for their development and therefore oil prices must now go up. I have just returned from Saudi Arabia, Kuwait and Abu Dhabi, and I am convinced that there are still moderate voices within OPEC calling for responsible actions by oil-producing countries. Unfortunately, not enough people realize the moderating role these nations have played in oil-price decision-making. If it were not for them, the price of oil would be much higher today. Consumers must support such voices.

I do not question the right of the oil producers to develop their countries and prosper. However, as leaders in an interdependent world, they must share responsibility for the well-being of the world economy. In fact, they will prosper only if the world economy in general prospers. Even a small increase in the price of oil would have a serious adverse impact on the fragile world economic recovery. Further, a considerable number of countries are beginning to have difficulty borrowing abroad, and will have to initiate adjustment measures to reduce their deficits. This process will be a problem without an increase; with an increase, it will cause severe strains in the financial system in 1977. It's for these reasons that we believe that an increase in the price of oil is not justified nor, indeed, is it in the overall interest of the producer countries themselves.

The immediate decision is with OPEC. The longer-term decision is with the United States and the consuming countries. Our energy problems are economically solvable—we can reduce demand; we can increase supply; and the market can again have a role. However, for this to happen, we must not allow politics to dominate economics. Either we separate politics from oil or politics will impose greater governmental intrusion on us domestically and isolation internationally. The resources and technology exist; the capital is there—the only question is whether we have the human will to build the proper energy policy in today's interdependent world.

Mr. Parsky, an assistant secretary of the Treasury for international affairs, wrote this article for the International Herald Tribune.

Keeps Aides in Dark

Carter Has Last Wor

By David S. Broder

WASHINGTON.—There was an important and instructive clue to the character of the incoming Carter administration last week—one that indicates again how elusive the new President-elect really is.

While Carter was running through a marathon course of meetings at Blair House, his principal aides were making the rounds of the journalistic gatherings, voicing with remarkable freedom their own guesses about forthcoming Carter policy and organizational decisions.

They were always careful to make it plain that they were speaking for themselves—and not for Jimmy Carter. But reporters hearing the views of Bert Lance, the director-designate of the Office of Management and Budget, on the shape of a possible tax cut could be excused for treating them seriously.

And when Greg Schneiders, Carter's young administrative assistant, talked about the possible shape of the White House staff, it was certain to be noticed—and reported.

Hard Truth

But the hard truth is that the disclaimers Lance and Schneiders and the others put on their remarks were probably more than window dressing. The reason that they apparently feel so free to speak for themselves is that they really don't know what Carter is going to do.

This "open administration" which the President-elect promised is up against one possibly insuperable problem. The only person in it who really counts is a man who plays his cards very close to his vest.

That is confirmed—along with so much else—by his uninhibited aides. Schneiders, who probably spends as many hours a day with Carter as anyone, was asked why the names of prospective cabinet members seemed to be so much more closely held than in past transitions.

"The reason," he said "is that most of the decision-making is going on in one house down in Plains and in the mind of one person in that house.

"He [Carter] is reaching out very broadly for advice," Schneiders said. "He's placing literally hundreds of phone calls. This makes him the center of the entire process. There's only one person who has all the pieces of the puzzle—and that's Jimmy Carter. That's just the way he operates."

Asked if there were anyone with whom Carter shared the actual decision-making, Schneiders said, "Maybe Rosalynn [Mrs. Carter]." Then he added the names of Charles Kirbo, the lanta lawyer, campaign mana Hamilton Jordan and Press S retary Jody Powell.

But those three men have e told reporters that they often caught by surprise by d alons Carter made during his as governor—or statements uttered during the campaign.

The President-elect obvio feels no more need to co them systematically than feel inhibited about voicing own views without clearing him.

There is, of course, a ch that Carter and his principal sociates will turn into a coordinated, buttoned-down once they are installed in But one shouldn't bet on it.

'Have to Hedge'

Lance endured Carter's repudiation of the budget statement that a tax cut in 1977 was "almost a certa and then came back two later to say exactly the thing. Asked if the experience a public disagreement with chief would make him more hibited in the future, Lance emphatically, no.

"If I can't continue to ex myself freely, I can't play in his administration," said. "If I have to hedge a time I'm asked something use am I to him?"

From Franklin Roosevelt forward, the general rule presidential assistants has that they should cultivate a sion for anonymity." The their influence inside 1600 sylvania Avenue, the more ited they tended to be in their personal views to the outside.

But the Carter circle seems to have heard of this axiom at least, not be inclined to it. With them, there may be verse pattern—a group of inhibited advisers surrounding rather tight-lipped chief exec

"There's nothing wrong that, but you had best remem one thing: Carter will still the last word.

Which Reds Under Whose Beds

By C. L. Sulzberger

LONDON—In Britain's complicated but curiously workable democracy a wide spectrum of opinion is represented although two major parties, Labor (which runs the present government by the skin of its teeth) and Conservative, dominate. And even these two represent coalitions of political opinion ranging from center to far left among Laborites and from far right to center among Tories.

The word "Tory", first applied to Irish thugs, was selected as an epithet for royalists at a time when their principal opponents, the Whigs, were so dubbed for a Scottish king-hater named Whigamore. The Conservatives are still overwhelmingly attached to the profoundly reformed monarchic institution but so are most Labor party members who inherited the role of principal political contender from the Whigs.

Shorthand for 'Leftist'

Since the word "Red" has become accepted as shorthand for "leftist", one might say that some old-fashioned Tories in this country regard everyone to the left of them as Reds, including members of their own party. But the real search for Reds under the beds is in the ranks of Labor.

Prime Minister James Callaghan, former Prime Minister Sir Harold Wilson, and Ronald Hayward, general secretary of the Labor party, have all publicly called this month for study of leftist infiltration by the party's National Executive Committee.

But what is in question is a relatively miniature and even then divided organization that calls itself "Trotskyist". Leon Trotsky was one of the most brilliant and audacious of the handful of Bolsheviks who surrounded Lenin but his importance steadily faded after Stalin exiled him and then had him murdered in Mexico 36 years ago.

Therefore, in reality, the "Reds under the beds" inquiry bruited in British headlines is much ado about little and isn't anywhere near the same category of important questions as will the British economy pick up or will the United Kingdom survive at all.

Legally Banned

Communists—all varieties including Moscow's, Peking's or even Trotskyites—are legally banned by Labor and have been since the first Communist party of Great Britain was formed in 1920. But Labor's ranks have always included a relatively small minority of radical Maxists.

The so-called "Trotskyites" which Labor leaders now want to curb try to act in a clandestine way but with unimpressive success. One of their factions publishes a magazine called Militant which urges that "We must dig roots in the wards and constituencies" and adds: "We must never forget to train our cadres to the theoretical possibility of the unions as organisations being thrust aside, in a period of revolution, or prior to an insurrection, and that Workers' Committees or Soviets could take their place."

This is a kind of fairy-tale concept that has about as much relationship to current possibilities as England's 17th-century "glorious revolution" which introduced that astronomical Copernican thesis as a political word. In fact the "glorious revolution" meant what we today know as "cou revolution", changing things ward, not forward.

The "Trotskyites" in the party are mostly young lecturals who generally cha favor democratic procedure though their leader is a genarian named Ted Grant. seem to be active in only 3 to 4 per cent at most parliamentary constituencies tend to focus in areas where are large universities or poly nical institutions.

Slight Interest

They show slight intere major foreign policy issues devote most of their ener domestic problems. In som instances they have weaken embarrassed the position o ular MPs; but this is imp because Callaghan's gover remains on a razor's ed parliamentary approval.

Labor is a perplexing po force in Britain with the unions and their headqu often seeking to stress som different policies than the p mentary Labor party. Abou years ago the unions seem reach an apogee of left bias but have since been g ally inching back toward mo tion that favors Prime M Callaghan's efforts to ge country to work more effe and plug all danger of down the drain.

There is little doubt that Communists gained some str in the unions during the half of this decade but the now being quietly weeded where possible. My own sus is that the current fuss "Trotskyite" Reds under the is in fact simply one w getting at more orthodox munists who have quietly into the woodwork beside

—Letter—

Britain and England

I know it's difficult, but Americans should try to distinguish between "Britain" and "England" and avoid using the first for the second. Perhaps I may quote the Oxford English Dictionary: "In 1604, James I was proclaimed 'King of Great Britain'; and this name was adopted for the United Kingdom at the Union (i.e. of Scotland and England) in 1707."

Hence it is wrong to say that "Wales has been part of Britain since 1536" (IHT, Dec. 1). (Historically, the Welsh are the original Britons). Scotland was not "joined to Britain in 1707." Britain in the modern sense, the United Kingdom of Great Britain, only came into existence after that union, the terms of which preserved Scotland's independent legal and ecclesiastical systems.

News Analysis

Portuguese Voters Showed Surprising Stability, Fidelity

By Marvine Howe

LISBON, Dec. 14 (NYT).—The surprise in Portugal's local elections Sunday was the relative stability of the electorate and, above all, a certain fidelity to the Socialist party, in spite of everything.

Everything means essentially a series of unpopular measures taken by Premier Mario Soares's eight-month-old government "to bring order in the house" after months of revolutionary extravagance which brought the country to the brink of social and economic collapse.

Despite austerity measures on food and transport prices, stricter labor discipline and increased government control over strikes, a plurality of voters expressed continued confidence in the Socialist party to tackle the country's grave problems.

Nevertheless, the people served a clear warning to their leaders with a record 35-per-cent abstention, which would not be bad for most countries but contrasted dramatically with the 8 per cent who cast ballots in the first free elections last year.

Nostalgia for Authority

The nonvoters' message is generally interpreted as a growing disenchantment with the Socialist government and the new democratic institutions and even as a nostalgia for authoritarian rule.

Finally, leaders of all four major parties have claimed success and, in a way, they are right, as there were multiple losers in the complex elections with voters casting three ballots for the town halls and municipal and parish councils.

The Socialists won Lisbon and Oporto and the main cities throughout the country. The Social Democratic party and the conservative Social Democratic Center strengthened their positions in the northern rural areas while the Communists consolidated their hold over the agrarian reform zone in the southern Alentejo Province.

The principal effect of the election was to give the Socialist government time and sufficient mandate to pursue its program "to rebuild the country." Mr. Soares made it clear before the election that his Cabinet would resign if the Socialist party lost on the local level.

Nevertheless, the main opposition parties, which emerged from the election reinforced on the local level, are expected to intensify their attacks on the government, particularly in the Assembly of the Republic.

Safe for 3 Years

In the normal course of events, the Socialist government is safe, as far as elections are concerned, for another three years.

Its only democratic threat now lies in the Assembly of the Republic, the country's parliament. Two motions of censure by a parliamentary majority within 30 days of each other are enough to bring down the government, according to the Constitution. The government could also fall if the Assembly refuses to grant a motion of confidence.

At the same time, the Assembly could paralyze the government's activity by sitting on or rejecting its bills. The Socialists hold 107 of the total 263 seats in the Assembly and, up to now, have formed pragmatic and temporary alliances with the parties to the left or the right to get their bills passed.

Now, however, the government appears threatened by what is popularly called "an unholy alliance" of the three main opposition parties: The Social Democrats, Center Democrats and Communists.

Next week, the government faces a critical parliamentary debate on its 1977 budget and economic plan which constitutes the essence of the government's program.

To Oppose Budget

Mr. Soares's closest and most aggressive political rival, Francisco Sa Carneiro, whose Social Democratic party came second in the election, announced last night on nationwide television that his party would, from now on, intensify its opposition. He has also gone on record as saying that the Social Democrats would vote against the budget.

Socialist leaders are now hinting that systematic hostility from the Social Democrats could force them increasingly to seek Communist support in parliament.

Communist leader Alvaro Cunhal, whose party won third place from the conservative Center Democrats, warned that his party's strong showing in the election proved that the government must pay it heed—particularly on labor and agrarian reform policies.

The third problem for the Socialists is the Social Democratic Center, whose leader, Diogo Freitas Do Amaral, attacked the government today for failing to define clearly the rules of the economic game and leaving the private sector in limbo.

Thus, despite his electoral victory, Mr. Soares faces uncertainty and new difficulties whichever way he turns.

Perhaps the strongest point in the Socialist government's favor is that no one has presented a viable democratic alternative.

Mario Soares

Micronesia Role Of CIA Probed

WASHINGTON, Dec. 14 (WP).—The Senate Select Committee on Intelligence has opened an inquiry into reports that the CIA has conducted electronic surveillance against negotiators from the Pacific island group of Micronesia, according to a committee spokesman.

The spokesman said that the CIA had provided some information yesterday on the reported surveillance but said that the committee inquiry has not been completed.

Sen. Howard Baker, R-Tenn., the ranking Republican on the committee, said yesterday that he had no knowledge of the alleged CIA bugging, which reportedly has been conducted to learn the negotiating position of the Micronesians in talks with the United States on the eventual status of the trust territory. Sen. Baker said that he would make efforts this week to find out if the reports are true.

Resumption Set for Jan. 17

U.K. Adjourns Geneva Talks on Rhodesia Rule

GENEVA, Dec. 14 (UPI).—Britain adjourned the Rhodesia talks today after two months of black-white deadlock. It set Jan. 17 as a target date for resumption to follow a diplomatic visit to Africa by the conference chairman, Ivor Richard.

British officials said Mr. Richard's mission will be to persuade all parties involved to accept a British compromise for an interim government to run Rhodesia before black majority rule.

This plan provides for a British resident commissioner or governor who would have ultimate authority during the transitional process, the officials said.

Above all this commissioner, as commander in chief, would have "the final say in how the army and security forces are used," they said.

'Best Way Out'

"This is the best way out," the officials added.

Mr. Richard will leave for Africa with the plan just after Christmas, they said.

His journey will last as long as required. This is why Jan. 17 was set only as a target date for reconvening the conference.

Mr. Richard adjourned the talks by sending a simple "note from the chairman" to the four black nationalist delegations and the white minority government group. He scheduled a final news conference for tomorrow instead of today so as not to clash with a statement in Parliament by Foreign Secretary Anthony Crosland.

Officials disclosed that Mr. Richard decided against a concluding plenary session between all delegations because he feared "a public row" with everyone blaming each other for the failure to reach an agreement.

They said Mr. Richard's trip will take him to all the African "frontline" states surrounding Rhodesia, where he hopes to confer with each country's president.

Pretoria Stop

He will negotiate with Rhodesian Prime Minister Ian Smith in Salisbury, with the black nationalist leaders either in Rhodesia or in neighboring Mozambique where some of them are with the guerrilla forces, and will also go to Pretoria to see South African Prime Minister John Vorster.

Mr. Smith said repeatedly at the conference he opposes any British presence in Rhodesia during the interim process. He maintained this would be "more a hindrance than a help."

Conference officials, however, said they believe Mr. Smith will eventually have to give way.

"Smith wants a settlement," they said. The reason he wants one is because "he's losing the war" despite his public assertions to the contrary.

The conference formally opened Oct. 28 after one week of preliminaries which included Mr. Smith's demand—which Mr. Richard rejected—that the nameplate in front of his chair identify him as "Prime Minister of the Government of Rhodesia."

Britain had set Nov. 30 as the original deadline for concluding the conference with an agreement but it immediately bogged down over the demand for a fixed and binding independence date made by "Patriotic Front" leaders Robert Mugabe and Joshua Nkomo.

Britain finally agreed to fixing March 1, 1978, as the latest date for majority rule and pushed the conference deadline back to Dec. 30.

Smith Is Optimistic

SALISBURY, Rhodesia, Dec. 14 (UPI).—Mr. Smith said the conference has not collapsed but only adjourned and believes the British and the Americans will not let it break down.

"This conference after two months, I believe, will make history by being a conference which is adjourned before it's actually started its buisness," he said on returning from Geneva yesterday.

He said when it is reconvened, "it will have to be resumed on the basis of implementing the Anglo-American agreement."

Iraq Says Kurds Will Be Barred From Homeland

BAGHDAD, Dec. 14 (Reuters).—Between 30,000 and 40,000 Kurds from northern Iraq have been resettled in the center and south of the country and will not be moved back to their mountain homeland, according to Information Minister Tariq Aziz.

The minister said that these were Kurds who had fled to Iran after the collapse last year of Mullah Mustafa Barzani's 15-year rebellion. They were allowed to return under an amnesty on condition that they resettled outside their homeland.

Mr. Aziz said that these Kurds were believed to be too much under the influence of Gen. Barzani, although the rebel leader is now an elderly man with lung cancer who has faded into an obscure exile.

The figure for resettled Kurds given by the minister is a fraction of the 300,000 who, spokesmen of the Kurdistan Democratic party in Europe say, have been deported from the northern mountains.

Ivor Richard

150 Students Face Stranding Abroad

ANN ARBOR, Mich., Dec. 14 (AP).—The director of an international student-exchange program based here says that his organization has run out of funds and 150 students could be stranded without return plane tickets next month unless the group gets some money.

Frederick Luddy said that his International Cultural Exchange Corp. (ICX) is so broke that he has been working without pay since August and has closed the ICX office and moved its headquarters into his home.

Mr. Luddy estimated it will take between $50,000 and $75,000 to return all the high-school-age students now living abroad to their homes Jan. 10, when they are scheduled to come back. The students include Americans, South and Central Americans and Japanese, who are studying in this country, Europe and the rest of the Americas.

Caramanlis Leaves

ATHENS, Dec. 14 (UPI).—Premier Constantine Caramanlis left today for a three-day official visit to Pakistan.

Ulster Alerted For Christmas Violence by IRA

BELFAST, Dec. 14 (Reuters).—Security chiefs in Northern Ireland are on the alert for a Christmas offensive by the IRA.

They are convinced that yesterday's wave of 10 bomb attacks in Belfast and in other towns signaled a fresh campaign of violence.

Tighter security precautions were ordered in all main towns in the British-ruled province and the police appealed to traders and business establishments to be extra vigilant, particularly for fire bombers, who they believe will be active up to Christmas.

The IRA said it was responsible for yesterday's attacks—the worst in Northern Ireland since early summer.

Gunmen also killed a crippled man in Belfast, wounded two policemen in Lurgan and hijacked dozens of vehicles for bomb hoaxes to disrupt telephone services, stop trains and block main roads.

Turks Give Youth, Sister Long Terms

IZMIR, Turkey, Dec. 14 (UPI).—A court sentenced a West German youth to life imprisonment and his 15-year-old sister to nearly 17 years in jail today for trying to smuggle 79 pounds of hashish into Turkey.

The court in this coastal city sentenced Angelo Wingler, 17, and his sister Angela to death but then commuted the boy's to life and the girl's to 16 years and eight months because she is a minor.

They were arrested last month for trying to smuggle about $294,000 worth of hashish in the secret compartment of their automobile.

New Leftist Daily Will Appear in Paris

PARIS, Dec. 14 (Reuters).—A new leftist daily newspaper will be published in Paris next year probably starting in late February—with financial support from the weekly news magazine Nouvel Observateur, the magazine announced today.

The tabloid newspaper, expected to be called Matin de Paris (Paris Morning), will be financially independent of the leftist political parties but will strongly support the Socialist-Communist alliance in the 1978 general election, magazine sources said.

FASHION

The Do-It-Yourself Peasant In the Saint Laurent Style

By Hebe Dorsey

PARIS (IHT).—The Saint Laurent Russian peasant look is already too much of a good thing.

It is turning up everywhere. At a recent gala, Baronne Guy de Rothschild, Mrs. Pierre Schlumberger and Mrs. Edmond Artar walked in, like three sisters, in identical Saint Laurent ballgowns. At the Relais Plaza the other day, at least five women were wearing similar versions of the flowered outfits from the Rive Gauche boutiques.

The best sellers are the Liberty skirt-plus-blouse-plus-belt for daytime and the crushed velvet skirt with gold lamé blouse for evening. In the couture department, the big-sleeved, romantic taffeta gowns have found customers in Hélène Rochas, Rosemarie Marcie-Rivière, Nan Kempner, Mrs. William McCormick Blair jr. and others.

The look is filtering down so fast slightly modified versions are now available in other shops.

In London, stores, like Janet Wilson's on Beauchamp Place, are doing such a faithful job of copying as to make you think you are in a Saint Laurent boutique—except that the prices are drastically lower. In Milan, it is straight chutzpah, with boutiques offering the complete Saint Laurent kit, neatly wrapped up in a plastic bag. In Paris, adventurous women turn to fabric stores, such as Max, on the Champs-Elysées, where they find as many as 200 different flower prints.

"Liberty cannot keep up with orders," said a spokesman for Max, "but we were lucky, we did have huge stocks, so we have some left." The price for a Liberty print (that was used two years ago by Saint Laurent in his couture collection) is regularly 80 francs a meter—which means that any woman who knows her way around a sewing machine can knock off a skirt for 120 francs.

The other side of the coin is that sales resistance is growing—not to the look itself but to the exact right-down-to-the-last-accessory Saint Laurent version. It is cheaper to do the look yourself and the result is often prettier. One of the best fakes in town lately was worn by Comtesse Hubert d'Ornano at a party. "Look," she said, "the skirt is an Indian antique somebody gave me, then I put on a black blouse, gold belt and jewelry—the only Saint Laurent piece is the shawl." If anything, the result was more interesting than the original Saint Laurent panoply (crushed velvet, gold blouse and cummerbund) worn at the same party by French Health Minister Simone Veil.

By now, the flowered look has become so overpowering that one might think it would die, so to speak, in the bud. However, it has been a long time since women have looked so decidedly pretty and the chances are that it will be years before the look saturates the market. The clearest sign came from the recent Interstoff fabrics fair, where the strongest sellers were Saint Laurent-like flowered prints. Since fashion starts with fabrics, the conclusion is as clear as one plus one.

SIPA.

Comtesse Hubert d'Ornano *. . . only the shawl.*

Show Closes in Moscow

MOSCOW, Dec. 14 (AP).—The U.S. Bicentennial exhibition closed yesterday after attracting 270,000 visitors over a month-long run. The exhibition featured a movie tour of the United States, a photo exhibit of Americans dating back to the 1850s, early U.S. inventions, a film history of Soviet-American relations and souvenir bags with Russian translations of U.S. founding documents.

PARIS MOVIES

'Barocco': A Portentous, Deceptive 'Chef d'Oeuvre'

By Thomas Quinn Curtiss

PARIS, Dec. 14 (IHT).—"Barocco," directed by André Téchiné (at the Publicis Champs-Elysées, Biarritz and Rex) has been called a masterpiece by several Parisian critics. A supreme artistic achievement it is not. But it is a "chef d'oeuvre" of clever deception.

Portentous and studied, it is filled with nightmarish images and vague social meaning. Through a thick fog of ambiguities, it points an accusing finger at corruption in the press and politics. As its intrigues—there are half a dozen and all are supposedly interrelated — take place behind a smoke screen, one's interest soon wanes. The experience is akin to watching a two-hour trailer with violent scenes being flashed before your eyes without explanation. The boredom is probably deliberate for there are many who mistake dullness for profundity.

"Barocco" was shot in Amsterdam, but—another of its eccentricities—it does not take place in Amsterdam. The Dutch city is used to represent a French industrial town in the throes of an election campaign.

Among the dramatis personae are the publisher of scandal sheets (Jean-Claude Brialy) who is attempting to blackmail one of the candidates; the brutal proprietor of a sauna establishment (Julien Guiomar); an out-of-work waitress (Isabelle Adjani); her boxer fiancé (Gérard Depardieu); the waitress's friend and landlady, a hooker with baby (Marie-France Pisier). Depardieu also doubles as a hired assassin. The only concession he makes to differentiate the roles is hair dye and he seems to be chasing himself—this adds to the confusion.

Jean-Claude Brialy and Isabelle Adjani in Téchiné's "Barocco."

The photography is in the glossy Hollywood fashion. The film has an attractive pictorial sheen, but none of its details are original. There is a straining for the brooding harbor mood of Von Sternberg's "Docks of New York and Carné's "Quai des Brumes." There is the departing ocean liner, remembered from Fellini's "Amarcord", the huddled, whispered conferences of the bad men meeting in shadowy surroundings and the lovers clinging together in desperation; the chase in a railroad station (regards to Hitchcock) and striptease, property of the porn market. But these borrowings are not fitted into a coherent whole and, in place of recomposition, there is only decomposition.

Neither Isabelle Adjani nor Gérard Depardieu reveal any histrionic ability above the average. The best performance is that of Marie-France Pisier as the baby-bound prostitute. Téchiné's intention was obviously to make a guessing game of "Barocco," but the result suggests playing poker with postal cards.

* * *

That engaging comic Pierre Richard is back in a pleasing program feature, "Le Jouet," written and directed by Francis Veber.

Its theme of the poor, little rich tot who, spoiled and restricted by his staid elders, longs for amusing companionship has been treated often and in Jacques Tati's "Mon Oncle" with [illegible] sentimentality and more inventive humor. But the subject is eternal and Richard and Veber succeed in keeping it lively and funny.

The cherished brat of a publisher visits the toy department of an emporium owned by [illegible] father. A journalist in the store's employ happens to be [illegible] standing among the life-size dolls. The pampered child, [illegible] by the reporter's odd looks, demands him as a gift and the bewildered newsman is packed up and delivered to the [illegible] nursery. The two become friends and have some [illegible] adventures. This minor [illegible] has several droll conceits. Richard again proves an [illegible] nious movie clown. "Le Jouet" at the Marignan, Français, Montparnasse.

On the same order is "Le Jour de Gloire" (at the [illegible] tage, Mariyaux and Odéon) [illegible] star is another favorite [illegible] man, Jean Lefebvre, this [illegible] the resourceful postman [illegible] town occupied by the [illegible] the war's end. The Résist[illegible] has blown up a bridge and the male inhabitants of the [illegible] munity are threatened with [illegible] mediate execution if the culprit [illegible] not delivered to the German [illegible] my authorities. Lefebvre, [illegible] ing his faithful bicycle, [illegible] through the enemy lines, [illegible] comes back with the Amer[illegible] troops in hot pursuit, he has been mistaken for a [illegible] spy. Here, too, is harmless, [illegible] vering and inoffensive [illegible] a recommendation in itself these days.

The Great British Cheese Assault

By Naomi Barry

PARIS (IHT).—Bringing English cheeses to France might seem to be as foolhardy an operation as carrying coals to Newcastle. Undaunted, Britain's Milk Marketing Board recently decided to make the assault.

They went to the British Embassy for counsel. "What's wrong with the State Dining Room?" asked Lady Henderson, the ambassador's wife. "That's what we are here for," she said, recalling the days when the Union Jack and worldwide trade were indivisible. Already she had scored points from British woolens and British ready-to-wear.

Twenty-five leading Paris cheese merchants had agreed to stock Stilton, Cheddar, Cheshire, Wensleydale, Sage Derby, Double Gloucester and other leaders from cross-Channel dairy farms. Sir Nicholas and Lady Henderson threw a cheese tasting to launch the campaign of wedging a bit of Britain onto French tables.

The embassy, on the Rue du Faubourg-St. Honoré and built in 1720, is one of the most splendid 18th-century mansions in Paris. Pauline Bonaparte lived there from 1803 until 1814 when the house was sold to the Duke of Wellington. It has been HM property since 1840. To entice Parisian palates, the Hendersons presented British business interests with style.

The long table was set with rare gilded bronze epergnes, candelabra and other pieces by the 18th-century goldsmith Thomire. Lady Henderson directed the decorations—Coxe apples, walnuts, radishes, cabbages, roses and anemones. The cheeses were staged as edible bibelots.

Print Uniforms

French maids dressed in country garden print uniforms of *Lady Henderson's design* finished off with white eyelet embroidery collars, cuffs, and aprons circulated glasses of Sandeman's port and trays of miniature Welsh rarebits on crackers.

On the state table 15-pound cylinders of Stilton wrapped in snowy napkins were sliced from the top and cut into wedges, instead of being gouged out with the traditional silver scoops.

"When you dig in, too much of the cheese tends to dry out," explained the commercial attaché, "even when you douse the crater with port."

Everybody expected a good performance from the noble Stilton. The sleeper, however, was a blue-veined Cheshire, product of short-horn cows from a single farm in Shropshire. It combined delicacy with a subtle bite. Cheshire, oldest of British cheeses, goes back to Roman times. The orange variety is plebe, white is gentry, but the *blue is a royal sport.*

Lady Henderson urged guests to try the Sage Derby, a novelty marbled with bright green veins from the sage that goes into its making. It is an amusing addition to a cheese tray but lacks the strength for a solo. White Wensleydale, which made its appearance in the Middle Ages as a contribution from the Cistercian abbeys of Jervaulx and Rievaulx, is now the accepted partner for apple pie.

The cheeses had arrived at the embassy the previous evening. In the middle of the night, Lady Henderson woke with a fright.

"Suppose there were a mouse in the house," she said to her husband. The ambassador bounded downstairs and together with the night guard battened down the cargo with cloths against any possible nocturnal marauders.

Former Journalist

Lady Henderson, who was a journalist on the staff of Time magazine in Greece, Paris and New York from 1950 to 1957, is enamored of fashion but considers cooking the only thing she does well in life. During Sir Nicholas's assignment in Warsaw, she achieved a notable kitchen with the help of a Polish woman cook for whom she wrote out recipes in hieroglyphics. It wasn't just the language problems; the cook couldn't read.

Keystone.

Lady Henderson . . . *shrimp quiche.*

The Paris Embassy is [illegible] bonanza with a vegetable [illegible] a greenhouse, a quince tree [illegible] a knowledgeable French [illegible] the kitchen. Nonetheless, the [illegible] bassador's wife keeps close to [illegible] kitchen. One of her specialties is:

Lady's Henderson's Formal Quiche with Shrimp

Partially bake pie crust in [illegible] 8 or 9 and 1/2-inch cake [illegible] with removable rim.

Filling: 2 lbs shrimp, [illegible] fried in butter

4 heaping tablespoons flour

3 heaping tablespoons butter

3 ounces grated cheese, preferably mature Cheddar

1 cup cream, gently heated

6-7 eggs, separated

Salt, freshly ground pepper

1 teaspoon mustard

2 to 3 tablespoons butter

Into partially baked pie shell scatter shrimp, holding back [illegible] few for top decoration.

Dot with butter and pour [illegible] the following sauce.

Heat butter gently. Stir in flour. Pour over ("in one go") the previously heated cream and beat with wire whisk.

Remove from fire. Add grated cheese, salt, pepper, mustard. Stir, return to fire. Whisk until just on the boil.

Remove again from fire. Add egg yolks, one at a time, beating briskly. Allow to cool. Fold in stiffly beaten egg whites.

Pour this bechamel over the shrimps in pie shell and cover with aluminum foil.

Bake in preheated oven at 400 degrees Fahrenheit for 10 minutes. Lower heat to 350 degrees (205°C and 190°C.) for 15 minutes more.

Remove foil. Scatter a few shrimps on top for decoration. Cook for 15 minutes more, or until knife blade comes out clean.

Unmold. Let cool slightly and set. Cut in wedges. Decorate with chopped parsley and serve.

For Welsh rarebit, the Milk Marketing Board suggests the following recipe for savouries for six.

250 grams grated Cheddar

1 glass of dark beer.

1 teaspoon Worcestershire sauce

1 teaspoon mustard

75 grams heavy cream.

6 slices of sandwich bread, lightly toasted.

Bring beer to the boil. Remove from fire. Add grated cheese, Worcestershire and mustard.

Stir to obtain an even sauce. Add cream and allow to thicken until the consistency to be spread on the toast.

Pass under the grill. Serve hot.

ARTS AGENDA

Mary Faith Rhoads will give a concert of "Folk Songs—Old and New" Dec. 16 at 8:30 p.m. in the American Cultural Center in Paris (3 Rue du Dragon), accompanying herself on the guitar and other traditional instruments of the Appalachians.

* * *

Three concerts devoted to the works of Pierre Henry, marking a quarter-century of his activity as a composer—particularly in the fields of *musique concrète* and electronic music, will be given Dec. 17, 18 and 19 in the Salle du Conservatoire in Paris (2 bis Rue du Conservatoire). The first evening includes "Symphonie Pour un Homme Seul," composed jointly with Pierre Schaeffer, and the first performance of Schaeffer's "Le Trièdre Enchanté." The remaining two evenings are composed entirely of Henry's works, including the first performance of the concert version of his "Futuristie."

International

WestLB is just as international as your business

As you've probably noticed, most banks claim to be international. But one of the important questions you should ask yourself before choosing your international banking partner is: "How international does my bank have to be?"

It's not just a matter of a few more branches or representative offices here and there, or of an extra few hundred correspondents. It's international experience in the right fields at the right places that counts. WestLB has a great deal of it.

After all, it's the Banker of many of Germany's world-renowned Ruhr industries. In this bustling region, WestLB has grown into one of Europe's largest banks and it ranks among the top twenty in the world. Its experience in export and import financing is the solid cornerstone of its world-wide capacity.

In addition to this traditional international trade financing, WestLB's extensive sources of funds have made it a major force in the international issue business, Eurocurrency credits and project financing. A balance sheet total of close on DM 64,000 million reflects the financial capacity of the Bank. Backed by the State and the regional Sparkassen organization, it encompasses more than 200 regional universal banks (Sparkassen) with their own combined balance sheet total of close on DM 97 thousand million.

The rapidly expanding international requirements of WestLB's customers have spawned a world-wide network of offices, subsidiaries, participations and correspondents, as well as membership in the illustrious Orion Banking Group.

Each of these international points of contact – staffed by experienced bankers – provides access to WestLB's universal banking know-how and highly developed specialized facilities.

Thus, for instance, WestLB through its London Branch and WestLB International in Luxembourg concentrates on Euro-finance to first-class risks, with Libra Bank Ltd. providing finance in Latin America. In other financial centres such as New York, Beirut and Tokyo, WestLB is represented by highly versed staff members.

But these are just a few examples of WestLB's international capacity. In fact, if it's a question of international presence, WestLB can serve you wherever it matters; directly or in partnership with others.

However, WestLB's world-wide activity is only one reason for considering it as your banking partner. There are other very important questions you must ask yourself before making a final choice. "Is the bank absolutely secure?" "Does it have the necessary experience?" "Is it efficient?" Get the full answers to these questions and find out about our specialized services; contact us directly or ask your local bankers to put you in touch with us.

WestLB

Westdeutsche Landesbank Girozentrale

FINANCE

PARIS, WEDNESDAY, DECEMBER 15, 1976

U.K. Trade Deficit Widens Sharply

LONDON, Dec. 14 (AP-DJ).—The British government reported today a visible trade deficit for November of £510 million, up sharply from the revised October deficit of £354 million.

In November, 1975, the visible deficit had been £281 million.

British exports in November rose £24 million from a month earlier to a record £2.226 billion, while imports last month surged to a record £2.736 billion, up £160 million from a month earlier.

The government estimated that visible earnings from tourism, finance and insurance were running at a surplus of £200 million last month, resulting in a current account deficit for November of £310 million.

The November visible deficit of £510 million was the third largest monthly deficit reported by Britain. In Jul, of this year the deficit had been £536 million and in November, 1974, it was £548 million.

Sterling fell on news of the trade figures, and despite Bank of England support closed at $1.6755, down 1 1/2 cents from its highs of the day and down about 1/2 cent from a day earlier.

Share prices on the London Stock Exchange, already hit by profit-taking, closed sharply lower with the Financial Times industrial index dropping 9.4 points to 324.3.

The value of oil imports rose $146 million in November from a month earlier. This was mainly due to the volume of oil imports rising to 8.7 million tons from 6.2 million tons in October as British oil concerns increased supplies for the winter season and also attempted to beat the expected rise in crude oil prices next year.

A Trade Department spokesman also said the cost of oil had increased due to the pound's decline in alue on the foreign exchange market in the past few months.

Sterling's fall in value also had an overall negative impact on Britain's terms of trade.

Another reason for the wider deficit was a 2.5-per-cent decline in the volume of exports. However, the Trade Department spokesman said about two thirds of this fall was du. to Britain's trade in precious stones.

Much of the diamond trade between the Soviet Union and Israel goes through Britain, and diamond trade figures can have a major impact on the country's overall trade results.

Output Stagnant

The government also reported that British industrial and manufacturing output in October was virtually the same as a month earlier, adding that in recent months the "underlying level of industrial output has changed little."

The all-industries index for October was 102.5, compared with 102.4 a month earlier. The index was up 1.9 per cent from 100.6 in October, 1975.

The Central Statistical Office, which released the industrial and manufacturing statistics, said total industrial output in the latest three-month period was down 0.1 per cent from the previous three months.

The all-industries index includes manufacturing, mining, construction and utility activities. The index for manufacturing alone was 103.3 in October, compared with 103.2 in September. The manufacturing index was up 2.6 per cent from 100.7 in October, 1975.

For the three months ended Oct. 31 this index dropped 0.4 per cent from the previous three months.

The industrial and manufacturing indexes are seasonally adjusted and based on 1970 equals 100.

Bundesbank Says Recovery Boosting Nations' Investment

FRANKFURT, Dec. 14 (Reuters).—Growing foreign demand for West German investment goods indicates that economic recovery is causing investment activity to expand in many countries, the Bundesbank said in its monthly report today.

Unfulfilled export orders for German industry in October, seasonally adjusted, were equivalent to 5 1/2 months of foreign sales, compared with the equivalent month of about 4 months in the year. Foreign demand expansion was slow from 1972 to mid-1974, it said.

Increased foreign orders may have resulted partly from foreigners' desire to bring forward German purchases for fear of a further revaluation of the mark against their own currency, but nonetheless the German investment goods industry seems to be developing on a durable basis, it said.

Consumer demand also shows signs of revival, with German retail consumer sales increasing 1 per cent seasonally adjusted between July/August and September/October, and durable consumer goods, especially cars, are meeting increased demand, the Bundesbank said.

Private consumer spending in the third quarter rose 0.5 per cent from the second quarter and was 3 per cent above the third 1975 quarter.

However, as the population's real income rose through increased wages and salaries and higher social security payments, savings as a ratio of disposable income also rose to 15 per cent in the third quarter from 14.5 per cent in the first half. The actual amount saved was a seasonally adjusted 5 per cent above the level in the second quarter.

The Bundesbank said it believes the German economy currently has enough natural momentum to ensure that a measurable upturn continues provided the right wage policies are adopted.

The central bank said it sees no reason so far to stimulate demand through economic policies, for instance in the budget, although this would avoid the increases in production costs which higher wages bring.

The strategy of economic policy for 1977 will be to dampen inflation further, and the chances of achieving this goal look promising, it added.

Price Outlook

The Bundesbank said the prospects for more price stability clearly improved this year, with November's 3.7-per-cent year-on-year rise in the cost of living falling to a six-year low, while in recent months the rise in producer prices also began to slacken noticeably.

Industry's cost burdens eased, both on account of the relatively moderate rise in wage costs to date and to the calming in prices of important internationally traded raw materials. In general, corporate profits have improved.

Earlier this month the 220,000 steelworkers in North Rhine-Westphalia accepted a pay rise of 6 per cent for 1977 plus other benefits. Most settlements for 1976 were around 5.4 per cent.

The central bank said workers on average will enjoy a real 3-per-cent increase in gross income this year. Inflation has fallen more sharply than had been expected when the 1976 wage round was negotiated.

Collapse of Japanese Firm Is Said to Endanger Others

TOKYO, Dec. 14 (AP-DJ).—The failure of Japan's leading valve maker, Toyo Valve Co., which accumulated debts of about 88.2 billion yen ($298 million) has seriously jeopardized the financial condition of several other fairly large trading houses and other businesses, the court-appointed provisional trustee for the company said today.

Taizo Ishikawa, a well-known lawyer appointed last month by Tokyo District Court to preside over Toyo Valve's rehabilitation, said he and other major backers of Toyo Valve were "very concerned" about trading houses that were left with large amounts of credit outstanding to the bankrupt company.

Mr. Ishikawa declined to name the companies that are in most danger of failing as the result of Toyo Valve's collapse.

There have already been four bankruptcies of Toyo Valve affiliates, however.

Toyo Valve applied to Tokyo District Court late in November when it became obvious that it could not make payment on a bill. The company hid from its major creditors and banks—including its main backer, Mitsui & Co.—the extent of its liabilities.

The 88.2-billion-yen in debts, which makes it the second largest corporate failure in Japanese history, has been reduced to an estimated 66.3 billion yen as banks claimed deposits the company had with them (around 11 billion yen) and trading houses sold off products in hand made by the company valued at about 6 billion yen.

It is now estimated that trading houses hold about 30 billion yen in Toyo's debts—with Mitsui accounting for 7.1 billion yen—and banks about 22 billion yen. The remainder is owed to various other affiliates of the 55-year-old company.

Mr. Ishikawa said no overseas companies were put in financial difficulty by Toyo Valve's failure. He said that indications are that the company can be put back into sound financial condition, but it will take one or two years before creditors of the company will begin to recoup their losses.

Citibank Rejects Criticism Of Over-Aggressive Lending

By William F. Low

AMSTERDAM, Dec. 14 (IHT). Citibank, probably the most active participant in the medium-term Eurocurrency market, has denied criticism that it is overaggressive in its lending and has overexposed to less developed countries (LDCs).

George Putnam, chairman of Citicorp International Group, says that while Citibank has been a major lender to the LDCs as a group "the record thus far has been excellent."

In an interview with the weekly newsletter International Investor Mr. Putnam explains that Citibank's credit procedures are "extremely rigorous." In most countries, Citibank has branches or representatives in the country involved and they are "tremendously helpful in assessing risks based on long resident experience."

Mr. Putnam admits that rescheduling of debts may become necessary in isolated cases, but "we believe the problem is clearly manageable." As regards criticism that Citibank has led the downward movement in interest rate margins, Mr. Putnam argues that the market, rather than any particular bank determines the spread and total yield for a large syndicated credit for any given corporate or country borrower.

Citibank monitors its costs very carefully and "not infrequently" declines to participate in deals that yield less than it considers an adequate return on a risk-reward-cost basis, he said.

Mr. Putnam, recently appointed chairman of Citicorp International Group which incorporates all Citibank's merchant banking activities outside the United States, is moving from London to New York at the end of this year. However, he will remain chairman of the London-based Citicorp International Bank Ltd., which covers Europe, the Middle East and Africa regions.

Growth Stocks Show Poorly in N.Y.

By Robert Metz

NEW YORK, Dec. 14 (NYT).—At the beginning of this year, investors got what they had prayed for most of this decade—a roaring bull market that surpassed most rallies in modern stock market history.

In a single month, the market gained 14.4 per cent as measured by the Dow Jones industrial average—from 852.41 on Dec. 31, 1975, to 975.28 on the last day of January.

Yet it is probably safe to say that investors, individual and professional, who did not chalk up gains in January are probably hurting today, for it has been back and forth ever since. Collectively, the 30 Dow Jones industrial stocks are actually a bit below the level of Jan. 31.

What is more, the growth stocks—which most investors tend to associate with stock market rallies—did relatively poorly all year. The mutual funds and others who concentrated their attention in this area of the market, with few exceptions, suffered disappointment.

Consider what happened to the large growth stock funds through Dec. 2. Only three funds with assets in excess of $50 million managed to place in the top 50 funds out of 500 funds of all sizes monitored by Lipper Analytical Distributors Inc.

They were the Value Line Special Situations Fund, up 37.28 per cent in the 11 months; the Mathers Fund, up 35.85 per cent, and the State Farm Growth Fund, up 30.36 per cent. The Windsor Fund, a growth and income vehicle, was also in the top 50 with a gain of 36.68 per cent.

There were 12 major funds in the top 50 in all. Of the remainder, six were income funds and two specialized in life insurance stocks. All of the 12 in the top 50 had gains of 30 per cent or better.

That compares with a gain for the Standard & Poor's 500 stock index of 17.07 per cent as of Nov. 30, 1976. All statistics reflect reinvestment of capital gains and income for the full period.

The success of the income funds reflects persistent high levels of interest and is a reminder to the nimble that leading mutual fund organizations allow switching from growth to income to money market funds at nominal cost.

Paris Costly, Dublin Cheap For Businessmen on Trips

By Paul Majendie

PARIS, Dec. 14 (Reuters).—Businessmen visiting eight European capitals on an expense account will find Paris the most expensive and Dublin the cheapest, according to a survey published here.

The French Chamber of Commerce survey rated the cities on prices in every category from hotels and restaurants to drinks and an evening at the cinema.

Paris costs most, followed by Bonn, Brussels, Amsterdam, London, Luxembourg, Rome and Dublin.

"In 1974 it was relatively advantageous for an executive to come to Paris. But in 1975 and 1976 this is no longer the case. The prices in this capital have increased considerably, mainly in hotels and restaurants," the survey said.

"Only transport prices—taxis and buses—remain competitive. The price of a cinema seat is also rising more rapidly in Paris than in the other European cities," it added.

Dublin, on the other hand, is a paradise for the businessman where, for example, drinks cost half as much as they do in Paris and restaurants are more than 30 per cent cheaper than in the French city. "Dublin seems to be a privileged place for expenses," the survey said.

But Paris and Dublin do not occupy the highs and lows in every category. The businessman looking for a bed after a long day with clients in Amsterdam would do well to leave before nightfall. The Dutch city has the most expensive hotels, according to the survey.

For the executive eager to celebrate the signing of a contract, the cheapest city for a drink before dinner is London.

But if he then wants to go out on the town for a slap-up meal, he would do better to cross the Irish Sea and eat out in Dublin.

Rome gets top marks for transport, whether the footweary businessman chooses a hire car, a taxi or public transport. The Italian city's costs were 60 per cent below those of Brussels and Bonn.

Despite Claims of Drop

OPEC's Purchasing Power Has Risen, Bank Reports

By Bhushan Bahree

GENEVA, Dec. 14 (AP-DJ).—There was been a solid increase in the purchasing power of members of the Organization of Oil Producing Countries between the summers of 1974 and 1976, economists at Swiss Bank Corp. have found.

Oil producers have claimed that because of inflation in the West, the cost of their imports has gone up and that an increase in the price of oil, to be considered at an OPEC oil ministers' meeting in Doha, Qatar, beginning tomorrow, is justified.

Until now, various studies have shown that these claims by oil producers may have been excessive and that a sharp rise in the price of oil might not, on these grounds, be justified. Now, economists at Switzerland's largest bank say that the very opposite is the case—that there has been a gain rather than a loss in OPEC's purchasing power.

In a continuing study of the oil and petrodollar issue, the economists, led by Christian Lutz, also concluded that:

- A rise in the price of OPEC oil will not really have any major impact on Western economies if it falls within the generally anticipated range of 7 to 12 per cent. Mr. Lutz said that the West's economic upswing would not be endangered, but he explained that by upswing he meant positive real growth "but no investment boom and no sharp reduction in unemployment levels."
- An oil price rise over the medium term of an average 5 per cent a year should be anticipated.
- By 1978, the OPEC countries as a group may not have any surplus revenues. Surpluses of Saudi Arabia, the United Arab Emirates and Kuwait would be balanced by deficits racked up by other oil producers.
- The real danger to Western nations stems from their inability to come up with viable alternative energy sources that would reduce the dependence of their economies on oil.

The Swiss Bank Corp. economists calculated that between the second quarter of 1974 and the second quarter this year, OPEC export prices increased by 34 per cent while those of the industrial nations went up by 11.2 per cent

Used Assumptions

However, the economists said this calculation was based on certain assumptions. Because import price indexes for most OPEC countries do not exist—in some cases, the indexes were discontinued after 1974—they based their calculations on the export price index of OPEC as a whole and substituted the export prices of industrial nations for the missing import data.

They also warned that individual countries might have had varied experiences, depending on the mix of their sources for imports.

EEC Adopts Rule On Firms' Capital

BRUSSELS, Dec. 14 (Reuters).—New publicly quoted companies in the European Economic Community will have to have a minimum capital of 25,000 European units of account ($30,000) within two years from now under new company law rules agreed by EEC foreign ministers, the EEC Commission said today.

However, the commission directive unanimously adopted by the ministers after six years of negotiation gives existing companies with lower capital seven years to comply with the new rule or to change their legal status.

Stocks Soar on Yamani Statement

NEW YORK, Dec. 14 (IHT).—Prices surged ahead on the New York Stock Exchange late today after Oil Minister Sheikh Ahmed Zaki Yamani said Saudi Arabia will oppose any increase in oil prices in early 1977.

Arriving in Qatar for the oil price fixing conference set for tomorrow, Sheikh Yamani said he would like to see oil prices remain frozen for a further six months.

He said his country no longer believed the world economic recovery had reached the stage where an oil price rise would be acceptable.

Prior to the report of Sheikh Yamani's statement, stock prices were drifting lower amid profit-taking and year-end portfolio switching.

The Dow Jones industrial average closed up 6.39 at 980.63. At 3 o'clock it was up 1.82.

Volume totaled 25.13 million shares compared with 24.8 million yesterday. Advancing issues outnumbered decliners by about 855 to about 607.

A number of petroleum issues rose. Mobil gained 1/4 to 62 1/2, Atlantic Richfield 1/2 to 59 1/4, Standard Oil Indiana 1/4 to 16 1/2, Skelly 1 1/2 to 110 and Superior Oil 1 to 234.

General Motors rose 1 1/2 to 75 5/8, Ford 5/8 to 58 3/4, Chrysler 1/4 to 19 1/8, but American Motors eased 1/8 to 4. Auto makers reported early December car sales today.

Among the actives, McDonald's eased 1/4 to 52 1/4, and Pillsbury 1 /4 to 41, but Ramada Inns, which declared its first dividend since 1975, rose 5/8 to 4 3/4.

Walter Kidde rose 5/8 to 30 1/4 while WUI Inc., on the Amex, eased 3/8 to 19 3/4. Kidde agreed in principle to sell its U.S. Lines Inc unit to WUI Inc. in a transaction valued at not less than $102 million.

AT&T closed up 3/8 at 64 3/8, IBM traded to 269 7/8, up 1/8, Du Pont was up 1 1/4 at 133 1/2, Eastman Kodak traded to 84 5/8, up 5/8, U.S. Steel closed up 1 3/4 at 51 1/4 and Xerox was up 1 1/2 at 58 3/8.

Gulf & Western closed up 1/8 at 18 1/4. G&W management will recommend increasing its dividend and predicted continued earnings growth in fiscal 1977. The company's shareholders also voted an increase in the authorized common and preferred stock.

Dayco was up 1/8 at 16 5/8. The firm said its fiscal year earnings and sales were up sharply

On the American Stock Exchange, the market-value index closed up 0.37 to 103.73.

The most active issue, Houston Oil & Minerals, rose 1/2 to 43 1/4 on volue of 100,000 shares.

Other active issues included Great Basins Pete, unchanged at 5 1/8, Syntex, down 3/8 to 21 1/4, National Patent Development, up 3/8 to 9 3/4 U.S. Filter, down 1/8 to 12 3/4, and Crutcher Resources, up 3/4 to 10 7/8.

Zambia Won't Repay Unauthorized Loans

LUSAKA, Dec. 14 (Reuters).—The Zambian government will not repay loans secured by top-ranking Zambian officials from foreign governments or organizations unless they were properly authorized, Finance Minister John Mwanakatwe said today.

Mr. Mwanakatwe said in a statement that only his office has the authority to raise government loans from other governments and foreign organizations.

He said that if loan agreements had been signed by unauthorized officials they "are invalid and consequently there are no legal obligations on the Zambian government to repay them."

Bank Opens in London

LONDON, Dec. 14 (AP-DJ).—European Arab Holding SA has opened a London subsidiary, European Arab Bank, which will engage in all banking activities including medium-term Eurocurrency lending and project finance.

People In Business

Peter Tann

Peter Tann has been appointed vice-president by Citibank NA. Mr. Tann is managing director of Citibank's operations in Denmark.

* * *

Richard Bechtold has been named vice-president for business development at Dow Chemical Europe, Horgen, Switzerland. He was transferred from the corporation's headquarters and replaces Paul Stroebel, who will return to Michigan as a corporate product director.

* * *

L.R. Dongelewicz has been named manager, Eastern European sales, for RCA broadcasting equipment. He was previously manager, international sales development at RCA Broadcast Systems in Camden, N.J.

Business Inventories Rise 0.5% in U.S.

WASHINGTON, Dec. 14 (AP-DJ).—Business inventories increased by $1.54 billion, or 0.5 per cent, in October, compared with September's upward revised $3.29 billion, or 1.2-per-cent rise, the Commerce Department said today.

After seasonal adjustment, October's inventories totaled $287.72 billion, compared with the revised September level of $286.19 billion. September's total was originally reported at $285.49 billion, for a 0.9-per-cent increase.

The ratio of inventories to sales increased to 1.52 for October from September, when inventories on hand equaled 1.51 month's sales.

VW Sales Up 13%

WOLFSBURG, West Germany, Dec. 14 (AP).—Volkswagen chief Toni Schmuecker reports the company's worldwide auto sales were up 12.7 per cent to 652,000 units in the first 11 months of 1976 and the trend should continue next year.

This advertisement appears as a matter of record only.
